25 November 2014

Original: English

Economic Commission for Europe

Inland Transport Committee

Working Party on Customs Questions affecting Transport

139th session

Geneva, 3–6 February 2015

Item 4 (b) (ii) of the provisional agenda

Customs Convention on the International Transport of Goods

under Cover of TIR Carnets (TIR Convention, 1975):

**Revision of the Convention – Preparation of Phase III
of the TIR revision process**

eTIR Reference Model – Version 4.1a

Note by the secretariat

Background

This document presents the reference model for the TIR Procedure Computerization Project in accordance with the United Nations Centre for Trade Facilitation and Electronic Business (UN/CEFACT) Modelling Methodology. The Reference Model will be expanded and refined as the work progresses and as feedback is received from modelling work carried out by the Informal ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (GE.1) and the network of eTIR focal points.

Contents

	<i>Page</i>
Introduction.....	12
a. Background to the document.....	12
b. Introduction to the reference model	25
b.1. Phases and Workflows.....	26
b.2. Step by step approach applied to the UMM.....	27
b.3. Structure and updating of the document	28
b.4. Stakeholders responsibility chart	29
b.5. Review and validation status	30
1. Business domain modelling	32
1.1 Vision.....	32
1.1.1 Project title and abbreviation	32
1.1.2 Objectives	33
1.1.3 Boundary of the eTIR Project	33
1.1.3.1 Stakeholders	33
1.1.3.2 Information.....	34
1.1.4 Business Opportunity and Problem Statement	34
1.1.4.1 Technological developments in international transport, trade and Customs procedures.....	34
1.1.4.2 Efficiency of the TIR Customs transit procedure.....	35
1.1.4.3 The fight against fraudulent activities	36
1.1.5 References.....	37
1.1.6 Scope of the project.....	37
1.1.7 Constraints	38
1.1.7.1 Technical constraints.....	38
1.1.7.2 Political/legal constraints	39
1.1.7.3 Financial / Economic constraints	39
1.1.7.4 Other constraints	39
1.1.8 Stakeholders' needs	39
1.1.8.1 Needs of Customs administrations	39
1.1.8.2 Needs of the transport industry	40
1.2 TIR procedure domain	40
1.2.1 TIR Procedure package diagram	40
1.2.2 TIR Procedure package diagram description	41
1.3 TIR Carnet life cycle use cases.....	42
1.3.1 Actors of the TIR Carnet life cycle	42
1.3.1.1 International organizations and national associations	43
1.3.1.2 Competent authorities	44

1.3.1.3	TIR Carnet holder	45
1.3.1.4	Administrative Committee of the TIR Convention (AC.2)	45
1.3.2	TIR Carnet life cycle use case diagram.....	46
1.3.3	TIR Carnet life cycle use case description	46
1.3.4	High-level activity diagram of the TIR Carnet life cycle	47
1.4	Elaboration of use cases.....	48
1.4.1	Issuance and distribution use case	48
1.4.1.1	Issuance and distribution use case diagram.....	48
1.4.1.2	Issuance and distribution use case description	48
1.4.1.3	Activity diagram of the issuance and distribution use case	50
1.4.2	TIR transport use case	51
1.4.2.1	TIR transport use case diagram	51
1.4.2.2	TIR transport use case description	52
1.4.2.3	Activity diagram of the TIR transport use case	54
1.4.2.4	Structured description of activity diagrams of the TIR transport use case	55
1.4.3	Return and repository use case.....	56
1.4.3.1	Return and repository use case diagram.....	56
1.4.3.2	Return and repository use case description	56
1.4.3.3	Activity diagram of the return and repository use case	58
1.4.4	Discharge procedure use case	59
1.4.4.1	Discharge procedure use case diagram	59
1.4.4.2	Discharge procedure use case description	59
1.4.4.3	Activity diagram of the discharge procedure use case	60
1.4.4.4	Structured description of the activity diagram of the discharge use case	61
1.4.5	Start TIR operation use case	62
1.4.5.1	Start TIR operation use case diagram.....	62
1.4.5.2	Start TIR operation use case description	63
1.4.5.3	Activity diagram of the start TIR operation use case	65
1.4.5.4	Structured description of the activity diagram of the start TIR operation use case	66
1.4.6	Terminate TIR operation use case.....	67
1.4.6.1	Terminate TIR operation use case diagram.....	67
1.4.6.2	Terminate TIR operation use case description	68
1.4.6.3	Activity diagram of the terminate TIR operation use case	71
1.4.6.4	Structured description of the activity diagram of the terminate TIR operation use case	72
1.5	Entry classes	73
1.6	High-level class diagram	73
1.6.1	High-level class diagram description	73

1.6.1.1	International organization	73
1.6.1.2	Association.....	74
1.6.1.3	Road vehicle.....	75
1.6.1.4	Sealed loading unit.....	75
1.6.1.5	TIR transport	76
1.6.1.6	TIR operation	77
1.6.1.7	Goods Manifest Line Item.....	78
1.6.1.8	Customs office	79
1.6.1.9	Country.....	80
1.6.1.10	TIR Carnet Holder.....	81
1.6.2	High-level class diagram.....	82
2.	e-Business requirements.....	83
2.1	High-level description of the eTIR project	83
2.1.1	Actors and roles	83
2.1.1.1	Customs authorities.....	83
2.1.1.2	eTIR international system	83
2.1.1.3	Holder.....	84
2.1.1.4	Guarantee Chain.....	84
2.1.2	Fundamental principles	84
2.1.2.1	eTIR International System brief.....	84
2.1.2.2	Management by Customs of data on guarantees	85
2.1.2.2.1	Registration of the guarantee.....	85
2.1.2.2.2	Cancellation of a guarantee	86
2.1.2.2.3	Verification of the guarantee	86
2.1.2.2.4	Querying guarantee status	86
2.1.2.2.5	Transmission of TIR transport and TIR operation data.....	86
2.1.2.3	Exchange of TIR transport and TIR operation information	86
2.1.2.3.1	Data handling at the beginning of the TIR transport	86
2.1.2.3.2	Data handling related to TIR operations.....	87
2.1.2.4	Other aspects	87
2.1.2.4.1	Issuance of guarantees.....	87
2.1.2.4.2	Declaration/advance cargo information.....	88
2.1.2.4.3	Pre-arrival information	89
2.1.2.5	Data exchange	89
2.1.2.5.1	Central platform	89
2.1.2.5.2	Communication	89
2.1.2.5.3	Standard messages.....	89
2.1.2.6	Security	89
2.1.2.6.1	The elements of security from the TIR Convention	89

2.1.2.6.2	Controlled access (Annex 9, Part II)	89
2.1.2.6.3	Security data elements.....	89
2.1.2.6.4	eTIR international system security	89
2.1.2.7	Accompanying document / Certified report	90
2.1.2.8	Fallback solutions.....	90
2.1.3	Deliverables	90
2.1.3.1	National deliverables.....	90
2.1.3.1.1	National management of data	90
2.1.3.1.2	Bridges to the eTIR international system	90
2.1.3.1.3	User manuals and training	90
2.1.3.2	International deliverables	90
2.1.3.2.1	Central databases.....	90
2.1.3.2.2	Web services	90
2.1.3.2.3	eTIR website	91
2.1.3.2.4	Definitions of standard messages	91
2.1.3.2.5	Technical documentation	91
2.1.3.2.6	User manuals and training for trainers	91
2.1.3.2.7	Helpdesk.....	91
2.1.3.2.8	Customs offices database	91
2.1.3.2.9	Countries database.....	91
2.1.3.2.10	Authentication database	91
2.1.3.3	Other required systems.....	91
2.1.3.3.1	Authorized access database	91
2.1.3.4	Languages and character sets	91
2.2	Step-by step implementation	92
2.2.1	Management by Customs of data on guarantees module	92
2.2.2	Data exchange module	92
2.2.3	Abolition of the present TIR Carnet: a geographical expansion	92
2.2.4	Parallel projects.....	93
2.2.4.1	Declaration mechanisms	93
2.2.5	Schedule	93
2.2.5.1	Paper to electronic step-by-step transition	94
2.3	Use cases analysis.....	94
2.3.1	Management by Customs of data on guarantees use case	94
2.3.1.1	Management by Customs of data on guarantees use case diagram	94
2.3.1.2	Guarantee state chart diagram	95
2.3.1.3	Register Guarantee Chain use case description.....	96
2.3.1.4	Register / Update Guarantee Chain information activity diagram	97
2.3.1.5	Register guarantee use case description	98

2.3.1.6	Register guarantee activity diagram	99
2.3.1.7	Cancel guarantee use case description	100
2.3.1.8	Cancel guarantee activity diagram	101
2.3.1.9	Accept guarantee use case description	102
2.3.1.10	Accept guarantee activity diagram	103
2.3.1.11	Get holder info use case description.....	104
2.3.1.12	Get holder info activity diagram	105
2.3.1.13	Query guarantee use case description	105
2.3.1.14	Query guarantee activity diagram	106
2.3.2	Data exchange use case	107
2.3.2.1	Data exchange use case diagram	107
2.3.2.2	Record consignment information use case description	108
2.3.2.3	Record consignment information activity diagram	109
2.3.2.4	Update consignment information use case description	110
2.3.2.5	Update consignment information activity diagram	112
2.3.2.6	Starting of TIR operation use case description.....	113
2.3.2.7	Starting of TIR operation activity diagram	114
2.3.2.8	Terminate TIR operation use case description	115
2.3.2.9	Terminate TIR operation activity diagram	116
2.3.2.10	Discharge TIR operation use case description	117
2.3.2.11	Discharge TIR operation activity diagram	118
2.3.2.12	Notify Guarantee Chain use case description.....	119
2.3.2.13	Notify Guarantee Chain activity diagram	119
2.3.2.14	Notify subsequent Countries use case description	120
2.3.2.15	Notify subsequent Countries activity diagram	120

Introduction

a. Background to the document

At its ninety-fifth session, the Working Party expressed the view that, following the conclusions of Phases I and II of the TIR revision process, the next logical step was to provide the TIR regime with the legal and administrative basis to allow for the use of modern information, management and control technology based on highly automated and secured electronic procedures. The Working Party recognized that computerization of the TIR procedure was inevitable (a) in the light of today's extremely rapid technological developments, based on Internet and Smart Card technologies, particularly affecting international transport and trade, (b) the ever increasing need for improved efficiency of Customs transit procedures and (c) the fight against fraudulent activities which must be conducted with the most appropriate and effective means (TRANS/WP.30/190, para. 26).

The Working Party felt that the existing and widely varying national Customs procedures, administrative practices and legal requirements in the Contracting parties to the Convention should be taken into account during this process. Computerization of the TIR procedure, based on the TIR regime as revised during Phases I and II of the TIR revision process, would therefore have to focus on the possibility of linking national Customs transit procedures via a standard electronic and/or paper-based data file containing all information of the TIR Carnet. The newly to be created electronic data file would need to be compatible with most if not all possible technical EDI solutions applied or yet to be applied in the Contracting Parties (TRANS/WP.30/190, para. 27).

The link between national Customs procedures and the transfer of data files should be possible via (a) international EDI systems, as is being done in the New Computerized Transit System (NCTS), (b) Smart Cards that could be filled-in and carried along by the transport operator as well as filled-in, read and validated by Customs authorities or (c) the present paper-based TIR Carnets, possibly supplemented by bar-code and TIR Carnet holder identification system (TRANS/WP.30/190, para. 28).

The Working Party was of the view that, whatever system is to be used, the approach taken in computerization of the TIR regime must be courageous and forward looking and should be able to accommodate all possible technological solutions likely to be implemented in the years ahead (TRANS/WP.30/190, para. 29).

In order to make solid progress in this complex field, the Working Party decided to follow established practice and to establish an ad hoc group of experts on the computerization of the TIR regime which should be composed of experts from interested countries and industry groups (TRANS/WP.30/190, para. 30).

The Working Party, at its ninety-sixth session, felt that the expert Group, after having highlighted weaknesses and limitations of the current system, should, in particular:

- identify the objectives, procedures and required resources for the computerization of the TIR procedure and determine the role of the various actors (secretariat, Governments, IRU, etc.) in this process;
- analyze all administrative and legal requirements relevant for the computerization of the TIR regime;
- study suitable technological solutions in this respect, and
- take account of experiences made with similar automated systems at the national as well as at subregional levels, such as the NCTS, with a view to preparing

possible alternative solutions and scenarios, specifying the benefits as well as the disadvantages of the various approaches (TRANS/WP.30/192, para. 37).

The ad hoc Expert Group (hereafter referred to as “Ad hoc Group”) met twice in 2001, on 19 February and on 21 June.

With regard to the objectives of the computerization process, the Ad hoc Group decided that those identified by the Working Party at its ninety-fifth session had kept their validity TRANS/WP.30/2001/13, paras. 13-14).

The Ad hoc Group reconsidered the fundamental approaches for computerization of the TIR procedure and agreed that, knowing that computerization of the TIR procedure was a continuing process, involving various stages of development, none of the options could be excluded for the time being. Efforts should be pursued at the national level to prepare the national Customs legislation for the acceptance of electronic data processing and interchange techniques and the electronic signature (TRANS/WP.30/2001/13, paras. 18-19).

The Ad hoc Group acknowledged that, regardless of the finally selected approach, from a legal point of view, the amount of changes to be made to the TIR Convention could be limited and that it would basically be sufficient to amend the Convention with either a definition of the TIR Carnet, that would include the use of portable electronic files or introduce one new article which would allow for the use of new technologies in general, including the acceptance of electronic signatures, leaving the existing text of the Convention as it stands. Special provisions dealing with the legal and technical specification of the accepted new technologies could be inserted into a separate, newly to be created Annex (TRANS/WP.30/2001/13, para. 23).

With regard to the role played by the various actors in the computerization process, the Ad hoc Group agreed that the computerization process would have consequences for the persons and organizations dealing with the issuance and organization and functioning of the guarantee system, as well as for Customs authorities, whose task it is to check and process the provided data and ensure the goods’ unaltered arrival at the Customs office of destination. In addition, the use of automated risk management would influence the work of Customs authorities and associations at the national level, as well as the work of the international organization, the insurers and the TIRExB. However, the Ad hoc Group felt that at that time it was not appropriate to pursue this subject, as it depended on a variety of, as yet unknown, factors (TRANS/WP.30/2001/13, paras. 26-27).

On the basis of the outcome of the work performed by the Ad hoc Group, the Working Party mandated the secretariat to convene meetings of special expert groups. These special groups should address the two major problems the Ad hoc Group had encountered in the pursuit of its work:

- To study the conceptual and technical aspects of the computerization process of the TIR Procedure, including the financial and administrative implications of its introduction, both at the national and at the international level, and prepare a draft of electronic messages to allow for an interchange of electronic data, nationally, between Contracting Parties and with international organizations;
- To study in detail the impact of the various approaches that had been identified by the Ad hoc Group on the existing legal text of the TIR Convention as well as the repercussions it could have on international private law, national administrative procedures and to draft a description of the role that the various actors (in particular: national associations, international organization, insurers and TIRExB) could play in the TIR Convention, once the paper-based system would be complemented and/or replaced by a system functioning on the basis of the electronic interchange of information (TRANS/WP.30/2001/13, para. 31).

On the basis of this mandate, the Informal ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (hereafter referred to

as “Expert Group), at its first session, adopted its Terms of Reference, which stipulate that the Expert Group shall:

- List and analyse the data elements required for the operation of a TIR transport at the national and international level, as stipulated in the TIR Convention as well as in resolutions and recommendations, adopted by the Administrative Committee (in particular Annexes 1,4, and 9 of the TIR Convention) and make an inventory of possible new features which could be included into the electronic version of the TIR procedure. On that basis, the group shall draw up flow charts, reflecting the actual and future stages of the TIR procedure. Within the context of its work, the group shall also study the use of standardized codes, ensuring a uniform understanding and interpretation of the data elements in the TIR Carnet.
- List and analyse the existing information and telecommunication systems and study to what extent the experiences gained at the national and international level can be included in the development of a computerized TIR procedure.
- Prepare conclusions with regard to the computerization of the TIR procedure, reflecting the results of the work under (a) and (b) and taking account of the financial implications they might have on the national and international level (TRANS/WP.30/2002/11, annex 1)

The Informal ad hoc Expert Group on the Legal Aspects of Computerization of the TIR Procedure shall:

- Study in detail the impact of the various approaches of the computerization process on the existing legal provisions of the TIR Convention as well as the repercussions it could have on national administrative procedures;
- Draft a description of the role the various actors (in particular: national association, international organization, insurers and TIRExB) could play in the TIR Convention, once the paper based system would be complemented and/or replaced by a system functioning on the basis of the electronic interchange of information (Terms of reference still to be adopted).
- Both informal ad hoc Expert Groups shall report to the Working Party on the progress of their work. At the completion of its work, each ad hoc Expert Group shall draw up a working document containing concrete proposals for further action, to be discussed and approved by the Working Party.

At its second meeting, the informal ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure discussed at length the conceptual and hierarchical data models, describing the information contained in the TIR Carnet, but felt it could not reach agreement on any of them. Some experts questioned the usefulness of such complex models, whereas others expressed the view that they were not in a position to judge to what extent the models actually represented the structure of information in the current TIR Carnet. For these reasons, the Expert Group decided to revert to his matter at a later stage and mandated the secretariat to organize a meeting with some IT specialists to study which model is best suited for the purposes of the Expert Group. The Expert Group further welcomed the secretariat’s proposal to use in the future the Unified Modelling Language-standard (UML) (ExG/COMP/2002/10, paras. 11 and 12).

At their meeting, which took place on 3 July 2003, the IT specialists held an extensive exchange of views on the suitability of the, UML based, UN/CEFACT Modelling Methodology (UMM) as a methodology to model business processes like the TIR procedure. As such, UMM provides a procedure for specifying, in an implementation-independent manner, business processes involving information exchange. Although the IT specialists noted that it could be worthwhile to study other methodologies, they recognized that the process of selecting a methodology is very complex and time consuming. They agreed that this work has already been done by the UN/CEFACT team in the elaboration of UMM and that UMM offers the necessary tools

to describe the TIR business process, a uniform approach for the work of the Expert Group and a valuable base for future improvements in the TIR procedure. Seeing that the activities, undertaken by the Expert Group so far, fitted well into UMM, and that the approach endorsed by the Expert Group in the project overview was in line with the UMM, they invited the secretariat to prepare a first draft document for discussion by the Expert Group at its forthcoming meeting. The scope of the first phase of the work of the Expert Group being the analysis of the current system - the ‘as-is’ description of the TIR procedure - the IT specialists decided to limit this first document to the Business Domain Modelling, the first step in UMM. Furthermore, the IT specialists recommended having a full implementation of the methodology, including a first descriptive part describing the so-called ‘vision’ of the project. Moreover, they emphasized the necessity to adapt UMM, as it would be necessary with any other methodology, to the particulars of the TIR business process (ExG/COMP/2003/2, para. 6).

At its one-hundred-and-fifth session, the Working Party was informed orally of the progress made by the Expert Group at its third meeting, which took place on 1 and 2 September 2003 in Budapest. The Working Party endorsed the work undertaken by the Expert Group and took particular note of three issues, where the Expert Group had expressed that it needed further guidance from the Working Party. These issues were:

(a) the definition of the scope of the project, which had been formulated by the Working Party as being “the computerization of the TIR Procedure”. The Expert Group felt that the Working Party should clarify in more detail what was meant exactly by this wording. Within this context, the Expert Group also noted that the term “TIR Procedure” was an undefined term, making it impossible to describe exactly the boundaries of the project;

(b) The description of the approach on how to achieve the computerization of the TIR Procedure. In view of political and technical developments, having taken place over the last few years, the Working Party was requested to provide a more detailed guidance to the Expert Group on which approach the computerization project should pursue;

(c) The title of the project. For practical reasons, the secretariat had proposed to refer in the future to the “eTIR Project” as a short name for the project to computerize the TIR Procedure. The Expert Group felt it was not in a position to decide on this issue and decided to refer the matter to the Working Party for further discussion (TRANS/WP.30/210, paras. 27-31)

At its one-hundred-and-sixth session, the Working Party confirmed that:

(a) the final objective of the computerization of the TIR procedure encompasses the computerization of the whole TIR Carnet life cycle from distribution issuance and via the TIR transport to return and repository and that it should, ultimately be aimed at replacing the current paper TIR Carnet. The Working Party agreed that the process to achieve this objective may be challenging, requiring the input of considerable human and financial input, both at the international and the national level. Therefore, the Working Party agreed that a step-by-step approach seemed the only feasible alternative to achieve any tangible results in the near future. To that end, it mandated the secretariat, as a first step, in cooperation with the Expert Group (a) to work out concrete proposals on how to exchange the so-called ‘static’ data-elements contained in the TIR Carnet (data elements which remain unchanged throughout the TIR Transport) between the competent authorities of Contracting Parties, possibly also including the data contained in the ITDBOnline as a preliminary step, (b) to conduct a feasibility study on the practicability of such proposals and, ultimately, (c) to propose a pilot along one of the major transit corridors to implement them.

The Working Party agreed that, as a next step, the integration of the so-called ‘dynamic’ data elements (data elements which may be amended or updated in the course of the TIR Transport) should be considered. Further steps should then address

the issue of inclusion of additional features, such as security related information and advance cargo information.

Once these tangible steps had been achieved, the Expert Group could focus its attention on further, outstanding, issues in relation to the computerization of the TIR procedure.

(b) The Working Party agreed that the approach of the computerization process should, until further notice, be focused on the establishment of an international, centralized database, whose aim it should be to facilitate the secure exchange of data between national Customs systems. At a later stage, the sharing and exchange of data with other bodies concerned (such as TIREXB, international organizations, national associations and the international guarantee), should not be excluded.

(c) The Working Party agreed that the Project to Computerize the TIR Procedure could, in future, be referred to as “eTIR-project” (TRANS/WP.30/212, para. 26).

At its thirty-sixth session, the Administrative Committee was informed about progress made in the preparation of Phase III of the TIR revision process within the UNECE Working Party (WP.30) and its Ad hoc Group of Experts on Computerization of the TIR Procedure. The Committee endorsed the mandate given by the Working Party to the Informal Ad hoc Expert Group (a) to work out concrete proposals on how to exchange the so-called ‘static’ data elements contained in the TIR Carnet (data elements which remain unchanged throughout the TIR Transport) between the competent authorities of Contracting Parties, possibly also including the data contained in the ITDB Online as a preliminary step, (b) to conduct a feasibility study on the practicability of such proposals and, ultimately, (c) to propose a pilot along one of the major transit corridors to implement them. As a next step, the integration of the so-called ‘dynamic’ data elements (data elements which may be amended or updated in the course of the TIR Transport) should be considered. Further steps should then address the issue of inclusion of additional features, such as security and advance cargo information.

Once these tangible steps have been achieved, the Expert Group could focus its attention on further outstanding issues in relation to the computerization of the TIR procedure.

The Administrative Committee endorsed the opinion of the Working Party that the approach of the computerization process should, until further notice, be focused on the establishment of an international, centralized database, whose aim it should be to facilitate the secure exchange of data between national Customs systems. At a later stage, the sharing and exchange of data with other bodies concerned (such as TIREXB, international organizations, national associations and the international guarantee), should not be excluded.

The Administrative Committee endorsed the Working Party’s decision that the Project to computerize the TIR Procedure could, in future, be referred to as “eTIR-project” (TRANS/WP.30/AC.2/73, paras 38–41).

At its sixth session, the Expert Group established that, with the exception of Chapters 1.1.7 and 1.1.8, it had completed its work on Chapter 1 of the Reference Model and that it would dedicate its future work to the remaining Chapters, unless new, as yet unknown, information would require a re-assessment of Chapter 1 (ExG/COMP/2004/24, para. 15).

At its one-hundred-and-tenth session, the Working Party took note that the first part of the work of the Expert Group, encompassing the description of the current TIR procedure, had been finalized (TRANS/WP.30/220, para. 30).

At its one-hundred and thirteenth session, the Working Party adopted document TRANS/WP.30/2005/32-TRANS/WP.30/AC.2/2005/18, containing Chapter 1 of the Reference Model for the eTIR Project, with the understanding that further chapters will

be included at a later stage of the project, subject to approval by the Working Party, and that a number of points of the document will be updated to reflect recent developments and as the eTIR Project develops over time.

The Working Party was of the opinion that there was no reason to review the mandates and opinions provided, so far, by the relevant TIR bodies in the computerization process. The Working Party felt that the mandate should remain dynamic, thus providing full freedom to the Expert Group to analyze and develop its ideas on a technical level and to take into account technical innovations that could be advantageous for the development of the project.

The Working Party confirmed that the eTIR Project should evolve around the establishment of an international centralized database in order to facilitate the secure exchange of data between national Customs systems. Furthermore, Contracting Parties agreed that the management of data on guarantees, once the guarantor had issued a guarantee to an operator, should lie with Customs (ECE/TRANS/WP.30/226, paras. 34, 35 and 41).

At its forty-second session, the Administrative Committee considered document ECE/TRANS/WP.30/AC.2/2006/13, containing an overview of the mandates and opinions provided, so far, by the relevant TIR bodies in the computerization process. The Administrative Committee noted the concerns of some Contracting Parties with regard to the legal and financial aspects linked to the introduction of the eTIR system and the differences in technological development between countries, which might lead to possible complications and delays at the time of implementation at the national level. The Committee also noted the concerns by the international organization and its member associations with regard to their role in the eTIR system. The Administrative Committee stressed that the eTIR system should meet the requirements of all Contracting Parties to the Convention. The Committee decided to include in the guidelines for the computerization of the TIR system the part of the statement of the UNECE Executive Secretary at the opening of the present session referring to the computerization of the TIR system. The Committee endorsed the document and the following list of guidelines:

- Maintenance of the basic philosophy and structure of the TIR procedure, safeguarding and, possibly, strengthening the provisions of the TIR Convention, particularly those prepared under Phases I and II of the TIR revision process (TRANS/WP.30/194, para. 36);
- Computerization of the whole TIR Carnet life cycle from distribution, issuance and via the TIR transport to return and repository, aimed at, ultimately, replacing the current paper TIR Carnet (TRANS/WP.30/212, para. 26);
- The establishment of an international, centralized database, the aim of which should be to facilitate the secure exchange of data between national Customs systems (TRANS/WP.30/212, para. 26);
- The management by Customs of data on guarantees, once the guarantor has issued a guarantee to an operator (ECE/TRANS/WP.30/226, para. 41);
- The development of the eTIR system, which connects existing and future Customs IT systems, should be realized with an appropriate level of connectivity with the existing TIR related IT systems (ECE/TRANS/WP.30/AC.2/85, para. 38).

At its one-hundred-and-sixteenth session, the Working Party requested to start working on Chapter 3 of the Reference Model, dedicated to the analysis of the e-Business-Requirements as contained in Chapter 2 (see ECE/TRANS/WP.30/232, para. 32).

At its one-hundred-and-seventeenth session, the Working Party considered document ECE/TRANS/WP.30/2007/16-ECE/TRANS/WP.30/AC.2/2007/15, submitted by the secretariat, containing Chapter 2 of the eTIR Reference Model and

adopted the document, subject to the deletion of the asterisks and corresponding footnotes in Chapter 2.1.2.2.3. and 2.1.2.4.2. The Working Party decided that the adopted Chapter 2 could be revised at any time (see ECE/TRANS/WP.30/234, para. 22). The Administrative Committee, at its forty-fourth session, endorsed the Working Party's decision (see ECE/TRANS/WP.30/AC.2/91, para. 19).

At its thirteenth session, the Expert Group welcomed a first draft of Chapter 3 of the Reference Model as contained in document ECE/TRANS/WP.30/GE.1/2007/13. After an in-depth discussion, the Expert Group mandated the secretariat to align draft Chapter 3 with its findings, to propose data elements and a structure for the identified electronic messages and to draft the fall-back scenarios sequence diagram, for consideration at its next meeting (ECE/TRANS/WP.30/GE.1/2007/16, paras. 7–9).

At its fourteenth session, the Expert Group welcomed the revised Chapter 3, contained in document ECE/TRANS/WP.30/GE.1/2007/13 Rev.1 as well as the proposals for additional security elements in Informal Document GE.1 No.2 (2008). It reviewed the draft fall-back scenarios and the messages. It also mandated the secretariat to align Chapter 3 with its findings, to propose code lists for messages and to amend the class diagrams and messages with security data elements in a revised Chapter 3, for consideration at its next meeting (ECE/TRANS/WP.30/GE.1/2008/3, paras. 8–9).

At its fifteenth session, the Expert Group mandated the secretariat to organize a drafting group whose task would be to finalize the draft of Chapter 3, taking into account the findings of the Expert Group. At the kind invitation of Serbian Customs, the drafting group met in Belgrade on 28–29 January 2009. The drafting group reviewed each and every UML diagram, revisited the fall-back procedure and revised the messages. It provided the secretariat with clear instructions on how to further revise document ECE/TRANS/WP.30/GE.1/2007/13 Rev.2.

At its one-hundred-and-twenty-first session, the Working Party considered document ECE/TRANS/WP.30/2008/8/Rev.2, containing clarifications on the method of submission of the Customs declaration as described in Chapter II of the eTIR Reference Model, prepared by the secretariat on instructions from GE.1 at its fifteenth session. There was general consensus that the document provided the necessary clarifications. At the request of the Working Party, these clarifications will be added as Annex to the eTIR Reference Model (See ECE/TRANS/WP.30/242, para. 27).¹

At its sixteenth session, the Expert Group revised documents ECE/TRANS/WP.30/GE.1/2007/13 Rev.3, ECE/TRANS/WP.30/GE.1/2009/3 and informal document GE.1 No. 1(2009), containing the various parts composing Chapter 3 of the Reference Model. It also requested experts to provide further inputs to the secretariat after the meeting and before a new revision of Chapter 3 would be issued.

At its one-hundred-and-twenty-second session, the Working Party was informed that GE.1 was of the firm opinion that the so-called “push approach was the only viable solution to ensure that the information exchange with and within the eTIR international system takes place in real time. Only the “push” approach would allow that information is sent in real time from one system to another with a direct and traceable acknowledgement of receipt. The Working Party endorsed this opinion, thus ensuring that the information sent in real by the Customs office of departure, after it has accepted the Customs declaration, will be duly acknowledged upon receipt of the advance cargo information, by all Customs authorities involved in the TIR transport (See ECE/TRANS/WP.30/244, para. 28).

At its seventeenth session, the Expert Group welcomed the final version of Chapter 3 of the eTIR Reference Model, contained in document ECE/TRANS/WP.30/GE.1/2010/2, and took note of the amendments brought to the

¹ See Annex VI.

messages thanks to the kind assistance of Mr. Hans Greven from the Dutch Customs authorities, thus ensuring full alignment with version 3 of the WCO transit data model.

At its eighteenth session, the Expert Group extensively discussed version 3.0a of the eTIR Reference Model, as contained in document ECE/TRANS/WP.30/GE.1/2011/3, as well as the additional amendment proposals contained in Informal document GE.1 No.1 (2011). The Expert Group took note of the two amendments proposals. It decided to further discuss the first proposal, i.e. to include international declaration mechanisms, at its next session on the basis of a revised document to be prepared by the secretariat. The Expert Group decided to forward the second proposal, i.e. to make use of the guarantee chain's database to validate guarantees which have not yet been accepted by Customs, to the Working Party on Customs Questions affecting Transport (WP.30), together with version 3.0 of the eTIR Reference Model. Furthermore, the Expert Group mandated the secretariat to request the views of the network of eTIR focal points on the second proposal, which then, after review, could be transmitted to WP.30 as a technical recommendation by the network of eTIR focal points (ECE/TRANS/WP.30/GE.1/2011/6, paras. 10–11).

At its nineteenth session, the Expert Group took note of requests by WP.30 at its one-hundred-and-twenty-eighth session, and reconsidered two proposals to amend the eTIR Reference Model, version 3.0a, as contained in document ECE/TRANS/WP.30/2011/4.

On the basis of the proposal contained in document ECE/TRANS/WP.30/2011/5 and the recommendations by the eTIR focal points, contained in document ECE/TRANS/WP.30/GE.1/2011/8, the Expert Group reconsidered the proposal to make use of the guarantee chain's database(s) to validate guarantees which have not yet been accepted by Customs. The Expert Group was of the view that, though technically feasible, the proposal would increase the complexity of the eTIR system without there being any indication or justification given with regard to possible benefits. On the contrary, this proposal does not entail a necessity for the guarantor to register guarantees with the eTIR international system in the first place, nor is there any consequence attached to the guarantor's failure to do so. This could have very negative consequences on the functioning of the backup procedures. In conclusion, it was decided to inform WP.30 that, from a technical and conceptual perspective, the Expert Group recommended not pursuing this proposal, leaving it up to WP.30 to decide if, for political reasons of the system, this option could nevertheless be maintained.

The Expert Group also reconsidered the proposal to include international declaration mechanisms in the scope of the eTIR project on the basis of document ECE/TRANS/WP.30/GE.1/2010/9, prepared by the secretariat in collaboration with experts from Czech Customs. While highlighting the absence of global international agreements on electronic signatures, the Expert Group took note that some countries impose the use of national certification authorities when it comes to signing electronic documents intended for governmental agencies. The Expert Group felt that there was insufficient information to take a decision on the issue and requested the secretariat to launch a survey among both TIR and eTIR focal points, aimed at gathering information from all TIR Contracting Parties on the current and expected practice, rules and regulations on electronic signatures. In the absence of internationally recognized certification authorities, the Expert Group also considered two alternative options: on the one hand, the Expert Group envisaged that the advanced cargo information could be signed by a representative (an entity that would assist transport operators to submit their data electronically and sign on their behalf), and, on the other hand, it also considered that authentication of the electronic advance cargo information by means of a hash code could be sufficient. In the latter case, transport operators would not need to be authenticated to be able to send their electronic information and the actual act of submission of the declaration would be accomplished by means of the presentation of the vehicle, the goods and the reference to the information submitted electronically by the transport operator at the Customs office of departure or entry (en route) (ECE/TRANS/WP.30/2012/1, paras. 8–10).

At its one-hundred-and-twenty-ninth session, the Working Party reaffirmed the importance of computerization of the TIR procedure. Some delegations stressed the need to proceed step-by-step in order to avoid a possible disruption of the TIR procedure in less technically developed countries. WP.30 took note that a progressive introduction of the eTIR system was already foreseen in the eTIR Reference Model, thus allowing countries to join a computerized system as soon as they are ready. The Working Party noted that GE.1 had made sure that not only all functionalities provided in the current paper-based TIR system would be available in the eTIR system, but also the use of modern technologies to bring numerous additional benefits to the Customs and transport industry, as identified in the eTIR Reference Model. The secretariat also recalled that the concepts contained in version 3.0 of the eTIR Reference Model (ECE/TRANS/WP.30/2011/4) were the very same that had already been approved in version 2.0. WP.30 accepted version 3.0 of the eTIR Reference Model as a basis for its work, without prejudice to the outcome of its deliberations on the whole eTIR project.

The Working Party reconsidered the amendment proposal contained in document ECE/TRANS/WP.30/2011/5 and decided to follow the recommendation of GE.1 not to amend the guarantee validation procedure described in the eTIR Reference Model.

Some delegations stressed that the eTIR project has multiple aspects and that the acceptance of version 3.0 of the eTIR Reference Model only addresses the conceptual and technical aspects of the project, leaving aside its legal, administrative and financial dimensions. The importance of capacity-building and transfer of technology was also underlined. Therefore, these delegations were of the view that, once those issues had been addressed, WP.30 would need to reconsider the eTIR Reference Model. Some other delegations did not agree with this view and highlighted the considerable efforts and time spent by the dedicated experts in GE.1 developing the eTIR Reference Model, in line with the mandates of the Working Party. They pointed out the necessity for rapid progress on eTIR and felt that less technologically advanced countries should neither be left aside nor block the computerization. Countries having additional technical proposals were invited to bring those before GE.1 for consideration. In this context, WP.30 reiterated its standing invitation to all countries to participate in the work of GE.1 and contribute to the eTIR project by nominating an eTIR focal point (ECE/TRANS/WP.30/258, paras. 19–21).

At its twentieth session, the Expert Group reconsidered the proposal to introduce international declaration mechanisms in the eTIR project, as presented in document ECE/TRANS/WP.30/GE.1/2011/9, in the light of the results of the survey on the use of electronic signatures in the framework of the eTIR project, contained in Informal document GE.1 No. 3 (2012), as well as comments by eTIR focal points, contained in Informal document GE.1 No. 2 (2012).

The Expert Group acknowledged the necessity to provide the transport industry with a variety of options to submit electronic information to Customs. Considering that, despite the introduction of a standard declaration message in the eTIR Reference Model, national declarations mechanisms might still differ between countries, in particular when it comes to authentication of the sender of the information, the Expert Group felt that it was essential to include international declaration mechanisms in the eTIR project. The survey on the use of electronic signatures in the framework of the eTIR project confirmed that most countries require the use of electronic signatures or other authentication mechanisms for the transmission of advance cargo information. In most countries, only national (or at best: regional) electronic signatures are accepted and, at present, only a few countries recognize foreign certification authorities (CA) for the issuance of legally binding electronic signatures. The Expert Group confirmed that, as long as internationally recognized CA's have not been developed and recognized, it will be extremely difficult to implement the cross-border use of electronically signed documents. The Expert Groups noted that 50% of respondents to the questionnaire indicated that an international CA could be used if recognized by an international agreement and half of those considered that the TIR Convention could be considered as providing an appropriate platform for that purpose. Consequently, the secretariat was

requested to further explore the possibilities to include international declaration mechanisms, for example by means of trusted third party solutions and directly in the eTIR international system, possibly linked with the authorization procedure of TIR Carnet holders. Finally, the Expert Group requested the secretariat to redraft a proposal to include international declarations mechanisms in the eTIR Reference Model for its next meeting, underlining that a realistic proposal should be based on authentication mechanisms (e.g. user/password) and trusted system-to-system information exchanges (e.g. Virtual Private Network), rather than on electronic signatures.

The Expert Group took note of minor errors in the eTIR Reference Model. It requested their correction (including in the XML schemas published on the eTIR website) and the issuance of a version 4.0 of the eTIR Reference Model containing Chapters 1 to 4, as already published in documents ECE/TRANS/WP.30/2011/4, ECE/TRANS/WP.30/GE.1/2011/4 and ECE/TRANS/WP.30/GE.1/2011/10 and available at the TIR and eTIR websites (ECE/TRANS/WP.30/2012/7, paras. 9–11).

At its 130th session, the Working Party endorsed the report of the nineteenth session of the Informal Ad hoc Expert Group on Conceptual and Technical aspects of Computerization of the TIR Procedure (GE.1) (Belgrade, 13 and 14 September 2011), contained in document ECE/TRANS/WP.30/2012/1. The delegations of Iran (Islamic Republic of) and Kazakhstan were of the view that WP.30 should only take note of this report without any endorsement. The secretariat recalled that the endorsement of the GE.1 report does not imply the approval by WP.30 of the outcome of GE.1 work, i.e. additions and/or amendments to the eTIR Reference Model, but rather indicates the support of the Working Party for GE.1 activities and a request to continue the work along the lines presented in the report. As in the past, amendments and additions to the eTIR Reference Model will be submitted separately to the Working Party for approval (ECE/TRANS/WP.30/260, para. 26).

WP.30 also noted that, in line with the joint mandates by WP.30, TIREXB, GE.1 and ITC, the secretariat, with the assistance of the UNOG competent services, had issued a tender for a cost-benefit analysis (CBA) of the eTIR project. On the basis of the offers received, a consultant had been selected. To date, a detailed inception report was produced and agreed upon. The CBA report should be finalized on time to be presented at the twentieth session of the GE.1 and will be later submitted to WP.30 and TIREXB for consideration (ECE/TRANS/WP.30/260, para. 29).

At its 131st session, the Vice-Chair of the Informal Ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (GE.1), Mrs. Özyazici Sunay of Turkey, informed the Working Party of the results of GE.1 at its twentieth session, which was held in Prague on 19 and 20 April 2012, at the kind invitation of the Czech Customs administration. The main issues discussed at the session were the inclusion of international declaration mechanisms in the eTIR Reference Model, the draft Cost-Benefit Analysis (CBA) of the eTIR Project as presently conducted by a consultancy firm at the request of TIREXB and the dematerialization of documents attached to the TIR Carnet (ECE/TRANS/WP.30/262, para. 26).

At its twenty-first session, the Expert Group welcomed the new proposal to introduce international declaration mechanisms in the eTIR project, as presented in Informal document GE.1 No. 10 (2012). Recalling a key principle of the eTIR project, i.e. that the eTIR international systems avoids the multiplicity of direct Customs to Customs connections, the Expert Group requested removing the direct secure system to system connections between customs administrations from the Customs international declaration mechanisms option (ECE/TRANS/WP.30/2013/5, para. 8).

At its 132nd session, WP.30 took note of the results of the twenty-first session of the Expert Group which took place on 25 and 26 September 2012 in Bratislava, at the

kind invitation of the Slovak Customs. The meeting considered a proposal to complement the existing national declaration mechanism, as contained in the eTIR Reference Model, with an international component, in order to provide the transport industry with a variety of options to submit electronic information to Customs. The Expert Group agreed to include in the eTIR Reference Model, various alternative international declaration mechanisms. A first option would be provided by the eTIR international system (web services only), another one by the private sector, with systems such as IRU's TIR-EPD, and a last option could be provided by the Customs authorities of the country of residence of the transport operator, thus taking advantage of national authentication mechanisms. The Expert Group also delivered comments (Informal document GE.1 No. 12 (2012)) on the final draft of the Cost Benefit Analysis (CBA) of the eTIR Project. In particular, the Expert Group agreed with the methodology applied by the consultants, but, at the same time, felt that some costs, e.g. for training, and indirect benefits, like the improved facilitation for trade and increased security, were missing in the calculations. The Expert Group requested the secretariat to prepare a new document, containing a summary of the consultants' findings, in combination with an assessment by the secretariat of the limitations of CBA as well as recommendations by the Expert Group. With regard to the dematerialization of attached documents, WP.30 noted that the secretariat had submitted a request to the Data Model Project Team of WCO to amend the "attached documents" class of the WCO Data Model, so that it no longer only allows the attachment of image files but can also handle various options which were considered by the Expert Group. As a consequence, a new class had been added which would be used in eTIR messages to handle electronically attached documents. The eTIR Reference Model will be amended accordingly (ECE/TRANS/WP.30/264, para. 26).

At its 133rd session, the Working Party endorsed the report of the twenty-first session of the Ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (GE.1) (ECE/TRANS/WP.30/2013/5). WP.30 was also informed about the finalization of the Cost Benefit Analysis (CBA) of eTIR (Informal document GE.1 No.12/Rev.1 (2012)) and its non-technical summary (Informal document GE.1 No.1 (2013)), prepared by the secretariat at request by GE.1 and containing an assessment of the CBA limitations and recommendations. Both documents have been distributed to GE.1 participants and eTIR focal points for consideration, published on the UNECE website and on the agenda of the twenty-second session of GE.1. The Working Party noted that, having addressed financial and most of technical aspects of eTIR, GE.1 was nearing the end of its mandate and considered that this work should be followed by consideration of legal and policy aspects of eTIR by WP.30 (ECE/TRANS/WP.30/266, para. 24).

At its twenty-second session, the Expert Group took note of the final version of the Cost Benefit Analysis of the eTIR Project (CBA) carried out by an independent contractor, as contained in Informal document No. 12 (2012)/Rev.1. It also welcomed Informal document GE.1 No. 2 (2013), containing a summary of the consultants' CBA, in combination with an assessment by the secretariat of the limitations of the analysis as well as recommendations. It discussed and slightly revised the wording of the recommendations.

The IRU expressed the reservations with regard to the final CBA, the corresponding assessment made by the TIR secretariat and the recommendations by the Expert Group.

The Expert Group confirmed that the assessment of the CBA in Informal document GE.1 No. 2 (2013) already takes into account most of the remarks made by the IRU at earlier sessions and, thus, acknowledged that some cost elements might be slightly underestimated, in particular labour costs, depending on where the eTIR international system would be hosted. Nevertheless, the consultant has calculated the costs based on the requirement contained in the eTIR Reference Model where, for

example, an international 24/7 helpdesk is not envisaged. Furthermore, it is not correct to say that managerial and technical costs are not considered, as in most of the options a significant share of those costs are included in the hosting costs. With regard to the cost to the IRU and the associations, the Expert Group recalled that the consultant has taken into account that the largest part of the issuance of TIR Carnets has already been computerized by the IRU and its associations, thus limiting the costs for the guarantee chain to connect to the eTIR international system. The Expert Group was of the view that, since only maximum estimated costs were used and the fact that costs have been increased by 20 per cent to factor in the risk of a possible underestimation, the estimation should be sufficiently accurate to for the sake of the CBA. Furthermore, the Expert Group requested the secretariat to look into the possibility to use off-the-shelf solutions (including open source solutions) for the development of the eTIR kernel, thus, possibly, reducing the costs of development of the eTIR international system.

The Expert Group requested the secretariat to include a revised version of Informal document GE.1 No. 2 (2013) as an annex to the eTIR Reference Model and submit it to the Working Party on Customs Questions affecting Transport (WP.30) for consideration (ECE/TRANS/WP.30/2013/10, paras. 15–18).

At its 134th session, the Working Party took note of the outcome of the twenty-second session of the Ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (GE.1) as presented orally by its vice-Chair. In particular, it took note that GE.1 had finalized the introduction of an international declaration mechanism into the eTIR project and that it had extensively discussed the results of the Cost Benefit Analysis, its summary and its assessment in order to prepare recommendations. (ECE/TRANS/WP.30/268, para. 29).

At its 135th session, WP.30 took note of the finalization of the Cost Benefit Analysis (CBA) of the eTIR project, together with its summary, assessment and the resulting recommendations by GE.1 (ECE/TRANS/WP.30/2013/10). The secretariat gave a presentation on this document and, in reply to questions by various delegations, further clarified a number of issues concerning some of the assumptions and results of CBA.

At its twenty-third session, the Expert Group welcomed version 4.0a of the eTIR Reference Model. It took note of the various changes introduced in this version, in particular: the inclusion of the latest references to decisions by the Expert Group and WP.30 in the Introduction, the alignment of all message to the WCO data model v.3.3 (including Customs to Customs (C2C) messages), the reorganization of the various Chapters containing the message descriptions, the introduction of figures to better visualize messages, the integration of Chapter 4 and its Annex as well as the insertion of a new Annex entitled “Cost Benefit Analysis of the eTIR system: summary, limitations and recommendations”. The Expert Group expressed its great appreciation for the extensive contribution by Mr. Hans Greven (Netherlands) in preparing the descriptions of the eTIR messages.

Furthermore, the Expert Group reconsidered if it was necessary to keep UN/EDIFACT message descriptions for a newly devised system such as eTIR, in particular considering that it could ultimately further complicate the process envisaged to ensure the integrity of the data submitted, i.e. the use of hash codes. Taking into account that some countries will use legacy systems based on UN/EDIFACT to allow for the submission of eTIR data (e.g. Belgium) the Expert Group decided to keep UN/EDIFACT as a possible option for communicating TIR data to customs administrations. As a consequence and while taking into account the outcome of its discussion under agenda item 3.b, the Expert Group decided it should consider if the direct submission of TIR data by the transport operator to customs administrations could replace the hash code mechanism to ensure the integrity of the data. The Expert Group acknowledged that, today, this is a current practice in all countries requiring the

submission of electronic advance cargo information, either using nationally provided declaration mechanisms or the TIR-EPD system of the IRU. The Expert Group requested the secretariat to present an informal document on this issue to WP.30 at its February 2014 session and ask WP.30 whether the eTIR project should abandon the objective to request the submission of electronic information only in countries with Customs offices of departure. It also requested the secretariat to analyse the consequences of such a change on the eTIR reference model as a whole, including on the fall-back scenarios.

The Expert Group also considered Informal document GE.1 No. 10 (2013), containing a proposal by the secretariat to include in the eTIR Reference Model tables cross-referencing the functional message descriptions and the tags used in XML schemas. The Expert Group recognized the usefulness of such tables and requested the secretariat to include them in Chapter 4.2.3.1. The Expert Group also pointed out that UN/EDIFACT message descriptions (Chapter 4.2.3.2) should be amended and be aligned to the WCO data model v.3.3. It requested the secretariat to issue a version 4.1a of the eTIR Reference Model that would include the changes requested above, for consideration by WP.30, possibly at its June 2014 session.

Finally, the Expert Group considered all tasks and activities listed in its Terms of Reference (TRANS/WP.30/2002/11, Annex 1). After extensive discussions, the Expert Group was of the opinion that the eTIR Reference Model fully covers the mandate that WP.30 had entrusted it with. At the same time, the Expert Group was conscious that, ultimately, it is the task of the WP.30 to endorse the eTIR Reference Model and consider if the Expert Group has satisfactorily fulfilled its mandate (ECE/TRANS/WP.30/2014/4, paras. 11–14).

At its 136th session, the Working Party) noted that GE.1 was of the view that it was nearing completion of its mandate and had requested the secretariat to start preparing a document summarizing its achievement and recommendations (ECE/TRANS/WP.30/272, para. 24).

At its 137th session, the Working Party, at the request of the Informal Ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure (GE.1), extensively discussed document ECE/TRANS/WP.30/2014/5. In particular, it took note that the submission of diverging safety and security data to each country en route might represent an added complexity for transport operators conducting TIR (or eTIR) transports. The Working Party stressed that the principle of a single TIR declaration in the country of departure should be respected and decided that the declaration mechanisms designed in the eTIR Reference Model should not be amended. Considering that safety and security data requirements have their own legal basis and in view of the difficulty in agreeing on common requirements, the Working Party also decided that, even if they are related to TIR transports, those requirements should be left optional in the standard eTIR declaration. As a consequence, the Working Party instructed GE.1 to continue to work on the development of a standards eTIR declaration (ECE/TRANS/WP.30/274, para. 15).

b. Introduction to the reference model

Just as it is not possible to build a decent and secure house without a proper plan, which has been drawn up by a qualified architect, it is not possible to computerize a system without first designing the necessary models, outlining all the elements and procedures of which it consists. And just as the construction of a small garden shed does not require the same planning as the construction of a hundred storey high commercial building, different systems will require different modelling techniques, in function of their aim and complexity.¹

This document contains the full description of the TIR Procedure Computerization Project.

The business process modelling methodology applied to draw up this document is based on the UN/CEFACT Modelling Methodology (UMM). UMM in its turn is based on the Unified Modelling Language (UML) from the Object Management Group (OMG) and is derived from the Rational Unified Process (RUP) developed by Rational Corporation. As such, UMM provides a procedure for specifying/modelling business processes in a protocol-neutral, implementation-independent way.

Business Modelling provides a formalized way to describe how the TIR procedure operates and thus enables a common understanding of its key features and requirements. It can be used as a tool to provide a range of e-business solutions covering all or part of the TIR procedure and based on a variety of technologies. The models also facilitate the detection of opportunities for simplification and harmonization.

This document is first intended to facilitate the work of the Informal ad hoc Expert Group on Conceptual and Technical Aspects of Computerization of the TIR Procedure and to provide modelling support. In addition, it should facilitate the future work to be undertaken by the Informal ad hoc Expert Group on Legal Aspects of Computerization of the TIR Procedure. The final version of the Reference Model will be submitted to the Working Party on Customs Questions affecting Transport (WP.30) and the Administrative Committee for the TIR Convention (AC.2) for endorsement as well as being a reference for any future work in the eTIR Project. In addition, every single chapter of the Reference Model will, upon completion, be submitted for endorsement to the WP.30 (see Table 0.3).

¹ See also IS architecture artistry. G. Gage, IDG Communication Publication, July 1991.

b.1. Phases and Workflows

According to Rational Unified Process and UMM, every project passes through a series of standard phases. The phases are inception, elaboration, construction and transition. For each phase, a number of workflows is required. The workflows identified for computerization projects are: Business Domain Modelling, e-Business requirements, Analysis, Design, Implementation, Test and Deployment. The UMM focuses on the inception and elaboration phases and limits itself to the first four workflows, not encompassing the Implementation, Test and Deployment workflows. The description of the work during every phase, indication the main or 'high-level' activities, is shown in Table 0.1.

Table 0.1
Activities associated with each phase

Phase	High-level activities
Inception	<ul style="list-style-type: none"> ○ Idea is conceived, and initially documented using the UMM. ○ Main workflows are: 1) Business Domain Modelling, and 2) e-Business requirements.
Elaboration	<ul style="list-style-type: none"> ○ Idea is further refined and expanded ○ Main workflows are: 1) Analysis, and 2) Design ○ The outcome – deliverables – is compared with the already defined models, requirements and references contained in the 'repository' ○ New models or enhancements to existing models are incorporated into the repository
Construction	<ul style="list-style-type: none"> ○ Messages are designed ○ Software development ○ Main workflows are: 1) Implementation, 2) Testing, and 3) Deployment
Transition	<ul style="list-style-type: none"> ○ Testing ○ Main workflow is Deployment

In the Inception and Elaboration phases, the UMM concentrates on workflows needed to understand the business needs to produce business scenarios, business objects and areas of business collaboration. They are:

- Business Domain Modelling
- e-Business requirements
- Analysis
- Design

Within each of these workflows a set of deliverables is produced (see Table 0.2). The whole process is iterative so that additions and changes can be validated and incorporated into any of the workflows as they are discovered. Additions and changes should be a natural result of maintenance and enhancement.

Table 0.2
Deliverables

<i>Deliverables</i>	<i>Business Domain Modelling Workflow</i>	<i>e-Business requirements Workflow</i>	<i>Analysis Workflow</i>	<i>Design Workflow</i>
Package diagram	X			

<i>Deliverables</i>	<i>Business Domain Modelling Workflow</i>	<i>e-Business requirements Workflow</i>	<i>Analysis Workflow</i>	<i>Design Workflow</i>
Class diagram	X	X	X	X
Use case description	X	X	X	
Use case diagram	X	X	X	X
Sequence diagram			X	X
Collaboration diagram			X	X
Statechart (state machine) diagram			X	X
Activity diagram	X	X	X	X
Component diagram				X
Deployment diagram				X
Requirements list	X	X	X	
Glossary	X	X	X	

Every workflow focuses on specific aspects of the project. The Business Domain Modelling describes the scope of the project within the whole system, enabling a common understanding of the functioning of the current TIR procedure – the “as-is” situation – to all ‘stakeholders’ and defines the high-level business requirements. The e-Business requirements workflow captures the detailed user requirements in the computerized environment to be developed and further elaborates the use cases described in the previous phase of the work. The third workflow, the Analysis, translates the requirements identified in earlier phases into specifications that can be followed by software developers and message designers. Finally, in the Design workflow, the specification devised during the Analysis workflow will be used to develop the messages and the collaborations required to exchange these messages.

Each and every workflow will be terminated by a formal validation by the relevant bodies.

b.2. Step by step approach applied to the UMM

At its one-hundred-and-sixth session, the Working Party agreed that, in the light of the complexity of the project and in order to achieve tangible results in the near future, a step-by step approach was the only feasible way to address the eTIR Project.

As stated in the introduction to Chapter b, the UMM methodology is mainly based upon the Rational Unified Process (RUP), which originally has been used in the field of software engineering. The eTIR Project, although not being a software engineering project, nevertheless is confronted with many similar problems with regard to the complexity of the issues at stake. In order to address complex problems, software engineers usually issue a first version of a software, tackling the main issues. With every new release, they add functionalities to the software with a view to advance towards reaching the final objectives of the project.

In the eTIR project, the various steps to be undertaken to achieve results in the project may be considered as being equivalent to the various releases of software. Therefore (and in accordance with the RUP), every single step, after it has been clearly defined, will be considered as a specific sub-project and will have to pass through all phases of a project lifecycle. All sub-projects share the same final objectives but each individual sub-project contains different elements to achieve them.

b.3. Structure and updating of the document

The underlying document follows the methodology and structure presented above. The four main chapters correspond to the four workflows of the Inception and Elaboration phases. In addition, a number of annexes also forms part of the present Reference Model.

The requirements list and the glossary (TIR glossary) are two key cross-reference documents which are used throughout the process to ensure that all business requirements, terms, and definitions are recorded. These two documents are maintained as and recorded in Annexes 1 and 2 respectively.

Annex 3 contains the data elements records.

Annex 4 contains a UML Symbols Glossary, describing the specific terms and symbols of the language to allow non-UML literates to understand the numerous diagrams contained in this document.

Annex 5 contains a UMM/UML Glossary, describing the specific terms used by the UMM methodology.

Annex 6 contains a detailed description of the functioning of the eTIR declaration mechanisms.

Annex 7 contains summary of an independently conducted cost-benefit analysis (CBA), an assessment of the CBA and recommendations.

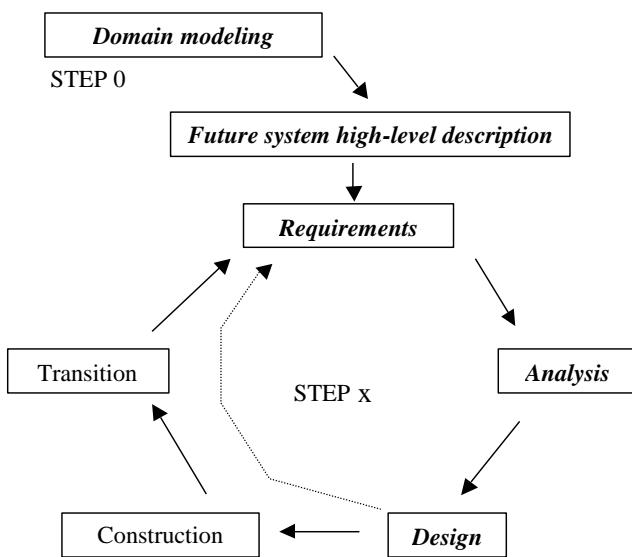

Annexes 8 and 9 contain the functional and technical fall-backs.

Annexes 10 and 11 contain the lists of, respectively, figures and tables contained in underlying document.

In Annex 12 the reader can find all references to the documents used to elaborate this document.

The Reference Model will contain the results of each work phase, in line with the description in Chapter b.1. and in accordance with the decisions by the Expert Group. In view of the step-by-step approach, described in Chapter b.2., the Reference Model will be amended by means of an iterative process, as shown in Figure 0.1.

Figure 0.1
Step-by-step iterative approach of UMM

Because UMM does not go beyond the design phase of projects, the actual construction and transition phases are beyond the scope of the eTIR Project. Thus, the Expert Group can already start drafting the requirements of the next step before the previous step will actually be in production (see dashed line in Figure 0.1.).

A step-by-step approach can only be successful if all steps, necessary to achieve the final goal, are well defined before starting the actual work. Therefore, the introduction to Chapter 2 contains the description of the different steps of the project and explains how these steps will complement each other in order to achieve the overall objectives of the eTIR Project.

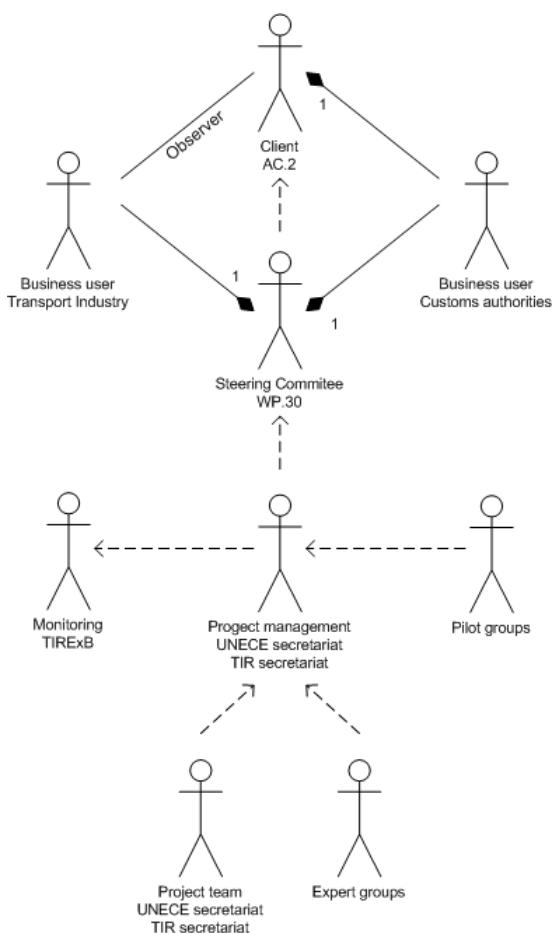

In addition, some chapters or annexes may be added in the future to reflect the specificities of the TIR Procedure Computerization Project.

Moreover, the existing systems identified during the domain modelling phase will have to be taken into account during the Analysis and Design phases of every step to avoid superfluous or incompatible developments. It is important to recall that the eTIR project is not a so-called “Greenfield” project.

b.4. Stakeholders responsibility chart

The computerization of the TIR Procedure is a project involving numerous stakeholders. Most of them have specific roles to play in the project and they are interdependent. Figure 0.2 shows the roles of the stakeholders and dependencies between them; dependency arrows also indicate the reporting directions, in other words, who reports to whom.

Figure 0.2
Stakeholders responsibility chart

b.5. Review and validation status

The table below presents the revisions and the validation dates for the various parts and versions of the reference model.

Table 0.3

1. Business domain modelling

The purpose of the Business Domain Modelling workflow is:

- To present the scope of the project;
- To understand the structure and dynamics of processes within the current TIR procedure;
- To ensure that all stakeholders involved have a common understanding of the current TIR procedure;
- To understand the daily business in the TIR procedure, without reference to an electronic solution;
- To formulate the high-level business requirements which will serve as a basis for a subsequent detailed analysis.

In an international project such as the computerization of the TIR procedure, it is absolutely indispensable that every stakeholder involved has a common vision of the project. Therefore, the first part of the Business Domain Modelling describes this vision in light of the background and the mandates given to the various groups involved.

Once the vision is clearly defined, the high-level analysis of the TIR procedure domain can be undertaken, followed by a more detailed analysis enabling a deeper understanding of the functioning of the TIR procedure. To this end, the domain is divided into areas and a use case analysis is drawn up for each area of interest. Already at this level some areas will be left aside because they are not part of the scope of the project. The requirements list and the TIR glossary are also filled-in accordingly. The list of entity classes and the high-level class diagram, established during this workflow, contribute to the development of the TIR glossary.

Deliverables from the Business Domain Model workflow include:

- Scope of the Business Domain and the boundaries of the project;
- Business Domain use case diagram with its description and business domain activity diagram;
- Use case diagram, use case description and activity diagram for each area;
- TIR entity classes, definitions and a high-level class diagram;
- List of business requirements (including non-functional requirements);
- TIR glossary.

1.1 Vision

This first part of the work aims at reaching agreement on the objectives, the business needs and the scope of the business domain. This also involves identifying the business opportunities and specifying the boundaries of the business domain being modelled.

1.1.1 Project title and abbreviation

The title given by the WP.30 to the project is:

TIR Procedure Computerization Project

The abbreviation used for the project is:

eTIR

1.1.2 Objectives

This chapter gives a brief description of the purpose of the project.

The final objectives of the eTIR Project are:

- Integrating the computerized TIR procedure in the overall process of technological development in international transport, trade and Customs procedures:
 - Simple and cost effective data capture and data transmission;
 - Facilitation of global intermodal application of the TIR Procedure;
 - Real time exchange of information among actors.
- Improving the efficiency and quality of the TIR procedure:
 - Reduction of processing times at border crossings and final destination;
 - Increased efficiency of internal administrative and control procedures;
 - Increased accuracy and reduction of errors;
 - Reduction of costs;
 - Progressive replacement of paper TIR Carnet;
 - Full use of international standard codes in order to eliminate language barriers;
 - Availability of advance cargo information.
- Reducing the risk of fraud and improving security:
 - Automatic generation of data for risk assessment;
 - Facility to implement early-warning system;
 - Easy access to information for control and risk management purposes.

1.1.3 Boundary of the eTIR Project

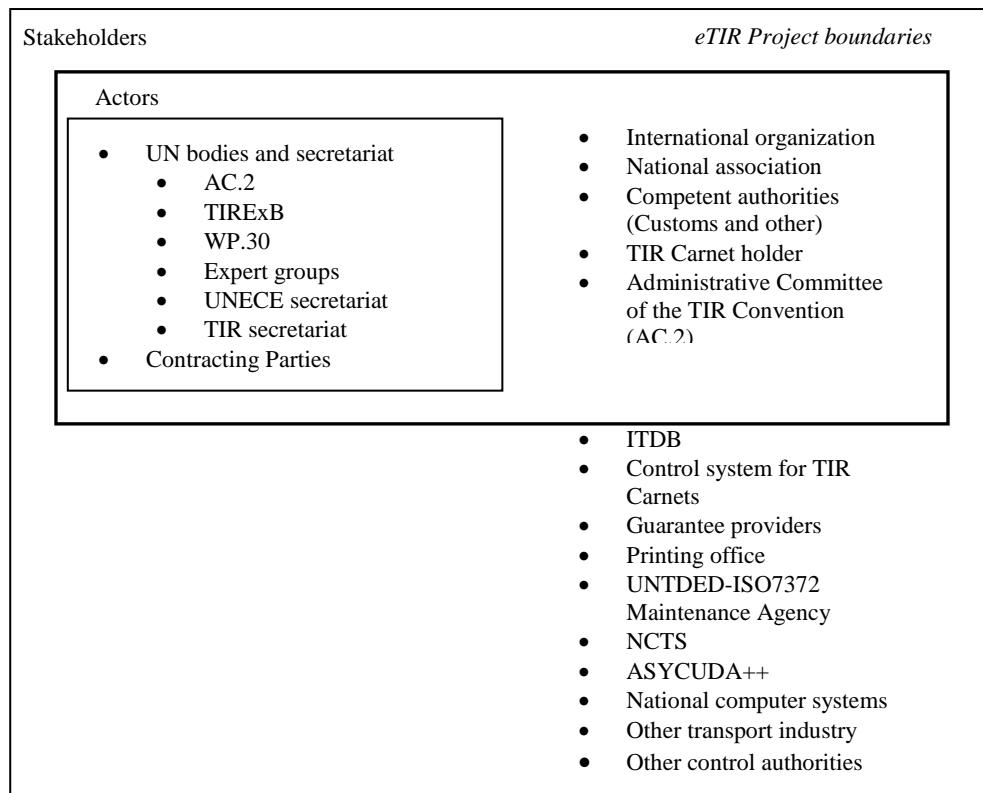

The final objective of the eTIR project encompasses the computerization of the whole TIR Carnet life cycle (from issuance and distribution via the TIR transport to return and repository) and is ultimately aimed at replacing the current paper TIR Carnet. However, the eTIR Project will inevitably have repercussions on other parts of the TIR Procedure. Therefore, it is important to identify the boundaries of the project in order to realize the full impact the project may have and to ensure that the views of all stakeholders are taken into due account. The boundaries are defined along two axes: stakeholders and information

1.1.3.1 Stakeholders

A stakeholder is defined as someone (or something) who is materially affected by the outcome of the system but may or may not be an actor of the system. Actors are stakeholders who are involved in the specific project as users and are thus part of the Reference Model. Stakeholders inside the boundary of the system are involved in the project as active participants in the work and/or members of decision-making bodies; those outside the boundary may participate in meeting to ensure any future compatibility where necessary.

Figure 1.1 shows the stakeholders inside and outside the boundaries of the project and emphasises those who are also actors.

Figure 1.1
Stakeholders and actors

1.1.3.2 *Information*

The data elements inside the boundaries have already been identified and are listed in Annex 3 of the Reference Model (source: the report of the Second meeting of the Expert Group (ExG/COMP/2002/10, Annex 4)). These data elements reflect the information contained in the current, paper-based, TIR carnets and provide the basis for the elaboration of a minimal set of data to be computerized. However, this set may need to be further amended in the course of the project, when the Group addresses other issues, such as, for example, security.

1.1.4 **Business Opportunity and Problem Statement**

This section describes the initial considerations with regard to the development of the eTIR project. A complete vision for the future system is presented in Chapter 2.1 of this document.

1.1.4.1 *Technological developments in international transport, trade and Customs procedures*

The extremely rapid technological developments in Internet applications, world-wide wireless communication systems and smart card technologies have led to simple and cost effective data transmission possibilities on a world-wide level with increasingly secure authentication procedures. These technologies have and increasingly will affect profoundly the way and means how international transport and trade operations as well as Customs procedures are carried out.

EDI technologies are today used by all major freight forwarding companies and by many road transport companies engaged in international transport. Also Customs authorities increasingly use these technologies to enhance efficiency of internal administrative and control mechanisms and to improve service quality at border crossing points.

The reasons for such rapid introduction of EDI technologies – unthinkable only five years ago – are cost benefits and the superior service quality in terms of accuracy, speed, tracing, controlling, billing and other value-added features which are associated with the use of these computer-based technologies. Traditional paper-based documents and procedures no longer fit into such an environment unless they are accompanied or supported by computer readable data files. Any modern international Customs transit system with the objective of facilitating international transport and trade simply cannot ignore these rapid developments.

1.1.4.2 Efficiency of the TIR Customs transit procedure

Freight forwarding and transport companies as well as Customs authorities constantly have to improve the efficiency of their operations and to increase service quality. This will become increasingly important since international goods transport, particular road transport, is forecast to increase considerably in the coming years, also along the East-West European transport corridors (European Union – Russian Federation, CIS countries and beyond) and on the Southeast-European axis (European Union – Turkey –Iran (Islamic Republic)/Middle East). These trends, together with the tremendous growth of smaller and time-sensitive shipments, will substantially increase the volume of international shipments and thus the workload of Customs authorities. At the same time the resources allocated to Customs services, both in terms of manpower and installations, are decreasing in many countries.

Statistics show that there exist no alternatives to the TIR Customs transit procedure for international road transport. In 2000 more than 500,000 TIR operations were terminated in the Russian Federation. The CIS countries alone accounted for more than half a million of TIR Carnets issued. Bulgaria, Iran (Islamic Republic of), Romania and Turkey also issued more than 900,000 TIR Carnets to their transport operators in 2000. Even with the extension of the Community and Common Transit Systems to the EU accession countries in the coming years, the use of the TIR procedure will probably further increase, particularly once the countries in the Middle East, Northern Africa and Asia apply fully the TIR procedure and China accedes to the TIR Convention.

Thus, the TIR Customs transit regime will remain the backbone for efficient international road transport at the pan-European level and it seems thus indispensable to adapt it to the already existing and emerging needs of the transport industry and the Customs authorities involved.

In the 1970's, when the paper-based TIR Carnet was introduced in its present form, it not only provided proof of the required guarantee coverage, but it also constituted the administrative basis for further trade facilitation as well as effective Customs administration and control of transit operations. Today the TIR Carnet has lost this role to a large extent (apart from the fact that it is no longer in line with the format and layout of modern trade documents as recommended in the UN Layout key). In fact, there are even situations where the use of the TIR Carnet interferes with the concept of effective Customs transit administration and control, as the information contained in the TIR Carnets is often no longer used directly by Customs authorities, but has to be inserted manually into the various national computer systems which are increasingly used by Customs authorities. In some cases the white and green vouchers in the TIR Carnet are no longer used for Customs control, even though they still have to be filled-in by TIR Carnet holders. Apart from the risk of errors during repetitive data entry (ironically this had been one of the major advantages of the TIR Carnet replacing national Customs documents) these manual procedures are time-consuming and require resources which Customs authorities should use more effectively for other purposes.

The TIR Carnet also seems to become a burden for TIR Carnet holders as it is difficult, expensive and time-consuming to be filled-in and requires tailor-made

software and hardware solutions, while multiple data entries in the TIR Carnet vouchers are often no longer needed for Customs control purposes (see above). Furthermore, the use of TIR Carnets results in millions of physical handling and shipment operations between a centralized printer and the IRU in Switzerland, between national associations and TIR transport operators in more than 40 countries and vice versa, until their final storage at the IRU premises in Switzerland. All these physical movements are a potential source for errors and fraud. They also are reflected in the costs of TIR Carnets, not to mention those incurred by the international EDI Carnet control system.

In terms of Customs efficiency, the paper-based TIR Carnet therefore has already and will increasingly become the weakest link in the TIR transport chain, unless it is complemented and ultimately replaced by electronic procedures. The introduction of new Customs procedures, such as the New Computerized Transit System (NCTS), client-oriented automated Customs declarations systems already available or being installed in virtually all major ports and airports or the electronic Customs procedures applicable for land transport in North America support this view.

Experience shows that automated Customs transit systems do not only reduce processing times at border crossing and final destination, but also allow Customs authorities to offer value-added services to transport operators and freight forwarders, such as on-line information on the status of transit operations. There is no reason why only the road transport industry should not be allowed to benefit from the possibilities of modern technologies in dealing with Customs authorities.

1.1.4.3 The fight against fraudulent activities

The fight against misuse of Customs transit systems is of utmost importance to all parties, as the facilities of these procedures can only be granted if Customs duties and taxes at risk are not jeopardized or can be easily recovered in case of misuse.

In contrast to its modest origins, Customs transit systems involve today thousands of operations every day. In such an environment, individual and manual processing and control of documentation by Customs officers, as in the past, has become ineffective and is no longer possible without causing long delays. The visual checking of paper-based documents, Customs stamps, ID-numbers, etc. must be complemented and/or replaced by automated systems which can verify authenticity of persons and data (documents) and automatically generate data for risk assessment of sensitive cargoes, destinations, etc. Effective risk management systems with the capability to act in anticipation of emerging problems are not only indispensable at the national level (Customs authorities and national associations), but, as a result of the centralized TIR guarantee system and the increase in international organized crime, also at the international level (international insurers, IRU, TIR Executive Board (TIRExB). The revised TIR Convention (Phase I) has provided the legal and administrative means to establish such a coordinated approach and modern EDI technologies allow its efficient functioning.

The IRU, acting in accordance with Article 6 of the TIR Convention, maintains data banks with commercial information of their member associations and on the TIR Carnet users as well as information on stolen, misused or otherwise risk-prone TIR Carnets. By means of the SafeTIR system, the IRU also obtains from Customs authorities on-line information on terminated TIR Carnets covering more than 80 per cent of all TIR transports.

The international insurers certainly also have detailed information available on all Customs claims lodged in the framework of the TIR Convention which should comprise information on the reasons for such claims, countries, operators and types of goods involved as well as the amount of duties and taxes thereon.

The TIRExB, as a governmental organ, also has detailed information on all TIR Carnet holders as well as on their status (authorized, excluded or withdrawn). It also has detailed information on approved Customs seals and stamps as well as on the numerous legal arrangements made between national associations and Customs authorities in the Contracting Parties to the Convention.

Some of this information is already today available to Customs authorities or to the private sector, but no concerted efforts have yet been made to share or combine this information neither at the national and international levels nor between these levels. With a view to enhancing pro-active risk management capabilities by Customs authorities, private associations and the international guarantee providers of the TIR system, it seems therefore indispensable that Customs enforcement authorities, the TIRExB as well as the international TIR guarantee providers pool their knowledge and data. In line with national data protection laws, such information could, in the future, be made available on-line and on the basis of well-defined criteria. An integrated information system would not only provide for systematic information about trends in criminal activities, but could also allow automated risk assessment on a case by case basis, thus speeding-up border crossing and termination procedures for the very large majority of transport operators (TRANS/WP.30/2001/5, paras. 15-30).

The Expert Group, when validating the Business Opportunity and Problem Statement at its fourth session on 1-2 March 2004, fully recognized the fact that the statement as reflected in underlying Chapter should be judged and analyzed within the context of its historical setting. In 2001, when identifying the existing problems and formulating the challenges/opportunities ahead in the field of computerization of the TIR Procedure, the Ad Hoc Expert Group on Computerization was not in a position to judge a number of developments which would take place in the course of time, which would put some of the issues raised in a different light. In particular, the Expert Group stressed that major achievements had already been obtained with regard to the implementation of a control system for TIR Carnets, where considerable concerted efforts had been undertaken by Customs authorities and the private sector to exchange and share information.

1.1.5 References

References are contained in Annex IX of the Reference Model.

1.1.6 Scope of the project

The scope of the project is to allow for the use of electronic data interchange in the so-called “TIR Carnet life cycle” without changing its basic philosophy.

The following elements of the TIR procedure are inside the scope of the project:

- TIR Carnet life cycle:
 - Issuance and distribution of TIR Carnets;
 - TIR Transport;
 - Return and repository of the TIR Carnets;

The following elements of the TIR procedure are outside the scope of the project:

- Approval of the guarantee chain;
- Approval of the association;
- Approval of transport operators;
- Approval of vehicles;

- Management of a control system for TIR Carnets (Annex 10 of the TIR Convention);
- Administration of the TIR Convention;
- Organization and functioning of the guarantee system.

When outlining the contents of the eTIR Project, the WP.30 and the Expert Group have already identified a number of tasks which shall be included. The key statements are reproduced here after:

- Analysis of the actual and future functioning of the TIR procedure (TRANS/WP.30/2002/5; ExG/COMP/2002/7);
- Development of a standard set of messages allowing for an effective communication between parties involved (ExG/COMP/2002/5);
- Preparation of the required amendments to the TIR Convention (TRANS/WP.30/2002/5; ExG/COMP/2002/7);
- Description of roles and responsibilities of all actors involved in an electronic environment (TRANS/WP.30/2002/7);
- Estimation of the costs generated by a computerized environment (cost/benefit analysis) (TRANS/WP.30/2002/5; ExG/COMP/2002/7);
- Inventory of impact on national administrative procedures and national infrastructure (TRANS/WP.30/2002/7);
- Step-by-step approach to achieve tangible results in the computerization of the TIR procedure (TRANS/WP.30/212);
- Establishment of an international centralized database (TRANS/WP.30/212);
- Management by Customs of data on guarantees, once the guarantor has issued a guarantee to an operator (ECE/TRANS/WP.30/226).

1.1.7 Constraints

This Chapter describes which issues of a technical, political, economical or other nature have to be taken into account when designing and describing the eTIR Project. Some such issues may limit the possibilities for the project, whereas others may represent dependencies or even create opportunities.

The Requirement List of Annex I specifies how each of these constraints has to be addressed.

1.1.7.1 Technical constraints

- Data protection
- Security
- Compatibility, interoperability or interfacing with the following projects
 - NCTS
 - National Customs systems
 - SafeTIR/Cutewise
 - ITDB
 - ASYCUDA, ASYCUDA ⁺⁺, ASYCUDA WORLD
 - UNTDED/ISO7372
 - UNeDocs (project)
 - WCO data sets and data model

- A complete migration overnight towards a computerized environment is not realistic (a step by step implementation is required).
- Use only future-proof systems and standards
- Character set and coding management

1.1.7.2 Political/legal constraints

- The TIR Convention should be changed as little as possible.
- Certain Contracting Parties may not want to directly exchange information with other Contracting Parties.
- The computerisation should not result in the exclusion of Contracting Parties from the TIR system.
- Data protection laws (e.g. business secrecy, privacy of physical persons law, governmental data protection)
- It may be a legal requirement that the national language of the country of departure is used.

1.1.7.3 Financial / Economic constraints

- Limited resources available at the national and international level, both at the private and the public sector.
- Budgeting procedure might take up to 50 months in certain countries. National investments should be planned long in advance.
- Financial support necessity

1.1.7.4 Other constraints

- Prioritisation and timing
- IT knowledge in countries (human constraints)

1.1.8 Stakeholders' needs

1.1.8.1 Needs of Customs administrations

Functional needs of Customs

- Real time information
- Advance cargo information
- International Guarantee management for Customs
- International validation of the authorisation of the TIR Carnet holders against the ITDB (Authorisation, Withdrawal, ...)
- Reports with statistical information
- Status of the TIR transport to be available

Functional needs of guarantors (in the view of Customs)

- Termination notification
- Discharge notification
- Status of the TIR transport to be available

Functional needs of the private sector (in the view of Customs)

- Status of the TIR transport to be available

Additional data needs for Customs

- Consignee
- EU: need of consignor data

1.1.8.2 Needs of the transport industry

- Keep the TIR System accessible for new Contracting Parties and small transporters meeting the requirements of Annex 9;
- Ensure the TIR system to be easy to use and competitive in comparison with another means of guaranteeing the delivery of goods to customs office of destination;
- Develop standardized instructions for all the participants of the TIR System with the aim to eliminate disconnected actions and human element causing mistakes while working with the system;
- Facilitate the movement of goods through faster and more standardized Customs procedures;
- Reduce the risk of providing the guarantee by rapidly securing termination and making data timely and available 100%;
- Quickly identify and eliminate from the system those who perpetrate fraud;
- Safeguard data from unauthorized access and occasional damage or loss;
- Increase the level of transparency and confidence between the industry and competent authorities.
- Standard declaration mechanism
- Status of the TIR transport to be available

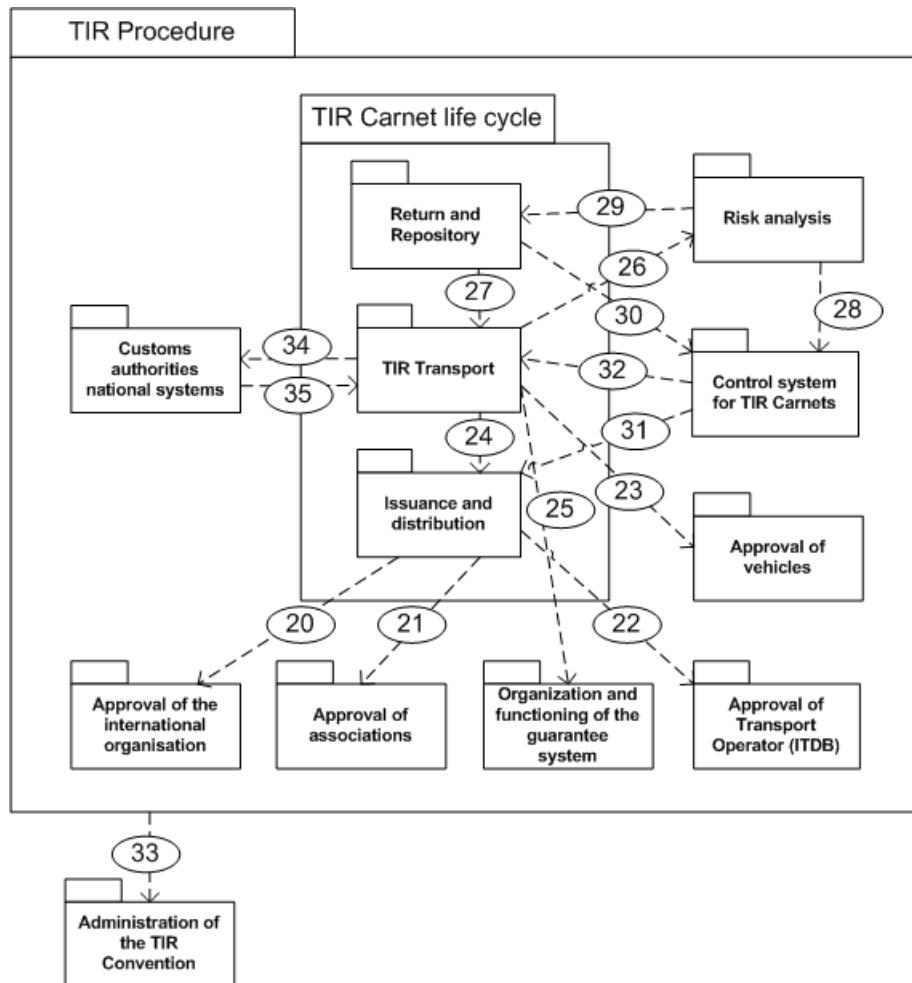

1.2 TIR procedure domain

The TIR procedure is a very wide domain, composed of numerous interconnected systems. As seen under 1.1.5, the current project is limited in its scope to a part of the overall TIR procedure: the TIR Carnet.

1.2.1 TIR Procedure package diagram

The following package diagram is intended to show the division of the domain into systems and the dependencies among those systems.

Figure 1.2
TIR procedure package diagram

1.2.2 TIR Procedure package diagram description

Table 1.1
TIR procedure package diagram description

Name	TIR procedure package diagram
Description	<p>The TIR procedure is an International Customs Procedure governed by the TIR Convention, 1975. A detailed description of the procedure can be found in the introduction of the TIR Handbook distributed by the TIR Secretariat.</p> <p>The TIR procedure is composed of numerous interconnecting systems to allow for the functioning of the procedure. The system we are most interested in for the current project is the TIR Carnet system. It can be defined by listing all functions and uses of the TIR Carnet. It is composed of sub-systems, namely: the issuance and distribution system, the TIR transport system and the return and repository.</p> <ul style="list-style-type: none"> The function of the issuance and distribution sub-system by the international organization and the national associations is to provide transport operators with TIR Carnets in order to allow them to perform TIR transports; The TIR transport sub-system is the central system of the TIR procedure. It links the transport industry to the customs offices involved in a TIR transport and allows them to exchange the necessary information;

- The transport operators, the associations and the international organization manage the return and repository sub-system. Its function is to centralize the storage of the used TIR Carnet and to check that no problems have occurred during the TIR transport;

Other systems outside the scope of the current project but of importance for the well functioning of the TIR procedure are:

- Customs authorities national systems;
- Approval of the guarantee chain;
- Approval of the association;
- Approval of transport operators;
- Approval of vehicles;
- Control system for TIR Carnets;
- Organization and functioning of the guarantee system;
- Risk analysis system;
- Administration of the TIR Convention.

In the package diagram, the dependencies between all systems are indicated with dashed arrows. The dependencies are numbered according to the Requirements 20 to 35 of which they are the consequences.

Actors	Transport industry, Customs, Guarantee chain.
Performance Goals	Facilitate border crossing in international transport of goods.
Preconditions	Ratification of the TIR Convention by Contracting Parties and implementation of the TIR system.
Requirements Covered	20-35

1.3 TIR Carnet life cycle use cases

Now that we have described the domain, we can concentrate on the scope of the eTIR Project, the TIR Carnet system.

1.3.1 Actors of the TIR Carnet life cycle

Before describing the use cases of the TIR Carnet life cycle, we will identify all the actors who play a role in the course of the TIR Carnet life cycle. By definition any person, entity or system playing a role in the TIR Carnet life cycle is an actor. The actors have already been identified when setting the boundaries of the project and they are:

- International organization,
- National association,
- Competent authorities (Customs and other),
- TIR Carnet holder,
- Administrative Committee of the TIR Convention (AC.2).

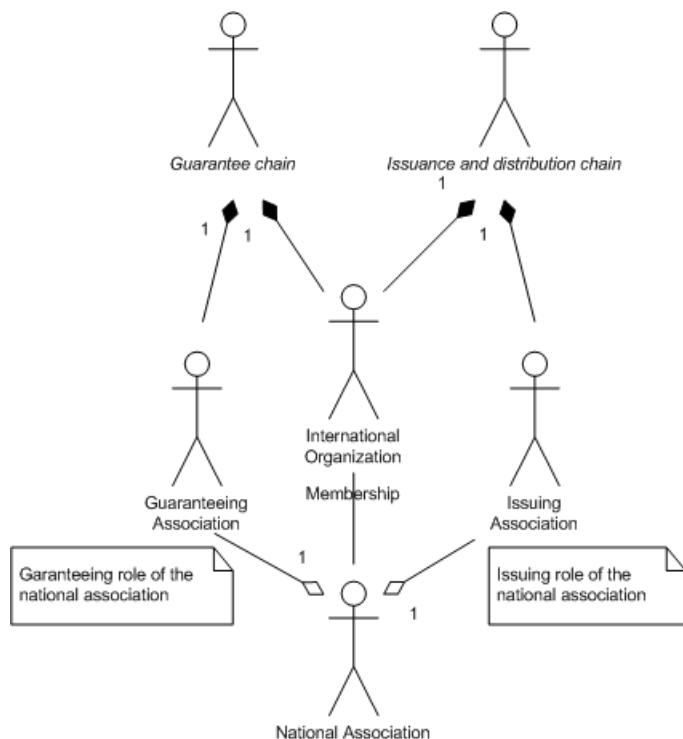

Each actor plays one or more roles in the course of the TIR Carnet life cycle. Therefore, the actors are often considered and defined according to one of the roles they play. For example, the actor “Customs authority” can play the role of Customs office of entry (en route) for incoming TIR transports but it can also play the role of Customs office of exit (en route) for outgoing TIR transports.

As a consequence, we will identify all aspects of each actor through the roles he performs within the context of the TIR Convention. The following description of the actors by means of the role they play is essential for understanding the rest of the chapter.

1.3.1.1 International organizations and national associations

International organizations and national associations can be described according to their two main roles in the TIR Carnet life cycle: the guaranteeing role and the issuing role. Figure 1.5 shows the relation between the international organizations and national associations, taking account of these roles.

**Figure 1.3
International organizations and national associations**

1.3.1.2 Competent authorities

The various competent authorities (Customs and other) can be structured in such a way that they reflect the generalization of the roles they have in common. Figure 1.4 reflects the various aspects of the competent authorities (mainly Customs authorities) in the course of the TIR Carnet life cycle.

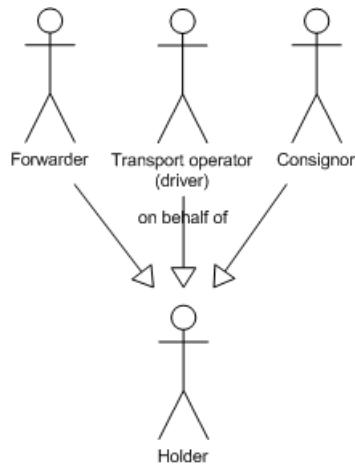

**Figure 1.4
Customs authorities and other authorities**

1.3.1.3 TIR Carnet holder

The TIR Carnet holder fulfils a central role in the TIR Carnet life cycle. This role is reflected in various use cases. Among these, the use case in which he provides data on the TIR transport and certifies them is certainly a crucial one. It can also happen that other persons, on his behalf, fill-in and certify the information that he must provide. Figure 1.6 shows the TIR Carnet holder and the agents who may provide data on his behalf.

Figure 1.5
TIR Carnet holder and agents

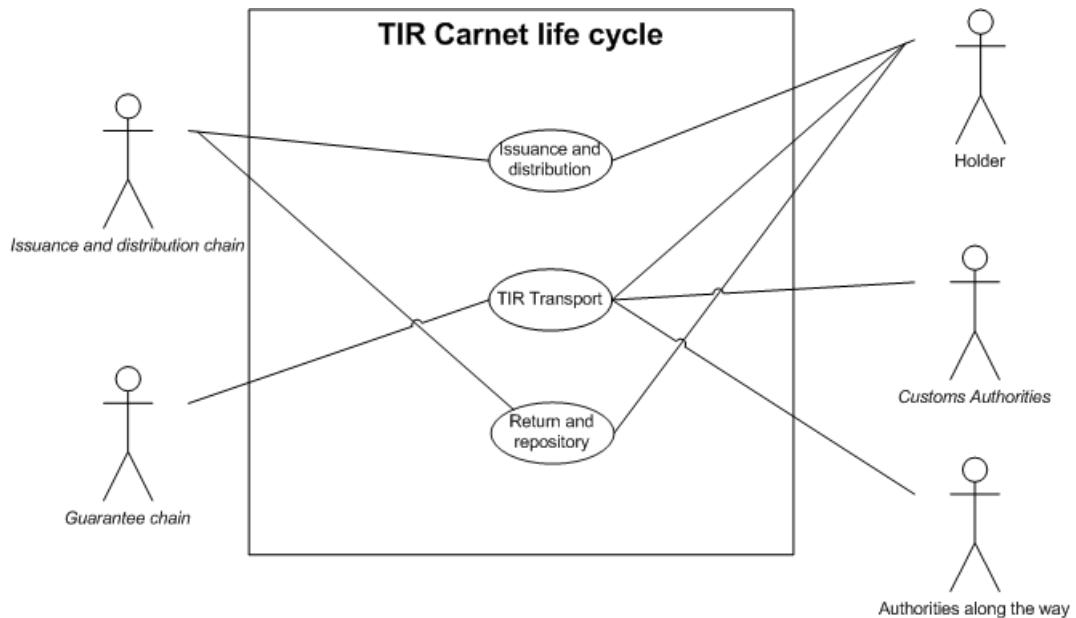

1.3.1.4 Administrative Committee of the TIR Convention (AC.2)

The AC.2 has a supervisory role with regard to the TIR Carnet life cycle. We will see in the detailed analysis of the use cases that some use cases in connection with that role are performed by the TIRExB.

1.3.2 TIR Carnet life cycle use case diagram

Figure 1.6
TIR Carnet life cycle use case diagram

1.3.3 TIR Carnet life cycle use case description

Table 1.2
TIR Carnet life cycle use case description

Name	TIR Carnet life cycle use case
Description	High-level view of all activities related to the paper TIR Carnet and the actors involved.
Actors	Guarantee chain, Customs authorities, Holder, Authorities along the way
Performance Goals	Allows the exchange of information between parties involved.
Preconditions	<ul style="list-style-type: none"> • Approval of the guarantee chain; • Approval of the association; • Approval of transport operators; • Approval of vehicles; • Management of the guarantee chain; • Administration of the TIR Convention.
Postconditions	-
Scenario	<p>An international organization prints (organizes the printing) of TIR Carnets and distributes them to the authorized national associations. An authorized transport operator (TIR Carnet Holder) can then request a TIR Carnet from his national association. The national association issues the TIR Carnet to the TIR Carnet Holder. The national association may in certain cases return the TIR Carnet to the international organization instead of issuing it to a TIR Carnet holder.</p> <p>The TIR Carnet is then presented to the Customs office of departure within the limits of its validity by the holder to perform a TIR Transport. The TIR Carnet does not only represent the</p>

international Customs document, but also the guarantee.

Once the TIR Transport has ended, the TIR Carnet is returned to the holder, then to the association and finally to the international organization. In case the validity of a TIR Carnet has expired before it is presented to the Customs office of departure by the TIR Carnet holder, he must return it unused to the national association, which sends it back to the international organization.

Alternative Scenario In case of fraud, Customs authorities may keep the TIR Carnet until the case is solved.

Figure 1.7
TIR Carnet life cycle activity diagram

1.4 Elaboration of use cases

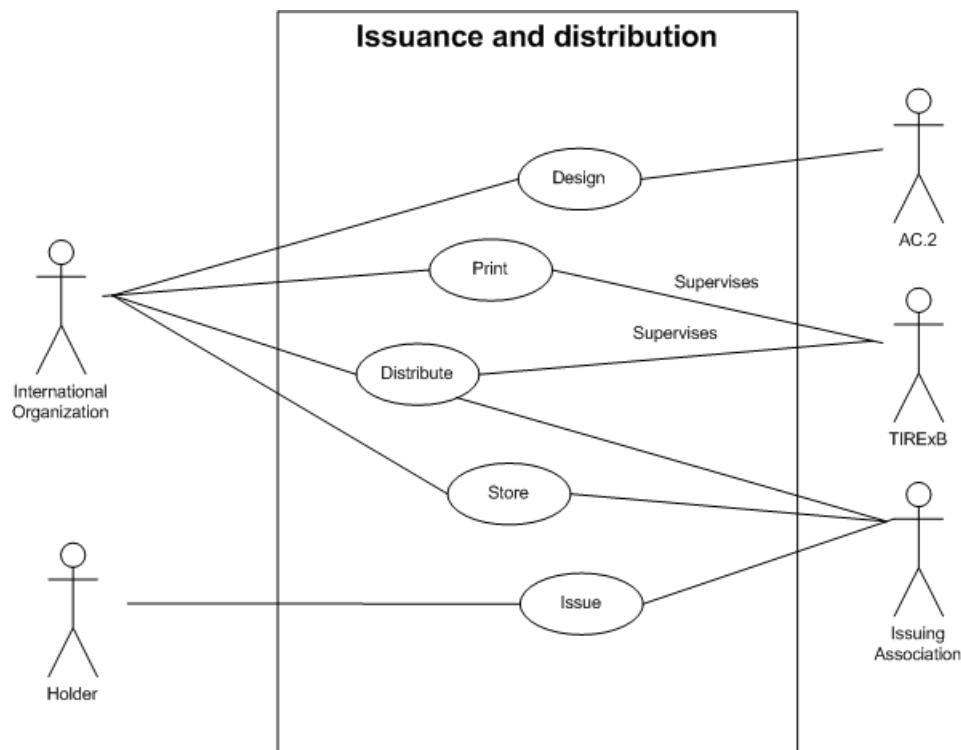

This chapter aims at providing a detailed view of the procedural aspects of the TIR system. It focuses on the most common procedure and does not describe in details occasional procedures. These latter are only identified as alternative scenarios and not dealt with in more details.

1.4.1 Issuance and distribution use case

1.4.1.1 Issuance and distribution use case diagram

Figure 1.8

Issuance and distribution use case diagram

1.4.1.2 Issuance and distribution use case description

Table 1.3

Issuance and distribution use case description

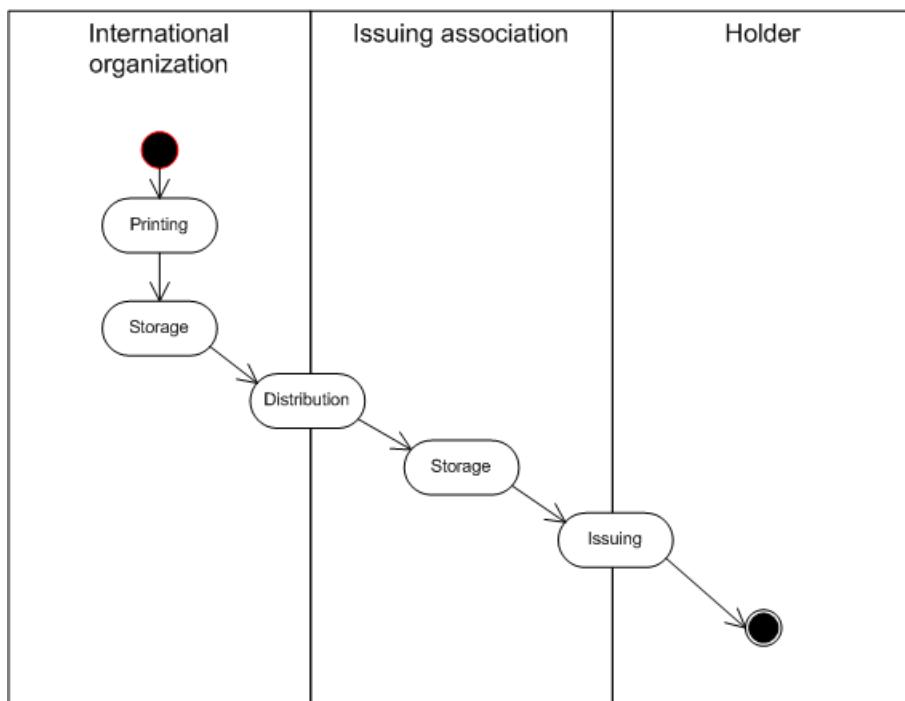

Name	Distribution and issuance use case
Description	In the course of this use case, the TIR Carnet is produced (printed, stored), distributed and issued to authorized transport operators.
Actors	AC.2, international organization, issuing association, holder of TIR Carnet, TIRExB
Performance Goals	To provide authorized TIR Carnet holders with TIR Carnets, the TIR Carnet being a Customs declaration to place goods under the TIR procedure (transit procedure) and representing an internationally recognized financial guarantee to Customs authorities of Contracting Parties with which a TIR operation can be established, in accordance with the provisions of the TIR Convention

Preconditions	<p>The international organization is authorized by AC.2 to centrally print and distribute TIR Carnets in accordance with Art. 6.2bis of the TIR Convention and Annex 8, Article 10 (b) of the TIR Convention under the supervision of the TIR Executive Board</p> <p>The national association is authorized by its national Customs authorities, according to Art. 6.1 of the TIR Convention and Annex 9, Part I of TIR Convention, to issue TIR Carnets and to act as guarantor. The national association should be affiliated to an international organization.</p> <p>Transport operators have to be authorized by competent Customs authorities, according to Art 6.4 and 6.5 of the TIR Convention and Annex 9, Part II of TIR Convention, in order to obtain TIR Carnets from their issuing association and to utilize TIR Carnets, according to Art. 6.3.</p>
Postconditions	<p>In accordance with the TIR Carnet life cycle use case, this use case can be followed by:</p> <ul style="list-style-type: none"> - the TIR transport use case; - the Return and repository use case.
Scenario	<p>While respecting the design, elaborated under the auspices of the United Nations Economic Commission for Europe and endorsed by AC.2, the international organization is responsible for printing TIR Carnets. The TIR Carnets are stored temporarily before being distributed by the international organization to its affiliated national issuing associations.</p> <p>The issuing association, possibly after another storage period, fills-in fields 1 to 4 of the TIR Carnet cover page and issues the TIR Carnet to authorized TIR Carnets holders, according to Art.6.3 of the TIR Convention (to national or, in some situations, to foreign TIR Carnet holders, respecting, in such case, special requirements) within the quota fixed by the association.</p> <p>The TIRExB supervises the centralized printing and distribution in accordance with Annex 8, Article 10 (b) of the TIR Convention.</p>
Alternative Scenario	<p>The main scenario does not take into account that the TIR Carnet may be stolen, lost or not valid. The following scenarios are possible:</p> <ol style="list-style-type: none"> 1. The TIR Carnet is lost/stolen/not valid after printing but before being stored at the premises of the international organization; 2. The TIR Carnet is lost/stolen/not valid while still stored at the premises of the international organization; 3. The TIR Carnet is lost/stolen/not valid during transport between the international organization and the national association; 4. The TIR Carnet is lost/stolen/not valid, while in possession of the national association, before being issued; 5. The TIR Carnet is lost/stolen/not valid after having been issued to the authorized TIR Carnet holder; 6. The TIR Carnet is returned by the national association to the international organization before being issued.
Special requirements	<p>Data on authorized TIR Carnet holders are stored in the International TIR Database (ITDB) maintained by the TIR Executive Board and TIR Secretariat.</p> <p>Data on lost/stolen TIR Carnets is maintained by the international organization in an electronic control system.</p>
Extension	During the distribution and issuance, information will be sent to the

Points	electronic control system maintained by the international organization.
Requirements Covered	-

1.4.1.3 Activity diagram of the issuance and distribution use case

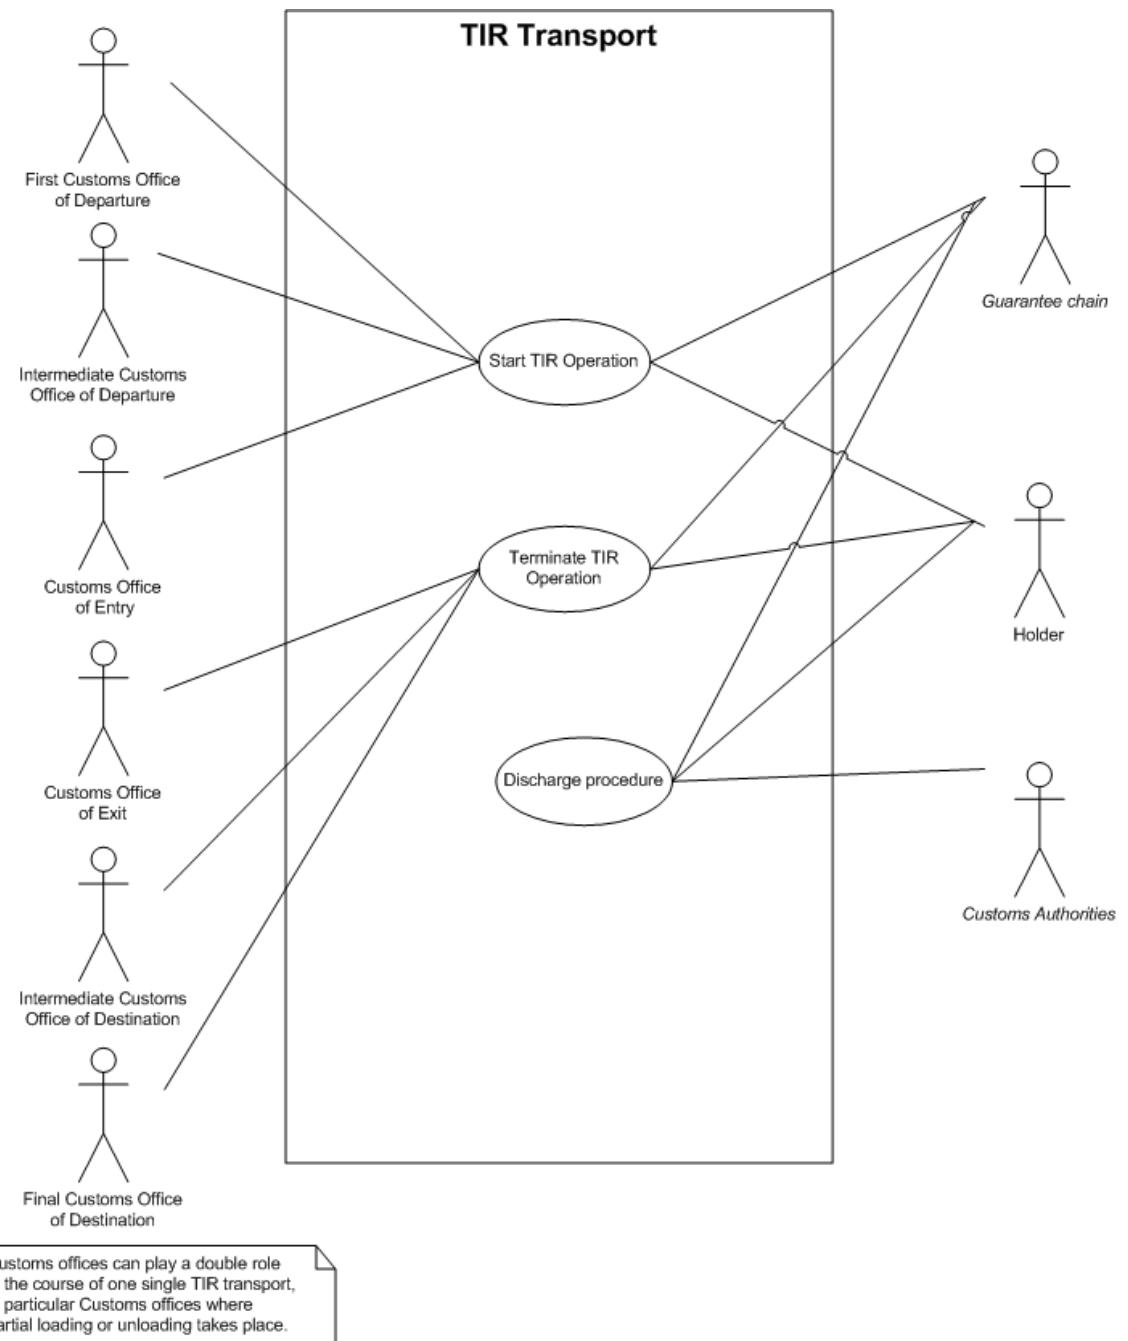

Figure 1.9
Issuance and distribution activity diagram

1.4.2 TIR transport use case

1.4.2.1 TIR transport use case diagram

Figure 1.10
TIR transport use case diagram

1.4.2.2 *TIR transport use case description*

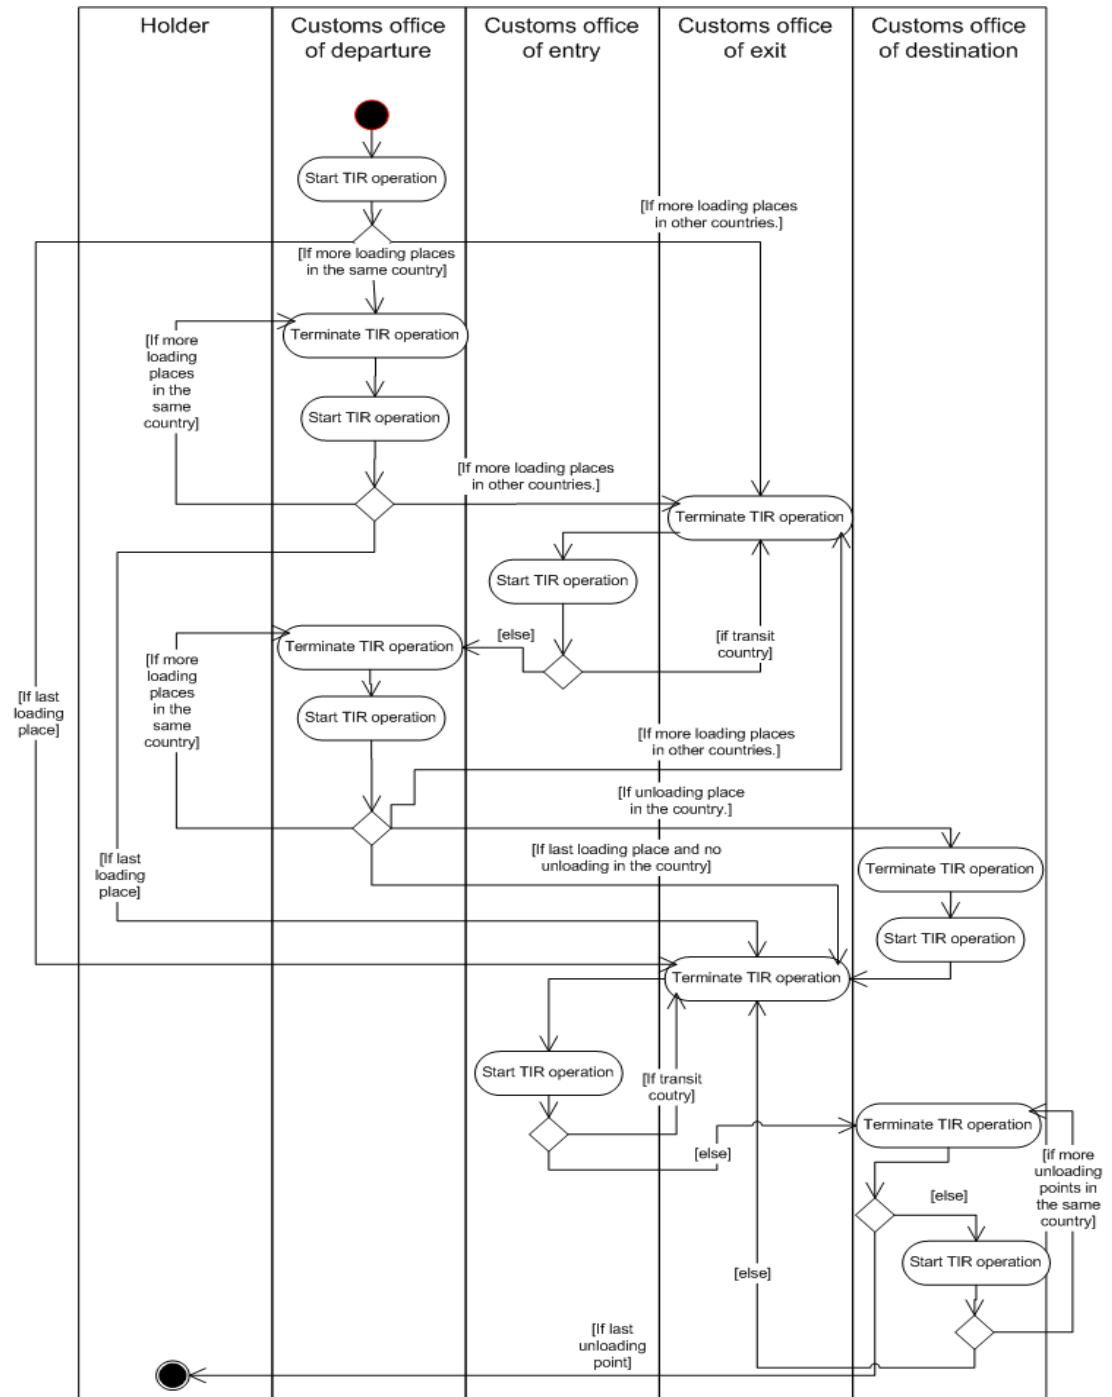

Table 1.4
TIR transport use case description

Name	TIR Transport Use Case
Description	This use case describes the transport of goods from the first Customs office of departure to the final Customs office of destination under the TIR procedure, where borders between countries (Customs territories) are crossed.
Actors	Customs authorities, Guarantee chain, TIR Carnet holder
Performance Goals	Reduce the time spent at all concerned Customs offices during international transport of goods performed under cover of a TIR Carnet in accordance with the provisions of the TIR Convention
Preconditions	<p>The authorized TIR Carnet holder must be issued with a valid TIR Carnet to begin the transport. The applicability of the TIR Carnet may depend on the type of the goods to be shipped (e.g. tobacco and alcohol require "Tobacco and Alcohol" TIR Carnets). For the transport of heavy or bulky goods, the TIR Carnet should bear the relevant inscription.</p> <p>The TIR transport has to be performed with an approved vehicle and/or container unless heavy or bulky goods are transported.</p> <p>The TIR transport must be guaranteed by associations approved in accordance with the provisions of Article 6 of the TIR Convention.</p>
Postconditions	<p>In accordance with the TIR Carnet life cycle use case, this use case shall be followed by:</p> <ul style="list-style-type: none"> - The Return and repository use case <p>After the TIR transport, the goods shall be placed under another Customs regime.</p>
Scenario	<p>Because the TIR transport is a sequence of TIR operations, the scenario of a TIR transport is represented here as a succession of TIR operations, each one being described in two steps. Each step 1-step 2 sequence constitutes a single TIR operation.</p> <p>Step 1: Start of the TIR operation at the first Customs office of departure. The Customs officers check the conformity of the TIR Carnet, the goods, the loading compartment, as well as the approval certificates for vehicle and/or container and the commercial and transport documents. Seals are affixed to the loading compartment. The Customs officer fills-in and stamps all the relevant parts of the TIR Carnet pages including counterfoil No. 1. Upon acceptance of the TIR Carnet by the first Customs office of departure, the guarantee is activated (Art. 8, 4).</p> <p>Step 2: Termination of the TIR operation at the Customs office of exit <u>en route</u>. The Customs officer stamps counterfoil No. 2, takes out voucher No. 2 and sends it to the Customs office of departure.</p> <p>Steps 1 and 2 are repeated if there are several Customs offices of departure (maximum 3 in one or several countries (Customs territories)). In such case, in every consecutive Contracting Party <u>en route</u> transited by the TIR transport, steps 1 and 2 are repeated with the following differences: the Customs office which carries out step 1 is called Customs office of entry <u>en route</u>. It checks the seals, the loading compartment and fills-in the relevant fields of vouchers 1 and 2 and counterfoil No. 1.</p> <p>Step 2 is equal to the previous step 2 at the Customs office of exit <u>en route</u>.</p>

	<p>In the country (Customs territory) of destination, step 1 is identical to the previous step 1 at the Customs office of entry <u>en route</u>. The Customs office which carries out step 2 is called the Customs office of destination. In step 2, Customs officers take off the seals, stamp counterfoil No. 2, take out voucher No. 2 and send it to the Customs office of entry <u>en route</u>. Step 2 encompasses the termination of the TIR operation for this country (Customs territory) as well as the certification of termination for the goods arrived at the Customs office of destination.</p> <p>The validity of the TIR Carnet can be checked by any Customs office of departure, exit <u>en route</u>, entry <u>en route</u> and of destination, using, for example, CUTE-Wise. All Customs offices have the right to remove the seals and to check the goods (see Article 5). In such case, new seals have to be affixed and the appropriate fields of the TIR Carnet have to be filled-in accordingly (box 16, box 3 of counterfoil 1 or box 4 of counterfoil 2).</p>
Alternative Scenario	<p>The main scenario does not take account of the following scenarios:</p> <ol style="list-style-type: none"> 1. Falsified acceptance of a TIR Carnet: fraudsters may attempt to falsify the acceptance of a genuine TIR Carnet by using false Customs stamps and seals; 2. Incident or accident <u>en route</u>: in such case, the so-called "certified report" should be filled-in by the competent authorities. In case the vehicle can no longer be used, the goods may be reloaded on a different truck and a new TIR Carnet is opened. If the goods are destroyed, competent authorities should state this fact. In this case, the TIR transport cannot be terminated at the intended Customs office(s) of destination but has to be terminated at the nearest Customs office <u>en route</u>. The TIR Carnet may also be amended by competent authorities so that the TIR Transport can continue with the same TIR Carnet; 3. Under some conditions, the TIR Transport can be suspended (Art. 26).

Requirements Covered	-

1.4.2.3 Activity diagram of the TIR transport use case

Figure 1.11
TIR transport activity diagram

1.4.2.4 Structured description of activity diagrams of the TIR transport use case

The TIR transport is a sequence of TIR operations that shall start at the first Customs office of departure and terminate at the final Customs office of destination.

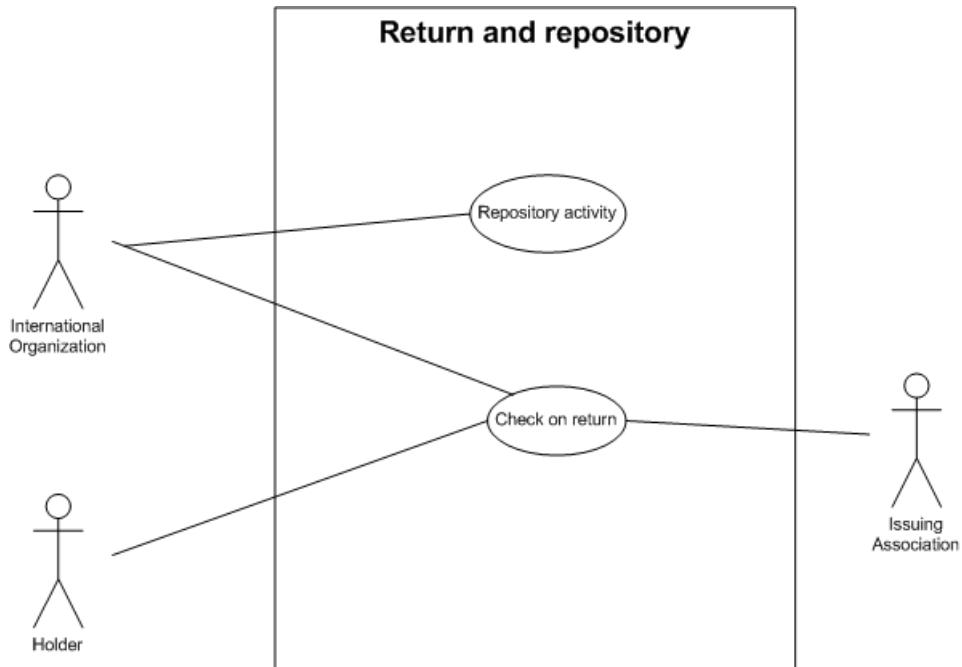

The TIR Transport **BEGINS** when the first Customs office of departure starts the first TIR operation.

- If other loading point in the same country (Customs territory): **go to 1**;
 - If additional loading will take place in other countries (Customs territories): **go to 2**;
 - If the loading phase is terminated: **go to 3**;
1. At the next loading point, the intermediate Customs office of departure will terminate the current TIR operation (acting as Customs office of destination) before starting a new TIR operation.
 - If there is another loading point in the same country (Customs territory) and if the number of loading points is still inferior to 3: **repeat 1**;
 - If additional loading will take place in other countries (Customs territories) and if the number of loading points is still inferior to 3: **go to 2**.
 - If the loading phase is terminated: **go to 3**.
 - 2. The Customs office of exit (en route) of the country (Customs territory) will terminate the current TIR operation and the Customs office of entry (en route) of the following country (Customs territory) will start a new TIR operation.
 - If it is a transit country (Customs territory): **repeat 2**.
 - If it is a country (Customs territory) where a loading will take place if the number of loading points is still inferior to 3: **go to 2.1**.
 - 2.1. At the next loading point, the intermediate Customs office of departure will terminate the current TIR operation (acting as Customs office of destination) before starting a new TIR operation.
 - If there is another loading place in the same country (Customs territory) and if the number of loading points is still inferior to 3: **repeat 2.1**;
 - If additional loading will take place in other countries (Customs territories) and if the number of loading points is still inferior to 3: **go to 2**;
 - If the loading phase is terminated and there is no unloading in the current country (Customs territory): **go to 3**;
 - If the loading phase is terminated and there is an unloading point in the current country (Customs territory) and if the number of loading points is still inferior to 3: **go to 2.1.1**.
 - 2.1.1. At the first unloading point, the intermediate Customs office of destination will terminate the current TIR operation before starting a new TIR operation (acting as Customs office of departure).
 - The maximum number of loading and unloading places is limited to 4 and when reaching 2.1.1 the number of loading and unloading is already 3. Thus, only one more unloading point is possible. The goods loaded in one country (Customs territory) cannot be unloaded in the same country (Customs territory). Therefore, the next step has to be the border: **go to 3**.
3. The Customs office of exit (en route) of the country (Customs territory) will terminate the current TIR operation and the Customs office of entry (en route) of the following country (Customs territory) will start a new TIR operation.
 - If it is a transit country (Customs territory): **repeat 3**.
 - If it is a country (Customs territory) where an unloading will take place if the number of loading + the number of unloading points is still inferior to 4: **go to 3.1**.
 - 3.1. At the unloading point, the Customs office of destination will terminate the current TIR operation.
 - If it is the last unloading point: **END**.
 - If there are other unloading points: **go to 3.1.1**.
 - 3.1.1. At the unloading point, the Intermediate Customs office of destination will start a new TIR operation (acting as Customs office of departure).
 - If there are other unloading points in other countries (Customs territories) and if the number of loading + the number of unloading points is still inferior to 4: **go to 3**.
 - If there are other unloading points in the same country (Customs territory) and if the number of loading + the number of unloading points is still inferior to 4: **go to 3.1**.

1.4.3 Return and repository use case

1.4.3.1 Return and repository use case diagram

Figure 1.12
Return and repository use case diagram

1.4.3.2 Return and repository use case description

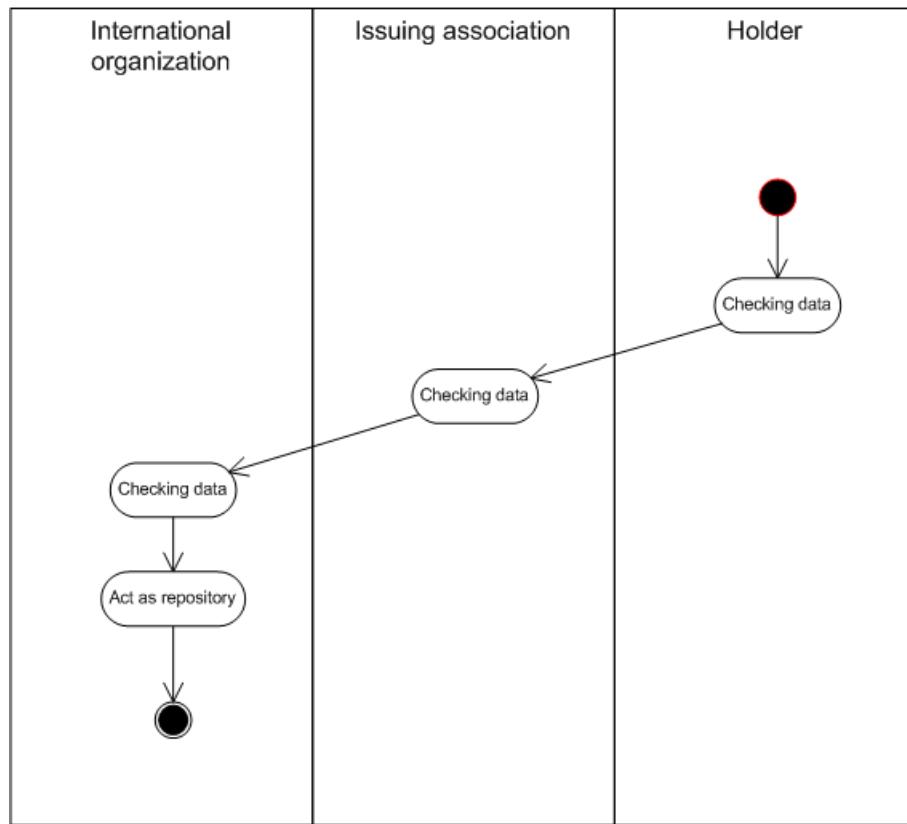

Table 1.5
Return and repository use case description

| | |
|-------------------|---|
| Name | Return and repository use case |
| Description | The TIR Carnet is sent back by the TIR Carnet holder to the international organization, via his national association, to centrally store the used or unused TIR Carnets. |
| Actors | TIR Carnet holder, national association, international organization. |
| Performance Goals | Store at a central point the evidence of the termination for the duration of the liability of the international guaranteeing chain. |
| Preconditions | In accordance with the TIR Carnet life cycle use case, this use case can be launched in two cases: <ul style="list-style-type: none"> - The TIR Carnet was issued to a TIR Carnet holder, who used it for a TIR Transport; - The TIR Carnet was issued to but not used by a TIR Carnet holder (usually because the TIR Carnet expired) |
| Postconditions | - |
| Scenario | After having checked the TIR Carnet, the TIR Carnet holder returns it to the national association that issued him the TIR Carnet (within the deadline fixed by the association).
The national association checks whether the TIR Carnet was used properly and whether it was terminated (check of stamps against the electronic control system maintained by the international organization).
The national association returns the TIR Carnets to the international organization. |

| | |
|----------------------|---|
| | The international organization checks the TIR Carnets and archives them. All returned TIR Carnets are physically stored at the international organization for at least the period during which its liability can be invoked according to the TIR Convention. |
| Alternative Scenario | <p>The main scenario does not take account of the following scenarios:</p> <ol style="list-style-type: none">1. The TIR Carnet is lost/stolen after the TIR Transport has ended; at the premises of the holder, the national association or the international organization;2. It may happen that the TIR Carnet is kept by Customs authorities and not returned to the TIR Carnet holder. In such case, Customs are encouraged to provide the TIR Carnet holder with the return slip which he should return to the national association. |

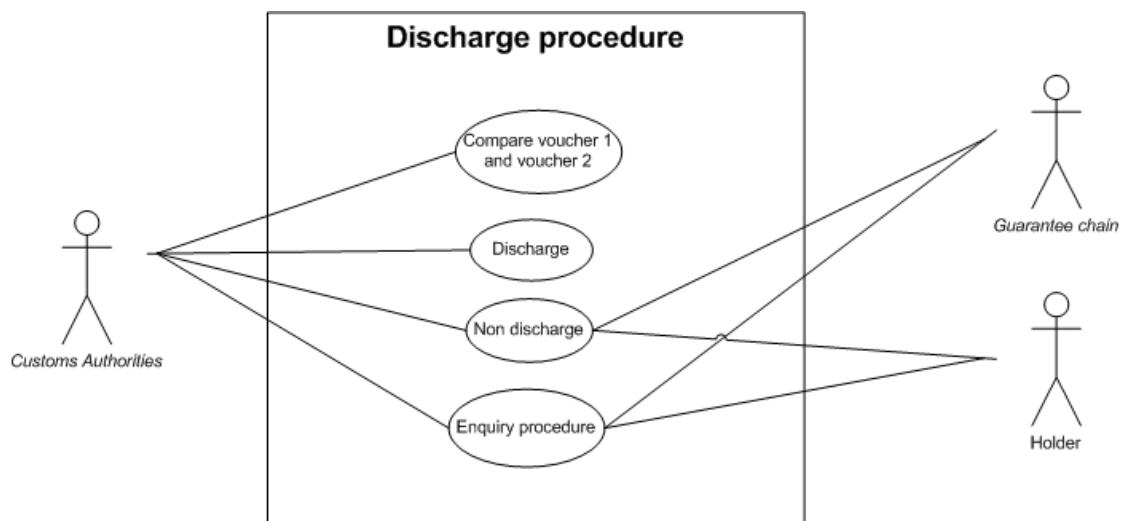

Figure 1.13
Return and repository activity diagram

1.4.4 Discharge procedure use case

1.4.4.1 Discharge procedure use case diagram

Figure 1.14
Discharge procedure use case diagram

1.4.4.2 Discharge procedure use case description

Table 1.6
Discharge procedure use case description

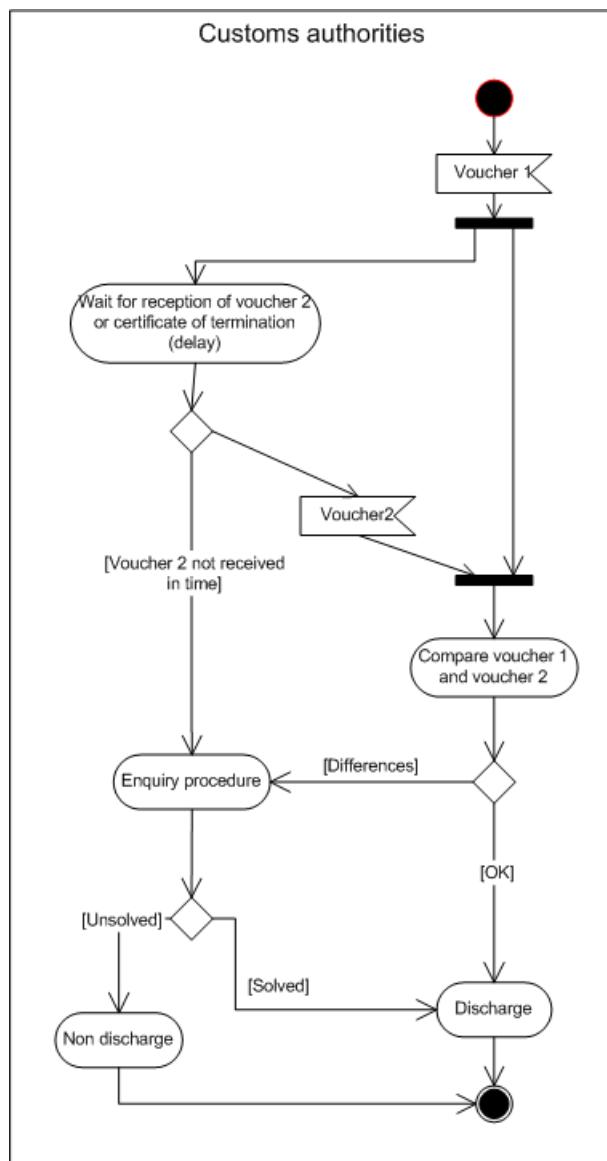

| | |
|----------------------|--|
| Name | The discharge procedure for a TIR operation |
| Description | Evaluation of the data or information available at the Customs office of destination or exit (<u>en route</u>) and those available at the Customs office of departure or entry (<u>en route</u>). |
| Actors | Customs authorities, Holder, Guarantee Chain |
| Performance Goals | Determine whether a TIR operation has been terminated correctly, in order to release the holder of his responsibilities and the national association of its guarantee. |
| Preconditions | This use case is launched after the start of a TIR operation. |
| Postconditions | - |
| Scenario | Once the TIR operation has been terminated, the Customs office of destination or exit (<u>en route</u>) sends back voucher No. 2 to the Customs office of departure or entry (<u>en route</u>) or to a centralized Customs office. Customs authorities compare vouchers No. 1 and No. 2 in order to establish the discharge. |
| Alternative Scenario | <p>The main scenario does not take account of the following scenarios:</p> <ol style="list-style-type: none"> 1. Instead of sending vouchers by post, an exchange of electronic messages between different Customs offices may take place; 2. In case the certificate of termination of the TIR operation has been obtained in an improper or fraudulent manner or in case no termination has taken place, neither the holder would be released of his responsibilities nor the national association of its guarantee; |

Extension
Points

Requirements
Covered

1.4.4.3 Activity diagram of the discharge procedure use case

Figure 1.15
Discharge procedure activity diagram

1.4.4.4 Structured description of the activity diagram of the discharge use case

Two major scenarios can be envisaged depending on the national practice:

- a) The discharge procedure is performed by the Customs office that has started the TIR operation; in that case the Customs office that has terminated the TIR operation sends either voucher No. 2 or the certificate of termination to the Customs office having started the TIR operation.
- b) The discharge procedure is performed by a central Customs office; in that case both the Customs office that has started the TIR operation and the Customs office that has terminated the TIR operation send respectively voucher No. 1 and voucher No. 2 or the certificate of termination to a central Customs office.

Except from these differences all three scenarios are mainly similar.

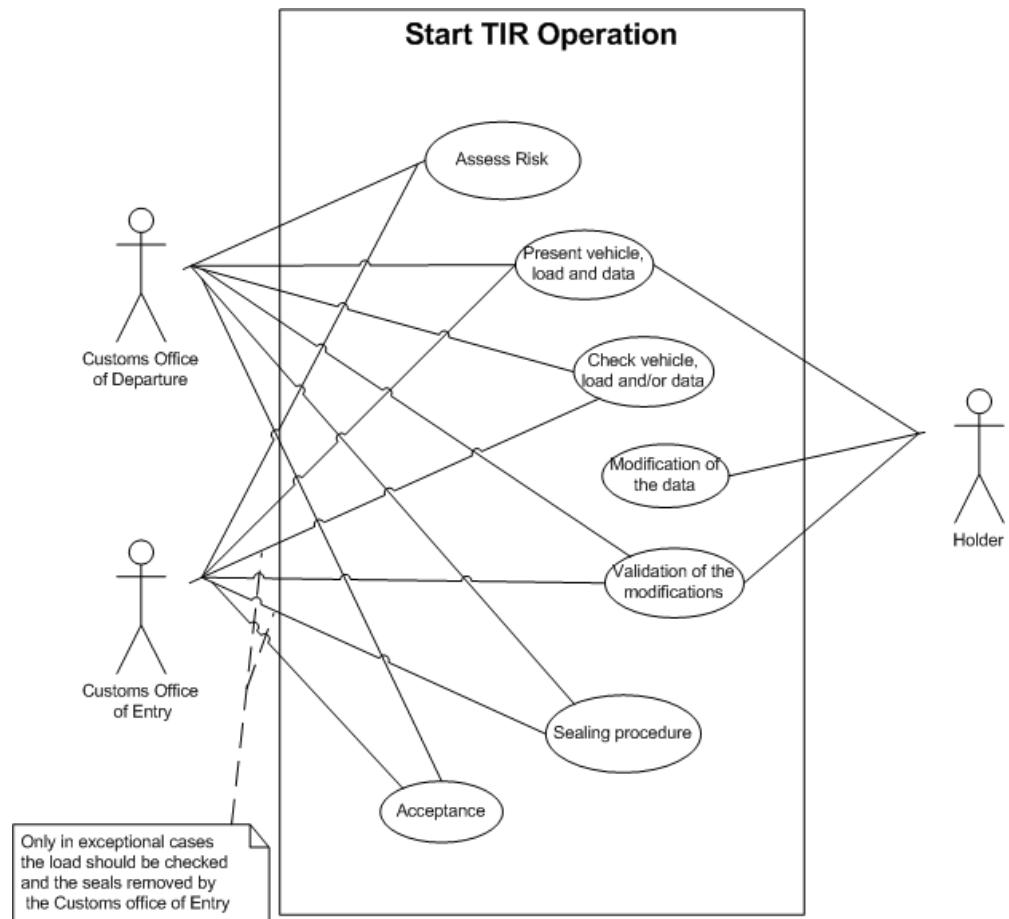

1. The discharge procedure **BEGINS** when the Customs office responsible for the discharge receives voucher no. 1 duly filled-in. A deadline for the reception of voucher No. 2 is then fixed.

- If voucher No. 2 arrives before the deadline: **go to 2**
 - If voucher No. 2 does not arrive before the deadline: **go to 3**
2. The information between voucher No. 1 and voucher No. 2 (or the certificate of termination) is compared.
 - If the comparison leads Customs to the assumption that a Customs infringement has taken place and taxes and duties are due: **go to 3**
 - If the comparison does not lead Customs to the conclusion that a Customs infringement has taken place and taxes and duties are due: **go to 4**
 3. Inquiry procedures are launched:
 - If the inquiry procedure concludes that a Customs infringement has not taken place and taxes and duties are not due: **go to 4**
 4. The TIR operation is discharged: **END**
-

1.4.5 Start TIR operation use case

1.4.5.1 Start TIR operation use case diagram

Figure 1.16
Start TIR operation use case diagram

1.4.5.2 Start TIR operation use case description

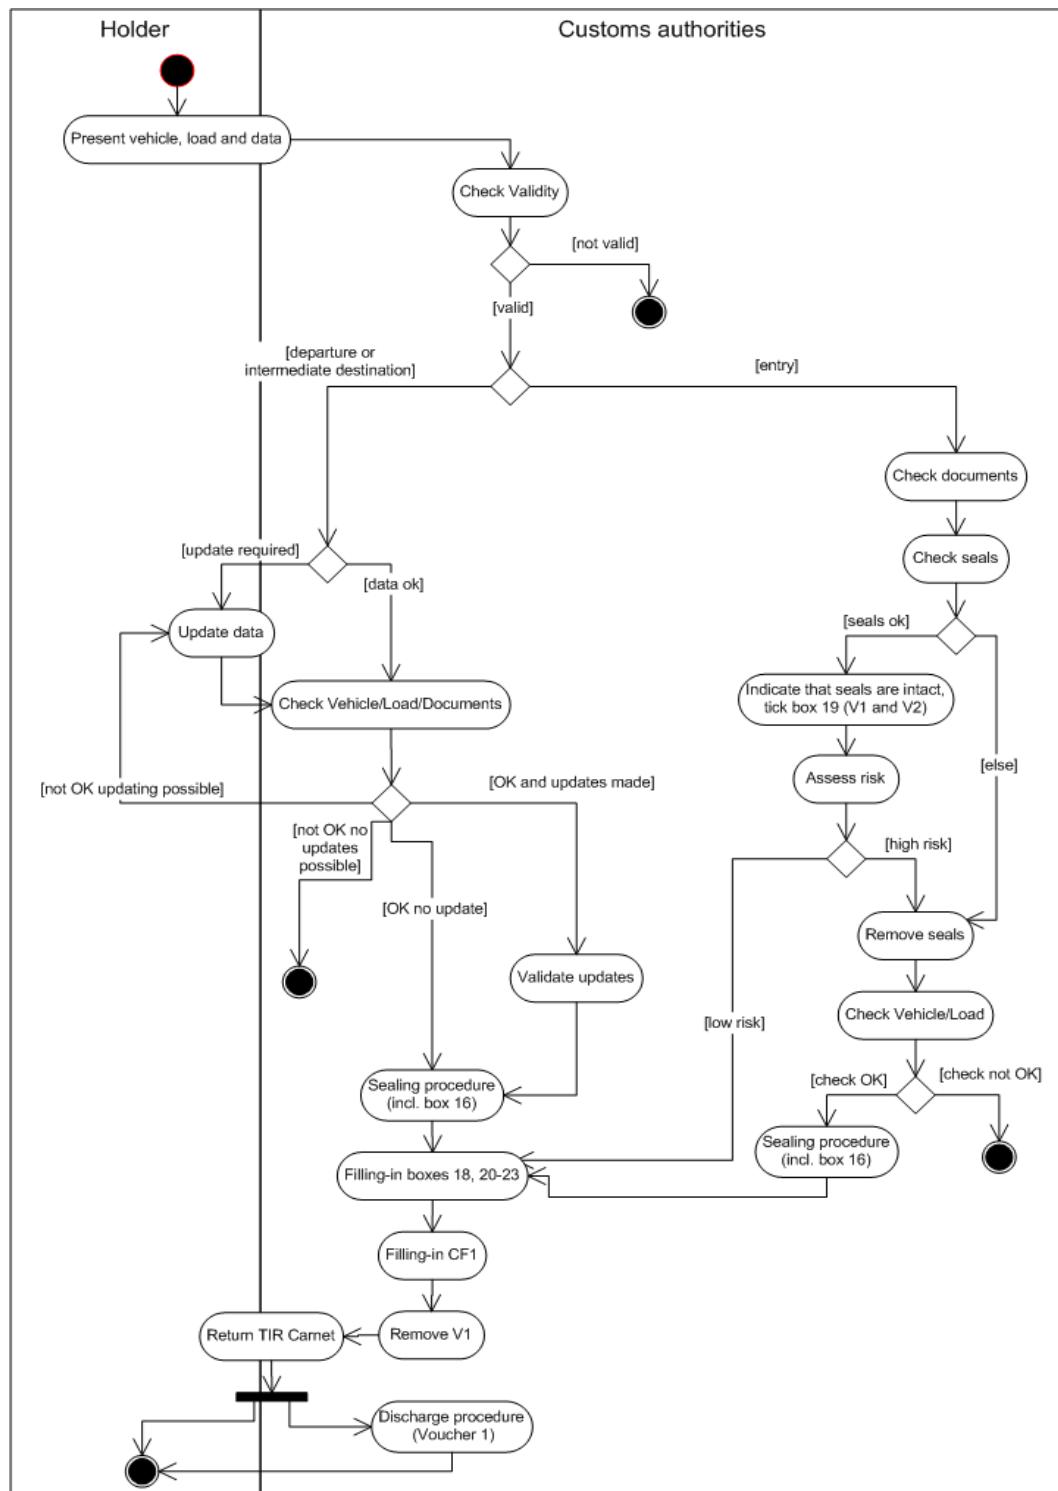

**Table 1.7
Start TIR operation use case description**

| Use Case Name | Start TIR operation use case |
|---|---|
| Use Case Description | The TIR Carnet is filled-in by the TIR Carnet holder and presented with the vehicle and goods to the Customs office of departure; in continuation, TIR Carnet, vehicle and goods have to be presented at intermediate Customs offices of departure and/or Customs offices of entry (<u>en route</u>). |
| Actors | TIR Carnet holder, Customs authorities. |
| Performance Goals | Start a transit procedure in a given country (Customs territory) for a specific leg of the TIR Transport. |
| Preconditions | In accordance with the TIR Transport use case, this use case applies in one of the following situations: <ul style="list-style-type: none"> - At the beginning of the TIR transport: The TIR Carnet holder has provided and validated all information for the TIR transport; - In all other cases: The preceding TIR operation has been terminated. |
| Postconditions | In accordance with the TIR Carnet life cycle use case, this use case is followed by: <ul style="list-style-type: none"> - The termination of the TIR operation. In addition the discharge procedure is launched. |
| Scenario Customs office of Departure | An authorized TIR Carnet holder presents a valid and duly filled-in TIR Carnet, together with the goods and a TIR approved vehicle at the Customs office of departure. The Customs office of departure checks the data of the TIR Carnet and other accompanying documents with the load. The Customs office of departure seals the load compartment and validates the TIR Carnet by inserting the number and identification of the seals in field 16, and by applying the stamp, signature, date and name of the Customs office of departure in field 17 of all vouchers No. 1 and No. 2 of the TIR Carnet. The Customs officer completes fields 18 and 20 to 23 of the vouchers No. 1 and No. 2 corresponding to the TIR operation, completes counterfoil No. 1, removes voucher No. 1 and returns the TIR Carnet to the holder. |
| Scenario Customs office of entry | Upon presentation of the TIR Carnet by the holder, the Customs office of entry checks the seals and carries out a routine check of the truck and accompanying documents and may check the validity of the TIR Carnet in Cuite-Wise. In exceptional cases, Customs authorities can require examination of road vehicle, combination of vehicles or containers and their load. <p>The Customs officer validates the TIR Carnet by completing fields 18 to 23 of vouchers No. 1 and No. 2 corresponding to the TIR operation, completes counterfoil No. 1, removes voucher No. 1 and returns the TIR Carnet to the holder.</p> |
| Scenario Intermediate Customs office of departure | The holder presents the TIR Carnet, together with the goods, already loaded at a previous Customs office of departure, at the intermediate Customs office(s) of departure which acts in the same way as the Customs office of departure: the Customs officer checks the data of the TIR Carnet and other accompanying documents with the load. He affixes new seals to the load compartment and validates the TIR Carnet by inscribing the number, identification of the seals in field |

| | |
|----------------------|---|
| | 16, and by applying the stamp, signature, date and name of the intermediate Customs office of departure in field 17 of all vouchers No. 1 and No. 2 remaining in the TIR Carnet. He completes fields 18 and 20 to 23 of vouchers No. 1 and No. 2 corresponding to the TIR operation, completes counterfoil No. 1, removes voucher No. 1 and returns the TIR Carnet to the holder. |
| Alternative Scenario | The main scenarios do not take account of the following scenarios:
a) Non validation of the TIR Carnet by Customs;
b) Falsified acceptance of the TIR Carnet;
c) Use of lost or stolen TIR Carnets. |
| Special requirements | In case of heavy and bulky goods with own identification marks, neither sealing nor a TIR approved vehicle is required. Specific identification marks will be mentioned in the TIR Carnet. |
| Extension Points | In the process of checking the validity of the TIR Carnet, Customs authorities may make use of information stored in the electronic control system maintained by the international organization. |
| Requirements Covered | |

1.4.5.3 Activity diagram of the start TIR operation use case

Figure 1.17
Start TIR operation activity diagram

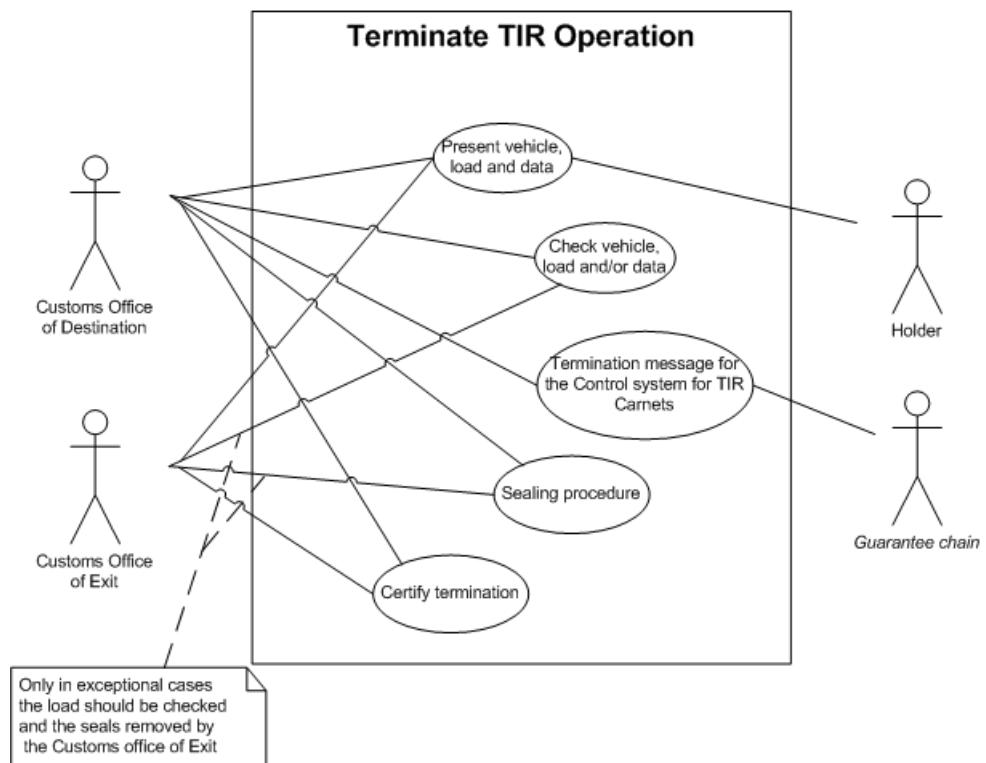

1.4.5.4 Structured description of the activity diagram of the start TIR operation use case

1. The start of a TIR operation **BEGINS** when the TIR Carnet holder presents a valid and duly filled-in TIR Carnet, together with the goods and a TIR approved vehicle at a Customs office. The Customs officer first checks the validity of the TIR Carnet and **ENDS** the procedure if the TIR Carnet is not valid.
 - If the vehicle is at a Customs office of departure or at an intermediate Customs office of destination: **go to 1.1**;
 - If the vehicle at a Customs office of entry: **go to 1.2**.
 - 1.1. If necessary, the TIR Carnet holder is requested to update the information in the TIR Carnet. The Customs office of departure checks the data of the TIR Carnet and other accompanying documents with the load.
 - If any problem is encountered: **go to 1.1.1**;
 - If checks are OK: **go to 1.1.2**.
 - 1.1.1. Update the information on the TIR Carnet.
 - If updating is possible: **go to 1.1.2**.
 - If no updating is possible: **END**.
 - 1.1.2. In case any updating in the TIR Carnet has taken place (goods, itinerary,...) the Customs officer validates those changes by applying the stamp, signature, date and name of Customs office in field 17 of all vouchers No. 1 and No. 2 remaining in the TIR Carnet. **Go to 1.1.3**.
 - 1.1.3. The Customs officer affixes (new) seals to the load compartment. He validates the TIR Carnet by inscribing the number and identification of the seals in field 16 of all vouchers No. 1 and No. 2 remaining in the TIR Carnet, **Go to 2**.
 - 1.2. The Customs officer checks the data of the TIR Carnet and other accompanying documents, as well as the seals and carries out a routine check of the truck.
 - If checks are OK: **go to 1.2.1**;
 - If checks are not OK: **go to 1.2.2**
 - 1.2.1. The Customs officer ticks box 19 on both vouchers 1 and 2 for the current operation and determines whether or not physical checking of the load is required.
 - If NO: **go to 2**;
 - If YES (exceptional cases): **go to 1.2.2**.
 - 1.2.2. The Customs officer removes the seals and checks the load and compares it with the data of the TIR Carnet and other accompanying documents.
 - If everything is OK: **go to 1.1.3**;
 - If any problem is encountered: **END**.
 2. - The Customs officer completes fields 18 and 20 to 23 of both vouchers No. 1 and No. 2 corresponding to the TIR operation,
 - he completes counterfoil No. 1,
 - he removes voucher No. 1,
 - he returns the TIR Carnet to the holder,
 - he keeps or transmits the voucher number 1 for the discharge procedure: **END**.
-

1.4.6 Terminate TIR operation use case

1.4.6.1 Terminate TIR operation use case diagram

Figure 1.18
Terminate TIR operation use case diagram

1.4.6.2 Terminate TIR operation use case description

Table 1.8
Terminate TIR operation use case description

| Name | Terminate TIR operation use case |
|-------------------|---|
| Description | The road vehicle, the combination of vehicles or the container with the goods and the TIR Carnet are presented for purposes of control to the Customs office of exit, destination or to the intermediate Customs office of departure (playing the role of a Customs office of exit or destination ¹). |
| Actors | TIR Carnet holder, Customs authorities, Guarantee chain. |
| Performance Goals | Terminate the transit procedure in a given country (Customs territory) for a specific leg of the TIR Transport. |
| Preconditions | In accordance with the TIR Transport use case, this use case can be launched only after the start of the TIR operation. |
| Postconditions | A termination message is sent to the control system for TIR Carnets
Voucher N°2 or the certificate of termination is sent to the office in charge of the discharge of the TIR operation |
| Scenario 1 | <p>Terminate TIR operation at the Customs office of exit en route:</p> <p>The holder presents the road vehicle, the goods and the TIR Carnet to the Customs Office of exit (<u>en route</u>) for purposes of control. The Customs officer checks the validity of the TIR Carnet, checks the integrity of the sealing devices, seals and their number against the seals' number mentioned in the TIR Carnet.</p> <p>The Customs officer may also examine all parts of the vehicle in addition to the sealed load compartment (Explanatory Note 0.21-1 to Article 21 of the TIR Convention).</p> <p>The Customs officer may exceptionally carry out an examination of the goods, particularly when an irregularity is suspected (Art. 5 par. 2 of the TIR Convention). In case of examination of the load of a road vehicle, combination of vehicles or the container, the Customs Officer affixes new seals and records on the TIR Carnet vouchers used in that Contracting Party, on the corresponding counterfoils, and on the vouchers remaining in the TIR Carnet, particulars of the new seals affixed and of the controls carried out (Art. 24 of the TIR Convention).</p> <p>If the checks are not satisfactory to the Customs officer, because he notices any irregularity in connection with the TIR operation itself, he may certify the termination of this TIR operation with reservation. In this case, the Customs officer completes field 24 of the appropriate detachable green sheet of voucher No. 2 by inscribing the name of the Customs office of exit (<u>en route</u>), crosses out box 25 (or does not cross out box 25, if the reason for the reservation is that seals or identification marks were indeed not found to be intact), completes field 27 by placing an "R" and fills-in field 28 by putting a stamp, date and a signature. Then the Customs officer completes accordingly the corresponding green counterfoil namely by inscribing the name of the Customs office of exit (<u>en route</u>) in field 1, crossing out box 2 (or does not cross out box 2, if the reason for the reservation is that seals or identification marks were indeed not found to be intact), repeating "R" under item 5 inscribing the reason why the TIR operation is terminated with reservation, and completing field 6 by putting the Customs stamp, date and signature.</p> |

¹ The procedure to terminate the TIR operation at an intermediate office of departure is slightly different than at Customs offices of exit or destination.

If the checks are satisfactory to the Customs officer, he completes field 24 of the appropriate detachable green sheet of voucher No. 2 of the TIR Carnet by inscribing the name of the Customs office of exit (en route), crosses out box 25 and completes field 28 by putting a stamp, date and a signature. Then the Customs officer completes accordingly the corresponding green counterfoil namely by inscribing the name of the Customs office of exit (en route) in field 1, crossing out box 2 and completing field 6 by putting the Customs stamp, date and signature.

After completing voucher and counterfoil number 2 with or without reservation, the Customs officer removes the green voucher number 2 of the TIR Carnet, and returns the TIR Carnet to the holder. The TIR operation is now terminated (Art. 1 lit. d of the TIR Convention). The Customs officer further tears off the detachable green sheet of voucher No. 2 of the TIR Carnet.

Scenario 2

Terminate TIR operation at the Customs office of destination:

The holder presents the road vehicle, the goods and the TIR Carnet to the Customs Office of destination for purposes of control. The Customs officer checks the validity of the TIR Carnet, checks the integrity of the seals and their number against the seals' number mentioned in the TIR Carnet.

The Customs officer may also examine all parts of a vehicle in addition to the sealed load compartment (Explanatory Note 0.21-1 to Article 21 of the TIR Convention).

The Customs officer takes the seals off and checks the goods.

If the checks are not satisfactory to the Customs Officer because he noticed some irregularities connected with the TIR operation itself, he may certify the termination of this TIR operation with reservation. In this case, the Customs officer completes field 24 of the appropriate detachable green sheet of voucher No. 2 of the TIR Carnet by inscribing the name of the Customs office of destination, crosses out box 25 (or does not cross out box 25, if the reason for the reservation is that seals or identification marks were indeed not found to be intact), inscribes the number of packages for which the termination of the TIR operation is certified in field 26, completes field 27 by placing an "R" and fills-in field 28 by putting a stamp, date and a signature. Then the Customs officer completes accordingly the corresponding green counterfoil namely by inscribing the name of the Customs office of destination in field 1, crossing out box 2 (or does not cross out box 2, if the reason for the reservation is that seals or identification marks were indeed not found to be intact), inscribing the number of packages for which the termination of the TIR operation is certified in field number 3, repeating "R" under item 5 inscribing the reason why the TIR operation is terminated with Reservation, and completing field 6 by putting the Customs stamp, date and signature.

If the checks are satisfactory to the Customs officer, he completes field 24 of the appropriate detachable green sheet of voucher No. 2 of the TIR Carnet by inscribing the name of the Customs office of destination, crosses out box 25, inscribes the number of packages for which the termination of the TIR operation is certified in field 26 and completes field 28 by putting a stamp, date and a signature. Then the Customs officer completes accordingly the corresponding green counterfoil namely by inscribing the name of the Customs office of destination in field 1, crossing out box 2, inscribing the number of packages for which the termination of the TIR operation is certified in field number 3, and completing field 6 by putting the Customs stamp, date and signature.

After completing voucher and counterfoil No. 2 with or without reservation, the Customs officer removes the green voucher No. 2 of the TIR Carnet and returns the TIR Carnet to the holder. The Customs officer

further tears off the detachable green sheet of voucher No. 2 of the TIR Carnet, keeps the upper part of the green voucher number 2 at the Customs office of destination.

The TIR operation is now terminated (Art. 1(d) of the TIR Convention). The Customs office of destination sends the SafeTIR message confirming the correct termination of the TIR operation at the Customs office of destination to the competent national guaranteeing association.

The Customs officer sends the detachable green sheet to the Customs office of entry (en route).

Scenario 3**Intermediate Customs office of destination**

In case a TIR transport consists of various part loads, one or two TIR operations will be terminated at intermediate Customs offices of destination. Such Customs office will play both the role of Customs office of destination (see scenario 2) as well as of Customs office of departure (see also: Use Case 1.4.5.)

Alternative Scenario

The main scenarios do not take account of the following scenarios:

1. Non validation of the TIR Carnet by Customs;
2. Falsified acceptance of the TIR Carnet;
3. Use of lost or stolen TIR Carnets

Special requirements

Goods which have arrived at their Customs office of destination are no longer under the TIR regime. Therefore, they are put under another Customs regime.

Extension Points

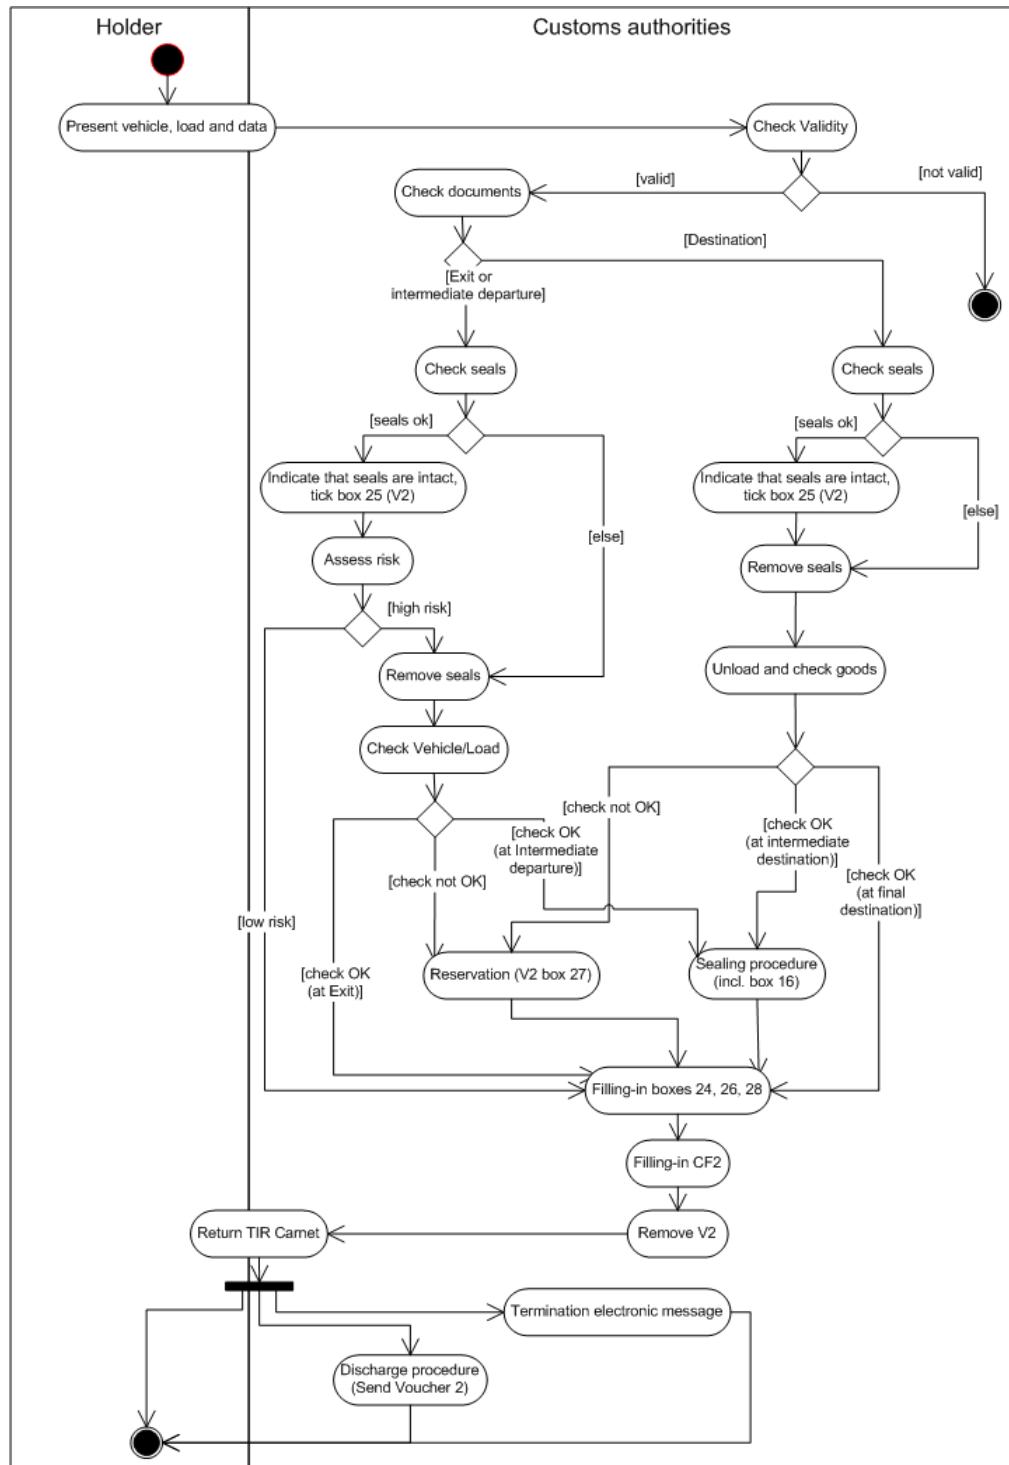

In the process of checking the validity of the TIR Carnet, Customs authorities may make use of information stored in the electronic control system maintained by the international organization.

Requirements Covered

-

1.4.6.3 Activity diagram of the terminate TIR operation use case

Figure 1.19
Terminate TIR operation activity diagram

1.4.6.4 Structured description of the activity diagram of the terminate TIR operation use case

1. The termination of a TIR operation **BEGINS** when the TIR Carnet holder presents a valid and duly filled-in TIR Carnet, together with the goods and a TIR approved vehicle at a Customs office (exit, destination or intermediate office of departure). The Customs officer may first check the validity of the TIR Carnet and **END** the procedure if the TIR Carnet is not valid.

The Customs officer may also examine all parts of the vehicle in addition to the sealed load compartment (Explanatory Note 0.21-1 to Article 21 of the TIR Convention).

- Customs of destination: **go to 1.1**;
- Customs of exit or intermediate departure: **go to 1.2**;

1.1. The Customs officer checks the integrity of all seals and their number against the seals' number(s) mentioned in the TIR Carnet

- If seals are OK: **go to 1.1.1**;
- If seals are not OK: **go to 1.1.2**.

1.1.1. Indicate that seals were intact by ticking box 25 in voucher N°2; **Go to 1.1.2**.

1.1.2. The Customs officer takes the seals off and checks the goods

- If checks are OK at intermediate Customs office of destination: **go to 1.2.2.1**;
- If checks are OK at final Customs office of destination: **go to 3**;
- If checks are not OK: **go to 2**.

1.2. The Customs officer checks the integrity of all seals and their number against the seals' number(s) mentioned in the TIR Carnet

- If seals are OK: **go to 1.2.1**;
- If seals are not OK: **go to 1.2.2**.

1.2.1. The Customs officer indicates that seals are intact by ticking box 25 in voucher N°2; he determines whether or not physical checking of the load is required:

- If YES: **go to 1.2.2**;
- If NO: **go to 3**.

1.2.2. The Customs officer removes the seals and checks the load and vehicle.

- If everything is OK at Customs office if exit: **go to 1.2.2.1**;
- If everything is OK at intermediate Customs office of departure: **go to 3**;
- If a problem is encountered: **go to 2**.

1.2.2.1. The Customs officer affixes new seals and records on the TIR Carnet vouchers used in that Contracting Party, on the corresponding counterfoils, and on the vouchers remaining in the TIR Carnet, particulars of the new seals affixed and of the controls carried out (Art. 24 of the TIR Convention): **go to 3**.

2. The Customs certifies the termination of the TIR operation with reservation. In this case, the Customs officer completes field 27 by placing an "R": **go to 3**.

3. - The Customs officer completes fields 24, 26 and 28 of voucher No. 2 corresponding to the TIR operation;
- he completes counterfoil No. 2;
 - he removes voucher No. 2;
 - he returns the TIR Carnet to the holder;
 - he also should send an electronic message to the control system for TIR Carnets;
 - and finally send a termination message to the discharge office (see discharge use case for details): **END**.
-

1.5 Entity classes

Entity classes describe “things” representing characteristics within the TIR procedure, which can take on a certain value or responsibility. Examples of entity classes are persons, places, concepts or situations.

In the TIR procedure, the following classes have been identified:

- International Organization
- Association
 - Issuing Association
 - Guaranteeing Association
- Road Vehicle
- Sealed loading unit
 - Load compartment
 - Container
- TIR transport
- TIR operation
- Goods Manifest Line Item
- Customs office
- Country
- TIR Carnet holder

1.6 High-level class diagram

1.6.1 High-level class diagram description

The following diagrams are sub parts of the complete high-level class diagram shown in Chapter. This subdivision aims at simplifying the explanation by focusing on a specific class at a time, describing its particularities and analyzing its relations with other classes.

In order to fully understand its complexity, the following diagrams reflect the various parts of the high-level class diagram of Figure 1.30, as seen from the perspective of its main classes.

1.6.1.1 International organization

Figure 1.20
International organization class and its relationships

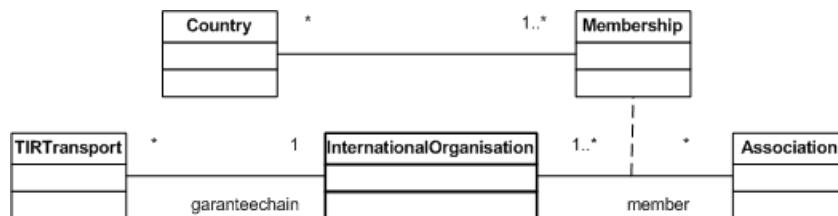

Table 1.9
International organization sub class diagram description

| | |
|-------------|---|
| Name | International organization sub class diagram |
| Description | Sub part of the high-level class diagram presenting the international organization class and all relations with other |

classes.

| | |
|---------------------------------------|--|
| Central Class | International organization |
| Example instance of the central class | <ul style="list-style-type: none"> ○ IRU ○ ... |
| Associated Classes | TIR transport, association |
| Associations and constraints | <p>The international organization organizes and ensures the proper functioning of the guarantee chain for a TIR transport. A TIR transport can be associated to one and only one international organization. The international organization can represent the guarantee chain for an unlimited number of transports. (Req. 1)</p> <p>The international organization has member associations. The membership is associated to at least one country. An association has to be member of at least one international organization. An international organization can have any number of member associations. A membership can be associated to various countries (e.g. FEBETRA –IRU has a membership valid for Belgium and Luxembourg) and one country can be covered by various memberships. (Req. 2)</p> |
| Requirements Covered | 1 and 2 |

1.6.1.2 Association

Figure 1.21
Association class and its relationships

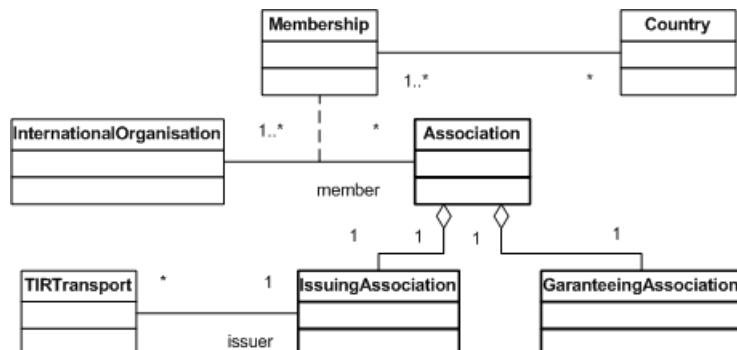

Table 1.10
Association sub class diagram description

| | |
|---------------------------------------|--|
| Name | Association sub class diagram |
| Description | Sub part of the high-level class diagram presenting the association class and all relations with other classes. |
| Central Class | Association |
| Example instance of the central class | <ul style="list-style-type: none"> ○ FEBETRA ○ BGL ○ ... |
| Associated Classes | TIR transport, international organization |
| Associations and constraints | An association has two roles represented by the subdivision of the association into its issuing role (the issuing association), responsible of the issuance of TIR Carnets to the TIR Carnet |

| | |
|--|-------------------------|
| holders, and its guaranteeing role (the guaranteeing association), representing the guarantee chain in its national territory. The two roles cannot be disconnected. (Req. 3)

The international organization has member associations. The membership is associated to at least one country. An association has to be member of at least one international organization. An international organization can have any number of member associations. A membership can be associated to various countries (e.g. FEBETRA –IRU has a membership valid for Belgium and Luxembourg) and one country can be covered by various memberships. (Req. 2)

The issuing association issues TIR Carnets for TIR transports. One and only one issuing association is issuing the TIR Carnet for a TIR transport. The issuing association can issue TIR Carnets for numerous TIR transports. (Req. 4) | Requirements
Covered |
|--|-------------------------|

1.6.1.3 Road vehicle

Figure 1.22
Road vehicle class and its relationships

Table 1.11
Road vehicle sub class diagram description

| | |

| Name | Road vehicle sub class diagram |
| Description | Sub part of the high-level road vehicle class diagram presenting the class and all relations with other classes. |
| Central Class | Road vehicle |
| Example instance of the central class | <ul style="list-style-type: none"> ○ Road tractor (Brand W, Model X, Chassis ref. Number Y, Plates ZZZZ) ○ Semi-Trailer (Brand M, Model N, Chassis ref. Number O, Plates PPPP) ○ ... |
| Associated Classes | Load compartment, TIR transport |
| Associations and constraints | A road vehicle can serve in numerous TIR transports. A TIR transport is performed by means of one or many road vehicles. (Req. 6)

A road vehicle is composed of zero or many load compartments. A load compartment is part of a single road vehicle. (Req. 7) |
| Requirements
Covered | 6 and 7 |

1.6.1.4 Sealed loading unit

Figure 1.23
Sealed loading unit class and its relationships

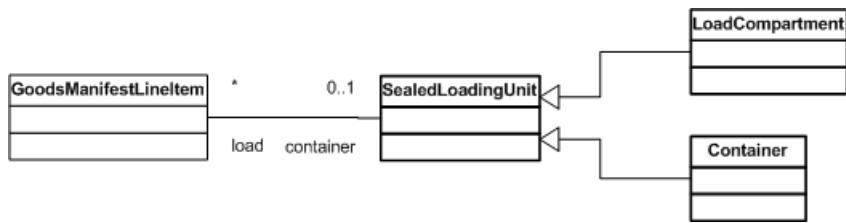

Table 1.12
Sealed loading unit sub class diagram description

| | |
|---------------------------------------|--|
| Name | Sealed loading unit sub class diagram |
| Description | Sub part of the high-level class diagram presenting the sealed loading unit class and all relations with other classes. |
| Central Class | Sealed loading unit |
| Example instance of the central class | <ul style="list-style-type: none"> ○ Container n° xxxxxxxxx ○ Load compartment of road vehicle of brand W, model X, chassis ref. Number Y and Plates ZZZZ approved for transports under customs seals. ○ ... |
| Associated Classes | Goods Manifest Line Item |
| Associations and constraints | <p>A sealed loading unit is a generalization of a container and a load compartment of a road vehicle. (Req. 8)</p> <p>A sealed loading unit can contain numerous loads, mentioned in the TIR Carnet as Goods Manifest Line Items. The goods described in the Goods Manifest Line Item are contained in one and only one sealed loading unit. In case of heavy and bulky goods (HBG), the goods described in the Goods Manifest Line Item may not be contained in a sealed loading unit. (Req. 9)</p> |
| Requirements Covered | 8 and 9 |

1.6.1.5 TIR transport

Figure 1.24
TIR transport class and its relationships

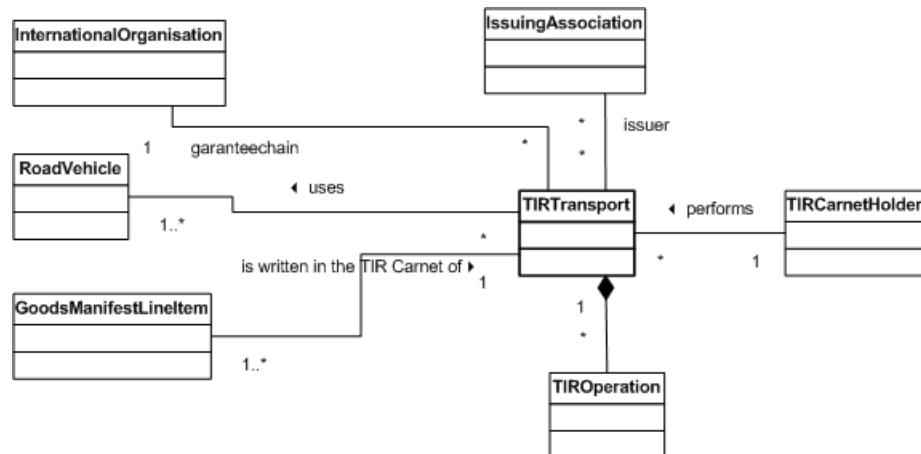

Table 1.13
TIR transport sub class diagram description

| | |
|---------------------------------------|---|
| Name | TIR transport sub class diagram |
| Description | Sub part of the high-level class diagram presenting the TIR transport class and all relations with other classes. |
| Central Class | TIR transport |
| Example instance of the central class | <ul style="list-style-type: none"> ○ Transport of 2000kg of chocolate from Geneva to Moscow under cover of the TIR Carnet No. XC38000000. ○ Transport of 100 computers from Ankara to Madrid under cover of the TIR Carnet No. XC38999999. ○ ... |
| Associated Classes | International organization, issuing association, road vehicle, TIR operation, Goods Manifest Line Item, TIR Carnet holder. |
| Associations and constraints | <p>The international organization organizes and ensures the proper functioning of the guarantee chain for a TIR transport. A TIR transport can be associated to one and only one international organization. The international organization can represent the guarantee chain for an unlimited number of transports. (Req. 1)</p> <p>The issuing association issues TIR Carnets for TIR transports. One and only one issuing association is issuing the TIR Carnet for a TIR transport. The issuing association can issue TIR Carnets for numerous TIR transports. (Req. 4)</p> <p>A road vehicle can serve in numerous TIR transports. A TIR transport is performed by means of one or many road vehicles. (Req. 6)</p> <p>A TIR transport is composed of TIR operations. The number of TIR operations within a TIR transport is at the moment limited to ten with the current paper system and has a minimum of two (these limitations should be extensible; therefore, two to many is more advisable). A TIR operation is part of one and only one TIR transport. (Req.10)</p> <p>A Goods Manifest Line Item is associated to one and only one TIR transport. A TIR transport can have from one to many Goods Manifest Line Items. (Req.11)</p> <p>A TIR transport is performed by one and only one TIR Carnet holder. A TIR Carnet holder can perform any number of TIR transports. (Req. 12)</p> |
| Requirements Covered | 1,4,6,10,11 and 12 |

1.6.1.6 TIR operation

Figure 1.25

TIR operation class and its relationships

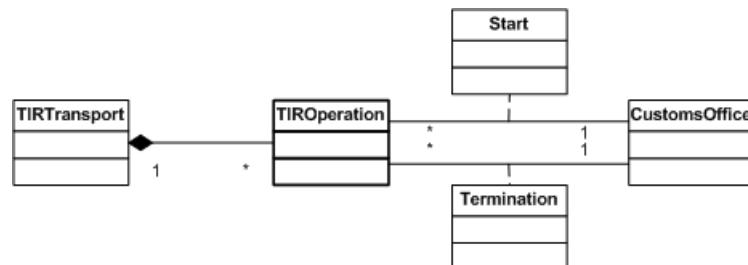

Table 1.14
TIR operation sub class diagram description

| | |
|---------------------------------------|---|
| Name | TIR operation sub class diagram |
| Description | Sub part of the high-level class diagram presenting the TIR operation class and all relations with other classes. |
| Central Class | TIR operation |
| Example instance of the central class | <ul style="list-style-type: none"> ○ A transit operation through Switzerland under cover of TIR Carnet N° XC380000XX starting in Geneva and terminated in Basel. ○ The first operation of a TIR transport under cover of TIR Carnet N° XC380000YY, starting in Moscow and terminated at the border point with Finland in Vyborg. ○ ... |
| Associated Classes | TIR transport, Customs office |
| Associations and constraints | <p>A TIR transport is composed of TIR operations. The number of TIR operations within a TIR transport is at the moment limited to ten with the current paper system and has a minimum of two (these limitations should be extensible; therefore, two to many is more advisable). A TIR operation is part of one and only one TIR transport. (Req.10)</p> <p>The TIR operation is started at one and only one Customs office and terminated at one and only one Customs office. A Customs office can start and terminate any number of TIR operations. (Req. 13)</p> |
| Requirements Covered | 10, 13 |

1.6.1.7 Goods Manifest Line Item

1.6.2 High-level class diagram

Figure 1.30
High-level class diagram

2. e-Business requirements

2.1 High-level description of the eTIR project

As elaborated in Chapter 1 of the Reference Model, the final objective of the computerization of the TIR procedure encompasses the computerization of the whole TIR Carnet life cycle from distribution, issuance and via the TIR transport to return and repository and it should, ultimately, be aimed at replacing the current paper TIR Carnet without changing the basic philosophy of the TIR Convention. In order to streamline the work towards this challenging objective, the Working Party agreed (and later confirmed) that the approach of the computerization process should be focused on the establishment of an international, centralized database, whose aim it is to allow the management by Customs of data on guarantees and the exchange of information between Customs authorities, being two elements of the TIR Carnet life cycle not computerized so far.

Holders will be required to send their advance cargo information / declaration only to countries of departure of the TIR Transports. The holder can send his declaration directly to the country of departure using the national declaration mechanisms. Alternatively, the holder can use the national Customs system in his country of residence to send declarations to third countries (this functionally is optional for Customs system), use the declaration web service in the eTIR international system or use other private services. . Moreover, the eTIR project defines a standard declaration message. Other elements falling outside the scope of the eTIR project concern the approval of international organizations, national associations, transport operators and vehicles, the organization and functioning of the guarantee system, the management of a control system under Annex 10 and the administration of the TIR Convention.

The first part of this Chapter aims at providing a high level description of the international, centralized database, the eTIR international system, whose aim it is to complement developments and achievements at the national and private level relating to the computerization of the TIR Carnet life cycle. It also provides general guidelines for the smooth transition from the current paper based system to full computerization. The second part of the Chapter describes the functioning of the eTIR international system by means of use cases and activity diagrams.

2.1.1 Actors and roles

This section describes the different tasks and obligations related to the actors and their roles.

2.1.1.1 Customs authorities

Customs authorities can perform the following roles:

- Customs office of departure
- Customs office of destination
- Customs office of entry (en route)
- Customs office of exit (en route)
- Customs office of discharge.

2.1.1.2 eTIR international system

The eTIR international system interfaces with the Guarantee Chain and will ensure the management by Customs of data on guarantees at international level.

Moreover, in view of the fact that, within the eTIR system, electronic direct exchange of information between the Customs administrations located in the different Contracting Parties is neither currently feasible nor enforceable, it will facilitate the secure circulation of standardized information between Customs administrations.¹

2.1.1.3 Holder

The holder performs the TIR transport and is responsible for providing the related declaration data electronically and for presenting the goods to the relevant Custom offices referred to in Chapter 2.1.1.1 above.

2.1.1.4 Guarantee Chain

The Guarantee Chain as described in this document is composed of an international organization, authorized by AC.2 to take on responsibility for the effective organization and functioning of an international guarantee system in accordance with the provisions of Article 6.2bis of the Convention and national associations, approved by Contracting Parties in accordance with the provisions of Article 6 and Annex 9, Part II of the Convention to act as guarantors. The Guarantee Chain provides the holder with an international guarantee i.e. a guarantee recognized by each of the Contracting Parties involved in the TIR transport.

2.1.2 Fundamental principles

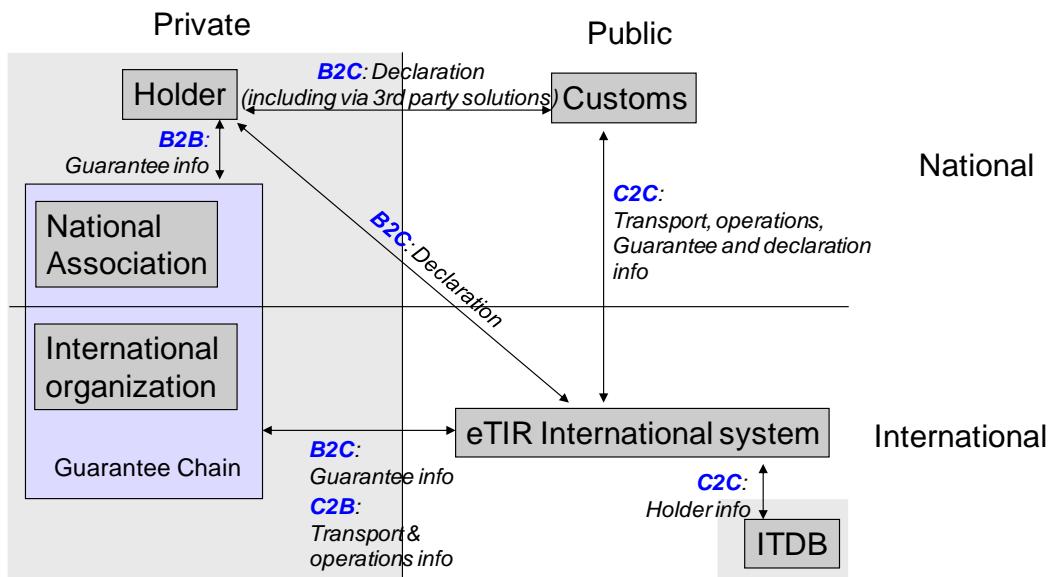

2.1.2.1 eTIR International System brief

The eTIR international system is devised to allow the management by Customs of data on guarantees by Customs and the secure exchange of data between national Customs systems related to the international transit of goods, vehicles and/or containers according to the provisions of the TIR Convention.

Therefore, only a part of the information flow required for the functioning of the TIR procedure is managed by the eTIR international system. The following picture graphically represents the information exchange between the actors. It also shows that the eTIR international system does not communicate with the holder. It is important to recall that the management of claims and the information to be provided by Customs authorities to authorized associations (under Article 42ter and an international organization (under Article 6.2bis) as provided for by Annex 10 of the TIR Convention are outside the scope of the eTIR project (see figure below).

¹ In accordance with the instructions by the WP.30 at its 106th session, the eTIR system administration shall be established on the basis of an international, centralized database whose aim it is to facilitate the secure exchange of data between national Customs systems (TRANS/WP.30/212, para. 26).

Figure 2.1
The new public private partnership

On the one hand, the Guarantee Chain transmits to the eTIR international system information on the guarantees it has issued to the holders so that they can be registered in the eTIR international system. The Guarantee Chain can also query at any time the status of guarantees it has issued and obtain related TIR transport information. On the other hand, Customs authorities use the eTIR international system to check the status of guarantees and to exchange information related to the TIR transport and to TIR operations.

The management by Customs of the data on guarantees and the secure exchange of data between national Customs systems in relation to TIR transport information are therefore the two fundamental features of the eTIR international system. Guidelines will also be provided to promote harmonization, especially in the context of the dialogue between the holder and Customs authorities.

Communication, security and fallback solutions constitute other key features of the system.

2.1.2.2 Management by Customs of data on guarantees

The management by Customs of data on guarantees requires a strong relationship between the Guarantee Chain and the eTIR international system. The Guarantee Chain sends information on each issued guarantee to the eTIR international system. The recording of this information in the eTIR international system is conditional on checks made against the International TIR database (ITDB) concerning authorized holders.

2.1.2.2.1 Registration of the guarantee

After having issued a guarantee to the holder, the Guarantee Chain shall register it in the eTIR international system by sending a standard electronic message.

- Elements comprising the registration of the guarantee

i) Holder (M)¹

Information on the physical or legal person to whom the guarantee has been issued.

ii) Guarantee Chain (M)

Information on the Guarantee Chain.

iii) Guaranteee (M)

Information on the guaranteee (guarantee reference number, validity date, guaranteee type, ...)

2.1.2.2.2 Cancellation of a guarantee

Once a guaranteee has been registered in the eTIR international system, the Guarantee Chain may cancel any guarantee which has not yet been used. It may also cancel the validity of a guarantee which is in use but only for the TIR operations which have not yet started. Such cancellation will, however, only become effective at the start of the first consecutive TIR operation.

2.1.2.2.3 Verification of the guarantee

The data on guaranteees will be accessible to all Customs offices. If a holder presents to Customs a declaration covered by a guarantee which is not recorded in the eTIR international system or has been cancelled by the Guarantee Chain, then Customs authorities shall not accept it.

2.1.2.2.4 Querying guaranteee status

Once a guaranteee has been registered in the eTIR international system, the Guarantee Chain can query at any time the status of guaranteees it has issued.

2.1.2.2.5 Transmission of TIR transport and TIR operation data

The eTIR international system notifies the Guarantee Chain of new information on TIR transports and TIR operations related to the guaranteees it has issued, other than information which is restricted to Customs.

2.1.2.3 Exchange of TIR transport and TIR operation information**2.1.2.3.1 Data handling at the beginning of the TIR transport**

Once the Customs office of departure accepts the declaration, according to national procedures, it will send a message containing that information, together with additional Customs data, to the eTIR international system, in line with agreed requirements. The latter will then store the declaration information and link it with the guaranteee information. This information is then sent to all Customs authorities involved in the TIR transport..

a. Recording of the elements comprising the TIR transport (and its subsequent updates)

The elements required for the TIR transport recording are those of the TIR operation 'start information' (see point 2.1.2.3.2.a(i)) plus all the elements provided in the declaration(s) (see 2.1.2.4.2.a).

¹ M: Mandatory; O: Optional; C: Conditional.

2.1.2.3.2 Data handling related to TIR operations

a. Elements composing the TIR operation registration

i) TIR operation start information

The Customs office of departure/entry provides the following information:

- Operation Reference Number and date of start (M)
- Seals (C)

Information on the seal(s) affixed to the vehicle(s) and/or container(s) if seals are affixed, changed or removed.

- Results of checks
- Time limit for transit (O)

Time limit for the TIR operation.

- National itinerary (O)

Customs office(s) at which the road vehicle, the combination of vehicles or the container together with the load have to be produced.

- Customs office (M)

ii) TIR operation termination information

The Customs office of destination/exit provides the following information:

- Date of termination (M)
- Seals (C)

Information on the seal(s) affixed to the vehicle(s) and/or container(s) if seals are affixed, changed or removed.

- Results of checks
- Reservations (M)

In case of doubts with regard to the TIR operation, the Customs office of destination or exit indicates that it has terminated the TIR operation with reservations.

- Customs office (M)

iii) TIR operation discharge information

The Customs office of discharge is responsible for discharging the TIR operation and providing the following information:

- Date of discharge (M)
- Customs office (M)

2.1.2.4 Other aspects

2.1.2.4.1 Issuance of guarantees

The holder requests a guarantee from the Guarantee Chain, which will, on the basis of international, national and internal rules, decide if the guarantee can be issued to the holder. The Guarantee Chain will then provide the holder with a guarantee reference number for that specific guarantee. This procedure is outside the scope of the development of the eTIR international system but is a prerequisite for its well functioning.

The Guarantee Chain registers the guarantee internationally as foreseen in point 2.1.2.2.1.

2.1.2.4.2 Declaration/advance cargo information¹

The holder submits the advance cargo information by electronic means to the Customs office of departure, making reference to a guarantee issued by a Guarantee Chain, using authentication mechanisms. The declaration shall be submitted prior to the presentation of the goods at the Customs office of departure. Alternatively, the holder can make use of declaration mechanisms provided by the eTIR international system, the Customs system of his country of residence (if available) or third party solutions provided by the private sector (including by the guarantee chains). National Customs systems and authorized international private sector declaration systems can use the declaration web service of the eTIR international system to forward the declaration to the country of departure.

Customs authorities shall, if satisfied, validate and accept the Customs declaration and transmit it to the eTIR International system. The eTIR international system forwards this information to the following Customs authorities involved in the TIR transport.

The following elements shall be provided in the declaration since these elements are also part of the registration of the TIR transport information (see 2.1.2.3.1.a).

a. Elements comprising the declaration

i) *Holder (M)*

Information on the physical or legal person who is responsible for transporting the goods and submitting the declaration.

ii) *Guaranteee (M)*

The guarantee reference number under which the TIR transport will be undertaken.

iii) *Goods (M)*

Information on the goods transported (e.g.: type, quantity, identifications, Customs office of departure, Customs office of destination, ...).

iv) *Mean of Transport/Containers (M)*

Information on the mean of transport and/or containers used to transport and /or carry the goods.

v) *Attached documents (O)*

Reference to all documents, paper or electronic, which are attached to the declaration.

vi) *[Consignee (O)*

Information on the physical or legal persons to whom goods are shipped.]

vii) *Intended itinerary (Country level) (M)*

Countries intended to be involved in the TIR transport.

¹ For a detailed explanation see Annex VI.

viii) [Consignor (M)]

Information on the physical or legal persons from whom goods are shipped.]

ix) [Subcontractors]

Information on the physical or legal person who performs the transport or a part of the transport on behalf of the holder.] under discussion

2.1.2.4.3 Pre-arrival information

One of the objectives of the eTIR international system, as defined by the Contracting Parties, is to provide Customs authorities with information prior to the arrival of cargos. This applies to information provided by the private sector as well as to information exchanged between Customs authorities. Therefore, the eTIR international system forwards to Customs authorities all information as soon as it is received (push principle).

2.1.2.5 Data exchange**2.1.2.5.1 Central platform**

The eTIR international system is built around a central platform, which is a composed of hardware and software, including databases and web services. The databases serve to store and make the information available and acts as repository for all information concerning the TIR system, whereas the web services allow for an efficient and secure interfacing between the Contracting parties, the Guarantee Chain and the central platform.

2.1.2.5.2 Communication

The eTIR international system may use secure Internet connections to exchange messages.

2.1.2.5.3 Standard messages

The exchange of data with the eTIR international system is achieved by means of a set of predefined standard messages. All messages needed to ensure the functioning of the eTIR international system are described in Chapter 3.

2.1.2.6 Security**2.1.2.6.1 The elements of security from the TIR Convention****2.1.2.6.2 Controlled access (Annex 9, Part II)**

Controlled access remains a major principle of the TIR system. The ITDB will be fully used to ensure that only authorized holders use the TIR system.

2.1.2.6.3 Security data elements

Data elements concerning supply chain security are contained in Chapter 3.

2.1.2.6.4 eTIR international system security

The eTIR international system is secured with security methods applicable to systems communicating via the Internet. Messages are encrypted and access is restricted to authorized users. The system is available 24/7.

2.1.2.7 *Accompanying document / Certified report*

An accompanying document, printed by the Customs office of departure, provides all information regarding the TIR transport. This document also covers the need in case of accidents and incidents and replaces the certified report.

2.1.2.8 *Fallback solutions*

If Customs offices or the Guarantee chain are not in a position to use the standard communication links between their systems and the eTIR international system (web services), the information will be securely exchanged by means of the eTIR website (See 2.1.3.2.3.). If the Customs offices electronic system or the communication channels are not functioning, , they will rely on the accompanying document to obtain or provide the required information.

Detailed fallback solutions for individual use cases are contained in Chapter 2.3.

2.1.3 **Deliverables**

2.1.3.1 *National deliverables*

2.1.3.1.1 *National management of data*

The national computer systems of the countries process electronically the data from and to the eTIR international system. The national applications are primarily focused on reception and validation of the electronic declaration as well as on the management of the TIR operations.

2.1.3.1.2 *Bridges to the eTIR international system*

National computer systems communicate with the eTIR international system using a predefined set of standard messages and technology.

2.1.3.1.3 *User manuals and training*

Customs administrations provide their Customs officers with the necessary documentation and training to ensure the proper use of the national parts of the eTIR international system. They can also provide documentation for holders.

2.1.3.2 *International deliverables*

2.1.3.2.1 *Central databases*

The central platform is based on a central database system, which stores the data and contains the functional rules that allow the functioning of the eTIR international system.

The databases contain information on the data on guarantees and their coverage, and link the issued guarantees with the holder. Moreover, they contain all data regarding the TIR transports linking them to the guarantee information.

2.1.3.2.2 *Web services*

Web services implemented on the central platform allow authorized computer systems to interact securely with the eTIR international system. The web services provide, in a standard format, the functions which allow querying and updating the central database, as well as the centralized submission of advance cargo information.

2.1.3.2.3 eTIR website

The eTIR website, made available internationally, is an alternative secure connection to the eTIR international system. It has the same functionalities as the web services (except for the centralized declaration mechanism).

2.1.3.2.4 Definitions of standard messages

All messages sent to or received from the eTIR international system are defined and listed in Chapter 3.

2.1.3.2.5 Technical documentation

The technical documentation will ensure that the Customs authorities and the Guarantee Chain can develop their specific applications connected to the eTIR international system.

2.1.3.2.6 User manuals and training for trainers

The user manuals and the training for trainers serve as basis for the development of national user manuals and national training programs. They describe the procedures, the best practices as well as all tools available in eTIR international system.

2.1.3.2.7 Helpdesk

A helpdesk is available to Customs authorities and the Guarantee Chain to help in the implementation of the eTIR international system.

2.1.3.2.8 Customs offices database

A database in which information on all Customs offices involved in the eTIR international system is stored.

2.1.3.2.9 Countries database

A database containing information on all countries involved in the eTIR system.

2.1.3.2.10 Authentication database

In order to technically restrict access to the eTIR international system to those users who have been authorized, an authorization database is used. This database is used to secure the web services as well as the website (for the fall-back scenarios). Consequently, it will contain the credentials of guarantee chains' IT systems and users as well as Customs central systems and specific Customs offices/officers. Furthermore, holders credentials will also be included to enable the use of the centralized declaration mechanism by means of web services.

2.1.3.3 Other required systems

2.1.3.3.1 Authorized access database

To ensure that guarantees are only issued to authorized holders, the eTIR international system links to the ITDB.

2.1.3.4 Languages and character sets

The eTIR international system will allow for the translation of all coded information in order to ensure the maximum transparency. In order to allow the transmission and display of all languages, the character set used by the eTIR international system is Unicode.

In case of textual descriptions, the language of the country where the information has been provided shall be used. Nevertheless, translations in other languages can also be provided and are sometimes required.

2.2 Step-by step implementation

The eTIR international system as defined in Chapter 2.1 is subdivided in two major modules: management by Customs of data on guarantees and data exchange, which should be developed simultaneously in order to obtain maximum benefits.

The full computerization of the TIR procedure depends on the complete implementation of both modules by all parties involved. Transitional steps will be required before all Contracting Parties of the Convention will exchange electronic information. In view of the wide geographical coverage of the TIR Convention and the different levels of technological development of the countries concerned, the duration of the transition may vary from country to country.

2.2.1 Management by Customs of data on guarantees module

The management by Customs of data on guarantees module, as described in Chapter 2.1.2.2, allows the Guarantee Chain to electronically register in the eTIR international system all guarantees issued to the holders. Moreover, it enables Customs authorities to check the validity of the guarantee in the course of a TIR transport and before each TIR operation.

Introducing the management by Customs of data on guarantees into the eTIR international system will increase the security of the TIR system by making available, at any time, information on the validity of the guarantees. Moreover, by linking the consultation of the status of the guarantee to the ITDB, it will further secure the system by ensuring that unauthorized holders will not be allowed to perform TIR transports. Logically, it will also further discourage attempts to falsify the TIR Carnet.

The corner stone of the management by Customs of data on guarantees module is the registration of the guarantee by the Guarantee Chain. It implies the development of the eTIR international system with all related functionalities and the development or the amendment of a tool allowing for real-time transmission by the Guarantee Chain of guarantee data to the eTIR international system

2.2.2 Data exchange module

The second module of the eTIR project focuses on developing the TIR transport and TIR operations information exchange combining them with the guarantee information provided by the Guarantee Chain.

In view of the fact that not all Customs offices will immediately have access to the eTIR international system, the use of present paper TIR Carnet will be maintained and remains mandatory. Nevertheless, all eTIR compatible Customs offices will already be in a position to have access to and update the central system with TIR transport/TIR operation information.

It can be envisaged that one or more pilot projects concerning the exchange of data between Contracting Parties can be initiated, in line with the mandate provided by WP.30 (TRANS/WP.30/212, para. 21).

2.2.3 Abolition of the present TIR Carnet: a geographical expansion

Before being able to completely abandon the present paper TIR Carnet, all parties involved in a TIR transport will have to be able to securely exchange electronic information on the TIR transport, the TIR operations and on the guarantee. To enable a smooth transition towards a fully computerized TIR system,

the use of the present paper TIR Carnet will be discontinued for itineraries where all Customs offices will be linked to the eTIR international system.

As a result, for those TIR transports where the TIR Carnet will no longer be required, the full implementation of the second phase of the eTIR project will become mandatory for all Customs offices involved. Issues with regard to rerouting are addressed in the analysis and design chapters.

2.2.4 Parallel projects

2.2.4.1 Declaration mechanisms

In parallel to the development and implementation of the eTIR international system (including a web service for submitting advance cargo information/declarations), national and international electronic declaration mechanisms will also have to be developed, aided by guidelines established in this Reference Model.

2.2.5 Schedule

The eTIR sub-projects imply developments at public and private level. Moreover, the public developments will be of both an international and national nature.¹

The following schedule does not provide any timeframe; it only aims at showing the dependencies between the various projects in their different phases of development. The national implementations of the projects by Contracting Parties will certainly not be achieved simultaneously. Therefore, the schedule below considers three different timeframes, covering the possibilities for countries to develop their projects at their own speed.

Table 2.1
Step-by-step implantation schedule

| <i>Sub-projects</i> | <i>Steps²</i> |
|--------------------------------|--------------------------|
| <i>eTIR project</i> | |
| Public international | I E C T |
| Public national | |
| Contracting Party 1 | E C T |
| Contracting Party 2 | E C |
| Contracting Party 3 | E |
| Private ^{3,4} | E C T |
| <i>Parallel projects</i> | |
| National declaration mechanism | |
| Contracting Party 1 | E C T |
| Contracting Party 2 | E C |
| Contracting Party 3 | E |
| Private ¹ | E C T |

¹ The same might apply to the private sector development but it is not the aim of this project to provide the private sector with instructions on how their systems will have to be developed or updated in order to meet the requirements of the eTIR project.

² The letters in the cells represent the different phases as identified in table 0.1 of the Reference Model (I: Inception, E: Elaboration, C: Construction, T: Transition). Steps in italics are performed at national level or at private sector level. Steps in bold need to be finalized before reaching the milestone (indicated by vertical lines).

³ The well functioning of the private/public partnership is essential to successfully implement this project.

⁴ The IRU emphasised that this part of the computerization has already been largely accomplished.

| <i>Sub-projects</i> | <i>Steps²</i> | | | |
|--|--------------------------|---|---|---|
| <i>Paper to electronic step-by-step transition</i> | 1 | 2 | 3 | 4 |

2.2.5.1 *Paper to electronic step-by-step transition*

The transition from the paper TIR Carnet to the eTIR system will be achieved progressively, with the completion and implementation of the projects at the national and international level. In the schedule above, four major steps are identified:

- 1: Before the eTIR international system will be in place, allowing the exchange of information between the Guarantee Chain and the eTIR international system as well as allowing countries to exchange data, the paper TIR Carnet and the actual private or public systems will remain the only possible tool for the management of the TIR procedure.
- 2: Once the eTIR international system is available and the Guarantee Chain interoperates with the system in order to provide the guarantee information, countries will start linking up to the eTIR international system, in order to obtain validation of the guarantees submitted by the holders.
- 3: When all Contracting Parties along a specific itinerary will have been computerized (the guarantee and data exchange modules as well as the declaration mechanisms), there will be no more need to use the present paper TIR Carnet for TIR transports along this itinerary. During this step, some TIR transports will continue to use paper TIR Carnets whereas others will be performed under cover of eTIR.
- 4: When all Contracting Parties of the TIR Convention will have implemented both modules as well as the appropriate declaration mechanisms, the present TIR Carnet will be completely abandoned.

2.3 Use cases analysis

The elaboration of the use case analysis is based on the instruction by the WP.30 that the eTIR project should evolve around the establishment of an international centralized database in order to facilitate the secure exchange of data between national Customs systems and that the management of the data on guarantees, once the Guarantee Chain had issued a guarantee to an holder, should lie with Customs (ECE/TRANS/WP.30/226, para. 41).

2.3.1 *Management by Customs of data on guarantees use case*

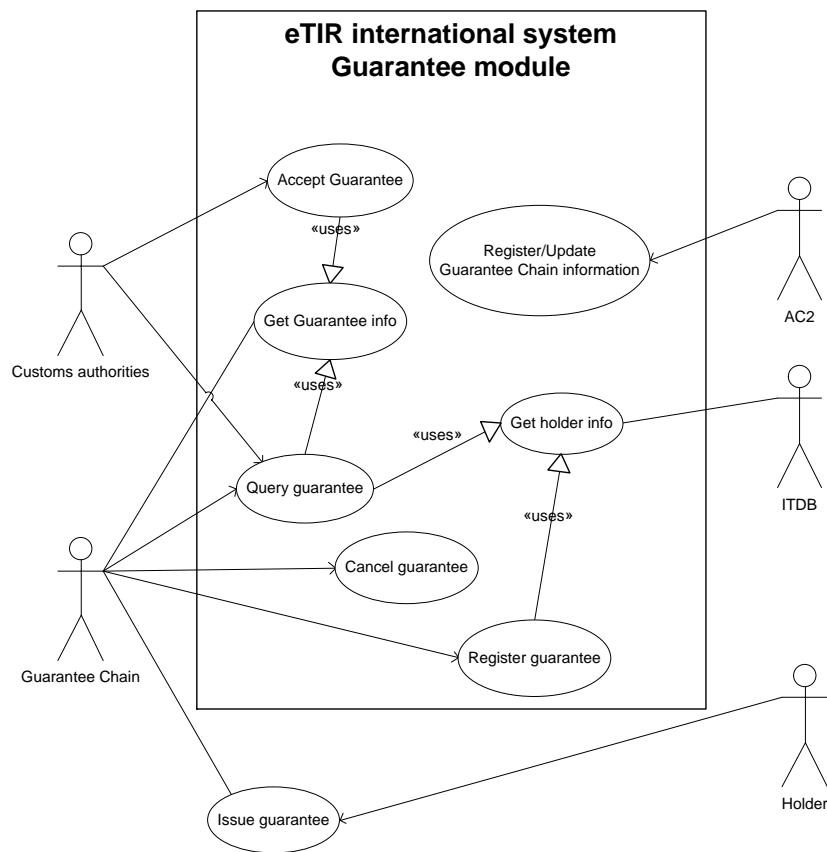

The management by Customs of data on guarantees requires that the Guarantee Chain updates the guarantees directly in the eTIR international system right after having issued them to holders.

2.3.1.1 *Management by Customs of data on guarantees use case diagram*

Figure 2.2

Customs management of guarantees use case diagram

¹ It is envisaged that the private sector will provide declaration mechanisms, in particular to authorize holders submitting declarations in a country other than their country of registration.

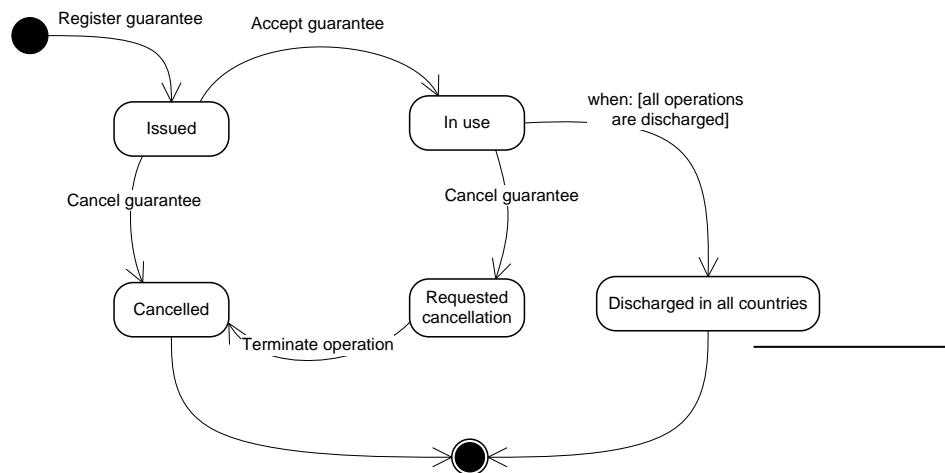

2.3.1.2 Guarantee state chart diagram

The guarantees registered in the eTIR international system will have their status updated all along the TIR transport. The following state chart diagram shows the various statuses as well as the transition even between them.

The guarantee status can be:

- Issued
 - In use
 - Proposed cancellation
 - Cancelled
 - Discharged in all countries

Figure 2.3
Guarantee state chart diagram

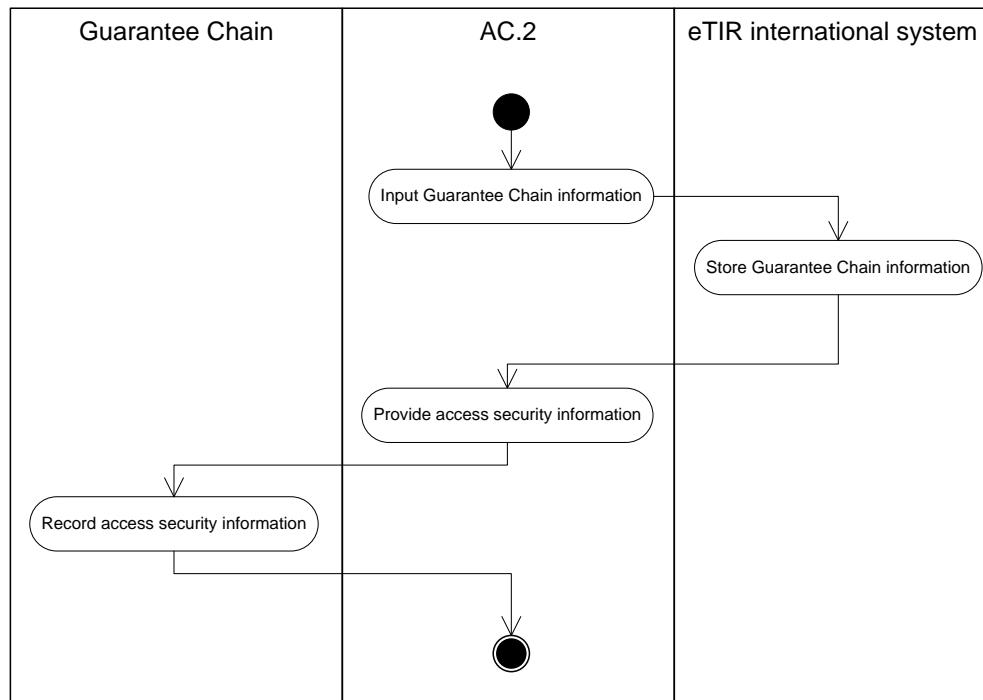

2.3.1.3 Register Guarantee Chain use case description

Table 2.2
Register/Update Guarantee Chain information use case description

| | |
|----------------------|---|
| Name | Register/Update Guarantee Chain information use case |
| Description | Once the Guarantee Chain has been authorized, it is registered in the eTIR international system. |
| Actors | AC.2 |
| Performance Goals | Only authorized Guarantee Chains can register guarantees in the eTIR international system. |
| Preconditions | - |
| Postconditions | - |
| Scenario | <p>Registration</p> <p>The AC.2 authorizes an international organization to manage the Guarantee Chain in accordance with article 6.2bis of the TIR Convention. It records the Guarantee Chain in the eTIR international system and inserts the information on the type of guarantees it is allowed to register (including the geographical coverage of its guarantees). It also provides the necessary security information to the Guarantee Chain in order to allow it to access the system.</p> |
| Alternative Scenario | - |
| Special requirements | - |
| Extension Points | - |
| Requirements Covered | - |

2.3.1.4 Register/Update Guarantee Chain information activity diagram

Figure 2.4
Register/Update Guarantee Chain information activity diagram

2.3.1.5 Register guarantee use case description

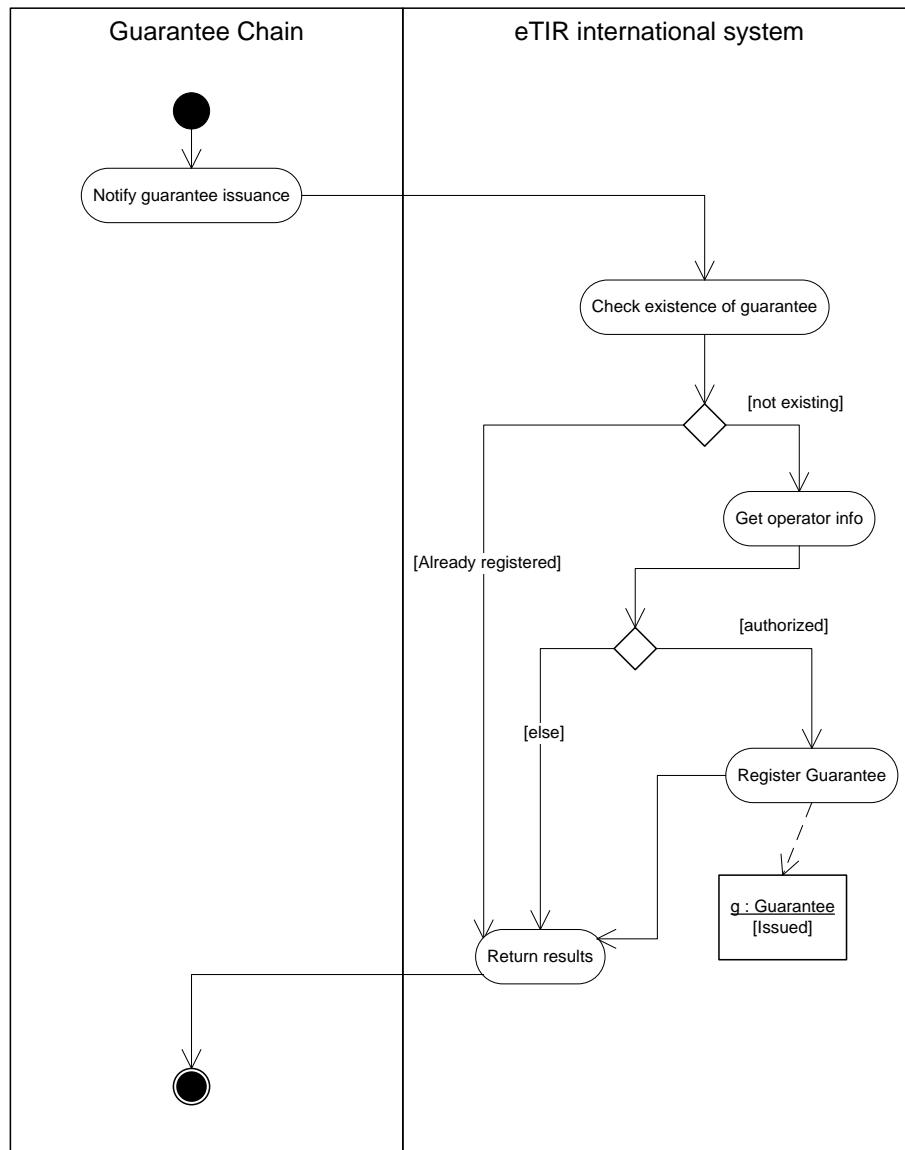

Table 2.3

Register guarantee use case description

| Name | Register guarantee use case |
|----------------------|---|
| Description | The Guarantee Chain registers each guarantee issued to a holder in the eTIR international system by sending an electronic message. |
| Actors | Guarantee Chain |
| Performance Goals | Any guarantee, issued to a holder, shall be registered in the eTIR international system before it can be used by a holder to accompany a declaration. |
| Preconditions | The holder, to whom the Guarantee Chain has issued a guarantee, must be authorized and registered in the ITDB and the eTIR international system should not contain a prior registration of the guarantee. |
| Postconditions | The guarantee information is stored in the eTIR international system with status “issued”. |
| Scenario | <p>Registration</p> <p>The Guarantee Chain issues a guarantee to a holder and sends a secure electronic message with all information regarding the guarantee to the eTIR international system. The eTIR international system checks if the guarantee has not yet been registered. Then it gets holder information, including its current status. In case the guarantee has not yet been registered and the holder is authorized, the system registers the guarantee and notifies the results of the registration of the guarantee to the Guarantee Chain. If the registration fails for any reason, the Guarantee Chain is informed accordingly.</p> |
| Alternative Scenario | <p>Fallback scenario</p> <p>If electronic messages cannot be sent to the eTIR international system by means of the web services, the eTIR website should be used.</p> |
| Special requirements | The Guarantee Chain cannot update any information it has registered in the eTIR international system. Only the cancellation of the guarantee is possible. |
| Extension Points | - |
| Requirements Covered | - |

2.3.1.6 Register guarantee activity diagram

Figure 2.5
Register guarantee activity diagram

2.3.1.7 *Cancel guarantee use case description*

Table 2.4

Cancel guarantee use case description

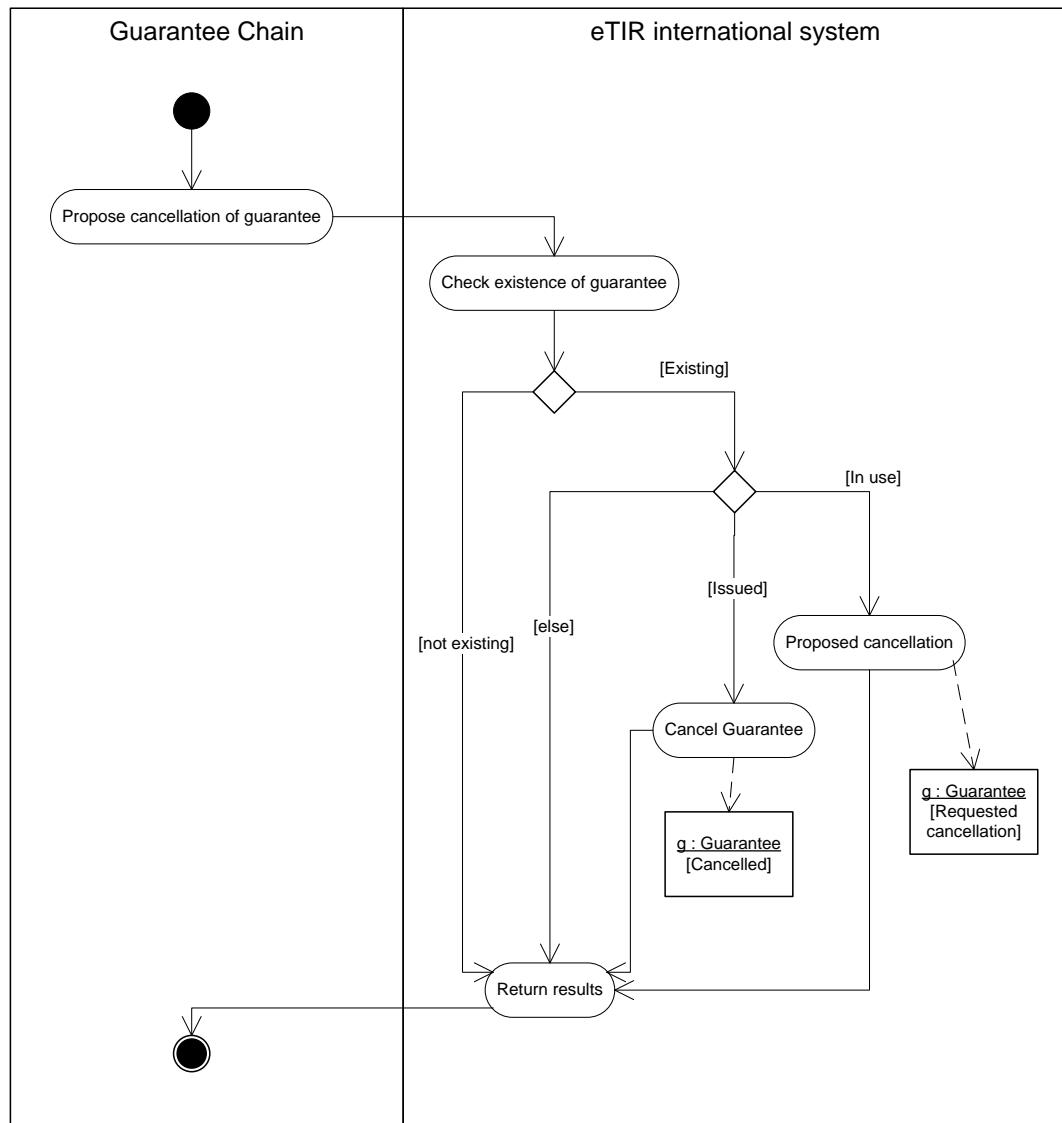

| Name | Cancel guarantee use case |
|----------------------|---|
| Description | The Guarantee Chain cancels a guarantee after it has been issued to a holder by sending an electronic message to the eTIR international system. |
| Actors | Guarantee Chain |
| Performance Goals | - |
| Preconditions | The guarantee must have been registered and have the status “issued”. The guarantee can also have the status “in use”. |
| Postconditions | The guarantee status is changed to “cancelled”, “requested cancellation” or remains in its current status. |
| Scenario | Cancellation

The Guarantee Chain sends a secure electronic message to the eTIR international system to request the cancellation of a guarantee. First the eTIR international system checks that the guarantee is registered. Then in case the guarantee status is “issued”, the eTIR international system changes the guarantee status to “cancelled”. If the guarantee status is “in use”, its status is turned to “requested cancellation”. |
| Alternative Scenario | Fallback scenario

If electronic messages cannot be sent to the eTIR international system by means of the web services, the eTIR website should be used. |
| Special requirements | |
| Extension Points | - |

2.3.1.9 *Accept guaranteee use case description*

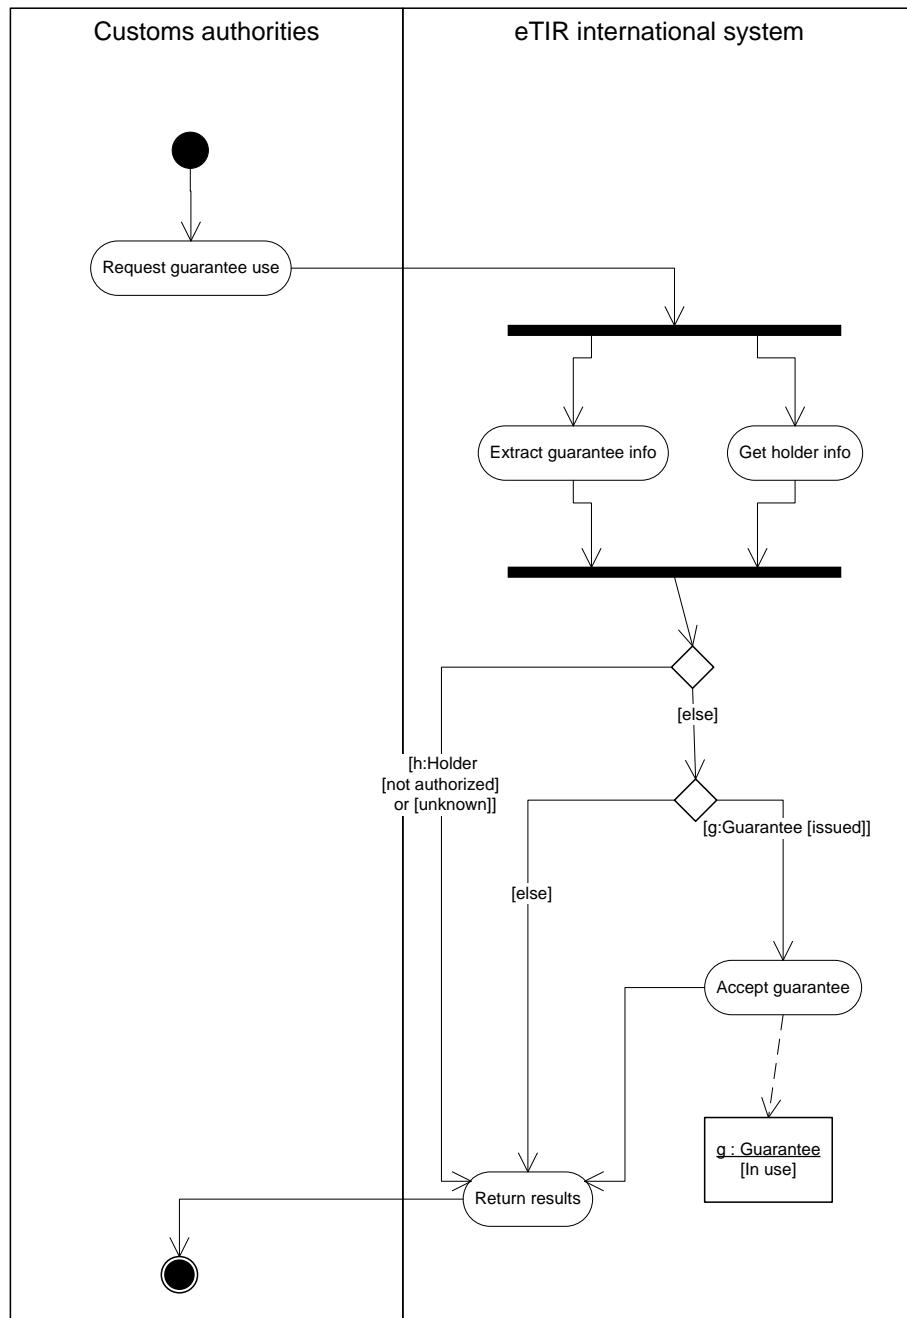

Table 2.5

Accept guaranteee use case description

| Name | Accept guaranteee use case |
|----------------------|--|
| Description | The Customs authorities notify the eTIR international system that the guaranteee has been accepted. |
| Actors | Customs authorities |
| Performance Goals | - |
| Preconditions | The guaranteee must be registered and its status must be “issued”. The Customs authorities at departure must also have received a TIR declaration. The holder must be registered in the database and authorized. |
| Postconditions | The guaranteee status is changed to “in use” or remains at its current status. |
| Scenario | Accept guaranteee
Customs authorities send a secure electronic message to the eTIR international system informing that the guaranteee has been accepted for a TIR transport. |
| Alternative Scenario | Fallback scenario
If electronic messages cannot be sent to the eTIR international system by means of the web services, the eTIR website should be used. |
| Special requirements | - |

Table 2.7
Query guarantee use case description

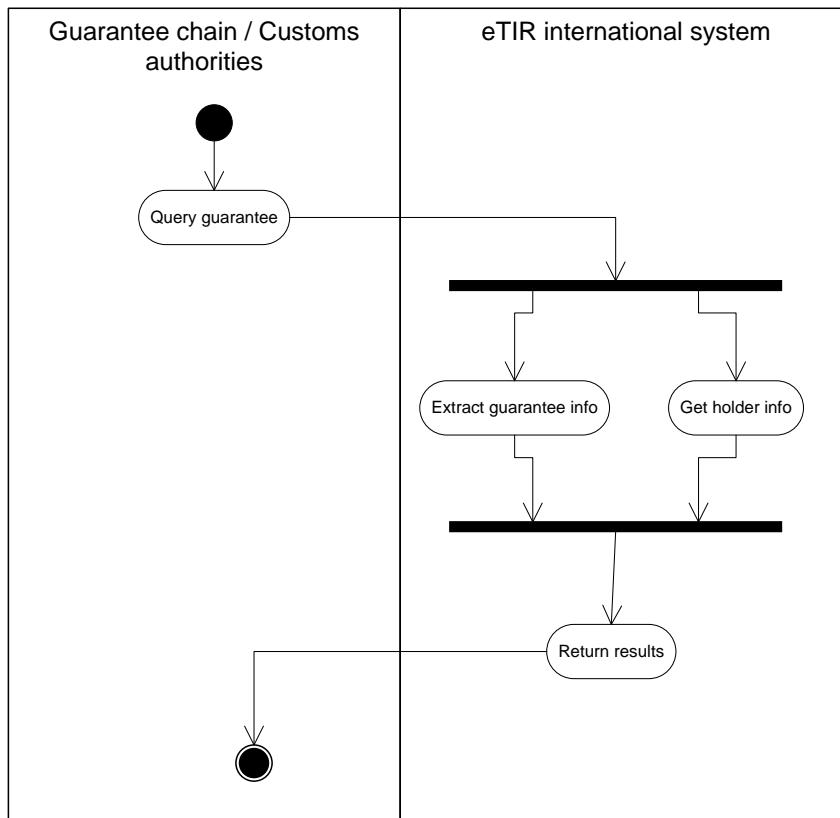

| Name | Query guarantee use case |
|----------------------|--|
| Description | Customs authorities or a Guarantee Chain request the eTIR international system information on issued guarantees. |
| Actors | Guarantee Chain, Customs authorities |
| Performance Goals | - |
| Preconditions | - |
| Postconditions | - |
| Scenario | <p>Query the guarantee</p> <p>A Guarantee Chain or Customs authorities send a secure electronic query to the eTIR international system. The eTIR international system extracts all data from the database concerning the guarantee and combines them with data on the holder (get holder info) and sends all information to Customs authorities or to the Guarantee Chain. If the guarantee has not yet been registered, the Customs authorities or the Guarantee Chain are informed accordingly.</p> |
| Alternative Scenario | <p>Fallback scenario</p> <p>Customs authorities and the Guarantee Chain can use the eTIR website.</p> |
| Special requirements | A Guarantee Chain can only query information on those guarantees which he has issued and which have been registered by the eTIR international system. The eTIR international system also provides him with information on TIR transports attached to the guarantees issued by him. |

Table 2.8
Record consignment information use case description

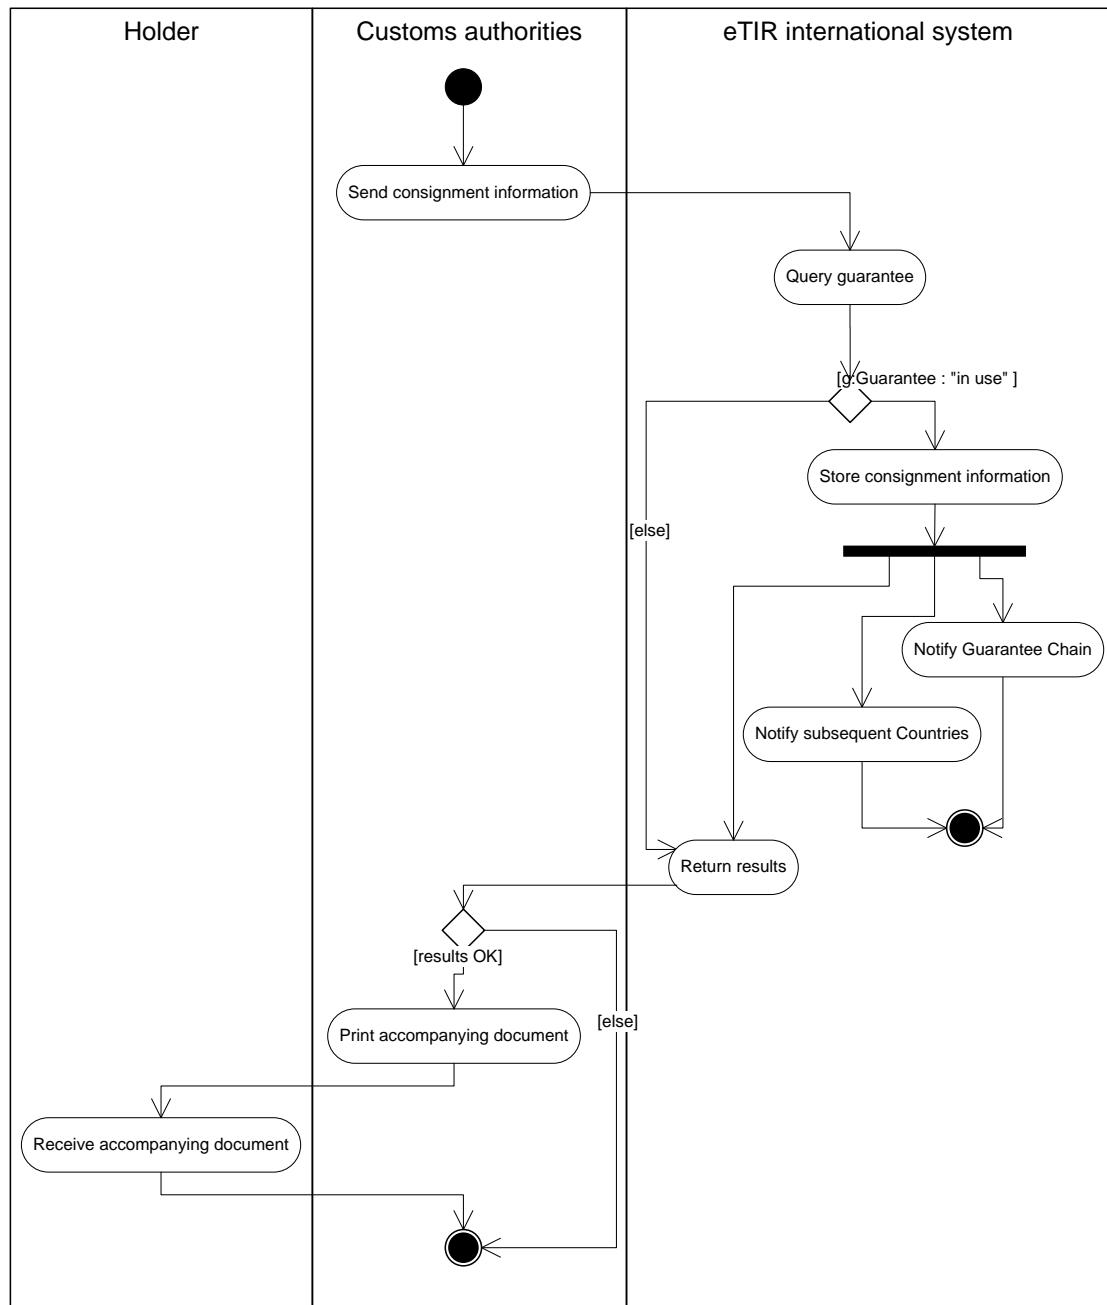

| | |
|----------------------|---|
| Name | Record consignment information use case |
| Description | Information about the consignment is centrally stored. |
| Actors | Customs authorities |
| Performance Goals | |
| Preconditions | The guarantee must have been accepted (status “in use”). The holder should be authorized and not currently excluded from any country along the itinerary.

The declaration has been accepted by Customs Authorities. |
| Postconditions | - |
| Scenario | The first Customs office of departure will send all data contained in the electronic declaration together with the information on seals affixed to the eTIR international system after having accepted the declaration and sealed the loading unit. The eTIR international system provides all subsequent countries indicated in the itinerary and the Guarantee Chain with the information. Customs authorities will provide the holder with an accompanying paper document. |
| Alternative Scenario | Fallback scenario

In case the transmission of information to the eTIR international system fails, the Customs authorities nevertheless accept the holder to start the TIR transport. Customs authorities will transmit the electronic data to the eTIR international system at the first opportunity or by means of the eTIR website. In the meantime, other Customs authorities will obtain the required information from the accompanying document. |

| Name | Update consignment information use case |
| Description | The information related to a declaration is updated after subsequent loading or partial unloading, after the truck and/or the goods have been submitted to checks, after the itinerary has been changed or after the vehicle has been changed. |
| Actors | Customs authorities, holder |
| Performance Goals | |
| Preconditions | The declaration updates have been accepted by Customs Authorities. The holder should be authorized and not currently excluded from any country along the itinerary. |
| Postconditions | - |
| Scenario | <p>Intermediate loading points</p> <p>The intermediate Customs office of departure will send all data contained in the declaration to the eTIR international system together with the information on the new seals, after having accepted the declaration and resealed the vehicle or container. The eTIR international system provides all subsequent countries indicated in the itinerary and the Guarantee Chain with the updated information.</p> <p>Intermediate Unloading points</p> <p>After having sent a termination message and unloaded the goods concerned, the intermediate Customs office of destination will send information on the new seals affixed. The eTIR international system provides all subsequent countries indicated in the itinerary and the Guarantee Chain with the updated information. Customs authorities provide the holder with an updated accompanying paper document.</p> <p>Customs checks</p> <p>Having removed the seals from the vehicle or container, performed the necessary checks and resealed the vehicle or container, Customs authorities send a message to provide the eTIR international system with information on the new seals affixed. The eTIR international system provides all subsequent countries indicated in the itinerary and the Guarantee Chain with the updated information. Customs authorities provide the holder with an updated accompanying paper document.</p> <p>Change of itinerary</p> <p>After having been informed by the holder that the routing of the transport has changed, Customs authorities send a message to provide the eTIR international system with information on the new itinerary. The eTIR international system provides all subsequent countries indicated in the itinerary and the Guarantee Chain with the updated information. It also informs the countries removed from the itinerary that the TIR transport will not transit their country. Customs authorities provide the holder with an updated accompanying paper document.</p> <p>Vehicles change</p> <p>After having been informed by the holder that a new vehicle (usually the tractor unit) will be used, Customs authorities send a message to provide the eTIR international system with information on the new vehicle. The eTIR international system provides all subsequent</p> |

countries indicated in the itinerary and the Guarantee Chain with the updated information.

Fallback scenario

In case the transmission of information to the eTIR international system fails, the Customs authorities nevertheless accept the holder to continue the TIR transport. Customs authorities will transmit the electronic data to the eTIR international system at the first opportunity or by means of the eTIR website. In the meantime, other Customs authorities will obtain the required information from the accompanying document.

Table 2.15
Advance cargo information use case description

| | |
|-------------|----------------------|
| Name | Declaration use case |
|-------------|----------------------|

| | |
|----------------------|--|
| Description | holder transmits an advance cargo declaration to the eTIR international system, either directly or via a declaration mechanism provided by the Customs authorities of its country of residence or a private international declaration mechanism, that will then forward it to the Customs authorities of the country of first Customs office of departure. |
| Actors | Holder, Customs authorities, private provider of an international declaration services (e.g. guarantee chain) |
| Performance Goals | |
| Preconditions | The holder, the Customs system of the country of residence of the holder or the private provider of an international declaration services is registered in the authentication database (see 2.1.3.2.10) |
| Postconditions | - |
| Scenario | . |
| Alternative Scenario | Fallback scenario
In case transmission by means of web services is not available, the holder can use other available declaration mechanisms. |
| Special requirements | - |
| Extension Points | - |
| Requirements Covered | - |

2.3.2.17 Advance cargo information activity diagram

Figure 2.18
Advance cargo information activity diagram

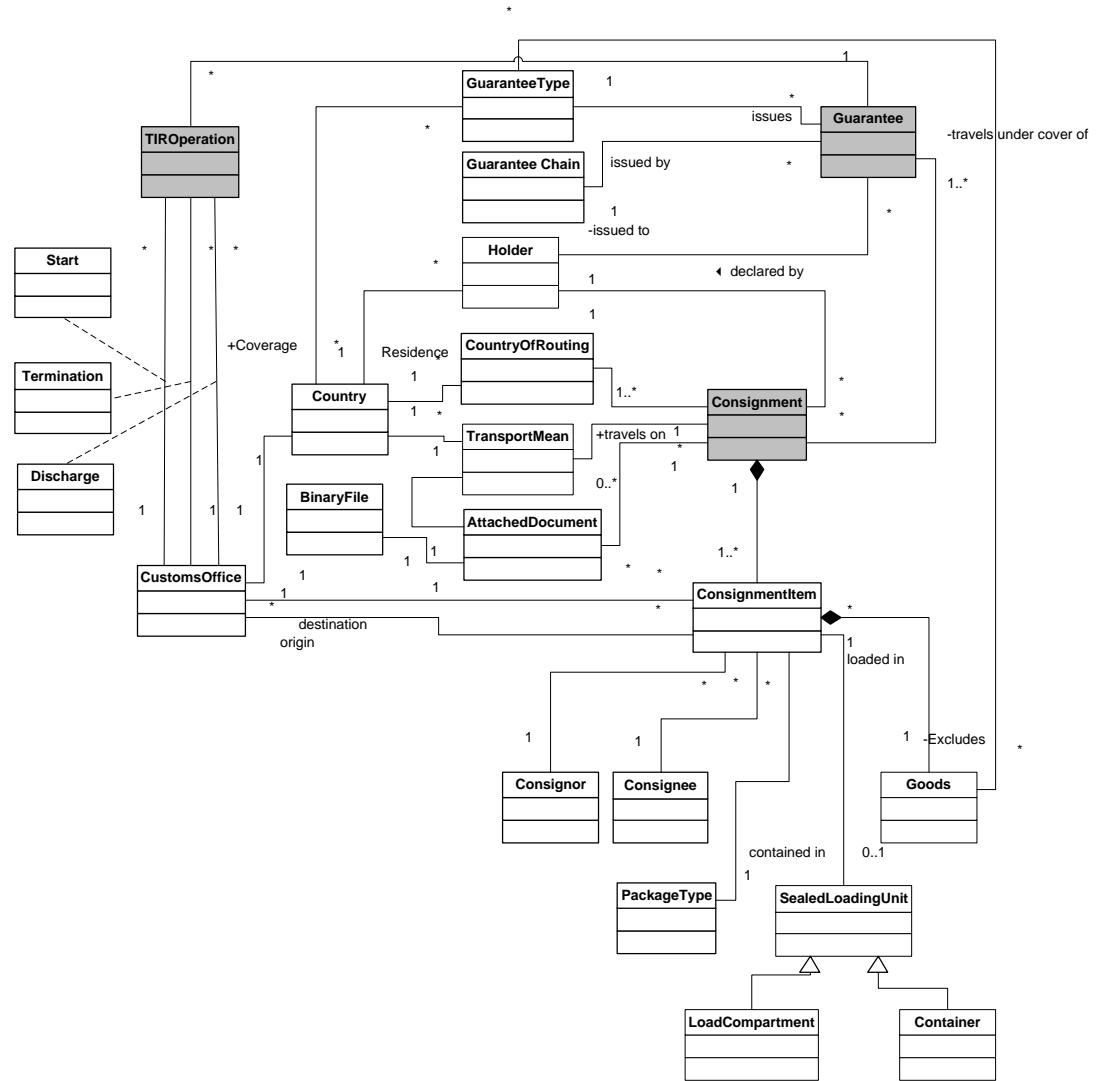

2.4 Class diagram

The class diagram in Figure 2.17 is articulated around 3 main classes (in grey): the guaranteee, the consignment and the TIR operation.

- The guaranteee class, because the majority of information exchanged with the eTIR international system will be referenced by means of the GRN.
- The consignment class, because it links all information regarding the goods in transit.
- The TIR operation class, because it allows the exchange of information previously contained in the counterfoils.

Figure 2.19
General eTIR class diagram

3. Analysis workflow

The purpose of the analysis chapter is to translate the requirements identified in Chapter 2 (eBusiness requirements) into specifications that enable software developers and message designers to further design the eTIR system.

8. Analysis goals are:

- (a) To build a set of business objects from the requirements contained in Chapter 2;
- (b) To transform the requirements set out in Chapter 2 into precise, object oriented specifications;
- (c) To provide a foundation for the design of electronic messages;
- (d) To provide all actors of the eTIR system with interfaces to hook on to their existing information systems;
- (e) To explicitly specify the dynamics of the eTIR system.

9. In order to achieve those goals, Chapter 3 provides further detail on the dynamic aspects of the eTIR system and completes the more general description provided by the activity diagrams in Chapter 2. It does so by means of sequence diagrams which describe the detailed interactions between actors and objects in the eTIR system. The identification of all these interactions is the basis for the elaboration of the electronic messages.

10. Furthermore, the class diagram in Chapter 2 is further developed and is now divided into three separate class diagrams, which include attributes and operations. The class diagrams will be used to design the messages and provide the structure of databases. They will also provide the basis for the development of the objects' methods.

The analysis chapter is therefore subdivided into two parts, starting with the activity analysis, which depicts the dynamics of the eTIR international system, and followed by a data analysis, which presents the attributes and the methods of the objects used and exchanged by the eTIR international system in the form of class diagrams.

3.1 Activity Analysis

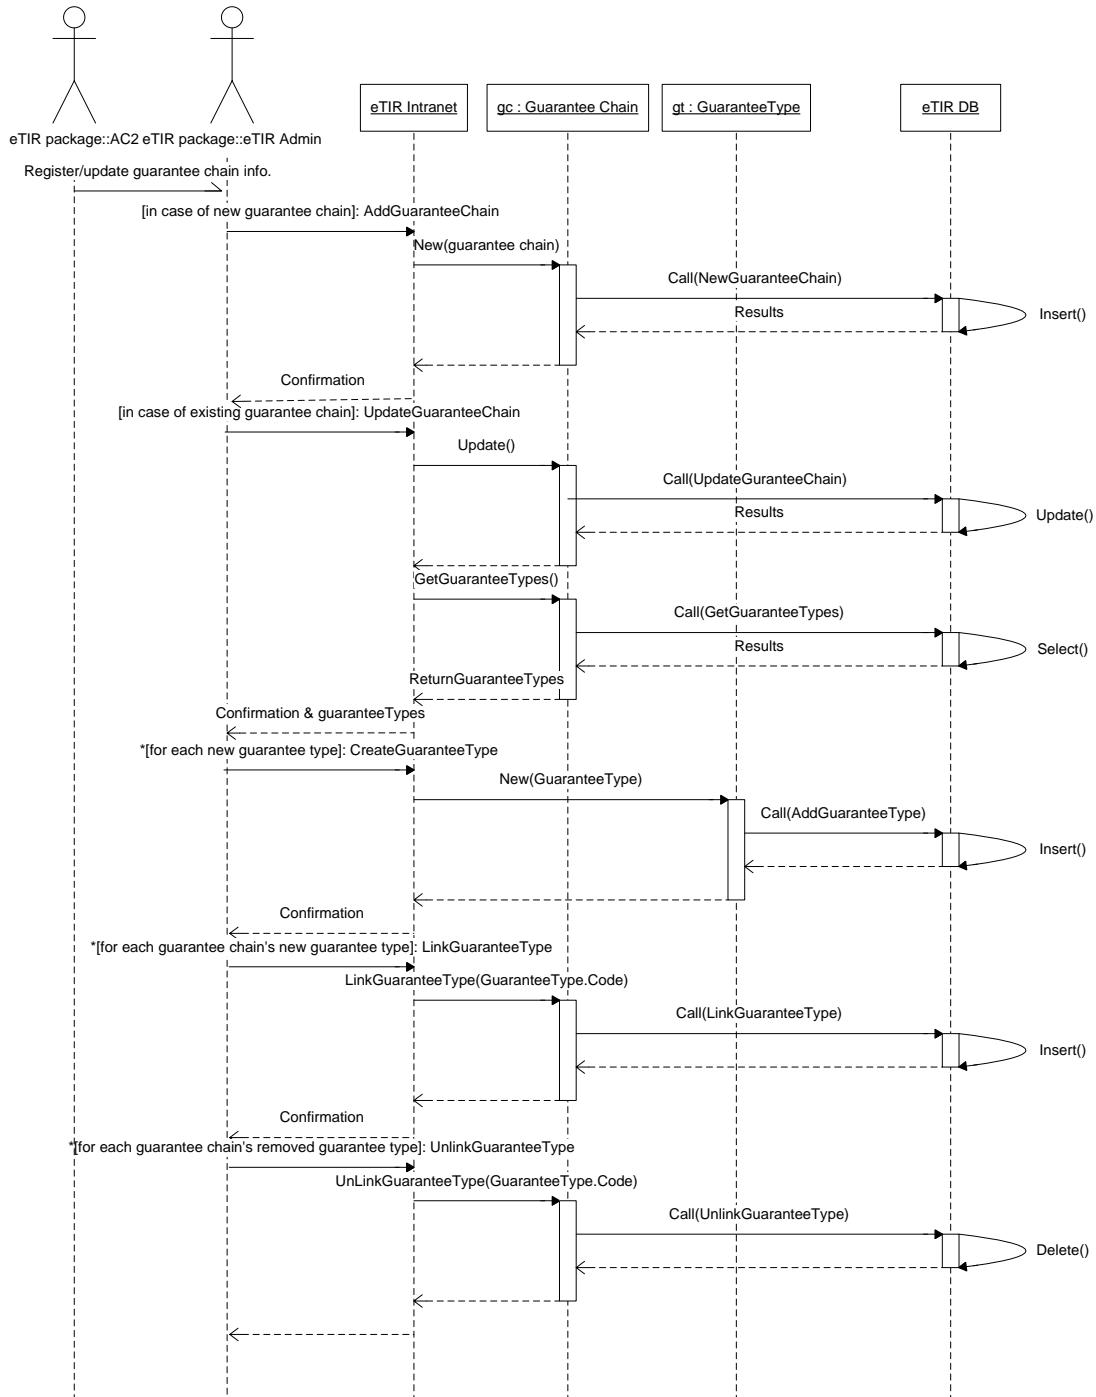

3.1.1 Sequence diagrams

The following sequence diagrams are devised on the basis of the activity diagrams presented in Chapter 2.3. They describe in details all interactions between the actors and the objects of the system.

3.1.1.1 Management by Customs of data on guarantees

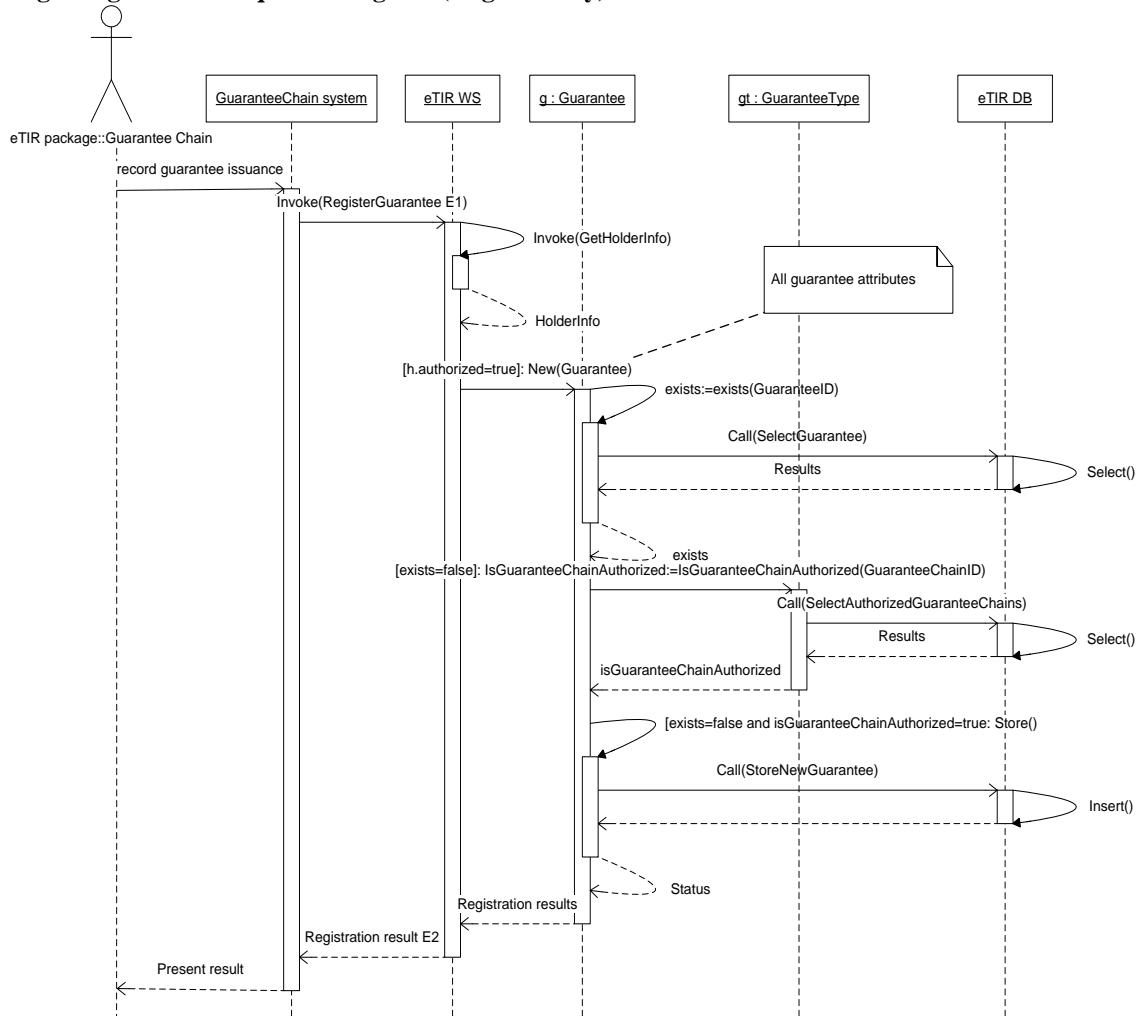

3.1.1.1.1 Register/update guarantee chain information

Figure 3.15:
Advance cargo information sequence diagram (English only)

3.1.2 Fall-back scenarios

The aim of this chapter is to provide specific fallbacks for every use case involving the eTIR international system. The fall-back scenarios are based on three major elements:

- Accompanying document;
- Local information;
- eTIR website, including a replica of the eTIR international database.

The accompanying document is a piece of paper provided by the Customs office of departure after the declaration has been accepted. It contains all relevant information regarding the TIR transport.

It is important to note that the underlying fall-backs are of a functional nature. The systems at stake (i.e. the eTIR international system, national systems and guarantee chain systems) should also be equipped with technical fall-backs which allow systems to run smoothly in case of failure. Functional fall-backs have to be used only when all technical fall-backs have failed.

The use of functional fall-backs may not provide the same level of facilitation to both the holder and Customs. As a consequence, their use should not be mandatory for the holder, who should always have the possibility to wait for the systems to be restored. Similarly, Customs may establish delays before starting functional fall-backs, allowing for the technical fall-back to be started or for the systems to be repaired.

3.1.2.1 Management by Customs of data on guarantees

Guarantee related information is crucial for the well-functioning of the eTIR system. Therefore, particular emphasis is put on the analysis of use cases where the eTIR international system is not in a position to provide the required exchange of guarantee information. The eTIR website will ensure that guarantee information can be accessed by Customs administrations in case the eTIR international system, the guarantee chain system or Customs systems are not available.

3.1.2.1.1 Register guarantee

Potential problems:

1. The guarantee chain system is not functioning.
2. The connection between the guarantee chain system and the eTIR international system is broken.
3. The eTIR international system is not functioning.

Fall-backs:

1. The guarantee chain transmits the information to the eTIR international system through the eTIR website. The guarantee chain will update its system as soon as it is again functioning, keeping in mind that the guarantees have already been entered in the eTIR international system. The eTIR international system will inform the guarantee chain accordingly in case it would try to register a guarantee already registered via the eTIR website channel.
2. The guarantee chain transmits the information to the eTIR international system via the eTIR website. Once the connection will be restored, the eTIR international system will inform the guarantee chain accordingly in case it would try to register a guarantee already registered.
3. The guarantee chain transmits the information to the eTIR website database replica. The eTIR website database replica becomes the main source of information for all Customs administrations until the eTIR international system is restored. At that point, the eTIR international database and the eTIR website database replica will be synchronized.

3.1.2.1.2 Cancel guarantee

Potential problems:

1. The guarantee chain system is not functioning.
2. The connection between the guarantee chain system and the eTIR international system is broken.
3. The eTIR international system is not functioning.

Fall-backs:

1. The guarantee chain transmits the information to the eTIR international system through the eTIR website. The guarantee chain will update its system as soon as it is again functioning, keeping in mind that the guarantees concerned have already been cancelled in the eTIR international system. The eTIR international system will inform the guarantee chain accordingly in case it would try to cancel a guarantee already cancelled or not registered.
2. The guarantee chain transmits the information to the eTIR international system through the eTIR website. Once the connection will be restored, the eTIR international system will inform the guarantee chain accordingly in case it would try to cancel a guarantee already cancelled or not yet registered.
3. The guarantee chain transmits the information to the eTIR website database replica. The eTIR website database replica becomes the main source of information for all Customs administrations until the eTIR international system is restored. At that point, the eTIR international database and the eTIR website database replica will be synchronized.

3.1.2.1.3 Accept guarantee

Potential problems:

1. The Customs system is not functioning.
2. The connection between the Customs system and the eTIR international system is broken.
3. The eTIR international system is not functioning.

Fall-backs:

1. Customs authorities transmit the information via the eTIR website. Customs authorities will update their system as soon as it is again functioning, keeping in mind that the guarantee acceptance has already been registered in the eTIR international system. The eTIR website will provide the necessary information to Customs authorities in case they would try to accept guarantees which have already been accepted.
2. Customs authorities transmit the information via the eTIR website. The eTIR website will provide the necessary information to Customs authorities in case they would try to accept guarantees which have already been accepted.
3. Customs authorities transmit the information via the eTIR website. The eTIR website database replica becomes the main source of information for all Customs administrations until the eTIR international system is restored. At that point, the eTIR international database and the eTIR website database replica will be synchronized.

3.1.2.1.4 Get holder information

Potential problems:

1. The ITDB is not functioning.
2. The connection between the ITDB and the eTIR international system is broken.

Fall-backs:

1. The eTIR international system will use a local replica of the ITDB and include a warning code, informing that a replica of the ITDB is the source of the information and that the information might not be up to date.
2. Same as 1.

3.1.2.1.5 *Query guarantee*

The query guarantee use case has three functions:

- (a) allowing Customs authorities and the guarantee chain to obtain information on a guarantee (e.g. status or type),
- (b) allowing Customs authorities and the guarantee chain to obtain information related to TIR transports and
- (c) allowing Customs authorities and the guarantee chain to obtain information related to TIR operations.

Potential problems:

1. The Customs or guarantee chain system is not functioning.
2. The connection between the Customs or guarantee chain system and the eTIR international system is broken.
3. The eTIR international system is not functioning.
4. The TIR transport has begun using a paper fall-back scenario.
5. A previous country in the TIR transport used a fallback procedure

Fall-backs:

1. (a) To request the status of a guarantee, Customs authorities or the guarantee chain use the eTIR website. (b) In order to obtain TIR transport information (mainly the declaration), the Customs office of departure can either use a national backup system, if available, or request the holder to provide his declaration in paper format. At other Customs offices, the declaration information in the accompanying document will be used and can be verified from the eTIR website. The guarantee chain will be able to obtain the information related to the TIR transport using the eTIR website. (c) The information on TIR operations can also be obtained from the eTIR website.
2. (a) To request the status of a guarantee, Customs authorities and the guarantee chain use the eTIR website. (b) At Customs offices, other than the first Customs office of departure, the TIR transport information in the accompanying document will be used and can be verified from the eTIR website. The guarantee chain will be able to obtain the information related to the TIR transport using the eTIR website. (c) The information on TIR operations can also be obtained from the eTIR website.
3. (a) To request the information about the guarantee, Customs authorities and the guarantee chain use the eTIR website. (b) At Customs offices, other than the first Customs office of departure, the TIR transport information in the accompanying document will be used and can be verified from the eTIR website. The guarantee chain will be able to obtain the information related to the TIR transport using the eTIR website. (c) The information regarding TIR operation registered

electronically before the breakdown will be available for querying once the eTIR system is functioning again. For TIR operations taking place while the eTIR system was not functioning, only a copy of the accompanying document can be made available after the TIR transport has ended.

4. (a) *No fallback required* (b) At Customs offices, other than the first Customs office of departure, the TIR transport information in the accompanying document will be used. The guarantee chain will be able to obtain the information related to the TIR transport in the form of a copy of the accompanying document after the end of the TIR transport. (c) Information related to previous TIR operations can be found on the accompanying document. The guarantee chain will be able to obtain the information related to the TIR operations in the form of a copy of the accompanying document after the end of the TIR transport.
5. (a) *No fallback required* (b) *No fallback required*. (c) Information related to previous TIR operations that were handled under the fallback procedure (including potential changes of the seals) can be found on the accompanying document. The guarantee chain will be able to obtain the information related to the TIR operations in the form of a copy of the accompanying document after the end of the TIR transport.

3.1.2.2 Data exchange

The exchange of TIR transport data is a key element of the eTIR system. Customs authorities provide the holder with a paper accompanying document as reference. The paper accompanying document will also be used in case the information cannot be exchanged electronically. The information on TIR operations is also important but is considered of secondary importance and, therefore, will not be subject to fall-back procedures other than stamping the accompanying document.

A TIR transport started under a fall-back procedure will end under a fall-back procedure. If a fall-back procedure is used in a country of pure transit (no loading or unloading of goods), the following countries can still use the standard procedure but information regarding the operation carried out under the fall-back procedure will only be available on the accompanying document.

3.1.2.2.1 Record consignment information

Potential problems:

1. The Customs system of the country of departure is not functioning.
2. The connection between the Customs system of the country of departure and the eTIR international system is broken.
3. The eTIR international system is not functioning.
4. Subsequent countries could not be notified.

Fall-backs:

1. Customs authorities fill-in manually a paper accompanying document that will serve as the primary source of information for the TIR transport. The holder is informed that countries along the itinerary will not receive advance information. The holder remains responsible to comply with advance information requirements in subsequent countries. Alternatively, the TIR website allows Customs to record the consignment information.

2. The accompanying document produced by the Customs system becomes the primary source of information for the TIR transport. The holder is informed that countries along the itinerary will not receive advance information. The holder remains responsible to comply with advance information requirements in subsequent countries. Alternatively, the TIR website allows Customs to record the consignment information.
3. Same as 2.
4. The eTIR international system informs the Customs system that some subsequent countries could not be notified of the registration of this consignment. The Customs system will specifically mention (print) on the accompanying document that some countries did not receive the adequate information.

3.1.2.2.2 Update consignment information

The same potential problems and fall-backs as those of the record consignment use case apply. Moreover, if the TIR transport has already begun using a fall-back procedure, fall-back procedure 2 shall be used.

3.1.2.2.3 Start of TIR operation

For the Start of TIR operation use case the following differentiation applies:

- a. Customs office of departure and
- b. Customs office of entry.

Potential problems:

1. The Customs system is not functioning.
2. The connection between the Customs system and the eTIR international system is broken.
3. The eTIR international system is not functioning.
4. The TIR transport has begun using a paper fall-back scenario.

Fall-backs:

1. (a) Customs authorities amend the accompanying document they have produced with the start operation information. Alternatively, the TIR website allows Customs to register the TIR operation start information. (b) Customs authorities accept the accompanying document as source for the declaration and revert to a paper procedure to start the TIR operation. Customs authorities amend the accompanying document with the start operation information. The start information will be keyed-in and transmitted to the eTIR international system once the system is working. Alternatively, the TIR website allows Customs to register the TIR operation start information.
2. (a) Customs authorities amend the accompanying document they have produced with the start operation information. Alternatively, the TIR website allows Customs to register the TIR operation start information. (b) Customs authorities accept the accompanying document as source for the declaration and manually key-in the information in their system. Customs authorities amend the accompanying document with the start operation information. The start information will be transmitted to the eTIR international system once the

connection is re-established. Alternatively, the TIR website allows Customs to register the TIR operation start information.

3. (a) Customs authorities amend the accompanying document they have produced with the start operation information. Alternatively, the TIR website allows Customs to register the TIR operation start information. (b) Customs authorities accept the accompanying document as source for the declaration and manually key-in the information in their system. Customs authorities amend the accompanying document with the start operation information. The start information will be transmitted to the eTIR international system once it is functioning. Alternatively, the TIR website allows Customs to register the TIR operation start information.
4. (a) Not applicable. (b) Customs authorities accept the accompanying document as source for the declaration and, if nationally required, manually key-in the information in their system. The appropriate information is filled-in on the accompanying document. No information is transmitted to the eTIR international system.

3.1.2.2.4 Terminate TIR operation

Potential problems:

1. The Customs system is not functioning.
2. The connection between the Customs system and the eTIR international system is broken.
3. The eTIR international system is not functioning.
4. The TIR transport has begun using a paper fall-back scenario.

Fall-backs:

1. Customs authorities accept the accompanying document as source for the declaration and revert to a paper procedure to terminate the TIR operation. The appropriate information is filled-in on the accompanying document. The termination information will be keyed-in and transmitted to the eTIR international system once the system is working. Alternatively, the TIR website allows Customs to register the TIR operation termination information.
2. Customs authorities accept the accompanying document as source for the declaration and manually key-in the information in their system. The appropriate information is filled-in on the accompanying document. The termination information will be transmitted to the eTIR international system once the connection is re-established. Alternatively, the TIR website allows Customs to register the TIR operation termination information.
3. Customs authorities accept the accompanying document as source for the declaration and manually key-in the information in their system. The appropriate information is filled-in on the accompanying document. The termination information will be transmitted to the eTIR international system once it is functioning. Alternatively, the TIR website allows Customs to register the TIR operation termination information.
4. Customs authorities accept the accompanying document as source for the declaration and, if nationally required, manually key-in the information in their

system. The appropriate information is filled-in on the accompanying document. No information is transmitted to the eTIR international system.

3.1.2.2.5 Discharge TIR operation

Potential problems:

1. The Customs system is not functioning.
2. The connection between the Customs system and the eTIR international system is broken.
3. The eTIR international system is not functioning.
4. The TIR transport has begun using a paper fall-back scenario.

Fall-backs:

1. Customs authorities postpone the transmission of the discharge information until the system is working. Alternatively, the TIR website allows Customs to register the TIR operation discharge information.
2. Customs authorities postpone the transmission of the discharge information until the connection is re-established. . Alternatively, the TIR website allows Customs to register the TIR operation discharge information.
3. Same as 1.
4. No information is transmitted to the eTIR international system.

3.1.2.2.6 Notify guarantee chain

Potential problems:

1. The guarantee chain system is not functioning.
2. The connection between the guarantee chain system and the eTIR international system is broken.

Fall-backs:

1. The eTIR international system ensures that the information will be sent at a later stage.
2. Same as 1.

3.1.2.2.7 Notify subsequent countries

Potential problems:

1. The Customs system of one country along the itinerary is not functioning.
2. The connection between the Customs system of one country along the itinerary and the eTIR international system is broken.

Fall-backs:

1. The eTIR international system ensures that the information will be sent at a later stage. If the holder presents himself to a Customs office, whose system is not functioning, the accompanying document will be used as source of information.

2. The eTIR international system ensures that the information will be sent at a later stage. If the holder presents himself to a Customs office, whose system is not linked to the eTIR system, the accompanying document will be used as source of information.

3.1.2.2.8 Advance cargo information

Potential problems:

1. The Customs system is not functioning.
2. The connection between the Customs system and the eTIR international system is broken.
3. The eTIR international system is not functioning.

Fall-backs:

1. The eTIR international system notifies the holder or any system using the declaration web service that the declaration could not be forwarded and proposes the use of alternative declaration mechanisms.
2. The eTIR international system notifies the holder or any system using the declaration web service that the declaration could not be forwarded and proposes the use of alternative declaration mechanisms.
3. The holder or any system using the declaration web service must try to use alternative declaration mechanisms.

3.2 Data Analysis

The class diagrams below are based on the class diagram presented in Chapter 2 and are aligned to the standard WCO transit data model version 3.3.¹ Whereas the class diagrams in Chapter 2 only contained the class names and the relationships between classes, they now show the attributes and methods of each class. The methods allow for interactions between objects and/or actors as presented in the sequence diagrams in Chapter 3.1. The attributes are used in Chapter 4 as the data elements of the electronic messages and, together with the relationships, serve to design database structures used in the eTIR international system.

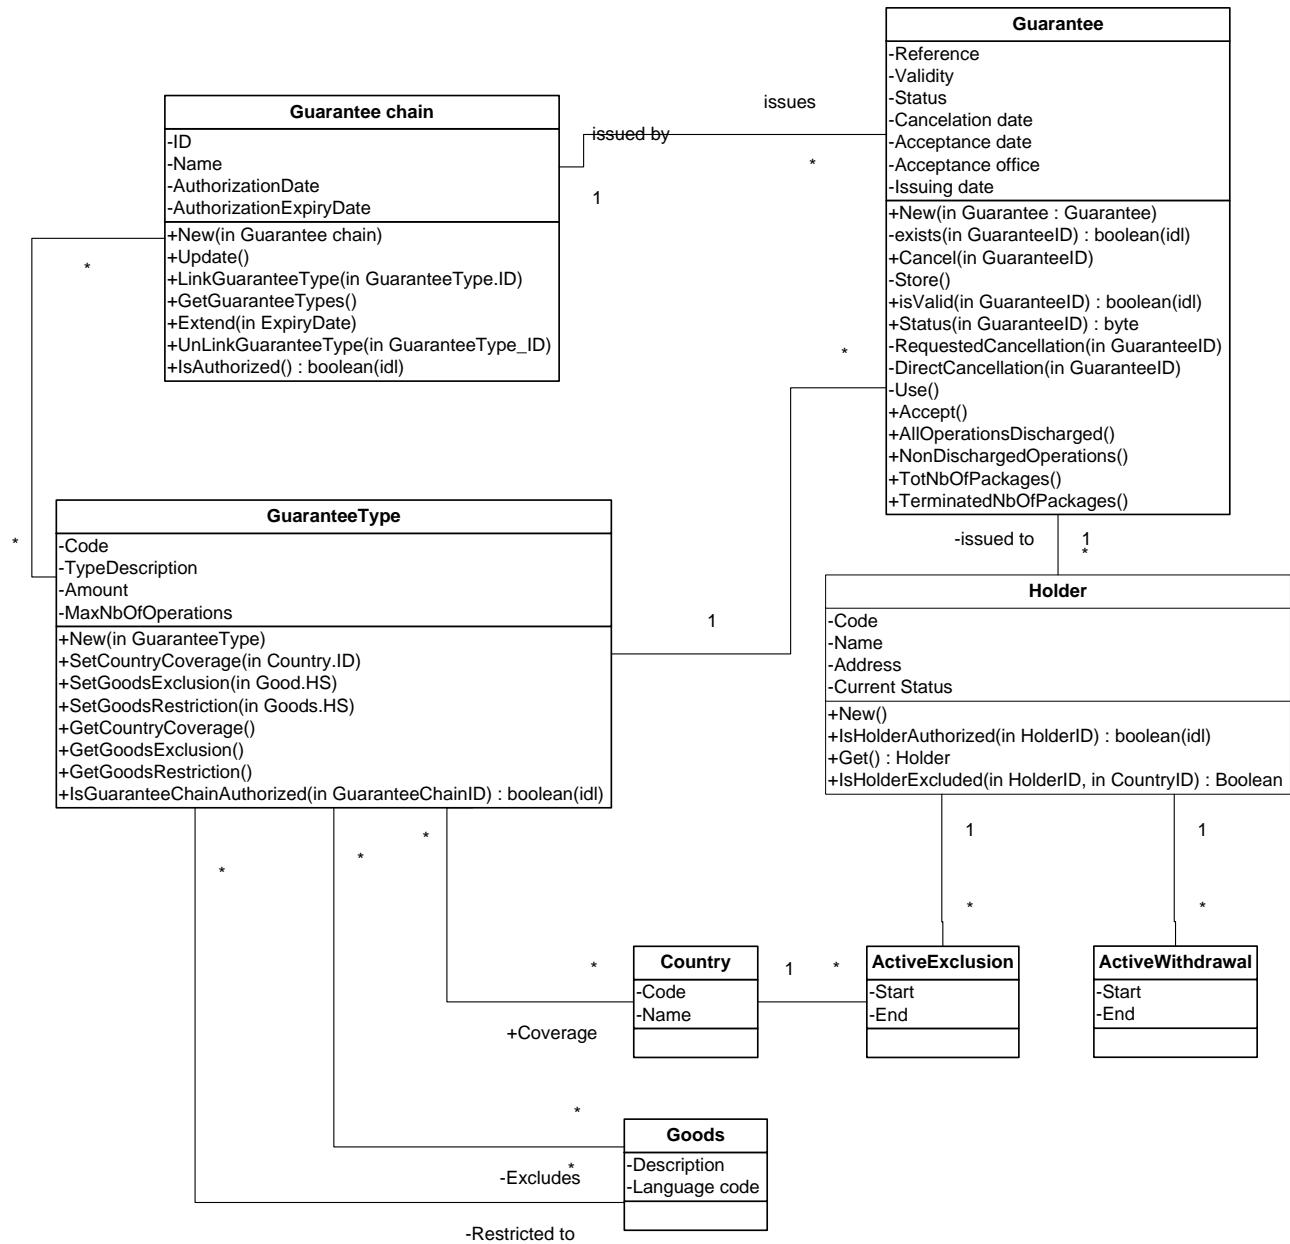

Three class diagrams are presented separately to facilitate the reading. As a consequence, the classes guarantee, goods, Customs office, country, holder can be found in more than one diagram.

3.2.1 Management by Customs of data on guarantees class diagram

The management by Customs of data on guarantees class diagram presents the classes involved in providing guarantee-related information and the relationships between these classes.

¹ The WCO Council approved the WCO data model version 3.3 in June 2013.

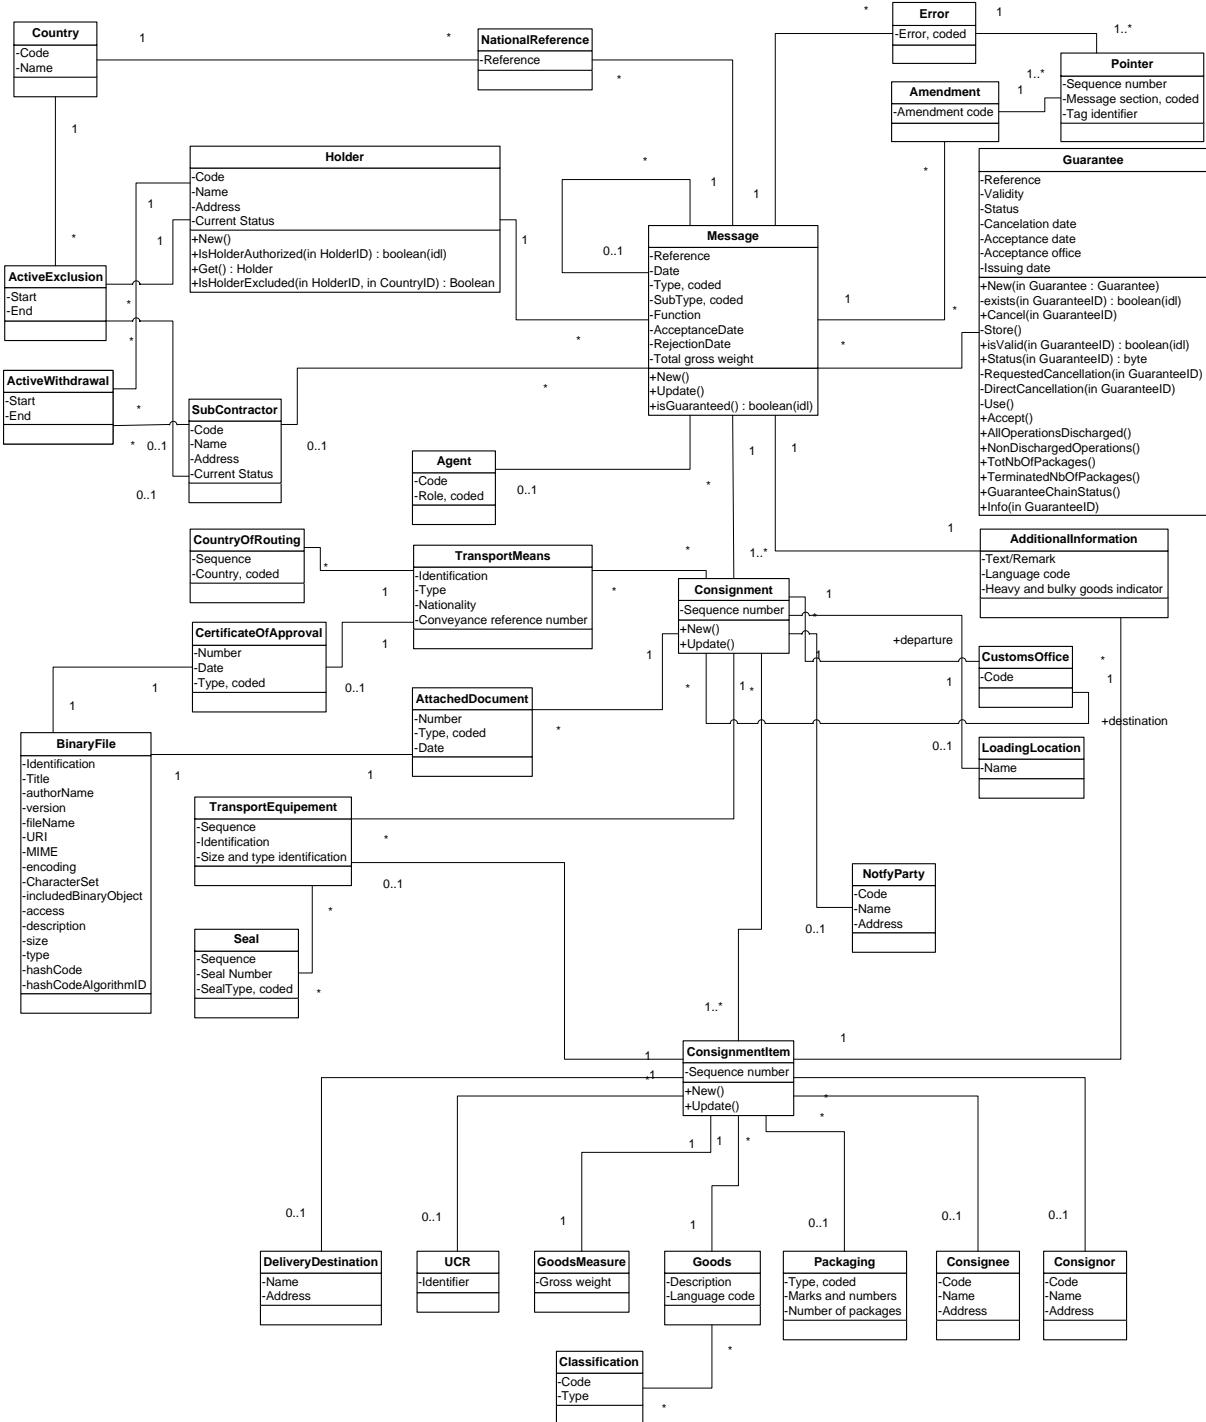

Figure 3.16: (English Only)
Customs management of guarantees class diagram

3.2.2 Declaration class diagram

The declaration class diagram presents the classes involved in the exchange of declaration-related information and the relationships between these classes.

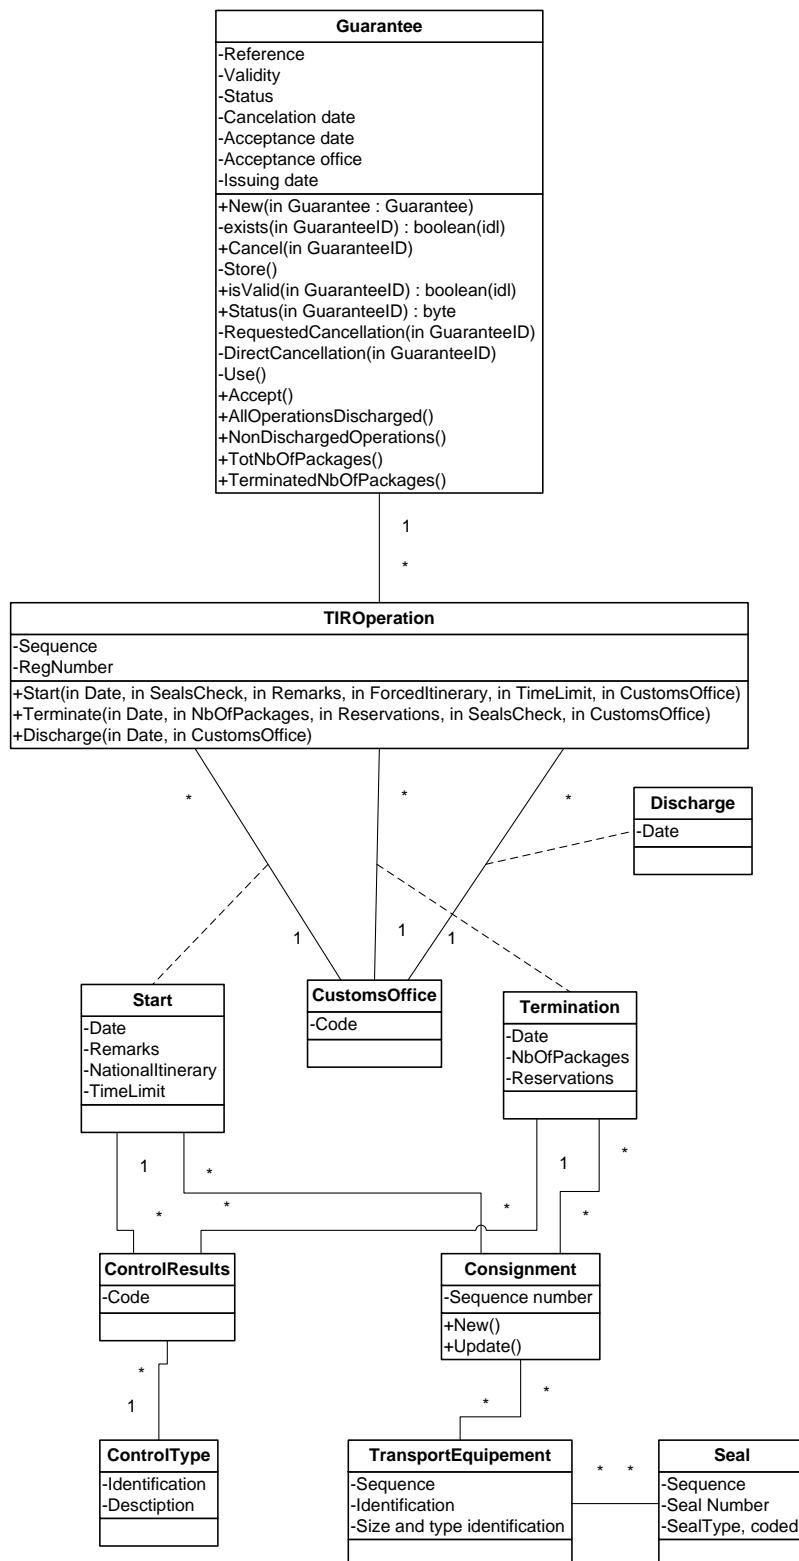

Figure 3.17: (English Only)
Declaration class diagram

3.2.3 TIR operations class diagram

The TIR operation class diagram presents the classes involved in the exchange of operation-related information and the relationships between these classes.

Figure 3.18: (English Only)
Data exchange class diagram

3.2.4 Lists of electronic messages

3.2.4.1 External messages

External messages are used to exchange information between Customs systems (including the eTIR international system) and other actors (guarantee chain and holder).

Table 3.1

External messages

| No. | Description | Response to: |
|-----|--|--------------|
| E1 | Register guaranteee

This message allows the Guarantee chain to register one or multiple guaranteees in the eTIR international system. | - |
| E2 | Registration results

This message is a response to message E1. It confirms the registration of the guaranteee or provides error codes. | E1 |
| E3 | Cancel guaranteee

This message allows the Guarantee chain to cancel one or multiple guaranteees it had previously registered in the eTIR international system. | - |
| E4 | Cancellation results

This message is a response to message E2. It confirms the cancellation of the guaranteee or provides error codes. | E3 |
| E5 | Query guaranteee

This message allows the Guarantee chain to query the eTIR international system to obtain information on one or multiple guaranteees it had previously registered. | - |
| E6 | Query results

This message is a response to message E5. It provides the information requested regarding the guaranteee(s) or error codes. | E5 |
| E7 | Notify guaranteee chain

This message informs the Guarantee chain of the availability of new information concerning one or many of the guaranteees it has issued. | - |
| E8 | Notification confirmation

This message is a response to message E7. It confirms the reception of the notification. | E7 |
| E9 | Advance Cargo Information

This message allows the holder to provide Customs authorities of departure with all information required to begin a TIR transport. It also allows the holder to amend the information and complement it in case of multiple loading places. | - |
| E10 | Advance Cargo Information results

This message is a response to message E9. It confirms the | E9 |

| No. | Description | Response to: |
|-----|--|--------------|
| | reception of or indicates the errors in the declaration. | |

3.2.4.2 Internal messages

Internal messages refer to the messages exchanged within the Customs international environment (between the eTIR international system and national Customs system).

Table 3.2
Internal messages

| No. | Description | Response to: |
|-----|---|--------------|
| I1 | Accept Guarantee | - |
| | This message allows Customs authorities to indicate that they have accepted a guarantee. | |
| I2 | Acceptance results | I1 |
| | This message is a response to message I1. It confirms the acceptance of the guarantee. | |
| I3 | Get holder info | - |
| | This message allows Customs authorities or the eTIR international system to retrieve information about holders in the ITDB. | |
| I4 | Holder info | I3 |
| | This message is a response to message I3. It provides the information regarding the holder(s) or error codes. | |
| I5 | Query guarantee | - |
| | This message allows Customs authorities to query the eTIR international system to obtain information on one or multiple guarantees. | |
| I6 | Query results | I5 |
| | This message is a response to message I5. It provides the information requested regarding the guarantee(s) or error codes | |
| I7 | Record Advance Cargo Information | - |
| | This message allows Customs authorities of departure to record all information related to the beginning of a TIR transport. | |
| I8 | Record Advance Cargo Information results | I7 |
| | This message is a response to message I7. It confirms the recording of consignment information and indicates to which countries received the related advance cargo information message. | |
| I9 | Start TIR operation | - |
| | This message allows Customs authorities to record information related to the start of TIR operations. | |
| I10 | Start results | I9 |

| No. | Description | Response to: |
|-----|---|--------------|
| | This message is a response to message I9. It confirms the recording of the start of the TIR operation or error codes. | - |
| I11 | Terminate TIR operation | - |
| | This message allows Customs authorities to record information related to the terminations of TIR operations. | - |
| I12 | Termination results | I11 |
| | This message is a response to message I11. It confirms the recording of the termination of the TIR operation or error codes. | - |
| I13 | Discharge TIR operation | - |
| | This message allows Customs authorities to record information related to the discharge of TIR operations. | - |
| I14 | Discharge results | I13 |
| | This message is a response to message I13. It confirms the recording of the discharge of the TIR operation or error codes. | - |
| I15 | Notify Customs | - |
| | This message is used by the eTIR international system to notify Customs authorities of the availability of new information | - |
| I16 | Notification confirmation | I15 |
| | This message is a response to message I15. It confirms the reception of the notification and provides a national reference in case of reception of advance cargo information. | - |

| | Code list | CL06 | | Document name code |
| | BINARYFILE | | | Occurrence 0 .. 1 |
| | WCO Id/Name
WCO Desc | 72B | | A computer file or program stored in a binary format |
| | Status | O | | |
| | Identification | | | |
| | WCO Id/Name
WCO Desc | M001 | | A unique identifier for this binary file |
| | Format | an..256 | | |
| | Status | R | | |
| | Title | | | |
| | WCO Id/Name
WCO Desc | M002 | | A title, expressed as text, for this binary file |
| | Format | an..256 | | |
| | Status | R | | |
| | Author name | | | |
| | WCO Id/Name
WCO Desc | M003 | | An author name, expressed as text, of this binary file |
| | Format | an..70 | | |
| | Status | O | | |
| | Version | | | |
| | WCO Id/Name
WCO Desc | M004 | | A unique version identifier for this binary file |
| | Format | an..17 | | |
| | Status | O | | |
| | File name | | | |
| | WCO Id/Name
WCO Desc | M005 | | A file name, expressed as text, of this binary file |
| | Format | an..256 | | |
| | Status | O | | |
| | URI | | | |
| | WCO Id/Name
WCO Desc | M006 | | A unique Uniform Resource Identifier (URI) for this binary file |
| | Format | an..2048 | | |
| | Status | O | | |
| | MIME | | | |
| | WCO Id/Name
WCO Desc | M007 | | A code specifying the Multipurpose Internet Mail Extensions (MIME) type for this binary file |
| | Format | an..70 | | |
| | Status | O | | |
| | Encoding | | | |
| | WCO Id/Name
WCO Desc | M008 | | A code specifying the encoding of this binary file |

| | | |
|-------------------------------------|---------|--|
| Format | an..17 | |
| Status | O | |
| Character set | | |
| WCO Id/Name | M009 | |
| WCO Desc | | A code specifying the character set for this binary file |
| Format | n..17 | |
| Status | O | |
| Include binary object | | |
| WCO Id/Name | M010 | |
| WCO Desc | | An included binary object for this binary file |
| Format | N/A | |
| Remark | | M010, Binary File Included Binary Object: To be used instead of D030 (Binary Image). D030 is marked for deletion in version 3.4! |
| Status | O | |
| Access | | |
| WCO Id/Name | M011 | |
| WCO Desc | | Access information, expressed as text, for this binary file such as security and download parameters |
| Format | an..256 | |
| Status | O | |
| Description | | |
| WCO Id/Name | M012 | |
| WCO Desc | | A textual description of this binary file |
| Format | an..256 | |
| Status | O | |
| Size | | |
| WCO Id/Name | M013 | |
| WCO Desc | | A measure of the size of this binary file |
| Format | n..16,6 | |
| Status | O | |
| Type | | |
| WCO Id/Name | M014 | |
| WCO Desc | | The code specifying the type of binary file, such as photo, spreadsheet |
| Format | an..6 | |
| Status | O | |
| Hash code | | |
| WCO Id/Name | M015 | |
| WCO Desc | | Hash code of the linked document |
| Format | an..256 | |
| Status | O | |
| Hash code algorithm id | | |
| WCO Id/Name | M016 | |
| WCO Desc | | Code indicating the algorithm used to calculate the hash code (e.g. MD5, ..) |
| Format | an..6 | |
| Status | O | |
| TRANPORTEQUIPMENT | | Occurrence 0 .. unbounded |
| WCO Id/Name | 31B | |
| WCO Desc | | Details of Transport equipment used for the consignment |
| ChangeLog | 0.1 | Added new Class "TransportEquipment" |
| Status | D | |
| Condition | C003 | |
| Sequence number | | |
| WCO Id/Name | 006 | |
| WCO Desc | | Number indicating the position in a sequence |
| Format | n..5 | |
| ChangeLog | 0.1 | Added new data element |
| Status | R | |
| Size and type identification | | |
| WCO Id/Name | 152 | |
| WCO Desc | | Code specifying the characteristics, i.e. size and type of a piece of transport equipment |
| Format | an..4 | |
| Code list | CL01 | Equipment size and type description code |
| SAFE information | Yes | |
| ChangeLog | 0.1 | Attribute moved from ConsignmentItem.TransportEquipment class. |
| Status | R | |
| Identification | | |

| | | |
|------------------------|--------|--|
| WCO Id/Name | 159 | Marks (letters and/or numbers) which identify equipment e.g. unit load device |

3.2.6.2 Rules

| | |
|------------------|--|
| Number and Name: | R001 |
| Description: | Each country of transit shall have an unique sequence number. They should be numbered from 1 to the number of countries involved in the transit and represent the order in which countries are traveled from departure to destination. In case of multiple means of transport, this will also allow to determine in which order the means of transport are used. |
| Number and Name: | R002 |
| Description: | If the Message confirms the reception of Advanced Cargo information then "National Reference" must be provided. |
| Number and Name: | R003 |
| Description: | Re-use a sequence number to indicate that a seal has been replaced. |
| Number and Name: | R004 |
| Description: | Use new sequence number only to mention additional seals. |
| Number and Name: | R005 |
| Description: | Indicate that a seal has been removed and not replaced with an "X" in the "seals number" field of the transport equipment sequence corresponding to the removed seal. |
| Number and Name: | R006 |
| Description: | Mandatory in case the seals have been changed, added or removed. |
| Number and Name: | R007 |
| Description: | In case of multiple consignments all transport equipment used must be listed only under the first consignment. |

| Guarantee | Cancellation date | Format changed from n8 to an..17 | March 2013 | 0.2 |

3.2.7.4 E4 – Cancellation results

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|---------|--------------------------|--|---------------|---------|
| Message | | Removed Guarantee class from this message | December 2012 | 0.2 |
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number | Format changed from an..14 to an..35 | 18-12-2012 | 0.2 |

| | | | |
|---------|------|--|------------------|
| Message | type | CL06 (Document name code) replaced February 2011 by CL26
(Message types)
Name of CL26 changed from 'Message sub types' to 'Message types'
Changed cardinality from 0..1 to 0..unbounded | 0.1 |
| Error | ... | | January 2011 0.1 |

3.2.7.5 E5 – Query guarantee

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-----------|-------------------------------|---|-----------------------------|------------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26
(Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | 18-12-2012
February 2011 | 0.2
0.1 |
| Message | Sub type, coded | Renamed the code list from 'Message sub type' to 'Reply type' | March 2014 | 0.3 |
| Message | Sub type, coded | Renamed element name 'Sub type, coded' to 'Reply type, coded' | March 2014 | 0.3 |
| Message | Sub type, coded | Replaces 'GUARANTEE.Query type' and uses CL09
(Message sub type) | February 2011 | 0.1 |
| Guarantee | Query Type | Attribute "Query type" removed and replaced by "MESSAGE.Sub type, coded" | February 2011 | 0.1 |

3.2.7.6 E6 – Query results

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|--------------------------|-------------------------------|---|-----------------------------|------------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26
(Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | 18-12-2012
February 2011 | 0.2
0.1 |
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |
| Guarantee | Validity | Format changed from n8 to an..17 | March 2013 | 0.2 |
| AdvancedCargoInformation | Message function, coded | Added restricted code '1'
(Cancellation). This code makes it possible to cancel the Declaration. | March 2014 | 0.3 |
| AdvancedCargoInformation | Message function, coded | Added new attribute 'Message function, coded' | March 2014 | 0.3 |
| AdvancedCargoInformation | Functional reference | Added 'Functional reference' to allow Declaration updates and cancellations to make reference to the original Declaration. | March 2014 | 0.3 |

| | | | | |
|--------------------------|------------------------------|--|---------------|-----|
| AdvancedCargoInformation | Date | Date format changed to an..35 | March 2014 | 0.3 |
| AdvancedCargoInformation | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'. | March 2014 | 0.3 |
| AdvancedCargoInformation | Version | Added new attribute 'Version' to the Message class | March 2014 | 0.3 |
| AdditionalInformation | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| Agent | Name | Added Condition C008 | | |
| Agent | Code | Added 'Name' to the Agent class | March 2014 | 0.3 |
| | | Status changed from Required (R) to Dependent (C) | March 2014 | 0.3 |
| Amendment | | New Condition C001 | | |
| Consignment | | Changed Condition C008 | March 2014 | 0.3 |
| | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| AttachedDocuments | Issuing date | Added Condition C008 | | |
| Declaration.CONSIGNMENT. | | Date format changed to an..35 | March 2014 | 0.3 |
| ConsignmentItem. | | The attributes 'Seal number' and 'Size and type identification' moved to 'Consignment. | February 2011 | 0.1 |
| TransportEquipment | | 'TransportEquipment.Seals' and 'Consignment. | | |
| | | 'TransportEquipment' class. | | |
| Declaration.CONSIGNMENT. | Identification | Also added to Consignment level. | February 2011 | 0.1 |
| TransportEquipment | | | | |
| CountryOfRouting | | New Rule R001 | February 2011 | 0.1 |
| Itinerary | Sequence | Added sequence to the Itinerary class | January 2011 | 0.1 |
| CertificateOfApproval | Date | Date format changed to an..35 | March 2014 | 0.3 |
| CertificateOfApproval | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'. | March 2014 | 0.3 |
| Declaration.CONSIGNMENT. | | Added new Class "TransportEquipment" | 06-10-2010 | 0.1 |
| TransportEquipment | | | | |
| TransportEquipment | Sequence number | Added new data element 'Sequence'. | February 2011 | 0.1 |
| Declaration.CONSIGNMENT. | Size and type identification | Data element moved from ConsignmentItem. | | 0.1 |

3.2.7.7 E7 – Notify guarantee chain

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|---------|--------------------------|---|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Sub type, coded | Replaces 'NOTIFICATION.Code' and uses CL09 (Sub type, coded) | February 2011 | 0.1 |
| Message | Message function, coded | Replaces data element 'Sub type, coded' | March 2014 | 0.3 |
| Message | Message function, coded | Code '9' (Original) is replaced by the (temporary) codes T1, T2, T3, T4 and T5. Final codes will be available after UN/CEFACT added those codes to the UN Code list 1225. | March 2014 | 0.3 |
| Message | Message reference number | Format changed from an..14 to an..35 | 18-12-2012 | 0.2 |
| Message | type | CL06 (Document name code) replaced by CL26 (Message types) | February 2011 | 0.1 |
| | | Name of CL26 changed from 'Message sub types' to 'Message types' | | |

| | | | | |
|--------------|------|--|---------------|-----|
| Notification | Code | Removed Notification class. The attribute 'Code' is replaced by MESSAGE.Sub type, coded. | February 2011 | 0.1 |
|--------------|------|--|---------------|-----|

3.2.7.8 E8 – Notification confirmation

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|---------|-------------------------------|--|-----------------------------|------------|
| Message | | Removed Guarantee class from this message | December 2012 | 0.2 |
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26 (Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | 18-12-2012
February 2011 | 0.2
0.1 |
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |

3.2.7.9 E9 – Advanced cargo information

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-----------------------|--------------------------|--|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message function, coded | Added restricted code '1' (Cancellation). This code makes it possible to cancel the Declaration. | March 2014 | 0.3 |
| Message | Functional reference | Added 'Functional reference' to allow Declaration updates and cancellations to make reference to the original Declaration. | March 2014 | 0.3 |
| Message | Message reference number | Format changed from an..14 to an..35 | 18-12-2012 | 0.2 |
| Message | Date | Date format changed to an..35 | March 2014 | 0.3 |
| Message | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'. | March 2014 | 0.3 |
| Message | type | CL06 (Document name code) replaced by CL26 (Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | February 2011 | 0.1 |
| Message | Version | Added new attribute 'Version' to the Message class | March 2014 | 0.3 |
| AdditionalInformation | | Status changed from Required (R) to Conditional (D).
Added Condition C008 | March 2014 | 0.3 |
| Agent | Name | Added 'Name' to the Agent class | March 2014 | 0.3 |
| Agent | Code | Status changed from Required (R) to Dependent (C) | March 2014 | 0.3 |
| Amendment | | New Condition C001 | | |
| Consignment | | Changed Condition C008 | March 2014 | 0.3 |
| AttachedDocuments | Number | Status changed from Required (R) to Conditional (D).
Added Condition C008
Format changed from an..14 to an..35 because of change in version 3.30
WCO Data model | March 2014 | 0.3 |
| AttachedDocument | Issuing date | Date format changed to an..35 | March 2014 | 0.3 |

| | | | | |
|--|------------------------------|---|--------------------------------|------------|
| Declaration.Consignment.ConsignmentItem.TransportEquipment | | The attributes 'Seal number' and 'Size and type identification' moved to 'Consignment.TransportEquipment.Seals' and 'Consignment.TransportEquipment' class.
Also added to Consignment level. | February 2011 | 0.1 |
| Declaration.Consignment.TransportIdentification | | | | |
| CountryOfRouting | Sequence number | New Rule R001
Added Sequence number to the Country of Routing class | February 2011
December 2012 | 0.1
0.2 |
| CountryOfRouting | Sequence number | Not mapped to EDIFACT. Mapping to EDIFACT will be possible in the next version of the GOVCBR | December 2012 | 0.2 |
| Consignment.TransportMean.AdditionalDocument | | Occurance changed from 0..Unbounded to 0..1 | February 2011 | 0.1 |
| AttachedDocument | Date | Date format changed to an..35 | March 2014 | 0.3 |
| AttachedDocument | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'.
Added new Class "TransportEquipment" | March 2014 | 0.3 |
| Declaration.Consignment.TransportEquipment | | Added new data element | 06-10-2010 | 0.1 |
| Declaration.Consignment.TransportEquipment | Sequence number | | February 2011 | 0.1 |
| TransportEquipment | Size and type identification | Attribute moved from ConsignmentItem.TransportEquipment class. | | 0.1 |
| TransportEquipment | Identification | Attribute also added to Consignment level | | 0.1 |
| Seal | | Added new Seal class | October 2010 | 0.1 |
| Seal | Sequence | Not mapped to EDIFACT. Mapping to EDIFACT will be possible in the next version of the GOVCBR | | 0.1 |
| Guarantee | . | Cardinality between Guarantee and Declaration changed from 1 .. 1 to 1 .. unbounded. To increase flexibility | 26-01-2011 | 0.1 |
| Guarantee | Validity | Removed attribute "Validity".
Status changed from Required (R) to Conditional (D). | Februari 2011
March 2014 | 0.1
0.3 |
| Holder | | Added Condition C008
Status changed from Required (R) to Conditional (D).
Added Condition C008 | March 2014 | 0.3 |

3.2.7.10 E10 - Advanced Cargo Information Results

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|--------------------------|--------------------------|--|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message function, coded | Attribute moved from the AdvancedCargoInformation class | December 2012 | 0.2 |
| Message | Message reference number | Format changed from an..14 to an..35 | 18-12-2012 | 0.2 |
| Message | type | CL06 (Document name code) replaced by CL26 (Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | February 2011 | 0.1 |
| Message | Type, coded | Attribute moved from the AdvancedCargoInformation class | December 2012 | 0.2 |
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |
| AdvancedCargoInformation | Acceptance date | Date format changed to an..35 | March 2014 | 0.3 |
| AdvancedCargoInformation | Message reference number | Format changed from an..14 to an..35 | 18-12-2012 | 0.2 |
| AdvancedCargoInformation | Rejection date | Date format changed to an..35 | March 2014 | 0.3 |

3.2.7.11 I1 – Accept guarantee

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-----------------------|-------------------------------|---|---|-------------------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35 CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |
| StartOffice Guarantee | Acceptance date | Name of CL26 changed from 'Message sub types' to 'Message types'
Entity "StartOffice" removed
Date format changed to an..35 | February 2011
11-12-2012
March 2014 | 0.1
0.2
0.3 |

3.2.7.12 I2 – Acceptance results

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-------------|-------------------------------|---|-------------------------------|------------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Declaration | Functional Reference | New attribute | 12-12-2012 | 0.2 |
| Message | Message reference number type | Format changed from an..14 to an..35 CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |
| Error | | Name of CL26 changed from 'Message sub types' to 'Message types'
Changed cardinality from 0..1 to 0..unbounded | February 2011
January 2011 | 0.1
0.1 |

3.2.7.13 I3 – Get holder information

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|---------|-------------------------------|---|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35 CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |

3.2.7.14 I4 – Holder information

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|---------|-------------------------------|---|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35 CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |

| | | | | |
|------------------|------------|--|--------------|-----|
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |
| ActiveWithdrawal | Start | Format changed from n8 to an..17 | March 2013 | 0.2 |
| ActiveWithdrawal | Start | Date format changed to an..35 | March 2014 | 0.3 |
| ActiveWithdrawal | Start date | Changed the attribute name from 'Start' to 'Start date'. | March 2014 | 0.3 |
| ActiveWithdrawal | End | Format changed from n8 to an..17 | March 2013 | 0.2 |
| ActiveWithdrawal | End | Date format changed to an..35 | March 2014 | 0.3 |
| ActiveWithdrawal | End date | Changed the attribute name from 'End' to 'End date'. | March 2014 | 0.3 |
| ActiveExclusion | Start | Format changed from n8 to an..17 | March 2013 | 0.2 |
| ActiveExclusion | Start | Date format changed to an..35 | March 2014 | 0.3 |
| ActiveExclusion | Start date | Changed the attribute name from 'Start' to 'Start date'. | March 2014 | 0.3 |
| ActiveExclusion | End | Format changed from n8 to an..17 | March 2013 | 0.2 |
| ActiveExclusion | End | Date format changed to an..35 | March 2014 | 0.3 |
| ActiveExclusion | End date | Changed the attribute name from 'End' to 'End date'. | March 2014 | 0.3 |

3.2.7.15 I5 – Query guarantee

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-------------------|-------------------------------|---|--------------------------------|------------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |
| Message | Reply type, coded | Name of CL26 changed from 'Message sub types' to 'Message types' | February 2011 | 0.1 |
| Message | Reply type, coded | Renamed the code list from 'Message sub type' to 'Reply type' | March 2014 | 0.3 |
| Message | Reply type, coded | Renamed element name 'Sub type, coded' to 'Reply type, coded' | March 2014 | 0.3 |
| Message Guarantee | Sub type, coded
Query Type | Replaces 'GUARANTEE.Query type'
Attribute "Query type" removed and replaced by ""MESSAGE.Sub type, coded"" | February 2011
February 2011 | 0.1
0.1 |

3.2.7.16 I6 – Query results

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|-----------|-------------------------------|--|---------------|---------|
| Message | Sender identification | Removed 'Sender identification' from the Data model. Is technical attribute. | February 2011 | 0.1 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26 (Message types) | 18-12-2012 | 0.2 |
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |
| Guarantee | Acceptance date | New attribute | 12-12-2012 | 0.2 |

| | | | | |
|--------------------------|-------------------------|--|---------------|-----|
| Guarantee | Cancellation date | New attribute | 08-08-2012 | 0.2 |
| Guarantee | Validity | Format changed from n8 to an..17 | March 2013 | 0.2 |
| Guarantee | Validity | Date format changed to an..35 | March 2014 | 0.3 |
| Guarantee | Issue date | New attribute | 08-08-2012 | 0.2 |
| Guarantee | Guarantee status | New attribute | 08-08-2012 | 0.2 |
| AdvancedCargoInformation | Message function, coded | Added restricted code '1'
(Cancellation). This code makes it possible to cancel the Declaration. | March 2014 | 0.3 |
| AdvancedCargoInformation | Message function, coded | Added new attribute 'Message function, coded' | March 2014 | 0.3 |
| AdvancedCargoInformation | Functional reference | Added 'Functional reference' to allow Declaration updates and cancellations to make reference to the original Declaration. | March 2014 | 0.3 |
| AdvancedCargoInformation | Date | Date format changed to an..35 | March 2014 | 0.3 |
| AdvancedCargoInformation | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'. | March 2014 | 0.3 |
| AdvancedCargoInformation | Type, coded | Added new attribute 'Type, coded' | March 2014 | 0.3 |
| AdvancedCargoInformation | Version | Added new attribute 'Version' to the Message class | March 2014 | 0.3 |
| AdditionalInformation | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| Agent | Name | Added Condition C008 | | |
| Agent | Code | Added 'Name' to the Agent class | March 2014 | 0.3 |
| | | Status changed from Required (R) to Dependent (C) | March 2014 | 0.3 |
| Amendment | | New Condition C001 | | |
| | | Status changed from Optional to Dependent. | March 2014 | 0.3 |
| Consignment | | Added Condition C008 | | |
| | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| AttachedDocument | Issuing date | Added Condition C008 | | |
| Declaration.Consignment. | | Date format changed to an..35 | March 2014 | 0.3 |
| ConsignmentItem. | | The attributes 'Seal number' and 'Size | February 2011 | 0.1 |
| TransportEquipment | | and type identification' moved to 'Consignment. | | |
| | | TransportEquipment.Seals' and 'Consignment. | | |
| | | TransportEquipment' class. | | |
| Declaration.Consignment. | Identification | Also added to Consignment level. | February 2011 | 0.1 |
| TransportEquipment | | | | |
| CountryOfRouting | | New Rule R001 | February 2011 | 0.1 |
| CountryOfRouting | Sequence number | Added Sequence number to the Country of Routing class | | 0.1 |

| | | | | |
|--------------------------|------------------------------|---|---------------|-----|
| AttachedDocument | Date | Date format changed to an..35 | March 2014 | 0.3 |
| AttachedDocument | Issuing date | Changed the attribute name from 'Date' to 'Issuing date'. | March 2014 | 0.3 |
| Declaration.Consignment. | | Added new Class "TransportEquipment" | 06-10-2010 | 0.1 |
| TransportEquipment | | Added new data element | February 2011 | 0.1 |
| Declaration.Consignment. | Sequence number | | | |
| TransportEquipment | Size and type identification | Attribute moved from ConsignmentItem. | | 0.1 |
| TransportEquipment | Identification | Attribute also added to Consignment level | | 0.1 |
| Seat | | Added new Seal class | | 0.1 |
| Guarantee | - | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| Guarantee | Validity | Added Condition C008 | | |
| NationalReference | | Format changed from n8 to an..17 | March 2013 | 0.2 |
| Holder | | New Class | August 2012 | 0.2 |
| | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| Start | Date | Added Condition C008 | | |
| Start | End date | Date format changed to an..35 | March 2014 | 0.3 |
| | | Changed the attribute name from 'Date' to 'End date'. | March 2014 | 0.3 |
| Start | Time limit | Date format changed to an..35 | March 2014 | 0.3 |
| Consignment | | Cardinality changed from 0..* to 0..1 to align with rule R007 and avoid having to repeat the seals information. | March 2014 | 0.3 |
| Start.Consignment | | Removed ConsignmentItem class. | 2010/10/06 | 0.1 |
| | | Seals information is provided under Consignment. | | |
| Start.Consignment. | | TransportEquipment.Seals | | |
| TransportEquipment | | New Rules: R006 and R007 | | |
| Start.Consignment. | | Added new TransportEquipment class | 2010/10/06 | 0.1 |
| TransportEquipment.Seal | | | | |
| Termination | Date | Added new SEAL class | 2010/10/06 | 0.1 |
| Termination | End date | Date format changed to an..35 | March 2014 | 0.3 |
| | | Changed the attribute name from 'Date' to 'End date'. | March 2014 | 0.3 |
| Termination.Consignment | | Removed ConsignmentItem class. | 2010/10/06 | 0.1 |
| | | Seals information is provided under Consignment. | | |
| Consignment | | TransportEquipment.Seals | | |
| | | New Rules: R006 and R007 | | |
| | | Cardinality changed from 0..* to 0..1 to align with rule R007 and avoid having to repeat the seals information. | March 2014 | 0.3 |
| Termination.Consignment. | | Added new TransportEquipment class | 2010/10/06 | 0.1 |
| TransportEquipment | | | | |

| | | | | |
|-------------------------------|------------|---|-------------|-----|
| Termination.Consignment. | | Added new SEAL class | 2010/10/06 | 0.1 |
| TransportEquipment.Seal | | New Class | August 2012 | 0.2 |
| TransitOperationTerminationOf | | | | |
| fic | | | | |
| e | | | | |

3.2.7.25 I15 – Notify Customs

| ENTITY | ATTRIBUTE | CHANGE | DATE | VERSION |
|--------------------------|-------------------------------|---|-----------------------------|------------|
| Guarantee | - | Guarantee class Removed from I15 | 11-12-2012 | 0.2 |
| Message | Message reference number type | Format changed from an..14 to an..35
CL06 (Document name code) replaced by CL26
(Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | 18-12-2012
February 2011 | 0.2
0.1 |
| Declaration | | Structure change. Declaration class moved from Guarantee class to Message level. | 12-12-2012 | 0.2 |
| Message | Message function, coded | Added restricted code '1' (Cancellation). This code makes it possible to cancel the Declaration. | March 2014 | 0.3 |
| Message | Message function, coded | Added new attribute 'Message function, coded' | March 2014 | 0.3 |
| AdvancedCargoInformation | Functional reference | Added 'Functional reference' to allow Declaration updates and cancellations to make reference to the original Declaration. | March 2014 | 0.3 |
| AdvancedCargoInformation | Date Issuing date | Date format changed to an..35
Changed the attribute name from 'Date' to 'Issuing date'. | March 2014
March 2014 | 0.3
0.3 |
| Message | Message function, coded | Added new attribute 'Type, coded' | March 2014 | 0.3 |
| AdvancedCargoInformation | Version | Added new attribute 'Version' to the Message class | March 2014 | 0.3 |
| AdditionalInformation | | Status changed from Required (R) to Conditional (D). | March 2014 | 0.3 |
| Agent | Name | Added Condition C008 | March 2014 | 0.3 |
| Agent | Code | Added 'Name' to the Agent class
Status changed from Required (R) to Dependent (C) | March 2014 | 0.3 |
| Amendment | | New Condition C001
Changed Condition C008 | March 2014 | 0.3 |

| | | | | |
|--|------------------------------|--|--|-------------------|
| Consignment | | Status changed from Required (R) to Conditional (D).
Added Condition C008 | March 2014 | 0.3 |
| AttachedDocument
Declaration.Consignment.
ConsignmentItem.
TransportEquipment | Issuing date | Date format changed to an..35
The attributes 'Seal number' and 'Size and type identification' moved to 'Consignment.
TransportEquipment.Seals' and 'Consignment.
TransportEquipment' class. | March 2014
February 2011 | 0.3
0.1 |
| Declaration.Consignment.
TransportEquipment | Identification | Also added to Consignment level. | February 2011 | 0.1 |
| CountryOfRouting
CountryOfRouting | Sequence number | New Rule R001
Added Sequence number to the Country of Routing class | February 2011 | 0.1
0.1 |
| AttachedDocument
AttachedDocument | Date
Issuing date | Date format changed to an..35
Changed the attribute name from 'Date' to 'Issuing date'.
Added new Class "TransportEquipment" | March 2014
March 2014 | 0.3
0.3 |
| Declaration.Consignment.
TransportEquipment
Declaration.Consignment.
TransportEquipment
TransportEquipment | Sequence number | Added new data element | February 2011 | 0.1 |
| TransportEquipment | Size and type identification | Attribute moved from ConsignmentItem.
TransportEquipment class. | | 0.1 |
| TransportEquipment | Identification | Attribute also added to Consignment level | | 0.1 |
| Consignment.
TransportEquipment.Seal
Guarantee | | Added new SEAL class | 2010/10/06 | 0.1 |
| Guarantee
Guarantee
Holder | Validity | Status changed from Required (R) to Conditional (D).
Added Condition C008 | March 2014 | 0.3 |
| TIROperation | | Format changed from n8 to an..17
Date format changed to an..35
Status changed from Required (R) to Conditional (D).
Added Condition C008 | March 2013
March 2014
March 2014 | 0.2
0.3
0.3 |
| Start
Start | Date
End date | TIR operation structure added to allow notifying Customs about the start and the terminations of TIR operations, in particular, when seals are added, changed or removed.
Date format changed to an..35
Changed the attribute name from 'Date' to 'End date'.
Date format changed to an..35 | March 2014
March 2014 | 0.3
0.3 |
| Start
Consignment | Time limit | Cardinality changed from 0..* to 0..1 to align with rule R007 and avoid having to repeat the seals information. | March 2014 | 0.3 |
| Start.Consignment | | Removed ConsignmentItem class.
Seals information is provided under Consignment.
TransportEquipment.Seals
New Rules: R006 and R007 | 2010/10/06 | 0.1 |

| Message | type | CL06 (Document name code) replaced by CL26
(Message types)
Name of CL26 changed from 'Message sub types' to 'Message types' | February 2011 | 0.1 |
| Error | | Changed cardinality from 0..1 to 0..unbounded | January 2011 | 0.1 |

3.2.8 Code lists

3.2.8.1 List of code lists

| | |
|-------------|---|
| CL01 | Equipment size and type description code (UN/EDIFACT 8155)
Code specifying the size and type of equipment. |
| CL02 | Party role code (UN/EDIFACT 3035)
Code giving specific meaning to a party. |
| CL03 | Item type identification code (UN/EDIFACT 7143)
Coded identification of an item type. |
| CL04 | Country name code (ISO 3166-1-alpha-2)
Identification of the name of the country or other geographical entity. |
| CL05 | Transport means description code (UNECE Recommendation 28)
Code specifying the means of transport. |
| CL06 | Document name code (UN/EDIFACT 1001) |

Code specifying the document name.

CL07 Package type description code (UNECE Recommendation 21 Annex VI)
Code specifying the type of package.

CL08 Seal type code (eTIR)
To specify a type of seal.

CL09 Reply type code (eTIR)

CL10 NOT USED (replaced by CL09-Message sub type)

CL11 NOT USED (replaced by CL09-Message sub type)

CL12 Guarantee type code (eTIR/to be developed)

CL13 Customs offices database (eTIR/to be developed)

CL14 Indicator (eTIR)

CL15 International TIR database (TIRExB/ITDB)

CL16 Message function code (UN/EDIFACT 1225)
Code indicating the function of the message.

CL17 Amendment code (eTIR)

CL18 Message section code (codes to be defined)

CL19 Pointer code (codes to be defined)

CL20 Language name code (ISO 639)
Code specifying the language name.
Is used as a Core Data Type

CL21 Measurement unit code (UNECE Recommendation 20)
Code specifying the unit of measurement.

CL22 Guarantee status (eTIR)

CL23 Holder status (eTIR)

CL24 Control result code (eTIR)

CL25 Control type code (eTIR)

CL26 Message types (eTIR)

CL99 Error code (eTIR)

3.2.8.2 CL01 – Equipment size and type description code (English Only)

CL01 Equipment size and type description code (UN/EDIFACT 8155)

Code specifying the size and type of equipment.

| | |
|-----------|--|
| 1 | Dime coated tank
A tank coated with dime. |
| 2 | Epoxy coated tank
A tank coated with epoxy. |
| 6 | Pressurized tank
A tank capable of holding pressurized goods. |
| 7 | Refrigerated tank
A tank capable of keeping goods refrigerated. |
| 9 | Stainless steel tank
A tank made of stainless steel. |
| 10 | Nonworking reefer container 40 ft
A 40 foot refrigerated container that is not actively controlling temperature of the product. |
| 12 | Europallet
80 x 120 cm. |
| 13 | Scandinavian pallet
100 x 120 cm. |
| 14 | Trailer
Non self-propelled vehicle designed for the carriage of cargo so that it can be towed by a motor vehicle. |
| 15 | Nonworking reefer container 20 ft
A 20 foot refrigerated container that is not actively controlling temperature of the product. |
| 16 | Exchangeable pallet
Standard pallet exchangeable following international convention. |
| 17 | Semi-trailer
Non self propelled vehicle without front wheels designed for the carriage of cargo and provided with a kingpin. |
| 18 | Tank container 20 feet
A tank container with a length of 20 feet. |

| | |
|--|---|
| CL01 | Equipment size and type description code (UN/EDIFACT 8155) |
| Code specifying the size and type of equipment. | |
| 19 | Tank container 30 feet
A tank container with a length of 30 feet. |
| 20 | Tank container 40 feet
A tank container with a length of 40 feet. |
| 21 | Container IC 20 feet
A container owned by InterContainer, a European railway subsidiary, with a length of 20 feet. |
| 22 | Container IC 30 feet
A container owned by InterContainer, a European railway subsidiary, with a length of 30 feet. |
| 23 | Container IC 40 feet
A container owned by InterContainer, a European railway subsidiary, with a length of 40 feet. |
| 24 | Refrigerated tank 20 feet
A refrigerated tank with a length of 20 feet. |
| 25 | Refrigerated tank 30 feet
A refrigerated tank with a length of 30 feet. |
| 26 | Refrigerated tank 40 feet
A refrigerated tank with a length of 40 feet. |
| 27 | Tank container IC 20 feet
A tank container owned by InterContainer, a European railway subsidiary, with a length of 20 feet. |
| 28 | Tank container IC 30 feet
A tank container owned by InterContainer, a European railway subsidiary, with a length of 30 feet. |
| 29 | Tank container IC 40 feet
A tank container, owned by InterContainer, a European railway subsidiary, with a length of 40 feet. |
| 30 | Refrigerated tank IC 20 feet
A refrigerated tank owned by InterContainer, a European railway subsidiary, with a length of 20 feet. |

| CL01 | Equipment size and type description code (UN/EDIFACT 8155) |
|--|--|
| Code specifying the size and type of equipment. | |
| 31 | Temperature controlled container 30 ft.
Temperature controlled container measuring 30 feet. |
| 32 | Refrigerated tank IC 40 feet
A refrigerated tank owned by InterContainer, a European railway subsidiary, with
a length of 40 feet. |
| 33 | Movable case: L < 6,15m
A movable case with a length less than 6,15 metres. |
| 34 | Movable case: 6,15m < L < 7,82m
A movable case with a length between 6,15 metres and 7,82 metres. |
| 35 | Movable case: 7,82m < L < 9,15m
A movable case with a length between 7,82 metres and 9,15 metres. |
| 36 | Movable case: 9,15m < L < 10,90m
A movable case with a length between 9,15 metres and 10,90 metres. |
| 37 | Movable case: 10,90m < L < 13,75m
A movable case with a length between 10,90 metres and 13,75 metres. |
| 38 | Totebin
A steel open top unit of about 1,5 * 1,5 * 2,5 meters for road transport of bulk cargo. |
| 39 | Temperature controlled container 20 ft
Temperature controlled container measuring 20 feet. |
| 40 | Temperature controlled container 40 ft
A temperature controlled container measuring 40 feet. |
| 41 | Non working refrigerated (reefer) container 30ft.
A 30 foot refrigerated (reefer) container that is not actively cooling the product. |
| 42 | Dual trailers
Two trailers linked together one behind another and pulled by one tractor. |
| 43 | 20 ft IL container (open top)
An open top container that is 20 feet in internal length. |
| 44 | 20 ft IL container (closed top)
A closed top container that is 20 feet in internal length. |
| 45 | 40 ft IL container (closed top)
A closed top container that is 40 feet in internal length. |

3.2.8.3 CL02 – Party role code (English Only)

CL02 Party role code (UN/EDIFACT 3035)

Code giving specific meaning to a party.

| | |
|-----------|--|
| AA | Party to be billed (AAR Accounting rule 11)
Party to be billed in accordance with AAR Accounting rule 11. |
| AB | Buyer's agent/representative
Third party who arranged the purchase of merchandise on behalf of the actual buyer. |
| AE | Declarant's agent/representative
Any natural or legal person who makes a declaration to an official body on behalf of another natural or legal person, where legally permitted (CCC). |
| AF | Transit principal
Natural or legal person responsible for the satisfactory performance of a Customs transit operation. Source: CCC. |
| AG | Agent
(3196) Party authorized to act on behalf of another party. Synonym: Representative. |
| AH | Transit principal's agent/representative
Agent acting on behalf of the transit principal (CCC). |
| AI | Successful job applicant
Person who has been chosen for a job. |
| AJ | Party issuing mutually agreed codes
The party which has issued all mutually agreed codes used in the message. |
| AK | Acknowledgement recipient
Party to whom acknowledgement should be sent. |
| AL | Principal responsible party
(3340) Party accepting liability for goods held or moving (e.g. transit) under a Customs authorization and
- when applicable - a guarantee. |
| AM | Authorized official
Employee of a company or firm authorized to act on behalf of that company or firm e.g. to make a Customs declaration. |

CL02 Party role code (UN/EDIFACT 3035)

Code giving specific meaning to a party.

| | |
|-----------|--|
| AN | Approved importer

Person or company which is authorised by the relevant Customs authority to import goods without payment all taxes or specific taxes at the point of entry into the country. |
| AO | Account of

Party account is assigned to. |
| AP | Accepting party

(3336) Party accepting goods, products, services, etc. |
| AQ | Approved consignor

Person or company approved by the relevant authority in the country to pack and export specific goods under Customs supervision. |
| AR | Authorized exporter

Exporter authorized/approved by Customs for special Customs procedures e.g. simplified procedure. |
| AS | Account servicing financial institution

Identifies the financial institution servicing the account(s). |
| AT | Authorized importer

Importer authorized/approved by Customs for special Customs procedures e.g. simplified procedure. |
| AU | Authorized trader (transit)

Trader authorized/approved by Customs for special transit procedures e.g. simplified procedure. |
| AV | Authorizing official

Party that has delegated the authority to take a certain action on behalf of a company or agency. |
| AW | Applicant's bank

(3234) Financial institution which is requested to issue the documentary credit. |
| AX | Authenticating party

Party which certifies that a document is authentic. |
| AY | Animal being investigated

Animal being investigated. |

3.2.8.4 CL03 – Item type identification code (English Only)

CL03 Item type identification code (UN/EDIFACT 7143)

Coded identification of an item type.

| | |
|-----------|--|
| AA | Product version number
Number assigned by manufacturer or seller to identify the release of a product. |
| AB | Assembly
The item number is that of an assembly. |
| AC | HIBC (Health Industry Bar Code)
Article identifier used within health sector to indicate data used conforms to HIBC. |
| AD | Cold roll number
Number assigned to a cold roll. |
| AE | Hot roll number
Number assigned to a hot roll. |
| AF | Slab number
Number assigned to a slab, which is produced in a particular production step. |
| AG | Software revision number
A number assigned to indicate a revision of software. |
| AH | UPC (Universal Product Code) Consumer package code (1-5-5)
An 11-digit code that uniquely identifies consumer packaging of a product; does not have a check digit. |
| AI | UPC (Universal Product Code) Consumer package code (1-5-5- 1)
A 12-digit code that uniquely identifies the consumer packaging of a product, including a check digit. |
| AJ | Sample number
Number assigned to a sample. |
| AK | Pack number
Number assigned to a pack containing a stack of items put together (e.g. cold roll sheets (steel product)). |
| AL | UPC (Universal Product Code) Shipping container code (1-2- 5-5)
A 13-digit code that uniquely identifies the manufacturer's shipping unit, including the packaging indicator. |

| | |
|--|---|
| CL03 | Item type identification code (UN/EDIFACT 7143) |
| Coded identification of an item type. | |
| AM | UPC (Universal Product Code)/EAN (European article number) Shipping container code (1-2-5-5-1)

A 14-digit code that uniquely identifies the manufacturer's shipping unit, including the packaging indicator and the check digit. |
| AN | UPC (Universal Product Code) suffix

A suffix used in conjunction with a higher level UPC (Universal product code) to define packing variations for a product. |
| AO | State label code

A code which specifies the codification of the state's labelling requirements. |
| AP | Heat number

Number assigned to the heat (also known as the iron charge) for the production of steel products. |
| AQ | Coupon number

A number identifying a coupon. |
| AR | Resource number

A number to identify a resource. |
| AS | Work task number

A number to identify a work task. |
| AT | Price look up number

Identification number on a product allowing a quick electronic retrieval of price information for that product. |
| AU | NSN (North Atlantic Treaty Organization Stock Number)

Number assigned under the NATO (North Atlantic Treaty Organization) codification system to provide the identification of an approved item of supply. |
| AV | Refined product code

A code specifying the product refinement designation. |
| AW | Exhibit

A code indicating that the product is identified by an exhibit number. |
| AX | End item

A number specifying an end item. |
| AY | Federal supply classification

A code to specify a product's Federal supply classification. |

CL03 Item type identification code (UN/EDIFACT 7143)**Coded identification of an item type.**

| | |
|-----------|--|
| AZ | Engineering data list
A code specifying the product's engineering data list. |
| BA | Milestone event number
A number to identify a milestone event. |
| BB | Lot number
A number indicating the lot number of a product. |
| BC | National drug code 4-4-2 format
A code identifying the product in national drug format 4-4-2. |
| BD | National drug code 5-3-2 format
A code identifying the product in national drug format 5-3-2. |
| BE | National drug code 5-4-1 format
A code identifying the product in national drug format 5-4-1. |
| BF | National drug code 5-4-2 format
A code identifying the product in national drug format 5-4-2. |
| BG | National drug code
A code specifying the national drug classification. |
| BH | Part number
A number indicating the part. |
| BI | Local Stock Number (LSN)
A local number assigned to an item of stock. |
| BJ | Next higher assembly number
A number specifying the next higher assembly or component into which the product is being incorporated. |
| BK | Data category
A code specifying a category of data. |
| BL | Control number
To specify the control number. |
| BM | Special material identification code
A number to identify the special material code. |
| BN | Locally assigned control number
A number assigned locally for control purposes. |
| BO | Buyer's colour
Colour assigned by buyer. |

CL03 Item type identification code (UN/EDIFACT 7143)**Coded identification of an item type.**

| | |
|-----------|--|
| BP | Buyer's part number
Reference number assigned by the buyer to identify an article. |
| BQ | Variable measure product code
A code assigned to identify a variable measure item. |
| BR | Financial phase
To specify as an item, the financial phase. |
| BS | Contract breakdown
To specify as an item, the contract breakdown. |
| BT | Technical phase
To specify as an item, the technical phase. |
| BU | Dye lot number
Number identifying a dye lot. |
| BV | Daily statement of activities
A statement listing activities of one day. |
| BW | Periodical statement of activities within a bilaterally agreed time period
Periodical statement listing activities within a bilaterally agreed time period. |
| BX | Calendar week statement of activities
A statement listing activities of a calendar week. |
| BY | Calendar month statement of activities
A statement listing activities of a calendar month. |
| BZ | Original equipment number
Original equipment number allocated to spare parts by the manufacturer. |

The codes given to certain commodities by an industry. |
| CG | Commodity grouping
Code for a group of articles with common characteristics (e.g. used for statistical purposes). |
| CL | Colour number
Code for the colour of an article. |
| CR | Contract number
Reference number identifying a contract. |

CL03 Item type identification code (UN/EDIFACT 7143)**Coded identification of an item type.**

| | |
|-----------|---|
| CV | Customs article number
Code defined by Customs authorities to an article or a group of articles for Customs purposes. |
| DR | Drawing revision number
Reference number indicating that a change or revision has been applied to a drawing. |
| DW | Drawing
Reference number identifying a drawing of an article. |
| EC | Engineering change level
Reference number indicating that a change or revision has been applied to an article's specification. |
| EF | Material code
Code defining the material's type, surface, geometric form plus various classifying characteristics. |
| EN | International Article Numbering Association (EAN)
Number assigned to a manufacturer's product according to the International Article Numbering Association. |
| GB | Buyer's internal product group code
Product group code used within a buyer's internal systems. |
| GN | National product group code
National product group code. Administered by a national agency. |
| GS | General specification number
The item number is a general specification number. |
| HS | Harmonised system
The item number is part of, or is generated in the context of the Harmonised Commodity Description and Coding System (Harmonised System), as developed and maintained by the World Customs Organization (WCO). |
| IB | ISBN (International Standard Book Number)
A unique number identifying a book. |
| IN | Buyer's item number
The item number has been allocated by the buyer. |
| IS | ISSN (International Standard Serial Number)
A unique number identifying a serial publication. |

| | |
|--|--|
| CL03 | Item type identification code (UN/EDIFACT 7143) |
| Coded identification of an item type. | |
| IT | Buyer's style number
Number given by the buyer to a specific style or form of an article, especially used for garments. |
| IZ | Buyer's size code
Code given by the buyer to designate the size of an article in textile and shoe industry. |
| MA | Machine number
The item number is a machine number. |
| MF | Manufacturer's (producer's) article number
The number given to an article by its manufacturer. |
| MN | Model number
Reference number assigned by the manufacturer to differentiate variations in similar products in a class or group. |
| MP | Product/service identification number
Reference number identifying a product or service. |
| NB | Batch number
The item number is a batch number. |
| ON | Customer order number
Reference number of a customer's order. |
| PD | Part number description
Reference number identifying a description associated with a number ultimately used to identify an article. |
| PL | Purchaser's order line number
Reference number identifying a line entry in a customer's order for goods or services. |
| PO | Purchase order number
Reference number identifying a customer's order. |
| PV | Promotional variant number
The item number is a promotional variant number. |
| QS | Buyer's qualifier for size
The item number qualifies the size of the buyer. |
| RC | Returnable container number
Reference number identifying a returnable container. |

CL03 Item type identification code (UN/EDIFACT 7143)**Coded identification of an item type.**

| | |
|------------|--|
| RN | Release number
Reference number identifying a release from a buyer's purchase order. |
| RU | Run number
The item number identifies the production or manufacturing run or sequence in which the item was manufactured, processed or assembled. |
| RY | Record keeping of model year
The item number relates to the year in which the particular model was kept. |
| SA | Supplier's article number
Number assigned to an article by the supplier of that article. |
| SG | Standard group of products (mixed assortment)
The item number relates to a standard group of other items (mixed) which are grouped together as a single item for identification purposes. |
| SK | SKU (Stock keeping unit)
Reference number of a stock keeping unit. |
| SN | Serial number
Identification number of an item which distinguishes this specific item out of a number of identical items. |
| SRS | RSK number
Plumbing and heating. |
| SRT | IFLS (Institut Francais du Libre Service) 5 digit product classification code
5 digit code for product classification managed by the Institut Francais du Libre Service. |
| SRU | IFLS (Institut Francais du Libre Service) 9 digit product classification code
9 digit code for product classification managed by the Institut Francais du Libre Service. |
| SRV | EAN.UCC Global Trade Item Number
A unique number, up to 14-digits, assigned according to the numbering structure of the EAN.UCC system. 'EAN' stands for the 'International Article Numbering Association', and 'UCC' for the 'Uniform Code Council'. |
| SRW | EDIS (Energy Data Identification System)
European system for identification of meter data. |

| | |
|--|--|
| CL03 | Item type identification code (UN/EDIFACT 7143) |
| Coded identification of an item type. | |
| SRX | Slaughter number
Unique number given by a slaughterhouse to an animal or a group of animals of
the same breed. |
| SRY | Official animal number
Unique number given by a national authority to identify an animal
individually. |
| SS | Supplier's supplier article number
Article number referring to a sales catalogue of supplier's supplier. |
| ST | Style number
Number given to a specific style or form of an article, especially used for
garments. |
| TG | Transport group number
(8012) Additional number to form article groups for packing and/or
transportation purposes. |
| UA | Ultimate customer's article number
Number assigned by ultimate customer to identify relevant article. |
| UP | UPC (Universal product code)
Number assigned to a manufacturer's product by the Product Code Council. |
| VN | Vendor item number
Reference number assigned by a vendor/seller identifying a product/service/
article. |
| VP | Vendor's (seller's) part number
Reference number assigned by a vendor/seller identifying an article. |
| VS | Vendor's supplemental item number
The item number is a specified by the vendor as a supplemental number for the
vendor's purposes. |
| VX | Vendor specification number
The item number has been allocated by the vendor as a specification number. |
| ZZZ | Mutually defined
A code assigned within a code list to be used on an interim basis and as
defined
among trading partners until a precise code can be assigned to the code list. |

3.2.8.6 CL05 – Transport means description code (English Only)

CL05 Transport means description code (UNECE Recommendation 28)

Code specifying the means of transport.

| | |
|-----------|--|
| 31 | Truck
Automotive vehicle designed for hauling loads. |
| 32 | Truck, tanker
Automotive vehicle with a tank. |
| 33 | Tractor
Automotive vehicle with an engine designed for pulling. |
| 34 | Van
Closed automotive vehicle designed for carrying freight. |
| 35 | Tiptanker
Automotive vehicle designed with a tank lifting capability. |
| 36 | Truck, dry bulk
Automotive vehicle designed for carrying dry bulk cargo. |
| 37 | Truck, container
Automotive vehicle designed for carrying containers. |
| 38 | Carrier, car
Automotive vehicle designed for carrying motorcars. |
| 39 | Truck, reefer
Automotive vehicle designed for the carriage of frozen cargo. |
| 60 | Multimodal, type unknown
Multimodal transport of unknown type. |
| 70 | Fixed transport installation, type unknown
Fixed transport installation of unknown type. |
| 71 | Pipeline
A line of one or more pipes for continuous transport of liquid or gas commodity. |
| 72 | Powerline
A line of one or more cables or wires for continuous transport of electricity. |
| 80 | Vessel, type unknown
Vessel of unknown type. |
| 81 | Motor freighter
Motorized vessel designed for carrying general cargo. |

| | |
|--|---|
| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 82 | Motor tanker
Motorized vessel designed for carrying liquid cargo. |
| 83 | Container vessel
Vessel designed for carrying containers. |
| 84 | Gas tanker
Vessel with tanks designed for carrying gas. |
| 85 | Motor freighter, tug
Motorized vessel designed for carrying cargo and capable of towing. |
| 86 | Motor tanker, tug
Motorized vessel designed for carrying liquid cargo and capable of towing. |
| 87 | Motor freighter with one or more ships alongside
Motorized vessel designed for carrying general cargo that has one or more vessels alongside. |
| 88 | Motor freighter with tanker
Motorized vessel designed for carrying general cargo alongside a vessel designed for carrying liquid cargo. |
| 89 | Motor freighter pushing one or more freighters
Motorized vessel designed for carrying general cargo, pushing one or more vessels also designed for carrying general cargo. |
| 150 | General cargo vessel
Vessel designed to carry general cargo. |
| 151 | Unit carrier
Vessel designed to carry unit loads |
| 152 | Bulk carrier
Vessel designed to carry bulk cargo. |
| 153 | Tanker
Vessel solely equipped with tanks to carry cargo. |
| 154 | Liquefied gas tanker
Tanker designed to carry liquefied gas. |
| 155 | Other special tanker
Tanker designed to carry other special liquids. |
| 157 | Cargo and passenger vessel
Vessel designed to carry cargo and passengers. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

| | |
|------------|---|
| 159 | Passenger ship
Vessel designed to carry more than 12 passengers. |
| 160 | Assistance vessel
Vessel designed to give assistance. |
| 170 | Other sea-going vessel
Sea-going vessel, not otherwise specified. |
| 172 | Work ship
Vessel designed to assist in work. |
| 173 | Push boat
Vessel designed to push other vessels. |
| 174 | Dredger
Vessel designed to scoop or suck mud or sand. |
| 175 | Fishing boat
Vessel designed for fishing. |
| 176 | Research and education ship
Vessel designed for research and education. |
| 177 | Navy vessel
Vessel operated by a Navy. |
| 178 | Structure, floating
Any floating structure. |
| 180 | Pleasure boat
Vessel designed for recreation. |
| 181 | Speedboat
Vessel designed for speed, often used for recreation. |
| 182 | Sailing boat with auxiliary motor
Vessel designed primarily for sailing outfitted with an auxiliary motor. |
| 183 | Sailing yacht
A specific type of vessel mostly used for pleasure and designed for sailing. |
| 184 | Boat for sport fishing
Vessel designed for sport fishing. |
| 185 | Craft, pleasure, longer than 20 metres
Vessel longer than 20 metres, designed for recreation. |

| CL05 | Transport means description code (UNECE Recommendation 28) |
|--|---|
| Code specifying the means of transport. | |
| 189 | Craft, other, recreational
Vessel designed for recreation, not otherwise specified. |
| 190 | Fast ship
Fast, all-purpose vessel. |
| 191 | Hydrofoil
Vessel with wing-like structure for skimming at high speed. |
| 192 | Catamaran, fast
Fast vessel designed with two parallel hulls. |
| 210 | Train, railroad
One or more rail wagons pulled or pushed by one or more locomotive units, or self-propelled, that move over rail tracks. |
| 220 | Train, passenger
Train designed to carry passengers. |
| 230 | Train, freight
Train for carrying freight. |
| 310 | Truck, mail
Automotive vehicle designed for carrying mail. |
| 311 | Truck dump
Automotive vehicle designed with a cargo-dumping capability. |
| 312 | Truck, forklift
Automotive vehicle designed for lifting cargo and heavy objects. |
| 313 | Loader, shovel
Automotive vehicle designed for shoveling sand and other bulk material. |
| 314 | Truck, platform, fixed
Automotive vehicle designed with a fixed platform. |
| 315 | Carrier, straddle
Automotive vehicle designed for lifting and transporting containers. |
| 320 | Crane, mobile
Automotive vehicle with cargo crane. |
| 330 | Bus
Automotive vehicle designed for carrying more than 8 passengers including the driver. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

- 341** Van, delivery
Automotive vehicle designed for making fast deliveries.
- 342** Van, light
Automotive vehicle designed for light carriage.
- 343** Van, furniture
Automotive vehicle designed for carrying furniture.
- 360** Tractor, industrial
Automotive vehicle designed for towing one or more trailers.
- 362** Truck, freezer with isothermic trailer
Automotive vehicle designed for carrying frozen goods with a trailer designed for carrying temperature-controlled goods.
- 363** Truck, isothermic with isothermic trailer
Automotive vehicle with trailer designed to carry temperature-controlled goods.
- 364** Truck, refrigerated with isothermic trailer
Automotive vehicle designed for carrying refrigerated goods with a trailer designed for carrying temperature-controlled goods.
- 365** Truck, freezer with refrigerated trailer
Automotive vehicle designed for carrying frozen goods with a trailer designed for carrying refrigerated goods.
- 366** Truck, isothermic with refrigerated trailer
Automotive vehicle designed to carry temperature-controlled goods with a trailer designed to carry refrigerated goods.
- 367** Truck, opening floor, with extendable trailer
Automotive vehicle with an opening floor with an extendable trailer.
- 368** Truck, rigid, with tank and tank trailer
Rigid automotive vehicle designed with a tank with a tank trailer.
- 369** Truck, bulk with tank trailer
Automotive vehicle designed for bulk carrying with a tank trailer.

| | |
|--|--|
| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 370 | Truck, rigid with tank and bulk trailer
Rigid automotive vehicle designed with a tank with a trailer capable of carrying
bulk cargo and liquid. |
| 371 | Truck, bulk with bulk trailer
Automotive vehicle and trailer both designed for carrying bulk cargo. |
| 372 | Truck, tautliner with extendable trailer
Automotive tautliner vehicle with extendable trailer. |
| 373 | Truck, tautliner with removable roof and extendable trailer
Automotive tautliner vehicle with removable roof and extendable trailer. |
| 374 | Truck, bulk truck with extendable trailer
Automotive vehicle designed for carrying bulk cargo with an extendable trailer. |
| 375 | Truck, refrigerated with freezer trailer
Automotive vehicle designed for carrying refrigerated goods with a trailer designed for carrying frozen goods. |
| 376 | Truck, isothermic with freezer trailer
Automotive vehicle designed for carrying temperature-controlled goods with a trailer designed for carrying frozen goods. |
| 377 | Truck, furniture with trailer
Automotive vehicle designed for carrying furniture with a trailer. |
| 378 | Truck, tautliner with furniture trailer
Automotive tautliner vehicle with trailer designed for carrying furniture. |
| 379 | Truck, tautliner, removable roof with furniture trailer
Automotive tautliner vehicle designed with a removable roof with a trailer designed for carrying furniture. |
| 380 | Truck, tip-up with gondola trailer
Automotive vehicle designed with a tip-up capability with a gondola trailer. |
| 381 | Truck, tautliner with gondola trailer
Automotive tautliner vehicle with a gondola trailer. |
| 382 | Truck, tautliner, with removable roof and gondola trailer
Automotive tautliner vehicle with removable roof and a gondola trailer. |
| 383 | Truck, opening-floor with gondola trailer
Automotive vehicle with an opening floor and with a gondola trailer. |

| | |
|--|---|
| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 384 | Truck, bulk with gondola trailer
Automotive vehicle designed for carrying bulk cargo with a gondola trailer. |
| 385 | Truck, tip-up with extendable gondola trailer
Automotive vehicle designed with a tip-up capability with an extendable gondola trailer. |
| 386 | Truck, tautliner with extendable gondola trailer
Automotive tautliner vehicle with an extendable gondola trailer. |
| 387 | Truck, tautliner, removable roof with extendable gondola trailer
Automotive tautliner vehicle designed with a removable roof and with an extendable gondola trailer. |
| 388 | Truck, opening floor with extendable gondola trailer
Automotive tautliner vehicle designed with an opening floor and with an extendable gondola trailer. |
| 389 | Truck, bulk with extendable gondola trailer
Automotive vehicle designed for carrying bulk cargo with an extendable gondola trailer. |
| 390 | Truck, tip-up truck with opening-floor trailer
Automotive vehicle designed with a tip-up capability with an opening-floor trailer. |
| 391 | Truck, tautliner with opening-floor trailer
Automotive tautliner vehicle with opening-floor trailer. |
| 392 | Truck, tautliner, removable roof, with opening-floor trailer
Automotive tautliner vehicle with a removable roof, with an opening-floor trailer. |
| 393 | Truck, opening-floor with opening-floor trailer
Automotive vehicle and trailer both with opening floors. |
| 394 | Truck, bulk truck with opening-floor trailer
Automotive vehicle designed for carrying bulk cargo with an opening-floor trailer. |
| 395 | Truck, with trailer
Automotive vehicle designed to pull a trailer, with a trailer attached. |
| 396 | Truck, tilt, with tilt trailer
Automotive vehicle with a tilt capability with a trailer also with a tilt capability. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

- 397** Truck, refrigerated, with refrigerated trailer
Automotive vehicle designed to carry refrigerated goods with a trailer also capable of carrying refrigerated goods.
- 398** Truck, freezer with freezer trailer
Automotive vehicle capable of carrying frozen goods with a trailer also capable of carrying frozen goods.
- 399** Truck, removal with removal trailer
Automotive vehicle designed to carry household effects with a trailer also capable of carrying household effects.
- 810** Motor freighter pushing at least one tank-ship
Motorized vessel designed for carrying general cargo, pushing at least one vessel designed to carry liquid cargo.
- 811** Tug, freighter
Vessel designed to push or pull another vessel that is also capable of carrying general cargo.
- 812** Tug, tanker
Vessel designed to push or pull another vessel also capable of carrying liquid cargo.
- 813** Tug, freighter, coupled
Vessel designed to push or pull another vessel that is also capable of carrying general cargo tied to one or more other vessels.
- 814** Tug, freighter/tanker, coupled
Vessel designed to push or pull another vessel that is also capable of carrying either general or liquid cargo tied to one or more other vessels.
- 815** Freightbarge
Lighter designed for carrying general cargo.
- 816** Tankbarge
Lighter designed for carrying liquid cargo.
- 817** Freightbarge with containers
Lighter designed for carrying containers.
- 818** Tankbarge, gas
Lighter designed for carrying gas.
-

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

- 821** Pushtow, one cargo barge
Vessel designed for pushing/towing, facilitating the movement of one cargo barge.
- 822** Pushtow, two cargo barges
Combination designed for pushing/towing, facilitating the movement of two cargo barges.
- 823** Pushtow, three cargo barges
Combination designed for pushing/towing, facilitating the movement of three cargo barges.
- 824** Pushtow, four cargo barges
Combination designed for pushing/towing, facilitating the movement of four cargo barges.
- 825** Pushtow, five cargo barges
Combination designed for pushing/towing, facilitating the movement of five cargo barges.
- 826** Pushtow, six cargo barges
Combination designed for pushing/towing, facilitating the movement of six cargo barges.
- 827** Pushtow, seven cargo barges
Combination designed for pushing/towing, facilitating the movement of seven cargo barges.
- 828** Pushtow, eight cargo barges
Combination designed for pushing/towing, facilitating the movement of eight cargo barges.
- 829** Pushtow, nine cargo barges
Combination designed for pushing/towing, facilitating the movement of nine or more cargo barges.
- 831** Pushtow, one gas/tank barge
Combination designed for pushing/towing, moving one tanker or gas barge.
- 832** Pushtow, two barges at least one tanker or gas barge
Combination designed for pushing/towing, moving two barges of which at least one tanker or gas barge.

| CL05 | Transport means description code (UNECE Recommendation 28) |
|--|--|
| Code specifying the means of transport. | |
| 833 | Pushtow, three barges at least one tanker or gas barge
Combination designed for pushing/towing, moving three barges of which at least one is a tanker or gas barge. |
| 834 | Pushtow, four barges at least one tanker or gas barge
Combination designed for pushing/towing, moving four barges of which at least one is a tanker or gas barge. |
| 835 | Pushtow, five barges at least one tanker or gas barge
Combination designed for pushing/towing, moving five barges of which at least one is a tanker or gas barge. |
| 836 | Pushtow, six barges at least one tanker or gas barge
Combination designed for pushing/towing, moving six barges of which at least one is a tanker or gas barge. |
| 837 | Pushtow, seven barges at least one tanker or gas barge
Combination designed for pushing/towing, moving seven barges of which at least one is a tanker or gas barge. |
| 838 | Pushtow, eight barges at least one tanker or gas barge
Combination designed for pushing/towing, moving eight barges of which at least one is a tanker or gas barge. |
| 839 | Pushtow, nine or more barges at least one tanker or gas barge
Combination designed for pushing/towing, moving nine or more barges of which at least one is a tanker or gas barge. |
| 840 | Tug, single
Vessel designed for pushing another vessel that is the only boat used for a tow. |
| 841 | Tug, one or more tows
Vessel designed for pushing another vessel that is involved in one or more concurrent tows. |
| 842 | Tug, assisting a vessel or linked combination
Vessel designed for pushing another vessel that is assisting one vessel or a combination of vessels or tugs and vessels. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

| | |
|-------------|--|
| 843 | Pushboat, single
Vessel designed for pushing. |
| 844 | Passenger ship, ferry, red cross ship, cruise ship
Vessels designed for carrying passengers. |
| 845 | Service vessel, police patrol, port services
Vessel designed to perform a specific dedicated service. |
| 846 | Vessel, work maintenance craft, floating derrick, cable-ship, buoy-ship, dredge
Vessel designed to perform a specific type of work. |
| 847 | Object, towed, not otherwise specified
An object in tow that is not otherwise specified. |
| 848 | Fishing boat
Vessel designed for fishing. |
| 849 | Bunkership
Vessel designed for carrying and delivering bunkers. |
| 850 | Barge, tanker, chemical
Vessel designed to carry liquid or bulk chemicals. |
| 851 | Object, not otherwise specified
A floating object that is not otherwise specified. |
| 1501 | Grain vessel
Vessel designed to carry grain. |
| 1502 | Timber/log carrier
Vessel designed to carry logs and timber. |
| 1503 | Wood chips vessel
Vessel designed to carry wood chips. |
| 1504 | Steel products vessel
Vessel designed to carry steel products. |
| 1505 | Carrier, general cargo/container
Vessel designed to carry general cargo and containers. |
| 1506 | Temperature controlled cargo vessels
Vessel designed to carry temperature-controlled cargo. |
| 1511 | Full container ship/cellular vessel
Vessel designed to carry containers only. |

| | |
|--|--|
| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 1512 | RoRo vessel
Vessel with ramp designed to carry roll-on/roll-off cargo. |
| 1513 | Car carrier
Vessel designed to carry automotive vehicles or their knock-down parts. |
| 1514 | Livestock carrier
Vessel designed to carry livestock. |
| 1515 | Barge carrier - Lash ship
Vessel designed to carry barges. Lash means lighters aboard ship. |
| 1516 | Chemical carrier
Vessel designed to carry chemicals in bulk or drums not in tanks. |
| 1517 | Irradiated fuel carrier
Vessel designed to carry irradiated fuel. |
| 1518 | Heavy cargo vessel
Ship designed to carry heavy cargo. |
| 1519 | RoRo/Container vessel
Vessel designed to carry both containers and roll-on/roll-off cargo. |
| 1521 | Dry bulk carrier
Vessel designed to carry dry bulk (expellers). |
| 1522 | Ore carrier
Vessel designed to carry ore. |
| 1523 | Cement carrier
Vessel designed to carry cement. |
| 1524 | Gravel carrier
Vessel designed to carry gravel. |
| 1525 | Coal carrier
Vessel designed to carry coal. |
| 1531 | Crude oil tanker
Tanker designed to carry crude oil. |
| 1532 | Chemical tanker, coaster
Tanker designed to carry chemicals in coastal traffic. |
| 1533 | Chemical tanker, deep sea
Tanker designed to carry chemicals in deep sea. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

| | |
|-------------|---|
| 1534 | Oil and other derivatives tanker
Tanker designed to carry oil and other derivatives. |
| 1541 | LPG tanker
Vessel designed to carry Liquefied Petroleum Gas (LPG). |
| 1542 | LNG tanker
Tanker designed to carry Liquefied Natural Gas (LNG). |
| 1543 | LNG/LPG tanker
Tanker designed to carry Liquefied Natural Gas (LNG) and Liquefied Petroleum Gas (LPG). |
| 1551 | Asphalt/bitumen tanker
Tanker designed asphalt and bitumen. |
| 1552 | Molasses tanker
Tanker designed to carry molasses. |
| 1553 | Vegetable oil tanker
Tanker designed to carry vegetable oil. |
| 1591 | Cruise ship
Passenger ship designed to carry tourists on specified routes. |
| 1592 | Ferry
Vessel designed to ply regularly between two or more ports. |
| 1593 | Other passenger ship
Vessel designed to carry passengers, not otherwise specified. |
| 1594 | Passenger ship, sailing
Vessel designed to carry passengers and mainly propelled by sails. |
| 1601 | Tug, without tow
Vessel designed to tow objects but sailing alone. |
| 1602 | Tug, with tow
Vessel designed to tow, and towing an object. |
| 1603 | Salvage vessel
Vessel designed to salvage. |
| 1604 | Rescue vessel
Vessel designed to effect rescue operations. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

| | |
|-------------|---|
| 1605 | Oil combat vessel
Vessel designed to combat oil spills. |
| 1606 | Oil rig
Object designed for drilling oil at sea. |
| 1607 | Hospital vessel
Vessel designed to serve as a hospital at sea. |
| 1711 | Pilot boat
Vessel designed to convey pilots to/from ships. |
| 1712 | Patrol/measure ship
Vessel designed to guard, patrol or measure. |
| 1721 | Supply vessel
Vessel designed to provide supplies. |
| 1723 | Offshore support vessel
Vessel designed to provide offshore support. |
| 1724 | Pontoon
Flat-bottomed vessel with a flat deck. |
| 1725 | Stone dumping vessel
Vessel designed to dump stones. |
| 1726 | Cable layer
Vessel designed to lay cable. |
| 1727 | Buoyage vessel
Vessel designed to handle buoys. |
| 1728 | Icebreaker
Vessel designed to break ice. |
| 1729 | Pipelaying vessel
Vessel designed to lay pipe. |
| 1751 | Trawler
Vessel designed to drag a bag-like net. |
| 1752 | Cutter
Small vessel that sometimes can be carried on a larger ship. |
| 1753 | Factory ship
Vessel designed as a fish factory. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

| | |
|-------------|---|
| 1761 | Fishery research vessel
Vessel designed for fishery research. |
| 1762 | Climate registration vessel
Vessel designed for climate registration. |
| 1763 | Ship for environmental measurement
Vessel designed for environmental monitoring and measurement. |
| 1764 | Scientific vessel
Vessel designed for scientific purposes. |
| 1765 | Sailing school ship
Vessel designed for training, powered by sail. |
| 1766 | Training vessel
Vessel designed for training. |
| 1781 | Crane, floating
A crane mounted on a barge or pontoon. |
| 1782 | Dock, floating
A submersible floating structure used as a dock. |
| 2201 | Train, super express
Train designed for high speed. |
| 2202 | Train, sleeper
Passenger train that includes carriages for sleeping. |
| 2203 | Train, passenger, hired group
A chartered train. |
| 2301 | Blocktrain
Train for carrying freight to the same destination. |
| 2302 | Train, container
Train for carrying containers. |
| 2303 | Train, with one wagon
Train with a single wagon for carrying freight. |
| 2304 | Train, with more than one and less than 20 wagons
Train with more than one and less than 20 wagons for carrying freight. |
| 2305 | Train, with more than 20 wagons
Train with more than 20 wagons for carrying freight. |

| | |

| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 3100 | Truck, tautliner with removal trailer
Automotive tautline truck with trailer capable of carrying household effects. |
| 3101 | Truck, tautliner with removable roof and removal trailer
Automotive tautline vehicle with removable roof and a trailer capable of carrying household effects. |
| 3102 | Car, with caravan
Automobile towing a house trailer. |
| 3103 | Truck, tautliner, 25 tonne
Automotive tautline vehicle with a 25 tonne capacity. |
| 3104 | Truck, tautliner, 25 tonne with removable roof
Automotive tautline vehicle with a 25 tonne capacity and a removable roof. |
| 3105 | Lorry, articulated, flat bed, 25 tonne
Articulated automotive vehicle with a flat bed and 25 tonne capacity. |
| 3106 | Lorry, articulated, flat bed, 24 tonne, with 10 metre crane
Articulated automotive vehicle with a flat bed and 25 tonne capacity with a 10 metre crane attached. |
| 3107 | Lorry, articulated, flat bed, 24 tonne, with 15 metre crane
Articulated automotive vehicle with a flat bed and 25 tonne capacity with a 15 metre crane attached. |
| 3108 | Lorry, articulated, flat bed, 24 tonne, with 18 metre crane
Articulated automotive vehicle with a flat bed and 25 tonne capacity with an 18 metre crane attached. |
| 3109 | Lorry, articulated, flat bed, 10 tonne
Articulated automotive vehicle with a flat bed and 10 tonne capacity. |
| 3110 | Truck, tautliner, 25 tonne, with 90 cubic metre trailer
Automotive tautline vehicle with a 25 tonne capacity and a 90 cubic metre trailer. |
| 3111 | Truck, tautliner, 25 tonne, with 120 cubic metre trailer
Automotive tautline vehicle with a 25 tonne capacity and a 120 cubic metre trailer. |
| 3112 | Lorry, flat with trailer and 10 metre crane
Automotive vehicle with flat bed and trailer and 10 metre crane. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

- 3113** Lorry, articulated with tank
Articulated automotive vehicle with tank designed for carrying liquid or bulk goods.
- 3114** Lorry, flat, 15 tonne
Automotive vehicle with flat bed and a 15 tonne capacity.
- 3115** Lorry, flat, 15 tonne with crane
Automotive vehicle with flat bed and a 15 tonne capacity and attached crane.
- 3116** Truck, isothermal
Automotive vehicle designed to carry temperature-controlled goods.
- 3117** Truck, refrigerated
Automotive vehicle designed to carry refrigerated goods.
- 3118** Van, freezer
Automotive vehicle designed to carry frozen goods.
- 3119** Van, isothermal
Automotive vehicle designed to carry temperature-controlled goods.
- 3120** Van, refrigerated
Automotive vehicle designed to carry refrigerated goods.
- 3121** Truck, bulk
Automotive vehicle designed to carry bulk goods.
- 3122** Truck, tip-up
Automotive vehicle designed with a tip-up capability.
- 3123** Truck, articulated, tip-up
Articulated automotive vehicle designed with a tip-up capability.
- 3124** Truck, rigid, with tank
Rigid automotive vehicle designed with a tank.
- 3125** Truck, tautliner
Automotive vehicle with non-rigid sides.
- 3126** Truck, tautliner, with removable roof
Automotive tautline vehicle with a removable roof.
- 3127** Truck, with opening floor
Automotive vehicle with a floor that can be opened.
- 3128** Truck, freezer
Automotive vehicle designed to carry frozen goods.

| CL05 | Transport means description code (UNECE Recommendation 28) |
| Code specifying the means of transport. | |
| 3129 | Truck, with crane for moving goods, without trailer
A truck with a crane for moving goods, without a trailer. |
| 3130 | Truck, with crane for moving goods, with trailer
A truck with a crane for moving goods, with a trailer. |
| 3131 | Truck, with crane for lifting goods, without trailer
A truck with a crane for lifting goods, without a trailer. |
| 3132 | Truck, with crane for lifting goods, with trailer
A truck with a crane for lifting goods, with a trailer. |
| 3133 | Taxi cab
Automotive vehicle licensed to ply for hire. |
| 3134 | Truck, furniture
Automotive vehicle designed for carrying furniture. |
| 3135 | Truck, hydrant
Automotive vehicle designed for the delivery of fuel from a fixed installation to a means of transport. |
| 3136 | Car
Automotive vehicle designed to carry a small number of passengers. |
| 3137 | Truck, with tail-lift
Automotive vehicle with a hydraulic lifting device on the rear of the vehicle for loading and unloading goods. |
| 3138 | Armoured vehicle
Automotive vehicle designed with fortified body for enhanced protection. |
| 3201 | Car, elevator
Automotive vehicle with raisable work platform. |
| 3301 | Bus, with trailer
Automotive vehicle with an attached trailer for carrying passengers and/or luggage. |
| 3302 | Bus, highway
Automotive vehicle designed for highway travel. |
| 3303 | Bus, sightseeing
Automotive vehicle designed for sightseeing. |

CL05 Transport means description code (UNECE Recommendation 28)**Code specifying the means of transport.**

3304 Bus, airport/city

Automotive vehicle designed to carry passengers and their baggage between an airport and a city and return.

3.2.8.7 CL06 – Document name code (English Only)

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

1 Certificate of analysis

Certificate providing the values of an analysis.

2 Certificate of conformity

Certificate certifying the conformity to predefined definitions.

3 Certificate of quality

Certificate certifying the quality of goods, services etc.

4 Test report

Report providing the results of a test session.

5 Product performance report

Report specifying the performance values of products.

6 Product specification report

Report providing specification values of products.

7 Process data report

Reports on events during production process.

8 First sample test report

Document/message describes the test report of the first sample.

9 Price/sales catalogue

A document/message to enable the transmission of information regarding pricing and catalogue details for goods and services offered by a seller to a buyer.

10 Party information

Document/message providing basic data concerning a party.

11 Federal label approval

A pre-approved document relating to federal label approval requirements.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 12** Mill certificate
Certificate certifying a specific quality of agricultural products.
- 13** Post receipt
Document/message which evidences the transport of goods by post (e.g. mail, parcel, etc.).
- 14** Weight certificate
Certificate certifying the weight of goods.
- 15** Weight list
Document/message specifying the weight of goods.
- 16** Certificate
Document by means of which the documentary credit applicant specifies the conditions for the certificate and by whom the certificate is to be issued.
- 17** Combined certificate of value and origin
Document identifying goods in which the issuing authority expressly certifies that the goods originate in a specific country or part of, or group of countries. It also states the price and/or cost of the goods with the purpose of determining the customs origin.
- 18** Movement certificate A.TR.1
Specific form of transit declaration issued by the exporter (movement certificate).
- 19** Certificate of quantity
Certificate certifying the quantity of goods, services etc.
- 20** Quality data message
Usage of QALITY-message.
- 21** Query
Request information based on defined criteria.
- 22** Response to query
Document/message returned as an answer to a question.
- 23** Status information
Information regarding the status of a related message.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

-
- | | |
|-----------|---|
| 24 | Restow
Message/document identifying containers that have been unloaded and then reloaded onto the same means of transport. |
| 25 | Container discharge list
Message/document itemising containers to be discharged from vessel. |
| 26 | Corporate superannuation contributions advice
Document/message providing contributions advice used for corporate superannuation schemes. |
| 27 | Industry superannuation contributions advice
Document/message providing contributions advice used for superannuation schemes which are industry wide. |
| 28 | Corporate superannuation member maintenance message
Member maintenance message used for corporate superannuation schemes. |
| 29 | Industry superannuation member maintenance message
Member maintenance message used for industry wide superannuation schemes. |
| 30 | Life insurance payroll deductions advice
Payroll deductions advice used in the life insurance industry. |
| 31 | Underbond request
A Message/document requesting to move cargo from one Customs control point to another. |
| 32 | Underbond approval
A message/document issuing Customs approval to move cargo from one Customs control point to another. |
| 33 | Certificate of sealing of export meat lockers
Document / message issued by the authority in the exporting country evidencing the sealing of export meat lockers. |
| 34 | Cargo status
Message identifying the status of cargo. |
| 35 | Inventory report
A message specifying information relating to held inventories. |
-

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 36** Identity card
Official document to identify a person.
- 37** Response to a trade statistics message
Document/message in which the competent national authorities provide a declarant with an acceptance or a rejection about a received declaration for European statistical purposes.
- 38** Vaccination certificate
Official document proving immunisation against certain diseases.
- 39** Passport
An official document giving permission to travel in foreign countries.
- 40** Driving licence (national)
An official document giving permission to drive a car in a given country.
- 41** Driving licence (international)
An official document giving a native of one country permission to drive a vehicle
in certain other countries.
- 42** Free pass
A document giving free access to a service.
- 43** Season ticket
A document giving access to a service for a determined period of time.
- 44** Transport status report
(1125) A message to report the transport status and/or change in the transport status (i.e. event) between agreed parties.
- 45** Transport status request
(1127) A message to request a transport status report (e.g. through the national multimodal status report message IFSTA).
- 46** Banking status
A banking status document and/or message.
- 47** Extra-Community trade statistical declaration
Document/message in which a declarant provides information about extra-Community trade of goods required by the body responsible for the collection of
trade statistics. Trade by a country in the European Union with a country
outside
the European Union.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|-----------|--|
| 48 | Written instructions in conformance with ADR article number 10385
Written instructions relating to dangerous goods and defined in the European Agreement of Dangerous Transport by Road known as ADR (Accord européen relatif au transport international des marchandises Dangereuses par Route). |
| 49 | Damage certification
Official certification that damages to the goods to be transported have been discovered. |
| 50 | Validated priced tender
A validated priced tender. |
| 51 | Price/sales catalogue response
A document providing a response to a previously sent price/sales catalogue. |
| 52 | Price negotiation result
A document providing the result of price negotiations. |
| 53 | Safety and hazard data sheet
Document or message to supply advice on a dangerous or hazardous material to industrial customers so as to enable them to take measures to protect their employees and the environment from any potential harmful effects from these material. |
| 54 | Legal statement of an account
A statement of an account containing the booked items as in the ledger of the account servicing financial institution. |
| 55 | Listing statement of an account
A statement from the account servicing financial institution containing items pending to be booked. |
| 56 | Closing statement of an account
Last statement of a period containing the interest calculation and the final balance of the last entry date. |
| 57 | Transport equipment on-hire report
Report on the movement of containers or other items of transport equipment to record physical movement activity and establish the beginning of a rental period. |
| 58 | Transport equipment off-hire report
Report on the movement of containers or other items of transport equipment to record physical movement activity and establish the end of a rental period. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|-----------|--|
| 59 | Treatment - nil outturn
No shortage, surplus or damaged outturn resulting from container vessel unpacking. |
| 60 | Treatment - time-up underbond
Movement type indicator: goods are moved under customs control for warehousing due to being time-up. |
| 61 | Treatment - underbond by sea
Movement type indicator: goods are to move by sea under customs control to a customs office where formalities will be completed. |
| 62 | Treatment - personal effect
Cargo consists of personal effects. |
| 63 | Treatment - timber
Cargo consists of timber. |
| 64 | Preliminary credit assessment
Document/message issued either by a factor to indicate his preliminary credit assessment on a buyer, or by a seller to request a factor's preliminary credit assessment on a buyer. |
| 65 | Credit cover
Document/message issued either by a factor to give a credit cover on a buyer, or by a seller to request a factor's credit cover. |
| 66 | Current account
Document/message issued by a factor to indicate the money movements of a seller's or another factor's account with him. |
| 67 | Commercial dispute
Document/message issued by a party (usually the buyer) to indicate that one or more invoices or one or more credit notes are disputed for payment. |
| 68 | Chargeback
Document/message issued by a factor to a seller or to another factor to indicate that the rest of the amounts of one or more invoices uncollectable from buyers are charged back to clear the invoice(s) off the ledger. |
| 69 | Reassignment
Document/message issued by a factor to a seller or to another factor to reassign an invoice or credit note previously assigned to him. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|-----------|--|
| 70 | Collateral account
Document message issued by a factor to indicate the movements of invoices, credit notes and payments of a seller's account. |
| 71 | Request for payment
Document/message issued by a creditor to a debtor to request payment of one or more invoices past due. |
| 72 | Unship permit
A message or document issuing permission to unship cargo. |
| 73 | Statistical definitions
Transmission of one or more statistical definitions. |
| 74 | Statistical data
Transmission of one or more items of data or data sets. |
| 75 | Request for statistical data
Request for one or more items or data sets of statistical data. |
| 76 | Call-off delivery
Document/message to provide split quantities and delivery dates referring to a previous delivery instruction. |
| 77 | Consignment status report
Message covers information about the consignment status. |
| 78 | Inventory movement advice
Advice of inventory movements. |
| 79 | Inventory status advice
Advice of stock on hand. |
| 80 | Debit note related to goods or services
Debit information related to a transaction for goods or services to the relevant party. |
| 81 | Credit note related to goods or services
Document message used to provide credit information related to a transaction for goods or services to the relevant party. |
| 82 | Metered services invoice
Document/message claiming payment for the supply of metered services (e.g., gas, electricity, etc.) supplied to a fixed meter whose consumption is measured over a period of time. |

| CL06 | Document name code (UN/EDIFACT 1001) |
|---|--|
| Code specifying the document name. | |
| 83 | Credit note related to financial adjustments
Document message for providing credit information related to financial adjustments to the relevant party, e.g., bonuses. |
| 84 | Debit note related to financial adjustments
Document/message for providing debit information related to financial adjustments to the relevant party. |
| 85 | Customs manifest
Message/document identifying a customs manifest. The document itemises a list of cargo prepared by shipping companies from bills of landing and presented to customs for formal report of cargo. |
| 86 | Vessel unpack report
A document code to indicate that the message being transmitted identifies all short and surplus cargoes off-loaded from a vessel at a specified discharging port. |
| 87 | General cargo summary manifest report
A document code to indicate that the message being transmitted is summary manifest information for general cargo. |
| 88 | Consignment unpack report
A document code to indicate that the message being transmitted is a consignment unpack report only. |
| 89 | Meat and meat by-products sanitary certificate
Document or message issued by the competent authority in the exporting country evidencing that meat or meat by-products comply with the requirements set by the importing country. |
| 90 | Meat food products sanitary certificate
Document or message issued by the competent authority in the exporting country evidencing that meat food products comply with the requirements set by the importing country. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|-----------|--|
| 91 | Poultry sanitary certificate

Document or message issued by the competent authority in the exporting country evidencing that poultry products comply with the requirements set by the importing country. |
| 92 | Horsemeat sanitary certificate

Document or message issued by the competent authority in the exporting country evidencing that horsemeat products comply with the requirements set by the importing country. |
| 93 | Casing sanitary certificate

Document or message issued by the competent authority in the exporting country evidencing that casing products comply with the requirements set by the importing country. |
| 94 | Pharmaceutical sanitary certificate

Document or message issued by the competent authority in the exporting country evidencing that pharmaceutical products comply with the requirements set by the importing country. |
| 95 | Inedible sanitary certificate

Document or message issued by the competent authority in the exporting country evidencing that inedible products comply with the requirements set by the importing country. |
| 96 | Impending arrival

Notification of impending arrival details for vessel. |
| 97 | Means of transport advice

Message reporting the means of transport used to carry goods or cargo. |
| 98 | Arrival information

Message reporting the arrival details of goods or cargo. |
| 99 | Cargo release notification

Message/document sent by the cargo handler indicating that the cargo has moved from a Customs controlled premise. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 100 | Excise certificate

Certificate asserting that the goods have been submitted to the excise authorities before departure from the exporting country or before delivery in case of import traffic. |
| 101 | Registration document

An official document providing registration details. |
| 102 | Tax notification

Used to specify that the message is a tax notification. |
| 103 | Transport equipment direct interchange report

Report on the movement of containers or other items of transport equipment being exchanged, establishing relevant rental periods. |
| 104 | Transport equipment impending arrival advice

Advice that containers or other items of transport equipment may be expected to be delivered to a certain location. |
| 105 | Purchase order

Document/message issued within an enterprise to initiate the purchase of articles, materials or services required for the production or manufacture of goods to be offered for sale or otherwise supplied to customers. |
| 106 | Transport equipment damage report

Report of damaged items of transport equipment that have been returned. |
| 107 | Transport equipment maintenance and repair work estimate advice

Advice providing estimates of transport equipment maintenance and repair costs. |
| 108 | Transport equipment empty release instruction

Instruction to release an item of empty transport equipment to a specified party or parties. |
| 109 | Transport movement gate in report

Report on the inward movement of cargo, containers or other items of transport equipment which have been delivered to a facility by an inland carrier. |
| 110 | Manufacturing instructions

Document/message issued within an enterprise to initiate the manufacture of goods to be offered for sale. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 111** Transport movement gate out report
Report on the outward movement of cargo, containers or other items of transport equipment (either full or empty) which have been picked up by an inland carrier.
- 112** Transport equipment unpacking instruction
Instruction to unpack specified cargo from specified containers or other items of transport equipment.
- 113** Transport equipment unpacking report
Report on the completion of unpacking specified containers or other items of transport equipment.
- 114** Transport equipment pick-up availability request
Request for confirmation that an item of transport equipment will be available for collection.
- 115** Transport equipment pick-up availability confirmation
Confirmation that an item of transport equipment is available for collection.
- 116** Transport equipment pick-up report
Report that an item of transport equipment has been collected.
- 117** Transport equipment shift report
Report on the movement of containers or other items of transport within a facility.
- 118** Transport discharge instruction
Instruction to unload specified cargo, containers or transport equipment from a means of transport.
- 119** Transport discharge report
Report on cargo, containers or transport equipment unloaded from a particular means of transport.
- 120** Stores requisition
Document/message issued within an enterprise ordering the taking out of stock of goods.
- 121** Transport loading instruction
Instruction to load cargo, containers or transport equipment onto a means of transport.

| CL06 | Document name code (UN/EDIFACT 1001) |
|---|--|
| Code specifying the document name. | |
| 122 | Transport loading report
Report on completion of loading cargo, containers or other transport equipment onto a means of transport. |
| 123 | Transport equipment maintenance and repair work authorisation
Authorisation to have transport equipment repaired or to have maintenance performed. |
| 124 | Transport departure report
Report of the departure of a means of transport from a particular facility. |
| 125 | Transport empty equipment advice
Advice that an item or items of empty transport equipment are available for return. |
| 126 | Transport equipment acceptance order
Order to accept items of transport equipment which are to be delivered by an inland carrier (rail, road or barge) to a specified facility. |
| 127 | Transport equipment special service instruction
Instruction to perform a specified service or services on an item or items of transport equipment. |
| 128 | Transport equipment stock report
Report on the number of items of transport equipment stored at one or more locations. |
| 129 | Transport cargo release order
Order to release cargo or items of transport equipment to a specified party. |
| 130 | Invoicing data sheet
Document/message issued within an enterprise containing data about goods sold, to be used as the basis for the preparation of an invoice. |
| 131 | Transport equipment packing instruction
Instruction to pack cargo into a container or other item of transport equipment. |
| 132 | Customs clearance notice
Notification of customs clearance of cargo or items of transport equipment. |
| 133 | Customs documents expiration notice
Notice specifying expiration of Customs documents relating to cargo or items of transport equipment. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 134** Transport equipment on-hire request
Request for transport equipment to be made available for hire.
- 135** Transport equipment on-hire order
Order to release empty items of transport equipment for on-hire to a lessee, and authorising collection by or on behalf of a specified party.
- 136** Transport equipment off-hire request
Request to terminate the lease on an item of transport equipment at a specified time.
- 137** Transport equipment survey order
Order to perform a survey on specified items of transport equipment.
- 138** Transport equipment survey order response
Response to an order to conduct a survey of transport equipment.
- 139** Transport equipment survey report
Survey report of specified items of transport equipment.
- 140** Packing instructions
Document/message within an enterprise giving instructions on how goods are to be packed.
- 141** Advising items to be booked to a financial account
A document and/or message advising of items which have to be booked to a financial account.
- 142** Transport equipment maintenance and repair work estimate order
Order to draw up an estimate of the costs of maintenance or repair of transport equipment.
- 143** Transport equipment maintenance and repair notice
Report of transport equipment which has been repaired or has had maintenance performed.
- 144** Empty container disposition order
Order to make available empty containers.
- 145** Cargo vessel discharge order
Order that the containers or cargo specified are to be discharged from a vessel.
- 146** Cargo vessel loading order
Order that specified cargo, containers or groups of containers are to be loaded in or on a vessel.

|---|---|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 147 | Multidrop order
One purchase order that contains the orders of two or more vendors and the associated delivery points for each. |
| 148 | Bailment contract
A document authorizing the bailing of goods. |
| 149 | Basic agreement
A document indicating an agreement containing basic terms and conditions applicable to future contracts between two parties. |
| 150 | Internal transport order
Document/message giving instructions about the transport of goods within an enterprise. |
| 151 | Grant
A document indicating the granting of funds. |
| 152 | Indefinite delivery indefinite quantity contract
A document indicating a contract calling for the indefinite deliveries of indefinite quantities of goods. |
| 153 | Indefinite delivery definite quantity contract
A document indicating a contract calling for indefinite deliveries of definite quantities. |
| 154 | Requirements contract
A document indicating a requirements contract that authorizes the filling of all purchase requirements during a specified contract period. |
| 155 | Task order
A document indicating an order that tasks a contractor to perform a specified function. |
| 156 | Make or buy plan
A document indicating a plan that identifies which items will be made and which items will be bought. |
| 157 | Subcontractor plan
A document indicating a plan that identifies the manufacturer's subcontracting strategy for a specific contract. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 158 | Cost data summary
A document indicating a summary of cost data. |
| 159 | Certified cost and price data
A document indicating cost and price data whose accuracy has been certified. |
| 160 | Wage determination
A document indicating a determination of the wages to be paid. |
| 161 | Contract Funds Status Report (CFSR)
A report to provide the status of funds applicable to the contract. |
| 162 | Certified inspection and test results
A certification as to the accuracy of inspection and test results. |
| 163 | Material inspection and receiving report
A report that is both an inspection report for materials and a receiving document. |
| 164 | Purchasing specification
A document indicating a specification used to purchase an item. |
| 165 | Payment or performance bond
A document indicating a bond that guarantees the payment of monies or a performance. |
| 166 | Contract security classification specification
A document that indicates the specification contains the security and classification requirements for a contract. |
| 167 | Manufacturing specification
A document indicating the specification of how an item is to be manufactured. |
| 168 | Buy America certificate of compliance
A document certifying that more than 50 percent of the cost of an item is attributed to US origin. |
| 169 | Container off-hire notice
Notice to return leased containers. |
| 170 | Cargo acceptance order
Order to accept cargo to be delivered by a carrier. |
| 171 | Pick-up notice
Notice specifying the pick-up of released cargo or containers from a certain address. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 172 | Authorisation to plan and suggest orders

Document or message that authorises receiver to plan orders, based on information in this message, and send these orders as suggestions to the sender. |
| 173 | Authorisation to plan and ship orders

Document or message that authorises receiver to plan and ship orders based on information in this message. |
| 174 | Drawing

The document or message is a drawing. |
| 175 | Cost Performance Report (CPR) format 2

A report identifying the cost performance on a contract at specified levels of the work breakdown structure (format 2 - organizational categories). |
| 176 | Cost Schedule Status Report (CSSR)

A report providing the status of the cost and schedule applicable to a contract. |
| 177 | Cost Performance Report (CPR) format 1

A report identifying the cost performance on a contract including the current month's values at specified levels of the work breakdown structure (format 1 - work breakdown structure). |
| 178 | Cost Performance Report (CPR) format 3

A report identifying the cost performance on a contract that summarizes changes to a contract over a given reporting period with beginning and ending values (format 3 - baseline). |
| 179 | Cost Performance Report (CPR) format 4

A report identifying the cost performance on a contract including forecasts of labour requirements for the remaining portion of the contract (format 4 - staffing). |
| 180 | Cost Performance Report (CPR) format 5

A report identifying the cost performance on a contract that summarizes cost or schedule variances (format 5 - explanations and problem analysis). |
| 181 | Progressive discharge report

Document or message progressively issued by the container terminal operator in charge of discharging a vessel identifying containers that have been discharged from a specific vessel at that point in time. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 182** Balance confirmation
Confirmation of a balance at an entry date.
- 183** Container stripping order
Order to unload goods from a container.
- 184** Container stuffing order
Order to stuff specified goods or consignments in a container.
- 185** Conveyance declaration (arrival)
Declaration to the public authority upon arrival of the conveyance.
- 186** Conveyance declaration (departure)
Declaration to the public authority upon departure of the conveyance.
- 187** Conveyance declaration (combined)
Combined declaration of arrival and departure to the public authority.
- 188** Project recovery plan
A project plan for recovery after a delay or problem resolution.
- 189** Project production plan
A project plan for the production of goods.
- 190** Statistical and other administrative internal documents
Documents/messages issued within an enterprise for the purpose of collection of production and other internal statistics, and for other administration purposes.
- 191** Project master schedule
A high level, all encompassing master schedule of activities to complete a project.
- 192** Priced alternate tender bill of quantity
A priced tender based upon an alternate specification.
- 193** Estimated priced bill of quantity
An estimate based upon a detailed, quantity based specification (bill of quantity).
- 194** Draft bill of quantity
Document/message providing a draft bill of quantity, issued in an unpriced form.
- 195** Documentary credit collection instruction
Instruction for the collection of the documentary credit.
-

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 196 | Request for an amendment of a documentary credit
Request for an amendment of a documentary credit. |
| 197 | Documentary credit amendment information
Documentary credit amendment information. |
| 198 | Advice of an amendment of a documentary credit
Advice of an amendment of a documentary credit. |
| 199 | Response to an amendment of a documentary credit
Response to an amendment of a documentary credit. |
| 200 | Documentary credit issuance information
Provides information on documentary credit issuance. |
| 201 | Direct payment valuation request
Request to establish a direct payment valuation. |
| 202 | Direct payment valuation
Document/message addressed, for instance, by a general contractor to the owner, in order that a direct payment be made to a subcontractor. |
| 203 | Provisional payment valuation
Document/message establishing a provisional payment valuation. |
| 204 | Payment valuation
Document/message establishing the financial elements of a situation of works. |
| 205 | Quantity valuation
Document/message providing a confirmed assessment, by quantity, of the completed work for a construction contract. |
| 206 | Quantity valuation request
Document/message providing an initial assessment, by quantity, of the completed work for a construction contract. |
| 207 | Contract bill of quantities - BOQ
Document/message providing a formal specification identifying quantities and prices that are the basis of a contract for a construction project. BOQ means:
Bill of quantity. |
| 208 | Unpriced bill of quantity
Document/message providing a detailed, quantity based specification, issued in an unpriced form to invite tender prices. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 209** Priced tender BOQ
 Document/message providing a detailed, quantity based specification, updated with prices to form a tender submission for a construction contract. BOQ means: Bill of quantity.
- 210** Enquiry
 Document/message issued by a party interested in the purchase of goods specified therein and indicating particular, desirable conditions regarding delivery terms, etc., addressed to a prospective supplier with a view to obtaining an offer.
- 211** Interim application for payment
 Document/message containing a provisional assessment in support of a request for payment for completed work for a construction contract.
- 212** Agreement to pay
 Document/message in which the debtor expresses the intention to pay.
- 213** Request for financial cancellation
 The message is a request for financial cancellation.
- 214** Pre-authorised direct debit(s)
 The message contains pre-authorised direct debit(s).
- 215** Letter of intent
 Document/message by means of which a buyer informs a seller that the buyer intends to enter into contractual negotiations.
- 216** Approved unpriced bill of quantity
 Document/message providing an approved detailed, quantity based specification (bill of quantity), in an unpriced form.
- 217** Payment valuation for unscheduled items
 A payment valuation for unscheduled items.
- 218** Final payment request based on completion of work
 The final payment request of a series of payment requests submitted upon completion of all the work.
- 219** Payment request for completed units
 A request for payment for completed units.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 220 | Order |
| | Document/message by means of which a buyer initiates a transaction with a seller involving the supply of goods or services as specified, according to conditions set out in an offer, or otherwise known to the buyer. |
| 221 | Blanket order |
| | Usage of document/message for general order purposes with later split into quantities and delivery dates and maybe delivery locations. |
| 222 | Spot order |
| | Document/message ordering the remainder of a production's batch. |
| 223 | Lease order |
| | Document/message for goods in leasing contracts. |
| 224 | Rush order |
| | Document/message for urgent ordering. |
| 225 | Repair order |
| | Document/message to order repair of goods. |
| 226 | Call off order |
| | Document/message to provide split quantities and delivery dates referring to a previous blanket order. |
| 227 | Consignment order |
| | Order to deliver goods into stock with agreement on payment when goods are sold out of this stock. |
| 228 | Sample order |
| | Document/message to order samples. |
| 229 | Swap order |
| | Document/message informing buyer or seller of the replacement of goods previously ordered. |
| 230 | Purchase order change request |
| | Change to an purchase order already sent. |
| 231 | Purchase order response |
| | Response to an purchase order already received. |
| 232 | Hire order |
| | Document/message for hiring human resources or renting goods or equipment. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 233 | Spare parts order
Document/message to order spare parts. |
| 234 | Campaign price/sales catalogue
A price/sales catalogue containing special prices which are valid only for a specified period or under specified conditions. |
| 235 | Container list
Document or message issued by party identifying the containers for which they are responsible. |
| 236 | Delivery forecast
A message which enables the transmission of delivery or product forecasting requirements. |
| 237 | Cross docking services order
A document or message to order cross docking services. |
| 238 | Non-pre-authorised direct debit(s)
The message contains non-pre-authorised direct debit(s). |
| 239 | Rejected direct debit(s)
The message contains rejected direct debit(s). |
| 240 | Delivery instructions
(1174) Document/message giving instruction regarding the delivery of goods. |
| 241 | Delivery schedule
Usage of DELFOR-message. |
| 242 | Delivery just-in-time
Usage of DELJIT-message. |
| 243 | Pre-authorised direct debit request(s)
The message contains pre-authorised direct debit request(s). |
| 244 | Non-pre-authorised direct debit request(s)
The message contains non-pre-authorised direct debit request(s). |
| 245 | Delivery release
Document/message issued by a buyer releasing the despatch of goods after receipt of the Ready for despatch advice from the seller. |
| 246 | Settlement of a letter of credit
Settlement of a letter of credit. |

| | |
|---|---|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 247 | Bank to bank funds transfer
The message is a bank to bank funds transfer. |
| 248 | Customer payment order(s)
The message contains customer payment order(s). |
| 249 | Low value payment order(s)
The message contains low value payment order(s) only. |
| 250 | Crew list declaration
Declaration regarding crew members aboard the conveyance. |
| 251 | Inquiry
This is a request for information. |
| 252 | Response to previous banking status message
A response to a previously sent banking status message. |
| 253 | Project master plan
A high level, all encompassing master plan to complete a project. |
| 254 | Project plan
A plan for project work to be completed. |
| 255 | Project schedule
A schedule of project activities to be completed. |
| 256 | Project planning available resources
Available resources for project planning purposes. |
| 257 | Project planning calendar
Work calendar information for project planning purposes. |
| 258 | Standing order
An order to supply fixed quantities of products at fixed regular intervals. |
| 259 | Cargo movement event log
A document detailing times and dates of events pertaining to a cargo movement. |
| 260 | Cargo analysis voyage report
An analysis of the cargo for a voyage. |
| 261 | Self billed credit note
A document which indicates that the customer is claiming credit in a self billing environment. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 262 | Consolidated credit note - goods and services
Credit note for goods and services that covers multiple transactions involving more than one invoice. |
| 263 | Inventory adjustment status report
A message detailing statuses related to the adjustment of inventory. |
| 264 | Transport equipment movement instruction
Instruction to perform one or more different movements of transport equipment. |
| 265 | Transport equipment movement report
Report on one or more different movements of transport equipment. |
| 266 | Transport equipment status change report
Report on one or more changes of status associated with an item or items of transport equipment. |
| 267 | Fumigation certificate
Certificate attesting that fumigation has been performed. |
| 268 | Wine certificate
Certificate attesting to the quality, origin or appellation of wine. |
| 269 | Wool health certificate
Certificate attesting that wool is free from specified risks to human or animal health. |
| 270 | Delivery note
Paper document attached to a consignment informing the receiving party about contents of this consignment. |
| 271 | Packing list
Document/message specifying the distribution of goods in individual packages (in trade environment the despatch advice message is used for the packing list). |
| 272 | New code request
Requesting a new code. |
| 273 | Code change request
Request a change to an existing code. |
| 274 | Simple data element request
Requesting a new simple data element. |
| 275 | Simple data element change request
Request a change to an existing simple data element. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 276 | Composite data element request
Requesting a new composite data element. |
| 277 | Composite data element change request
Request a change to an existing composite data element. |
| 278 | Segment request
Request a new segment. |
| 279 | Segment change request
Requesting a change to an existing segment. |
| 280 | New message request
Request for a new message (NMR). |
| 281 | Message in development request
Requesting a Message in Development (MiD). |
| 282 | Modification of existing message
Requesting a change to an existing message. |
| 283 | Tracking number assignment report
Report of assigned tracking numbers. |
| 284 | User directory definition
Document/message defining the contents of a user directory set or parts thereof. |
| 285 | United Nations standard message request
Requesting a United Nations Standard Message (UNSM). |
| 286 | Service directory definition
Document/message defining the contents of a service directory set or parts thereof. |
| 287 | Status report
Message covers information about the status. |
| 288 | Kanban schedule
Message to describe a Kanban schedule. |
| 289 | Product data message
A message to submit master data, a set of data that is rarely changed, to identify and describe products a supplier offers to their (potential) customer or buyer. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 290 | A claim for parts and/or labour charges
A claim for parts and/or labour charges incurred . |
| 291 | Delivery schedule response
A message providing a response to a previously transmitted delivery schedule. |
| 292 | Inspection request
A message requesting a party to inspect items. |
| 293 | Inspection report
A message informing a party of the results of an inspection. |
| 294 | Application acknowledgement and error report
A message used by an application to acknowledge reception of a message and/or to report any errors. |
| 295 | Price variation invoice
An invoice which requests payment for the difference in price between an original invoice and the result of the application of a price variation formula. |
| 296 | Credit note for price variation
A credit note which is issued against a price variation invoice. |
| 297 | Instruction to collect
A message instructing a party to collect goods. |
| 298 | Dangerous goods list
Listing of all details of dangerous goods carried. |
| 299 | Registration renewal
Code specifying the continued validity of previously submitted registration information. |
| 300 | Registration change
Code specifying the modification of previously submitted registration information. |
| 301 | Response to registration
Code specifying a response to an occurrence of a registration message. |
| 302 | Implementation guideline
A document specifying the criterion and format for exchanging information in an electronic data interchange syntax. |
| 303 | Request for transfer
Document/message is a request for transfer. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 304 | Cost performance report
A report to convey cost performance data for a project or contract. |
| 305 | Application error and acknowledgement
A message to inform a message issuer that a previously sent message has been received by the addressee's application, or that a previously sent message has been rejected by the addressee's application. |
| 306 | Cash pool financial statement
A financial statement for a cash pool. |
| 307 | Sequenced delivery schedule
Message to describe a sequence of product delivery. |
| 308 | Delcredere credit note
A credit note sent to the party paying on behalf of a number of buyers. |
| 309 | Healthcare discharge report, final
Final discharge report by healthcare provider. |
| 310 | Offer / quotation
(1332) Document/message which, with a view to concluding a contract, sets out
the conditions under which the goods are offered. |
| 311 | Request for quote
Document/message requesting a quote on specified goods or services. |
| 312 | Acknowledgement message
Message providing acknowledgement information at the business application level concerning the processing of a message. |
| 313 | Application error message
Message indicating that a message was rejected due to errors encountered at the application level. |
| 314 | Cargo movement voyage summary
A consolidated voyage summary which contains the information in a certificate
of analysis, a voyage analysis and a cargo movement time log for a voyage. |
| 315 | Contract
(1296) Document/message evidencing an agreement between the seller and the buyer for the supply of goods or services; its effects are equivalent to those of an order followed by an acknowledgement of order. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 316 | Application for usage of berth or mooring facilities
Document to apply for usage of berth or mooring facilities. |
| 317 | Application for designation of berthing places
Document to apply for designation of berthing places. |
| 318 | Application for shifting from the designated place in port
Document to apply for shifting from the designated place in port. |
| 319 | Supplementary document for application for cargo operation of dangerous goods
Supplementary document to apply for cargo operation of dangerous goods. |
| 320 | Acknowledgement of order
Document/message acknowledging an undertaking to fulfil an order and confirming conditions or acceptance of conditions. |
| 321 | Supplementary document for application for transport of dangerous goods
Supplementary document to apply for transport of dangerous goods. |
| 322 | Optical Character Reading (OCR) payment
Payment effected by an Optical Character Reading (OCR) document. |
| 323 | Preliminary sales report
Preliminary sales report sent before all the information is available. |
| 324 | Transport emergency card
Official document specifying, for a given dangerous goods item, information such as nature of hazard, protective devices, actions to be taken in case of accident, spillage or fire and first aid to be given. |
| 325 | Proforma invoice
Document/message serving as a preliminary invoice, containing - on the whole - the same information as the final invoice, but not actually claiming payment. |
| 326 | Partial invoice
Document/message specifying details of an incomplete invoice. |
| 327 | Operating instructions
Document/message describing instructions for operation. |
| 328 | Name/product plate
Plates on goods identifying and describing an article. |

| CL06 | Document name code (UN/EDIFACT 1001) |
|---|---|
| Code specifying the document name. | |
| 329 | Co-insurance ceding bordereau
The document or message contains a bordereau describing co-insurance ceding information. |
| 330 | Request for delivery instructions
Document/message issued by a supplier requesting instructions from the buyer regarding the details of the delivery of goods ordered. |
| 331 | Commercial invoice which includes a packing list
Commercial transaction (invoice) will include a packing list. |
| 332 | Trade data
Document/message is for trade data. |
| 333 | Customs declaration for cargo examination
Declaration provided to customs for cargo examination. |
| 334 | Customs declaration for cargo examination, alternate
Alternate declaration provided to customs for cargo examination. |
| 335 | Booking request
Document/message issued by a supplier to a carrier requesting space to be reserved for a specified consignment, indicating desirable conveyance, despatch time, etc. |
| 336 | Customs crew and conveyance
Document/message contains information regarding the crew list and conveyance. |
| 337 | Customs summary declaration with commercial detail, alternate
Alternate Customs declaration summary with commercial transaction details. |
| 338 | Items booked to a financial account report
A message reporting items which have been booked to a financial account. |
| 339 | Report of transactions which need further information from the receiver
A message reporting transactions which need further information from the receiver. |
| 340 | Shipping instructions
(1121) Document/message advising details of cargo and exporter's requirements for its physical movement. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 341 | Shipper's letter of instructions (air)

Document/message issued by a consignor in which he gives details of a consignment of goods that enables an airline or its agent to prepare an air waybill. |
| 342 | Report of transactions for information only

A message reporting transactions for information only. |
| 343 | Cartage order (local transport)

Document/message giving instructions regarding local transport of goods, e.g. from the premises of an enterprise to those of a carrier undertaking further transport. |
| 344 | EDI associated object administration message

A message giving additional information about the exchange of an EDI associated object. |
| 345 | Ready for despatch advice

Document/message issued by a supplier informing a buyer that goods ordered are ready for despatch. |
| 346 | Summary sales report

Sales report containing summaries for several earlier sent sales reports. |
| 347 | Order status enquiry

A message enquiring the status of previously sent orders. |
| 348 | Order status report

A message reporting the status of previously sent orders. |
| 349 | Declaration regarding the inward and outward movement of vessel

Document to declare inward and outward movement of a vessel. |
| 350 | Despatch order

Document/message issued by a supplier initiating the despatch of goods to a buyer (consignee). |
| 351 | Despatch advice

Document/message by means of which the seller or consignor informs the consignee about the despatch of goods. |
| 352 | Notification of usage of berth or mooring facilities

Document to notify usage of berth or mooring facilities. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 353 | Application for vessel's entering into port area in night-time
Document to apply for vessel's entering into port area in night-time. |
| 354 | Notification of emergency shifting from the designated place in port
Document to notify shifting from designated place in port once secured at the designated place. |
| 355 | Customs summary declaration without commercial detail, alternate
Alternate Customs declaration summary without any commercial transaction details. |
| 356 | Performance bond
A document that guarantees performance. |
| 357 | Payment bond
A document that guarantees the payment of monies. |
| 358 | Healthcare discharge report, preliminary
Preliminary discharge report by healthcare provider. |
| 359 | Request for provision of a health service
Document containing request for provision of a health service. |
| 360 | Request for price quote
Document/message requesting price conditions under which goods are offered. |
| 361 | Price quote
Document/message confirming price conditions under which goods are offered. |
| 362 | Delivery quote
Document/message confirming delivery conditions under which goods are offered. |
| 363 | Price and delivery quote
Document/message confirming price and delivery conditions under which goods are offered. |
| 364 | Contract price quote
Document/message confirming contractual price conditions under which goods are offered. |
| 365 | Contract price and delivery quote
Document/message confirming contractual price conditions and contractual delivery conditions under which goods are offered. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 366** Price quote, specified end-customer
 Document/message confirming price conditions under which goods are offered,
 provided that they are sold to the end-customer specified on the quote.
- 367** Price and delivery quote, specified end-customer
 Document/message confirming price conditions and delivery conditions under which goods are offered, provided that they are sold to the end-customer specified on the quote.
- 368** Price quote, ship and debit
 Document/message from a supplier to a distributor confirming price conditions under which goods can be sold by a distributor to the end-customer specified on
 the quote with compensation for loss of inventory value.
- 369** Price and delivery quote, ship and debit
 Document/message from a supplier to a distributor confirming price conditions and delivery conditions under which goods can be sold by a distributor to the end-customer specified on the quote with compensation for loss of inventory value.
- 370** Advice of distribution of documents
 Document/message in which the party responsible for the issue of a set of trade documents specifies the various recipients of originals and copies of these documents, with an indication of the number of copies distributed to each of them.
- 371** Plan for provision of health service
 Document containing a plan for provision of health service.
- 372** Prescription
 Instructions for the dispensing and use of medicine or remedy.
- 373** Prescription request
 Request to issue a prescription for medicine or remedy.
- 374** Prescription dispensing report
 Document containing information of products dispensed according to a prescription.
- 375** Certificate of shipment
 (1109) Certificate providing confirmation that a consignment has been shipped.

|---|--|
| Code specifying the document name. | |
| 376 | Standing inquiry on product information
A product inquiry which stands until it is cancelled. |
| 377 | Party credit information
Document/message providing data concerning the credit information of a party. |
| 378 | Party payment behaviour information
Document/message providing data concerning the payment behaviour of a party. |
| 379 | Request for metering point information
Message to request information about a metering point. |
| 380 | Commercial invoice
(1334) Document/message claiming payment for goods or services supplied under conditions agreed between seller and buyer. |
| 381 | Credit note
(1113) Document/message for providing credit information to the relevant party. |
| 382 | Commission note
(1111) Document/message in which a seller specifies the amount of commission, the percentage of the invoice amount, or some other basis for the calculation of the commission to which a sales agent is entitled. |
| 383 | Debit note
Document/message for providing debit information to the relevant party. |
| 384 | Corrected invoice
Commercial invoice that includes revised information differing from an earlier submission of the same invoice. |
| 385 | Consolidated invoice
Commercial invoice that covers multiple transactions involving more than one vendor. |
| 386 | Prepayment invoice
An invoice to pay amounts for goods and services in advance; these amounts will be subtracted from the final invoice. |
| 387 | Hire invoice
Document/message for invoicing the hiring of human resources or renting goods or equipment. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 388 | Tax invoice
An invoice for tax purposes. |
| 389 | Self-billed invoice
An invoice the invoicee is producing instead of the seller. |
| 390 | Delcredere invoice
An invoice sent to the party paying for a number of buyers. |
| 391 | Metering point information response
Response to a request for information about a metering point. |
| 392 | Notification of change of supplier
A notification of a change of supplier. |
| 393 | Factored invoice
Invoice assigned to a third party for collection. |
| 394 | Lease invoice
Usage of INVOIC-message for goods in leasing contracts. |
| 395 | Consignment invoice
Commercial invoice that covers a transaction other than one involving a sale. |
| 396 | Factored credit note
Credit note related to assigned invoice(s). |
| 397 | Commercial account summary response
A document providing a response to a previously sent commercial account summary message. |
| 398 | Cross docking despatch advice
Document by means of which the supplier or consignor informs the buyer, consignee or the distribution centre about the despatch of goods for cross docking. |
| 399 | Transshipment despatch advice
Document by means of which the supplier or consignor informs the buyer, consignee or the distribution centre about the despatch of goods for transshipment. |
| 400 | Exceptional order
An order which falls outside the framework of an agreement. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 401** Pre-packed cross docking order
An order requesting the supply of products packed according to the final delivery point which will be moved across a dock in a distribution centre without further handling.
- 402** Intermediate handling cross docking order
An order requesting the supply of products which will be moved across a dock, de-consolidated and re-consolidated according to the final delivery location requirements.
- 403** Means of transportation availability information
Information giving the various availabilities of a means of transportation.
- 404** Means of transportation schedule information
Information giving the various schedules of a means of transportation.
- 405** Transport equipment delivery notice
Notification regarding the delivery of transport equipment.
- 406** Notification to supplier of contract termination
Notification to the supplier regarding the termination of a contract.
- 407** Notification to supplier of metering point changes
Notification to the supplier about changes regarding a metering point.
- 408** Notification of meter change
Notification about the change of a meter.
- 409** Instructions for bank transfer
Document/message containing instructions from a customer to his bank to pay an amount in a specified currency to a nominated party in another country by a method either specified (e.g. teletransmission, air mail) or left to the discretion of the bank.
- 410** Notification of metering point identification change
Notification of the change of metering point identification.
- 411** Utilities time series message
The Utilities time series message is sent between responsible parties in a utilities infrastructure for the purpose of reporting time series and connected technical and/or administrative information.
-

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 412** Application for banker's draft
Application by a customer to his bank to issue a banker's draft stating the amount and currency of the draft, the name of the payee and the place and country of payment.
- 413** Infrastructure condition
Information about components in an infrastructure.
- 414** Acknowledgement of change of supplier
Acknowledgement of the change of supplier.
- 415** Data Plot Sheet
Document/Message providing technical description and information of the crop production.
- 416** Soil analysis
Soil analysis document.
- 417** Farmyard manure analysis
Farmyard manure analysis document.
- 418** WCO Cargo Report Export, Rail or Road
Declaration, in accordance with the WCO Customs Data Model, to Customs concerning the export of cargo carried by commercial means of transport over land, e.g. truck or train.
- 419** WCO Cargo Report Export, Air or Maritime
Declaration, in accordance with the WCO Customs Data Model, to Customs concerning the export of cargo carried by commercial means of transport over water or through the air, e.g. vessel or aircraft.
- 420** Optical Character Reading (OCR) payment credit note
Payment credit note effected by an Optical Character Reading (OCR) document.
- 421** WCO Cargo Report Import, Rail or Road
Declaration, in accordance with the WCO Customs Data Model, to Customs concerning the import of cargo carried by commercial means of transport over land, e.g. truck or train.
-

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 422 | WCO Cargo Report Import, Air or Maritime
Declaration, in accordance with the WCO Customs Data Model, to Customs concerning the import of cargo carried by commercial means of transport over water or through the air, e.g. vessel or aircraft. |
| 423 | WCO one-step export declaration
Single step declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for a Customs export procedure based on the 1999 Kyoto Convention. |
| 424 | WCO first step of two-step export declaration
First part of a simplified declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for Customs export procedure based on the 1999 Kyoto Convention. |
| 425 | Collection payment advice
Document/message whereby a bank advises that a collection has been paid, giving details and methods of funds disposal. |
| 426 | Documentary credit payment advice
Document/message whereby a bank advises payment under a documentary credit. |
| 427 | Documentary credit acceptance advice
Document/message whereby a bank advises acceptance under a documentary credit. |
| 428 | Documentary credit negotiation advice
Document/message whereby a bank advises negotiation under a documentary credit. |
| 429 | Application for banker's guarantee
Document/message whereby a customer requests his bank to issue a guarantee in favour of a nominated party in another country, stating the amount and currency and the specific conditions of the guarantee. |
| 430 | Banker's guarantee
Document/message in which a bank undertakes to pay out a limited amount of money to a designated party, on conditions stated therein (other than those laid down in the Uniform Customs Practice). |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 431** Documentary credit letter of indemnity
Document/message in which a beneficiary of a documentary credit accepts responsibility for non-compliance with the terms and conditions of the credit, and undertakes to refund the money received under the credit, with interest and charges accrued.
- 432** Notification to grid operator of contract termination
Notification to the grid operator regarding the termination of a contract.
- 433** Notification to grid operator of metering point changes
Notification to the grid operator about changes regarding a metering point.
- 434** Notification of balance responsible entity change
Notification of a change of balance responsible entity.
- 435** Preadvice of a credit
Preadvice indicating a credit to happen in the future.
- 436** Transport equipment profile report
Report on the profile of transport equipment.
- 437** Request for price and delivery quote, specified end-user
Document/message requesting price conditions and delivery conditions under which goods are offered, provided that they are sold to the end-customer specified on the request for quote.
- 438** Request for price quote, ship and debit
Document/message from a distributor to a supplier requesting price conditions under which goods can be sold by the distributor to the end-customer specified on the request for quote with compensation for loss of inventory value.
- 439** Request for price and delivery quote, ship and debit
Document/message from a distributor to a supplier requesting price conditions and delivery conditions under which goods can be sold by the distributor to the end-customer specified on the request for quote with compensation for loss of inventory value.
- 440** Delivery point list.
A list of delivery point addresses.
- 441** Transport routing information
Document specifying the routes for transport between locations.
-

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 442** Request for delivery quote
Document/message requesting delivery conditions under which goods are offered.
- 443** Request for price and delivery quote
Document/message requesting price and delivery conditions under which goods are offered.
- 444** Request for contract price quote
Document/message requesting contractual price conditions under which goods are offered.
- 445** Request for contract price and delivery quote
Document/message requesting contractual price conditions and contractual delivery conditions under which goods are offered.
- 446** Request for price quote, specified end-customer
Document/message requesting price conditions under which goods are offered, provided that they are sold to the end-customer specified on the request for quote.
- 447** Collection order
Document/message whereby a bank is instructed (or requested) to handle financial and/or commercial documents in order to obtain acceptance and/or payment, or to deliver documents on such other terms and conditions as may be specified.
- 448** Documents presentation form
Document/message whereby a draft or similar instrument and/or commercial documents are presented to a bank for acceptance, discounting, negotiation, payment or collection, whether or not against a documentary credit.
- 449** Identification match
Message related to conducting a search for an identification match.
- 450** Payment order
Document/message containing information needed to initiate the payment. It may cover the financial settlement for one or more commercial trade transactions. A payment order is an instruction to the ordered bank to arrange for the payment of one specified amount to the beneficiary.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 451 | Extended payment order

Document/message containing information needed to initiate the payment. It may cover the financial settlement for several commercial trade transactions, which it is possible to specify in a special payments detail part. It is an instruction to the ordered bank to arrange for the payment of one specified amount to the beneficiary. |
| 452 | Multiple payment order

Document/message containing a payment order to debit one or more accounts and to credit one or more beneficiaries. |
| 453 | Notice that circumstances prevent payment of delivered goods

Message used to inform a supplier that delivered goods cannot be paid due to circumstances which prevent payment. |
| 454 | Credit advice

Document/message sent by an account servicing institution to one of its account owners, to inform the account owner of an entry which has been or will be credited to its account for a specified amount on the date indicated. |
| 455 | Extended credit advice

Document/message sent by an account servicing institution to one of its account owners, to inform the account owner of an entry that has been or will be credited to its account for a specified amount on the date indicated. It provides extended commercial information concerning the relevant remittance advice. |
| 456 | Debit advice

Advice on a debit. |
| 457 | Reversal of debit

Reversal of debit accounting entry by bank. |
| 458 | Reversal of credit

Reversal of credit accounting entry by bank. |
| 459 | Travel ticket

The document is a ticket giving access to a travel service. |
| 460 | Documentary credit application

Document/message whereby a bank is requested to issue a documentary credit on the conditions specified therein. |

| CL06 | Document name code (UN/EDIFACT 1001) |
|---|---|
| Code specifying the document name. | |
| 461 | Payment card
The document is a credit, guarantee or charge card. |
| 462 | Ready for transshipment despatch advice
Document to advise that the goods ordered are ready for transshipment. |
| 463 | Pre-packed cross docking despatch advice
Document by means of which the supplier or consignor informs the buyer, consignee or distribution centre about the despatch of products packed according to the final delivery point requirements which will be moved across a dock in a distribution centre without further handling. |
| 464 | Intermediate handling cross docking despatch advice
Document by means of which the supplier or consignor informs the buyer, consignee or the distribution centre about the despatch of products which will be moved across a dock, de-consolidated and re-consolidated according to final delivery location requirements. |
| 465 | Documentary credit
Document/message in which a bank states that it has issued a documentary credit under which the beneficiary is to obtain payment, acceptance or negotiation on compliance with certain terms and conditions and against presentation of stipulated documents and such drafts as may be specified. The credit may or may not be confirmed by another bank. |
| 466 | Documentary credit notification
Document/message issued by an advising bank in order to transmit a documentary credit to a beneficiary, or to another advising bank. |
| 467 | Documentary credit transfer advice
Document/message whereby a bank advises that (part of) a documentary credit is being or has been transferred in favour of a second beneficiary. |
| 468 | Documentary credit amendment notification
Document/message whereby a bank advises that the terms and conditions of a documentary credit have been amended. |
| 469 | Documentary credit amendment
Document/message whereby a bank notifies a beneficiary of the details of an amendment to the terms and conditions of a documentary credit. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 470 | Waste disposal report
Document/message sent by a shipping agent to an authority for reporting information on waste disposal. |
| 481 | Remittance advice
Document/message advising of the remittance of payment. |
| 482 | Port authority waste disposal report
Document/message sent by a port authority to another port authority for reporting information on waste disposal. |
| 483 | Visa
An endorsement on a passport or any other recognised travel document indicating that it has been examined and found correct, especially as permitting the holder to enter or leave a country. |
| 484 | Multiple direct debit request
Document/message containing a direct debit request to credit one or more accounts and to debit one or more debtors. |
| 485 | Banker's draft
Draft drawn in favour of a third party either by one bank on another bank, or by a branch of a bank on its head office (or vice versa) or upon another branch of the same bank. In either case, the draft should comply with the specifications laid down for cheques in the country in which it is to be payable. |
| 486 | Multiple direct debit
Document/message containing a direct debit to credit one or more accounts and to debit one or more debtors. |
| 487 | Certificate of disembarkation permission
Document or message issuing permission to disembark. |
| 488 | Deratting exemption certificate
Document certifying that the object was free of rats when inspected and that it is exempt from a deratting statement. |
| 489 | Reefer connection order
Order to connect a reefer container to a reefer point. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 490 | Bill of exchange
Document/message, issued and signed in conformity with the applicable legislation, which contains an unconditional order whereby the drawer directs the drawee to pay a definite sum of money to the payee or to his order, on demand or at a definite time, against the surrender of the document itself. |
| 491 | Promissory note
Document/message, issued and signed in conformity with the applicable legislation, which contains an unconditional promise whereby the maker undertakes to pay a definite sum of money to the payee or to his order, on demand or at a definite time, against the surrender of the document itself. |
| 493 | Statement of account message
Usage of STATACT-message. |
| 494 | Direct delivery (transport)
Document/message ordering the direct delivery of goods/consignment from one means of transport into another means of transport in one movement. |
| 495 | WCO second step of two-step export declaration
Second part of a simplified declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for Customs export procedure based on the 1999 Kyoto Convention. |
| 496 | WCO one-step import declaration
Single step declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for Customs import procedure based on the 1999 Kyoto Convention. |
| 497 | WCO first step of two-step import declaration
First part of a simplified declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for Customs import procedure based on the 1999 Kyoto Convention. |
| 498 | WCO second step of two-step import declaration
Second part of a simplified declaration, in accordance with the WCO Customs Data Model, to Customs by which goods are declared for Customs import procedure based on the 1999 Kyoto Convention. |
| 499 | Previous transport document
Identification of the previous transport document. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 520** Insurance certificate
 Document/message issued to the insured certifying that insurance has been effected and that a policy has been issued. Such a certificate for a particular cargo is primarily used when good are insured under the terms of a floating or an open policy; at the request of the insured it can be exchanged for a policy.
- 521** Special requirements permit related to the transport of cargo
 A permit related to a transport document granting the transport of cargo under the conditions as specifically required.
- 522** Dangerous Goods Notification for Tanker vessel
 Dangerous Goods Notification for a vessel carrying liquid cargo in bulk.
- 523** Dangerous Goods Notification for non-tanker vessel
 Dangerous Goods Notification for a vessel carrying cargo other than bulk liquid cargo.
- 524** WCO Conveyance Arrival Report
 Declaration, in accordance with the WCO Customs Data Model, to Customs regarding the conveyance arriving in a Customs territory.
- 525** WCO Conveyance Departure Report
 Declaration, in accordance with the WCO Customs Data Model, to Customs regarding the conveyance departing a Customs territory.
- 526** Accounting voucher
 A document/message justifying an accounting entry.
- 527** Self billed debit note
 A document which indicates that the customer is claiming debit in a self billing environment.
- 528** Military Identification Card
 The official document used for military personnel on travel orders, substituting a passport.
- 529** Re-Entry Permit
 A permit to re-enter a country.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 530 | Insurance policy
Document/message issued by the insurer evidencing an agreement to insure and containing the conditions of the agreement concluded whereby the insurer undertakes for a specific fee to indemnify the insured for the losses arising out of the perils and accidents specified in the contract. |
| 531 | Refugee Permit
Document identifying a refugee recognized by a country. |
| 550 | Insurance declaration sheet (bordereau)
A document/message used when an insured reports to his insurer details of individual shipments which are covered by an insurance contract - an open cover or a floating policy - between the parties. |
| 575 | Insurer's invoice
Document/message issued by an insurer specifying the cost of an insurance which has been effected and claiming payment therefore. |
| 580 | Cover note
Document/message issued by an insurer (insurance broker, agent, etc.) to notify the insured that his insurance have been carried out. |
| 610 | Forwarding instructions
Document/message issued to a freight forwarder, giving instructions regarding the action to be taken by the forwarder for the forwarding of goods described therein. |
| 621 | Forwarder's advice to import agent
Document/message issued by a freight forwarder in an exporting country advising his counterpart in an importing country about the forwarding of goods described therein. |
| 622 | Forwarder's advice to exporter
Document/message issued by a freight forwarder informing an exporter of the action taken in fulfillment of instructions received. |
| 623 | Forwarder's invoice
Invoice issued by a freight forwarder specifying services rendered and costs incurred and claiming payment therefore. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 624 | Forwarder's certificate of receipt

Non-negotiable document issued by a forwarder to certify that he has assumed control of a specified consignment, with irrevocable instructions to send it to the consignee indicated in the document or to hold it at his disposal. E.g. FIATA-FCR. |
| 630 | Shipping note

(1123) Document/message provided by the shipper or his agent to the carrier, multimodal transport operator, terminal or other receiving authority, giving information about export consignments offered for transport, and providing for the necessary receipts and declarations of liability. Sometimes a multipurpose cargo handling document also fulfilling the functions of document 632, 633, 650 and 655. |
| 631 | Forwarder's warehouse receipt

Document/message issued by a forwarder acting as Warehouse Keeper acknowledging receipt of goods placed in a warehouse, and stating or referring to the conditions which govern the warehousing and the release of goods. The document contains detailed provisions regarding the rights of holders-by-endorsement, transfer of ownership, etc. E.g. FIATA-FWR. |
| 632 | Goods receipt

Document/message to acknowledge the receipt of goods and in addition may indicate receiving conditions. |
| 633 | Port charges documents

Documents/messages specifying services rendered, storage and handling costs, demurrage and other charges due to the owner of goods described therein. |
| 635 | Warehouse warrant

Negotiable receipt document, issued by a Warehouse Keeper to a person placing goods in a warehouse and conferring title to the goods stored. |
| 640 | Delivery order

Document/message issued by a party entitled to authorize the release of goods specified therein to a named consignee, to be retained by the custodian of the goods. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 650 | Handling order
Document/message issued by a cargo handling organization (port administration, terminal operator, etc.) for the removal or other handling of goods under their care. |
| 655 | Gate pass
Document/message authorizing goods specified therein to be brought out of a fenced-in port or terminal area. |
| 700 | Waybill
Non-negotiable document evidencing the contract for the transport of cargo. |
| 701 | Universal (multipurpose) transport document
Document/message evidencing a contract of carriage covering the movement of goods by any mode of transport, or combination of modes, for national as well as international transport, under any applicable international convention or national law and under the conditions of carriage of any carrier or transport operator undertaking or arranging the transport referred to in the document. |
| 702 | Goods receipt, carriage
Document/message issued by a carrier or a carrier's agent, acknowledging receipt for carriage of goods specified therein on conditions stated or referred to in the document, enabling the carrier to issue a transport document. |
| 703 | House waybill
The document made out by an agent/consolidator which evidences the contract between the shipper and the agent/consolidator for the arrangement of carriage of goods. |
| 704 | Master bill of lading
A bill of lading issued by the master of a vessel (in actuality the owner or charterer of the vessel). It could cover a number of house bills. |
| 705 | Bill of lading
Negotiable document/message which evidences a contract of carriage by sea and the taking over or loading of goods by carrier, and by which carrier undertakes to deliver goods against surrender of the document. A provision in the document that goods are to be delivered to the order of a named person, or to order, or to bearer, constitutes such an undertaking. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 706 | Bill of lading original

The original of the bill of lading issued by a transport company. When issued by

the maritime industry it could signify ownership of the cargo. |
| 707 | Bill of lading copy

A copy of the bill of lading issued by a transport company. |
| 708 | Empty container bill

Bill of lading indicating an empty container. |
| 709 | Tanker bill of lading

Document which evidences a transport of liquid bulk cargo. |
| 710 | Sea waybill

Non-negotiable document which evidences a contract for the carriage of goods by sea and the taking over of the goods by the carrier, and by which the carrier undertakes to deliver the goods to the consignee named in the document. |
| 711 | Inland waterway bill of lading

Negotiable transport document made out to a named person, to order or to bearer, signed by the carrier and handed to the sender after receipt of the goods. |
| 712 | Non-negotiable maritime transport document (generic)

Non-negotiable document which evidences a contract for the carriage of goods by sea and the taking over or loading of the goods by the carrier, and by which the carrier undertakes to deliver the goods to the consignee named in the document. E.g. Sea waybill. Remark: Synonymous with "straight" or "non-negotiable Bill of lading" used in certain countries, e.g. Canada. |
| 713 | Mate's receipt

Document/message issued by a ship's officer to acknowledge that a specified consignment has been received on board a vessel, and the apparent condition of the goods; enabling the carrier to issue a Bill of lading. |
| 714 | House bill of lading

The bill of lading issued not by the carrier but by the freight forwarder/consolidator known by the carrier. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 715 | Letter of indemnity for non-surrender of bill of lading
Document/message issued by a commercial party or a bank of an insurance company accepting responsibility to the beneficiary of the indemnity in accordance with the terms thereof. |
| 716 | Forwarder's bill of lading
Non-negotiable document issued by a freight forwarder evidencing a contract for the carriage of goods by sea and the taking over or loading of the goods by the freight forwarder, and by which the freight forwarder undertakes to deliver the goods to the consignee named in the document. |
| 720 | Rail consignment note (generic term)
Transport document constituting a contract for the carriage of goods between the sender and the carrier (the railway). For international rail traffic, this document must conform to the model prescribed by the international conventions concerning carriage of goods by rail, e.g. CIM Convention, SMGS Convention. |
| 722 | Road list-SMGS
Accounting document, one copy of which is drawn up for each consignment note; it accompanies the consignment over the whole route and is a rail transport document. |
| 723 | Escort official recognition
Document/message which gives right to the owner to exert all functions normally transferred to a guard in a train by which an escorted consignment is transported. |
| 724 | Recharging document
Fictitious transport document regarding a previous transport, enabling a carrier's agent to give to another carrier's agent (in a different country) the possibility to collect charges relating to the original transport (rail environment). |
| 730 | Road consignment note
Transport document/message which evidences a contract between a carrier and a sender for the carriage of goods by road (generic term). Remark: For international road traffic, this document must contain at least the particulars prescribed by the convention on the contract for the international carriage of goods by road (CMR). |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.****740** Air waybill

Document/message made out by or on behalf of the shipper which evidences the contract between the shipper and carrier(s) for carriage of goods over routes of the carrier(s) and which is identified by the airline prefix issuing the document plus a serial (IATA).

741 Master air waybill

Document/message made out by or on behalf of the agent/consolidator which evidences the contract between the agent/consolidator and carrier(s) for carriage of goods over routes of the carrier(s) for a consignment consisting of goods originated by more than one shipper (IATA).

743 Substitute air waybill

A temporary air waybill which contains only limited information because of the absence of the original.

744 Crew's effects declaration

Declaration to Customs regarding the personal effects of crew members aboard the conveyance; equivalent to IMO FAL 4.

745 Passenger list

Declaration to Customs regarding passengers aboard the conveyance; equivalent to IMO FAL 6.

746 Delivery notice (rail transport)

Document/message created by the consignor or by the departure station, joined to the transport or sent to the consignee, giving the possibility to the consignee or the arrival station to attest the delivery of the goods. The document must be returned to the consignor or to the departure station.

750 Despatch note (post parcels)

Document/message which, according to Article 106 of the "Agreement concerning Postal Parcels" under the UPU convention, is to accompany post parcels.

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 760** Multimodal/combined transport document (generic)
 A transport document used when more than one mode of transportation is involved in the movement of cargo. It is a contract of carriage and receipt of the cargo for a multimodal transport. It indicates the place where the responsible transport company in the move takes responsibility for the cargo, the place where the responsibility of this transport company in the move ends and the conveyances involved.
- 761** Through bill of lading
 Bill of lading which evidences a contract of carriage from one place to another in separate stages of which at least one stage is a sea transit, and by which the issuing carrier accepts responsibility for the carriage as set forth in the through bill of lading.
- 763** Forwarder's certificate of transport
 Negotiable document/message issued by a forwarder to certify that he has taken charge of a specified consignment for despatch and delivery in accordance with the consignor's instructions, as indicated in the document, and that he accepts responsibility for delivery of the goods to the holder of the document through the intermediary of a delivery agent of his choice. E.g. FIATA-FCT.
- 764** Combined transport document (generic)
 Negotiable or non-negotiable document evidencing a contract for the performance and/or procurement of performance of combined transport of goods and bearing on its face either the heading "Negotiable combined transport document issued subject to Uniform Rules for a Combined Transport Document (ICC Brochure No. 298)" or the heading "Non-negotiable Combined Transport Document issued subject to Uniform Rules for a Combined Transport Document (ICC Brochure No. 298)".

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 765 | Multimodal transport document (generic)

Document/message which evidences a multimodal transport contract, the taking
in charge of the goods by the multimodal transport operator, and an undertaking
by him to deliver the goods in accordance with the terms of the contract.
(International Convention on Multimodal Transport of Goods). |
| 766 | Combined transport bill of lading/multimodal bill of lading

Document which evidences a multimodal transport contract, the taking in
charge of the goods by the multimodal transport operator, and an undertaking
by him to deliver the goods in accordance with the terms of the contract. |
| 770 | Booking confirmation

Document/message issued by a carrier to confirm that space has been
reserved for a consignment in means of transport. |
| 775 | Calling forward notice

Instructions for release or delivery of goods. |
| 780 | Freight invoice

Document/message issued by a transport operation specifying freight costs and
charges incurred for a transport operation and stating conditions of payment. |
| 781 | Arrival notice (goods)

Notification from the carrier to the consignee in writing, by telephone or by
any
other means (express letter, message, telegram, etc.) informing him that a
consignment addressed to him is being or will shortly be held at his disposal at
a
specified point in the place of destination. |
| 782 | Notice of circumstances preventing delivery (goods)

Request made by the carrier to the sender, or, as the case may be, the
consignee, for instructions as to the disposal of the consignment when
circumstances prevent delivery and the return of the goods has not been
requested by the consignor in the transport document. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 783 | Notice of circumstances preventing transport (goods)
Request made by the carrier to the sender, or, the consignee as the case may be, for instructions as to the disposal of the goods when circumstances prevent transport before departure or en route, after acceptance of the consignment concerned. |
| 784 | Delivery notice (goods)
Notification in writing, sent by the carrier to the sender, to inform him at his request of the actual date of delivery of the goods. |
| 785 | Cargo manifest
Listing of goods comprising the cargo carried in a means of transport or in a transport-unit. The cargo manifest gives the commercial particulars of the goods, such as transport document numbers, consignors, consignees, shipping marks, number and kind of packages and descriptions and quantities of the goods. |
| 786 | Freight manifest
Document/message containing the same information as a cargo manifest, and additional details on freight amounts, charges, etc. |
| 787 | Bordereau
Document/message used in road transport, listing the cargo carried on a road vehicle, often referring to appended copies of Road consignment note. |
| 788 | Container manifest (unit packing list)
Document/message specifying the contents of particular freight containers or other transport units, prepared by the party responsible for their loading into the container or unit. |
| 789 | Charges note
Document used by the rail organization to indicate freight charges or additional charges in each case where the departure station is not able to calculate the charges for the total voyage (e.g. tariff not yet updated, part of voyage not covered by the tariff). This document must be considered as joined to the transport. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 790 | Advice of collection

(1030) Document that is joined to the transport or sent by separate means, giving to the departure rail organization the proof that the cash-on delivery amount has been encashed by the arrival rail organization before reimbursement of the consignor. |
| 791 | Safety of ship certificate

Document certifying a ship's safety to a specified date. |
| 792 | Safety of radio certificate

Document certifying the safety of a ship's radio facilities to a specified date. |
| 793 | Safety of equipment certificate

Document certifying the safety of a ship's equipment to a specified date. |
| 794 | Civil liability for oil certificate

Document declaring a ship owner's liability for oil propelling or carried on a vessel. |
| 795 | Loadline document

Document specifying the limit of a ship's legal submersion under various conditions. |
| 796 | Derat document

Document certifying that a ship is free of rats, valid to a specified date. |
| 797 | Maritime declaration of health

Document certifying the health condition on board a vessel, valid to a specified date. |
| 798 | Certificate of registry

Official certificate stating the vessel's registry. |
| 799 | Ship's stores declaration

Declaration to Customs regarding the contents of the ship's stores (equivalent to IMO FAL 3) i.e. goods intended for consumption by passengers/crew on board vessels, aircraft or trains, whether or not sold or landed; goods necessary for operation/maintenance of conveyance, including fuel/lubricants, excluding spare parts/equipment (IMO). |

| CL06 | Document name code (UN/EDIFACT 1001) |
|---|---|
| Code specifying the document name. | |
| 810 | Export licence, application for
Application for a permit issued by a government authority permitting
exportation
of a specified commodity subject to specified conditions as quantity, country
of
destination, etc. |
| 811 | Export licence
Permit issued by a government authority permitting exportation of a specified
commodity subject to specified conditions as quantity, country of destination,
etc. Synonym: Embargo permit. |
| 812 | Exchange control declaration, export
Document/message completed by an exporter/seller as a means whereby the
competent body may control that the amount of foreign exchange accrued from
a trade transaction is repatriated in accordance with the conditions of payment
and exchange control regulations in force. |
| 820 | Despatch note model T
European community transit declaration. |
| 821 | Despatch note model T1
Transit declaration for goods circulating under internal community transit
procedures (between European Union (EU) countries). |
| 822 | Despatch note model T2
Ascertainment that the declared goods were originally produced in an
European
Union (EU) country. |
| 823 | Control document T5
Control document (export declaration) used particularly in case of re-sending
without use with only VAT collection, refusal, un conformity with contract etc. |
| 824 | Re-sending consignment note
Rail consignment note prepared by the consignor for the facilitation of an
eventual return to the origin of the goods. |
| 825 | Despatch note model T2L
Ascertainment that the declared goods were originally produced in an
European
Union (EU) country. May only be used for goods that are loaded on one single
means of transport in one single departure point for one single delivery point. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 830 | Goods declaration for exportation

Document/message by which goods are declared for export Customs clearance, conforming to the layout key set out at Appendix I to Annex C.1 concerning outright exportation to the Kyoto convention (CCC). Within a Customs union, "for despatch" may have the same meaning as "for exportation". |
| 833 | Cargo declaration (departure)

Generic term, sometimes referred to as Freight declaration, applied to the documents providing the particulars required by the Customs concerning the cargo (freight) carried by commercial means of transport (CCC). |
| 840 | Application for goods control certificate

Document/message submitted to a competent body by party requesting a Goods control certificate to be issued in accordance with national or international standards, or conforming to legislation in the importing country, or

as specified in the contract. |
| 841 | Goods control certificate

Document/message issued by a competent body evidencing the quality of the goods described therein, in accordance with national or international standards, or conforming to legislation in the importing country, or as specified in the contract. |
| 850 | Application for phytosanitary certificate

Document/message submitted to a competent body by party requesting a Phytosanitary certificate to be issued. |
| 851 | Phytosanitary certificate

Document/message issued by the competent body in the exporting country evidencing that plants, fruit, or vegetables are free from disease and fit for consumption and giving details on fumigation or other treatment to which they may have been subjected. |
| 852 | Sanitary certificate

Document/message issued by the competent authority in the exporting country evidencing that alimentary and animal products, including dead animals, are fit for human consumption, and giving details, when relevant, of controls undertaken. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 853 | Veterinary certificate

Document/message issued by the competent authority in the exporting country evidencing that live animals or birds are not infested or infected with disease, and giving details regarding their provenance, and of vaccinations and other treatment to which they have been subjected. |
| 855 | Application for inspection certificate

Document/message submitted to a competent body by a party requesting an Inspection certificate to be issued in accordance with national or international standards, or conforming to legislation in the country in which it is required, or as specified in the contract. |
| 856 | Inspection certificate

Document/message issued by a competent body evidencing that the goods described therein have been inspected in accordance with national or international standards, in conformity with legislation in the country in which the inspection is required, or as specified in the contract. |
| 860 | Certificate of origin, application for

Document/message submitted to a competent body by an interested party requesting a Certificate of origin to be issued in accordance with relevant criteria, and on the basis of evidence of the origin of the goods. |
| 861 | Certificate of origin

Document/message identifying goods, in which the authority or body authorized to issue it certifies expressly that the goods to which the certificate relates originate in a specific country. The word "country" may include a group of countries, a region or a part of a country. This certificate may also include a declaration by the manufacturer, producer, supplier, exporter or other competent person. |
| 862 | Declaration of origin

Appropriate statement as to the origin of the goods, made in connection with their exportation by the manufacturer, producer, supplier, exporter or other competent person on the Commercial invoice or any other document relating to the goods (CCC). |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 863 | Regional appellation certificate

Certificate drawn up in accordance with the rules laid down by an authority or approved body, certifying that the goods described therein qualify for a designation specific to the given region (e.g. champagne, port wine, Parmesan cheese). |
| 864 | Preference certificate of origin

Document/message describing a certificate of origin meeting the requirements for preferential treatment. |
| 865 | Certificate of origin form GSP

Specific form of certificate of origin for goods qualifying for preferential treatment under the generalized system of preferences (includes a combined declaration of origin and certificate, form A). |
| 870 | Consular invoice

Document/message to be prepared by an exporter in his country and presented to a diplomatic representation of the importing country for endorsement and subsequently to be presented by the importer in connection with the import of the goods described therein. |
| 890 | Dangerous goods declaration

(1115) Document/message issued by a consignor in accordance with applicable conventions or regulations, describing hazardous goods or materials for transport purposes, and stating that the latter have been packed and labelled in accordance with the provisions of the relevant conventions or regulations. |
| 895 | Statistical document, export

Document/message in which an exporter provides information about exported goods required by the body responsible for the collection of international trade statistics. |
| 896 | INTRASTAT declaration

Document/message in which a declarant provides information about goods required by the body responsible for the collection of trade statistics. |
| 901 | Delivery verification certificate

Document/message whereby an official authority (Customs or governmental) certifies that goods have been delivered. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 910 | Import licence, application for
Document/message in which an interested party applies to the competent body
for authorization to import either a limited quantity of articles subject to import
restrictions, or an unlimited quantity of such articles during a limited period,
and
specifies the kind of articles, their origin and value, etc. |
| 911 | Import licence
Document/message issued by the competent body in accordance with import
regulations in force, by which authorization is granted to a named party to
import
either a limited quantity of designated articles or an unlimited quantity of such
articles during a limited period, under conditions specified in the document. |
| 913 | Customs declaration without commercial detail
CUSDEC transmission that does not include data from the commercial detail
section of the message. |
| 914 | Customs declaration with commercial and item detail
CUSDEC transmission that includes data from both the commercial detail and
item detail sections of the message. |
| 915 | Customs declaration without item detail
CUSDEC transmission that does not include data from the item detail section
of
the message. |
| 916 | Related document
Document that has a relationship with the stated document/message. |
| 917 | Receipt (Customs)
Receipt for Customs duty/tax/fee paid. |
| 925 | Application for exchange allocation
Document/message whereby an importer/buyer requests the competent body to
allocate an amount of foreign exchange to be transferred to an exporter/seller
in
payment for goods. |
| 926 | Foreign exchange permit
Document/message issued by the competent body authorizing an importer/
buyer to transfer an amount of foreign exchange to an exporter/seller in
payment for goods. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

- 927** Exchange control declaration (import)
 Document/message completed by an importer/buyer as a means for the competent body to control that a trade transaction for which foreign exchange has been allocated has been executed and that money has been transferred in accordance with the conditions of payment and the exchange control regulations in force.
- 929** Goods declaration for importation
 Document/message by which goods are declared for import Customs clearance [sister entry of 830].
- 930** Goods declaration for home use
 Document/message by which goods are declared for import Customs clearance according to Annex B.1 (concerning clearance for home use) to the Kyoto convention (CCC).
- 931** Customs immediate release declaration
 Document/message issued by an importer notifying Customs that goods have been removed from an importing means of transport to the importer's premises under a Customs-approved arrangement for immediate release, or requesting authorization to do so.
- 932** Customs delivery note
 Document/message whereby a Customs authority releases goods under its control to be placed at the disposal of the party concerned. Synonym: Customs release note.
- 933** Cargo declaration (arrival)
 Generic term, sometimes referred to as Freight declaration, applied to the documents providing the particulars required by the Customs concerning the cargo (freight) carried by commercial means of transport (CCC).
- 934** Value declaration
 Document/message in which a declarant (importer) states the invoice or other price (e.g. selling price, price of identical goods), and specifies costs for freight, insurance and packing, etc., terms of delivery and payment, any relationship with the trading partner, etc., for the purpose of determining the Customs value of goods imported.
-

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 935 | Customs invoice
Document/message required by the Customs in an importing country in which an exporter states the invoice or other price (e.g. selling price, price of identical goods), and specifies costs for freight, insurance and packing, etc., terms of delivery and payment, for the purpose of determining the Customs value in the importing country of goods consigned to that country. |
| 936 | Customs declaration (post parcels)
Document/message which, according to Article 106 of the "Agreement concerning Postal Parcels" under the UPU Convention, must accompany post parcels and in which the contents of such parcels are specified. |
| 937 | Tax declaration (value added tax)
Document/message in which an importer states the pertinent information required by the competent body for assessment of value-added tax. |
| 938 | Tax declaration (general)
Document/message containing a general tax declaration. |
| 940 | Tax demand
Document/message containing the demand of tax. |
| 941 | Embargo permit
Document/message giving the permission to export specified goods. |
| 950 | Goods declaration for Customs transit
Document/message by which the sender declares goods for Customs transit according to Annex E.1 (concerning Customs transit) to the Kyoto convention (CCC). |
| 951 | TIF form
International Customs transit document by which the sender declares goods for carriage by rail in accordance with the provisions of the 1952 International Convention to facilitate the crossing of frontiers for goods carried by rail (TIF Convention of UIC). |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|---|
| 952 | TIR carnet

International Customs document (International Transit by Road), issued by a guaranteeing association approved by the Customs authorities, under the cover of which goods are carried, in most cases under Customs seal, in road vehicles and/or containers in compliance with the requirements of the Customs TIR Convention of the International Transport of Goods under cover of TIR Carnets (UN/ECE). |
| 953 | EC carnet

EC customs transit document issued by EC customs authorities for transit and/or temporary user of goods within the EC. |
| 954 | EUR 1 certificate of origin

Customs certificate used in preferential goods interchanges between EC countries and EC external countries. |
| 955 | ATA carnet

International Customs document (Admission Temporaire / Temporary Admission) which, issued under the terms of the ATA Convention (1961), incorporates an internationally valid guarantee and may be used, in lieu of national Customs documents and as security for import duties and taxes, to cover the temporary admission of goods and, where appropriate, the transit of goods. If accepted for controlling the temporary export and reimport of goods, international guarantee does not apply (CCC). |
| 960 | Single administrative document

A set of documents, replacing the various (national) forms for Customs declaration within the EC, implemented on 01-01-1988. |
| 961 | General response (Customs)

General response message to permit the transfer of data from Customs to the transmitter of the previous message. |
| 962 | Document response (Customs)

Document response message to permit the transfer of data from Customs to the transmitter of the previous message. |
| 963 | Error response (Customs)

Error response message to permit the transfer of data from Customs to the transmitter of the previous message. |

| | |
|---|--|
| CL06 | Document name code (UN/EDIFACT 1001) |
| Code specifying the document name. | |
| 964 | Package response (Customs)
Package response message to permit the transfer of data from Customs to the transmitter of the previous message. |
| 965 | Tax calculation/confirmation response (Customs)
Tax calculation/confirmation response message to permit the transfer of data from Customs to the transmitter of the previous message. |
| 966 | Quota prior allocation certificate
Document/message issued by the competent body for prior allocation of a quota. |
| 970 | Wagon report
Document which contains consignment information concerning the wagons and their lading in a case of a multiple wagon consignment. |
| 971 | Transit Conveyor Document
Document for a course of transit used for a carrier who is neither the carrier at the beginning nor the arrival. The transit carrier can directly invoice the expenses for its part of the transport. |
| 972 | Rail consignment note forwarder copy
Document which is a copy of the rail consignment note printed especially for the need of the forwarder. |
| 974 | Duty suspended goods
Document giving details for the carriage of excisable goods on a duty-suspended basis. |
| 975 | Proof of transit declaration
A document providing proof that a transit declaration has been accepted. |
| 976 | Container transfer note
Document for the carriage of containers. Syn: transfer note. |
| 977 | NATO transit document
Customs transit document for the carriage of shipments of the NATO armed forces under Customs supervision. |
| 978 | Transfrontier waste shipment authorization
Document containing the authorization from the relevant authority for the international carriage of waste. Syn: Transfrontier waste shipment permit. |

CL06 Document name code (UN/EDIFACT 1001)**Code specifying the document name.**

| | |
|------------|--|
| 979 | Transfrontier waste shipment movement document
Document certified by the carriers and the consignee to be used for the international carriage of waste. |
| 990 | End use authorization
Document issued by Customs granting the end-use Customs procedure. |
| 991 | Government contract
Document/message describing a contract with a government authority. |
| 995 | Statistical document, import
Document/message describing an import document that is used for statistical purposes. |
| 996 | Application for documentary credit
Message with application for opening of a documentary credit. |
| 998 | Previous Customs document/message
Indication of the previous Customs document/message concerning the same transaction. |

3.2.8.9 CL08 – Seal type code**CL08 Seal type code (eTIR)****To specify a type of seal.**

- | | |
|----------|--|
| 1 | Mechanical seal
The seal is mechanical. |
| 2 | Electronic seal
The seal is electronic. |

3.2.8.10 CL09 – Message sub types**CL09 Reply type code (eTIR)**

| | |
|-----------|--|
| 00 | Return all information regarding guarantee (default) |
| 01 | Return only guarantee information |
| 02 | Return only declaration information |
| 03 | Return only TIR transport information |

3.2.8.11 CL10**NOT USED (replaced by CL09-Message sub type)****3.2.8.12 CL11****NOT USED (replaced by CL09-Message sub type)****3.2.8.13 CL12 – Guarantee type code (eTIR/to be developped)****3.2.8.14 CL13 – Customs offices database (eTIR/to be developped)**

3.2.8.15 CL14 – Indicator (eTIR)

| CL14 | Indicator |
|-------------|------------------|
| 0 | No |
| 1 | Yes |

3.2.8.16 CL15 – International TIR database (TIRExB/ITDB)**3.2.8.17 CL16 – Message function code (UN/EDIFACT 1225)**

| CL16 | Message function code (UN/EDIFACT 1225) |
|---|--|
| Code indicating the function of the message. | |
| 1 | Cancellation
Message cancelling a previous transmission for a given transaction. |
| 2 | Addition
Message containing items to be added. |
| 3 | Deletion
Message containing items to be deleted. |
| 4 | Change
Message containing items to be changed. |
| 5 | Replace
Message replacing a previous message. |
| 6 | Confirmation
Message confirming the details of a previous transmission where such confirmation is required or recommended under the terms of a trading partner agreement. |
| 7 | Duplicate
The message is a duplicate of a previously generated message. |
| 8 | Status
Code indicating that the referenced message is a status. |
| 9 | Original
Initial transmission related to a given transaction. |
| 10 | Not found
Message whose reference number is not filed. |
| 11 | Response
Message responding to a previous message or document. |

CL16 Message function code (UN/EDIFACT 1225)**Code indicating the function of the message.**

| | |
|-----------|---|
| 12 | Not processed
Message indicating that the referenced message was received but not yet processed. |
| 13 | Request
Code indicating that the referenced message is a request. |
| 14 | Advance notification
Code indicating that the information contained in the message is an advance notification of information to follow. |
| 15 | Reminder
Repeated message transmission for reminding purposes. |
| 16 | Proposal
Message content is a proposal. |
| 17 | Cancel, to be reissued
Referenced transaction cancelled, reissued message will follow. |
| 18 | Reissue
New issue of a previous message (maybe cancelled). |
| 19 | Seller initiated change
Change information submitted by buyer but initiated by seller. |
| 20 | Replace heading section only
Message to replace the heading of a previous message. |
| 21 | Replace item detail and summary only
Message to replace item detail and summary of a previous message. |
| 22 | Final transmission
Final message in a related series of messages together making up a commercial, administrative or transport transaction. |
| 23 | Transaction on hold
Message not to be processed until further release information. |
| 24 | Delivery instruction
Delivery schedule message only used to transmit short-term delivery instructions. |
| 25 | Forecast
Delivery schedule message only used to transmit long-term schedule information. |

CL16 Message function code (UN/EDIFACT 1225)**Code indicating the function of the message.**

| | |
|-----------|--|
| 26 | Delivery instruction and forecast
Combination of codes '24' and '25'. |
| 27 | Not accepted
Message to inform that the referenced message is not accepted by the recipient. |
| 28 | Accepted, with amendment in heading section
Message accepted but amended in heading section. |
| 29 | Accepted without amendment
Referenced message is entirely accepted. |
| 30 | Accepted, with amendment in detail section
Referenced message is accepted but amended in detail section. |
| 31 | Copy
Indicates that the message is a copy of an original message that has been sent, e.g. for action or information. |
| 32 | Approval
A message releasing an existing referenced message for action to the receiver. |
| 33 | Change in heading section
Message changing the referenced message heading section. |
| 34 | Accepted with amendment
The referenced message is accepted but amended. |
| 35 | Retransmission
Change-free transmission of a message previously sent. |
| 36 | Change in detail section
Message changing referenced detail section. |
| 37 | Reversal of a debit
Reversal of a previously posted debit. |
| 38 | Reversal of a credit
Reversal of a previously posted credit. |
| 39 | Reversal for cancellation
Code indicating that the referenced message is reversing a cancellation of a previous transmission for a given transaction. |

CL16 Message function code (UN/EDIFACT 1225)**Code indicating the function of the message.**

| | |
|-----------|---|
| 40 | Request for deletion
The message is given to inform the recipient to delete the referenced transaction. |
| 41 | Finishing/closing order
Last of series of call-offs. |
| 42 | Confirmation via specific means
Message confirming a transaction previously agreed via other means (e.g. phone). |
| 43 | Additional transmission
Message already transmitted via another communication channel. This transmission is to provide electronically processable data only. |
| 44 | Accepted without reserves
Message accepted without reserves. |
| 45 | Accepted with reserves
Message accepted with reserves. |
| 46 | Provisional
Message content is provisional. |
| 47 | Definitive
Message content is definitive. |
| 48 | Accepted, contents rejected
Message to inform that the previous message is received, but it cannot be processed due to regulations, laws, etc. |
| 49 | Settled dispute
The reported dispute is settled. |
| 50 | Withdraw
Message withdrawing a previously approved message. |
| 51 | Authorisation
Message authorising a message or transaction(s). |
| 52 | Proposed amendment
A code used to indicate an amendment suggested by the sender. |
| 53 | Test
Code indicating the message is to be considered as a test. |

CL16 Message function code (UN/EDIFACT 1225)**Code indicating the function of the message.**

| | |
|-----------|--|
| 54 | Extract
A subset of the original. |
| 55 | Notification only
The receiver may use the notification information for analysis only. |
| 56 | Advice of ledger booked items
An advice that items have been booked in the ledger. |
| 57 | Advice of items pending to be booked in the ledger
An advice that items are pending to be booked in the ledger. |
| 58 | Pre-advice of items requiring further information
A pre-advice that items require further information. |
| 59 | Pre-advised items
A pre-advice of items. |
| 60 | No action since last message
Code indicating the fact that no action has taken place since the last message. |
| 61 | Complete schedule
The message function is a complete schedule. |
| 62 | Update schedule
The message function is an update to a schedule. |
| 63 | Not accepted, provisional
Not accepted, subject to confirmation. |
| 64 | Verification
The message is transmitted to verify information. |
| 65 | Unsettled dispute
To report an unsettled dispute. |

3.2.8.22 CL21 – Measurement unit code (English Only)

CL21 Measurement unit code (UNECE Recommendation 20)

Code specifying the unit of measurement.

| | |
|-----------|-------------|
| 05 | lift |
| 06 | small spray |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|-----------|--|
| 08 | heat lot |
| 10 | group
A unit of count defining the number of groups (group: set of items classified together). |
| 11 | outfit
A unit of count defining the number of outfits (outfit: a complete set of equipment / materials / objects used for a specific purpose). |
| 13 | ration
A unit of count defining the number of rations (ration: a single portion of provisions). |
| 14 | shot
A unit of liquid measure, especially related to spirits. |
| 15 | stick, military
A unit of count defining the number of military sticks (military stick: bombs or paratroops released in rapid succession from an aircraft). |
| 16 | hundred fifteen kg drum |
| 17 | hundred lb drum |
| 18 | fiftyfive gallon (US) drum |
| 19 | tank truck |
| 20 | twenty foot container
A unit of count defining the number of shipping containers that measure 20 feet
in length. |
| 21 | forty foot container
A unit of count defining the number of shipping containers that measure 40 feet
in length. |
| 22 | decilitre per gram |
| 23 | gram per cubic centimetre |
| 24 | theoretical pound
A unit of mass defining the expected mass of material expressed as the number of pounds. |
| 25 | gram per square centimetre |
| 26 | actual ton |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|-----------|--|
| 27 | theoretical ton |
| | A unit of mass defining the expected mass of material, expressed as the number of tons. |
| 28 | kilogram per square metre |
| 29 | pound per thousand square feet |
| 30 | horse power day per air dry metric ton |
| 31 | catch weight |
| 32 | kilogram per air dry metric ton |
| 33 | kilopascal square metres per gram |
| 34 | kilopascals per millimetre |
| 35 | millilitres per square centimetre second |
| 36 | cubic feet per minute per square foot |
| | Conversion factor required |
| 37 | ounce per square foot |
| 38 | ounces per square foot per 0,01inch |
| 40 | millilitre per second |
| 41 | millilitre per minute |
| 43 | super bulk bag |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| 44 | fivehundred kg bulk bag |
| 45 | threehundred kg bulk bag |
| 46 | fifty lb bulk bag |
| 47 | fifty lb bag |
| 48 | bulk car load |
| 53 | theoretical kilograms |
| 54 | theoretical tonne |
| 56 | sitas |
| | A unit of area for tin plate equal to a surface area of 100 square metres. |
| 57 | mesh |
| | A unit of count defining the number of strands per inch as a measure of the fineness of a woven product. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|-----------|---|
| 58 | net kilogram |
| | A unit of mass defining the total number of kilograms after deductions. |
| 59 | part per million |
| | A unit of proportion equal to 10??. |
| 60 | percent weight |
| | A unit of proportion equal to 10??. |
| 61 | part per billion (US) |
| | A unit of proportion equal to 10??. |
| 62 | percent per 1000 hour |
| 63 | failure rate in time |
| 64 | pound per square inch, gauge |
| 66 | oersted |
| 69 | test specific scale |
| 71 | volt ampere per pound |
| 72 | watt per pound |
| 73 | ampere tum per centimetre |
| 74 | millipascal |
| 76 | gauss |
| 77 | milli-inch |
| 78 | kilogauss |
| 80 | pound per square inch absolute |
| 81 | henry |
| 84 | kilopound per square inch |
| | A unit of pressure defining the number of kilopounds force per square inch. |
| 85 | foot pound-force |
| 87 | pound per cubic foot |
| 89 | poise |
| 90 | Saybold universal second |
| 91 | stokes |
| 92 | calorie per cubic centimetre |
| 93 | calorie per gram |
| 94 | curl unit |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|-----------|--|
| 95 | twenty thousand gallon (US) tankcar |
| 96 | ten thousand gallon (US) tankcar |
| 97 | ten kg drum |
| 98 | fifteen kg drum |
| 1A | car mile |
| 1B | car count |
| 1C | locomotive count |
| 1D | caboose count |
| 1E | empty car |
| 1F | train mile |
| 1G | fuel usage gallon (US) |
| 1H | caboose mile |
| 1I | fixed rate

A unit of quantity expressed as a predetermined or set rate for usage of a facility
or service. |
| 1J | ton mile |
| 1K | locomotive mile |
| 1L | total car count |
| 1M | total car mile |
| 1X | quarter mile |
| 2A | radian per second

Refer ISO/TC12 SI Guide |
| 2B | radian per second squared

Refer ISO/TC12 SI Guide |
| 2C | roentgen |
| 2G | volt AC

A unit of electric potential in relation to alternating current (AC). |
| 2H | volt DC

A unit of electric potential in relation to direct current (DC). |
| 2I | British thermal unit per hour |
| 2J | cubic centimetre per second |

| CL21 | Measurement unit code (UNECE Recommendation 20) |
|---|--|
| Code specifying the unit of measurement. | |
| 2K | cubic foot per hour |
| 2L | cubic foot per minute |
| 2M | centimetre per second |
| 2N | decibel |
| 2P | kilobyte
A unit of information equal to 10^3 (1000) bytes. |
| 2Q | kilobecquerel |
| 2R | kilocurie |
| 2U | megagram |
| 2V | megagram per hour |
| 2W | bin
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| 2X | metre per minute |
| 2Y | milliroentgen |
| 2Z | millivolt |
| 3B | megajoule |
| 3C | manmonth
A unit of count defining the number of months for a person or persons to perform an undertaking. |
| 3E | pound per pound of product |
| 3G | pound per piece of product |
| 3H | kilogram per kilogram of product |
| 3I | kilogram per piece of product |
| 4A | bobbin
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| 4B | cap |
| 4C | centistokes |
| 4E | twenty pack |
| 4G | microlitre |
| 4H | micrometre (micron) |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| 4K | milliamperc |
| 4L | megabyte
A unit of information equal to 10 ⁷ (1000000) bytes. |
| 4M | milligram per hour |
| 4N | megabecquerel |
| 4O | microfarad |
| 4P | newton per metre |
| 4Q | ounce inch |
| 4R | ounce foot |
| 4T | pico farad |
| 4U | pound per hour |
| 4W | ton (US) per hour |
| 4X | kilolitre per hour |
| 5A | barrel (US) per minute |
| 5B | batch
A unit of count defining the number of batches (batch: quantity of material produced in one operation or number of animals or persons coming at once). |
| 5C | gallon(US) per thousand |
| 5E | MMSCF/day
A unit of volume equal to one million (1000000) cubic feet of gas per day. |
| 5F | pounds per thousand |
| 5G | pump |
| 5H | stage |
| 5I | standard cubic foot |
| 5J | hydraulic horse power
A unit of power defining the hydraulic horse power delivered by a fluid pump depending on the viscosity of the fluid. |
| 5K | count per minute |
| 5P | seismic level |
| 5Q | seismic line |
| A1 | 15 °C calorie |
| A10 | ampere square metre per joule second |

| CL21 | Measurement unit code (UNECE Recommendation 20) |
|---|--|
| Code specifying the unit of measurement. | |
| A11 | angstrom |
| A12 | astronomical unit |
| A13 | attojoule |
| A14 | barn |
| A15 | barn per electron volt |
| A16 | barn per steradian electronvolt |
| A17 | barn per steradian |
| A18 | becquerel per kilogram |
| A19 | becquerel per metre cubed |
| A2 | ampere per centimetre |
| A20 | British thermal unit per second square foot degree Rankine |
| A21 | British thermal unit per pound degree Rankine |
| A22 | British thermal unit per second foot degree Rankine |
| A23 | British thermal unit per hour square foot degree Rankine |
| A24 | candela per square metre |
| A25 | cheval vapeur |
| A26 | coulomb metre |
| A27 | coulomb metre squared per volt |
| A28 | coulomb per cubic centimetre |
| A29 | coulomb per cubic metre |
| A3 | ampere per millimetre |
| A30 | coulomb per cubic millimetre |
| A31 | coulomb per kilogram second |
| A32 | coulomb per mole |
| A33 | coulomb per square centimetre |
| A34 | coulomb per square metre |
| A35 | coulomb per square millimetre |
| A36 | cubic centimetre per mole |
| A37 | cubic decimetre per mole |
| A38 | cubic metre per coulomb |
| A39 | cubic metre per kilogram |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| A4 | ampere per square centimetre |
| A40 | cubic metre per mole |
| A41 | ampere per square metre |
| A42 | curie per kilogram |
| A43 | deadweight tonnage

A unit of mass defining the difference between the weight of a ship when completely empty and its weight when completely loaded, expressed as the number of tons. |
| A44 | decalitre |
| A45 | decametre |
| A47 | decitex

A unit of yarn density. One decitex equals a mass of 1 gram per 10 kilometres of length. |
| A48 | degree Rankine

Refer ISO 80000-5 (Quantities and units — Part 5: Thermodynamics) |
| A49 | denier

A unit of yarn density. One denier equals a mass of 1 gram per 9 kilometres of length. |
| A5 | ampere square metre |
| A50 | dyne second per cubic centimetre |
| A51 | dyne second per centimetre |
| A52 | dyne second per centimetre to the fifth power |
| A53 | electronvolt |
| A54 | electronvolt per metre |
| A55 | electronvolt square metre |
| A56 | electronvolt square metre per kilogram |
| A57 | erg |
| A58 | erg per centimetre |
| A59 | 8-part cloud cover

A unit of count defining the number of eighth-parts as a measure of the celestial dome cloud coverage.

Synonym: OKTA , OCTA |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| A6 | ampere per square metre kelvin squared |
| A60 | erg per cubic centimetre |
| A61 | erg per gram |
| A62 | erg per gram second |
| A63 | erg per second |
| A64 | erg per second square centimetre |
| A65 | erg per square centimetre second |
| A66 | erg square centimetre |
| A67 | erg square centimetre per gram |
| A68 | exajoule |
| A69 | farad per metre |
| A7 | ampere per square millimetre |
| A70 | femtojoule |
| A71 | femtometre |
| A73 | foot per second squared |
| A74 | foot pound-force per second |
| A75 | freight ton
A unit of information typically used for billing purposes, defined as either the number of metric tons or the number of cubic metres, whichever is the larger. |
| A76 | gal |
| A77 | Gaussian CGS unit of displacement |
| A78 | Gaussian CGS unit of electric current |
| A79 | Gaussian CGS unit of electric charge |
| A8 | ampere second |
| A80 | Gaussian CGS unit of electric field strength |
| A81 | Gaussian CGS unit of electric polarization |
| A82 | Gaussian CGS unit of electric potential |
| A83 | Gaussian CGS unit of magnetization |
| A84 | gigacoulomb per cubic metre |
| A85 | gigaelectronvolt |
| A86 | gigahertz |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| A87 | gigaohm |
| A88 | gigaohm metre |
| A89 | gigapascal |
| A9 | rate
A unit of quantity expressed as a rate for usage of a facility or service. |
| A90 | gigawatt |
| A91 | gon
Synonym: grade |
| A93 | gram per cubic metre |
| A94 | gram per mole |
| A95 | gray |
| A96 | gray per second |
| A97 | hectopascal |
| A98 | henry per metre |
| A99 | bit
A unit of information equal to one binary digit. |
| AA | ball
A unit of count defining the number of balls (ball: object formed in the shape of sphere). |
| AB | bulk pack
A unit of count defining the number of items per bulk pack. |
| ACR | acre |
| ACT | activity
A unit of count defining the number of activities (activity: a unit of work or action). |
| AD | byte
A unit of information equal to 8 bits. |
| AE | ampere per metre |
| AH | additional minute
A unit of time defining the number of minutes in addition to the referenced minutes. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| AI | average minute per call |
| | A unit of count defining the number of minutes for the average interval of a call. |
| AJ | cop |
| AK | fathom |
| AL | access line |
| | A unit of count defining the number of telephone access lines. |
| AM | ampoule |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| AMH | ampere hour |
| | A unit of electric charge defining the amount of charge accumulated by a steady flow of one ampere for one hour. |
| AMP | ampere |
| ANN | year |
| | Unit of time equal to 365,25 days. |
| | Synonym: Julian year |
| AP | aluminium pound only |
| APZ | troy ounce or apothecary ounce |
| AQ | anti-hemophilic factor (AHF) unit |
| | A unit of measure for blood potency (US). |
| AR | suppository |
| ARE | are |
| AS | assortment |
| | A unit of count defining the number of assortments (assortment: set of items grouped in a mixed collection). |
| ASM | alcoholic strength by mass |
| | A unit of mass defining the alcoholic strength of a liquid. |
| ASU | alcoholic strength by volume |
| | A unit of volume defining the alcoholic strength of a liquid (e.g. spirit, wine, beer, etc), often at a specific temperature. |
| ATM | standard atmosphere |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| ATT | technical atmosphere |
| AV | capsule
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| AW | powder filled vial |
| AY | assembly
A unit of count defining the number of assemblies (assembly: items that consist of component parts). |
| AZ | British thermal unit per pound |
| B0 | Btu per cubic foot |
| B1 | barrel (US) per day |
| B10 | bit per second
A unit of information equal to one binary digit per second. |
| B11 | joule per kilogram kelvin |
| B12 | joule per metre |
| B13 | joule per square metre
Synonym: joule per metre squared |
| B14 | joule per metre to the fourth power |
| B15 | joule per mole |
| B16 | joule per mole kelvin |
| B17 | credit
A unit of count defining the number of entries made to the credit side of an account. |
| B18 | joule second |
| B19 | digit
A unit of information defining the quantity of numerals used to form a number. |
| B2 | bunk |
| B20 | joule square metre per kilogram |
| B21 | kelvin per watt |
| B22 | kiloampere |
| B23 | kiloampere per square metre |
| B24 | kiloampere per metre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| B25 | kilobecquerel per kilogram |
| B26 | kilocoulomb |
| B27 | kilocoulomb per cubic metre |
| B28 | kilocoulomb per square metre |
| B29 | kiloelectronvolt |
| B3 | batting pound
A unit of mass defining the number of pounds of wadded fibre. |
| B30 | gibibit
A unit of information equal to 2^{30} bits (binary digits). |
| B31 | kilogram metre per second |
| B32 | kilogram metre squared |
| B33 | kilogram metre squared per second |
| B34 | kilogram per cubic decimetre |
| B35 | kilogram per litre |
| B36 | thermochemical calorie per gram |
| B37 | kilogram-force |
| B38 | kilogram-force metre |
| B39 | kilogram-force metre per second |
| B4 | barrel, imperial
A unit of volume used to measure liquids such as beer or wine. One barrel equals 36 imperial gallons. |
| B40 | kilogram-force per square metre |
| B41 | kilojoule per kelvin |
| B42 | kilojoule per kilogram |
| B43 | kilojoule per kilogram kelvin |
| B44 | kilojoule per mole |
| B45 | kilomole |
| B46 | kilomole per cubic metre |
| B47 | kilonewton |
| B48 | kilonewton metre |
| B49 | kiloohm |
| B5 | billet |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| B50 | kiloohm metre |
| B51 | kilopond |
| B52 | kilosecond |
| B53 | kilosiemens |
| B54 | kilosiemens per metre |
| B55 | kilovolt per metre |
| B56 | kiloweber per metre |
| B57 | light year
A unit of length defining the distance that light travels in a vacuum in one year. |
| B58 | litre per mole |
| B59 | lumen hour |
| B6 | bun |
| B60 | lumen per square metre |
| B61 | lumen per watt |
| B62 | lumen second |
| B63 | lux hour |
| B64 | lux second |
| B65 | maxwell |
| B66 | megaampere per square metre |
| B67 | megabecquerel per kilogram |
| B68 | gigabit
A unit of information equal to 10 ⁹ bits (binary digits). |
| B69 | megacoulomb per cubic metre |
| B7 | cycle
A unit of count defining the number of cycles (cycle: a recurrent period of definite duration). |
| B70 | megacoulomb per square metre |
| B71 | megaelectronvolt |
| B72 | megagram per cubic metre |
| B73 | meganewton |
| B74 | meganewton metre |
| B75 | megaohm |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| B76 | megaohm metre |
| B77 | megasiemens per metre |
| B78 | megavolt |
| B79 | megavolt per metre |
| B8 | joule per cubic metre |
| B80 | gigabit per second
A unit of information equal to 10? bits (binary digits) per second. |
| B81 | reciprocal metre squared reciprocal second |
| B82 | inch per linear foot
A unit of length defining the number of inches per linear foot. |
| B83 | metre to the fourth power |
| B84 | microampere |
| B85 | microbar |
| B86 | microcoulomb |
| B87 | microcoulomb per cubic metre |
| B88 | microcoulomb per square metre |
| B89 | microfarad per metre |
| B9 | batt |
| B90 | microhenry |
| B91 | microhenry per metre |
| B92 | micronewton |
| B93 | micronewton metre |
| B94 | microohm |
| B95 | microohm metre |
| B96 | micropascal |
| B97 | microradian |
| B98 | microsecond |
| B99 | microsiemens |
| BAR | bar [unit of pressure] |
| BB | base box
A unit of area of 112 sheets of tin mil products (tin plate, tin free steel or black plate) 14 by 20 inches, or 31,360 square inches. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| BD | board |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BE | bundle |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BFT | board foot |
| | A unit of volume defining the number of cords (cord: a stack of firewood of 128 cubic feet). |
| BG | bag |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BH | brush |
| BHP | brake horse power |
| BIL | billion (EUR)
Synonym: trillion (US) |
| BJ | bucket |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BK | basket |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BL | bale |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BLD | dry barrel (US) |
| BLL | barrel (US) |
| BO | bottle |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BP | hundred board feet |
| | A unit of volume equal to one hundred board feet. |
| BQL | becquerel |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| BR | bar [unit of packaging] |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BT | bolt |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BTU | British thermal unit |
| BUA | bushel (US) |
| BUI | bushel (UK) |
| BW | base weight |
| BX | box |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| BZ | million BTUs |
| C0 | call |
| | A unit of count defining the number of calls (call: communication session or visitation). |
| C1 | composite product pound (total weight) |
| C10 | millifarad |
| C11 | milligal |
| C12 | milligram per metre |
| C13 | milligray |
| C14 | millihenry |
| C15 | millijoule |
| C16 | millimetre per second |
| C17 | millimetre squared per second |
| C18 | millimole |
| C19 | mole per kilogram |
| C2 | carset |
| C20 | millinewton |
| C21 | kibibit |
| | A unit of information equal to 2^{12} (1024) bits (binary digits). |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| C22 | millinewton per metre |
| C23 | milliohm metre |
| C24 | millipascal second |
| C25 | milliradian |
| C26 | millisecond |
| C27 | millisiemens |
| C28 | millisievert |
| C29 | millitesla |
| C3 | microvolt per metre |
| C30 | millivolt per metre |
| C31 | milliwatt |
| C32 | milliwatt per square metre |
| C33 | milliweber |
| C34 | mole |
| C35 | mole per cubic decimetre |
| C36 | mole per cubic metre |
| C37 | kilobit
A unit of information equal to 10^3 (1000) bits (binary digits). |
| C38 | mole per litre |
| C39 | nanoampere |
| C4 | carload |
| C40 | nanocoulomb |
| C41 | nanofarad |
| C42 | nanofarad per metre |
| C43 | nanohenry |
| C44 | nanohenry per metre |
| C45 | nanometre |
| C46 | nanoohm metre |
| C47 | nanosecond |
| C48 | nanotesla |
| C49 | nanowatt |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| C5 | cost |
| C50 | neper |
| C51 | neper per second |
| C52 | picometre |
| C53 | newton metre second |
| C54 | newton metre squared kilogram squared |
| C55 | newton per square metre |
| C56 | newton per square millimetre |
| C57 | newton second |
| C58 | newton second per metre |
| C59 | octave
A unit used in music to describe the ratio in frequency between notes. |
| C6 | cell |
| C60 | ohm centimetre |
| C61 | ohm metre |
| C62 | one
Synonym: piece; unit |
| C63 | parsec |
| C64 | pascal per kelvin |
| C65 | pascal second |
| C66 | pascal second per cubic metre |
| C67 | pascal second per metre |
| C68 | petajoule |
| C69 | phon
A unit of subjective sound loudness. A sound has loudness p phons if it seems to the listener to be equal in loudness to the sound of a pure tone of frequency 1
kilohertz and strength p decibels. |
| C7 | centipoise |
| C70 | picoampere |
| C71 | picocoulomb |
| C72 | picofarad per metre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| C73 | picohenry |
| C74 | kilobit per second
A unit of information equal to 10^3 (1000) bits (binary digits) per second. |
| C75 | picowatt |
| C76 | picowatt per square metre |
| C77 | pound gage |
| C78 | pound-force |
| C79 | kilovolt ampere hour
A unit of accumulated energy of 1000 volt amperes over a period of one hour. |
| C8 | millicoulomb per kilogram |
| C80 | rad |
| C81 | radian |
| C82 | radian square metre per mole |
| C83 | radian square metre per kilogram |
| C84 | radian per metre |
| C85 | reciprocal angstrom |
| C86 | reciprocal cubic metre |
| C87 | reciprocal cubic metre per second |
| C88 | reciprocal electron volt per cubic metre |
| C89 | reciprocal henry |
| C9 | coil group
A unit of count defining the number of coil groups (coil group: groups of items arranged by lengths of those items placed in a joined sequence of concentric circles). |
| C90 | reciprocal joule per cubic metre |
| C91 | reciprocal kelvin or kelvin to the power minus one |
| C92 | reciprocal metre |
| C93 | reciprocal square metre
Synonym: reciprocal metre squared |
| C94 | reciprocal minute |
| C95 | reciprocal mole |
| C96 | reciprocal pascal or pascal to the power minus one |

| CL21 | Measurement unit code (UNECE Recommendation 20) |
|---|--|
| Code specifying the unit of measurement. | |
| C97 | reciprocal second |
| C98 | reciprocal second per cubic metre |
| C99 | reciprocal second per metre squared |
| CA | can |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CCT | carrying capacity in metric ton |
| | A unit of mass defining the carrying capacity, expressed as the number of metric tons. |
| CDL | candela |
| CEL | degree Celsius |
| | Refer ISO 80000-5 (Quantities and units — Part 5: Thermodynamics) |
| CEN | hundred |
| | A unit of count defining the number of units in multiples of 100. |
| CG | card |
| | A unit of count defining the number of units of card (card: thick stiff paper or cardboard). |
| CGM | centigram |
| CH | container |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CJ | cone |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CK | connector |
| CKG | coulomb per kilogram |
| CL | coil |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CLF | hundred leave |
| | A unit of count defining the number of leaves, expressed in units of one hundred |
| | leaves. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| CLT | centilitre |
| CMK | square centimetre |
| CMQ | cubic centimetre |
| CMT | centimetre |
| CNP | <p>hundred pack</p> <p>A unit of count defining the number of hundred-packs (hundred-pack: set of one hundred items packaged together).</p> |
| CNT | <p>cental (UK)</p> <p>A unit of mass equal to one hundred weight (US).</p> |
| CO | <p>carboy</p> <p>Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet).</p> |
| COU | coulomb |
| CQ | <p>cartridge</p> <p>Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet).</p> |
| CR | <p>crate</p> <p>Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet).</p> |

| CT | <p>carton</p> <p>Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet).</p> |
| CTG | <p>content gram</p> <p>A unit of mass defining the number of grams of a named item in a product.</p> |
| CTM | metric carat |
| CTN | <p>content ton (metric)</p> <p>A unit of mass defining the number of metric tons of a named item in a product.</p> |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | | |
|------------|---|---|
| CU | cup | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CUR | curie | |
| CV | cover | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CWA | hundred pounds (cwt) / hundred weight (US) | |
| CWI | hundred weight (UK) | |
| CY | cylinder | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| CZ | combo | |
| D03 | kilowatt hour per hour | A unit of accumulated energy of a thousand watts over a period of one hour. |
| D04 | lot [unit of weight] | A unit of weight equal to about 1/2 ounce or 15 grams. |
| D1 | reciprocal second per steradian | |
| D10 | siemens per metre | |
| D11 | mebibit | A unit of information equal to 2^{29} (1048576) bits (binary digits). |
| D12 | siemens square metre per mole | |
| D13 | sievert | |
| D14 | thousand linear yard | |
| D15 | sone | A unit of subjective sound loudness. One sone is the loudness of a pure tone of frequency one kilohertz and strength 40 decibels. |
| D16 | square centimetre per erg | |
| D17 | square centimetre per steradian erg | |
| D18 | metre kelvin | |
| D19 | square metre kelvin per watt | |
| D2 | reciprocal second per steradian metre squared | |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| D20 | square metre per joule |
| D21 | square metre per kilogram |
| D22 | square metre per mole |
| D23 | pen gram (protein)
A unit of count defining the number of grams of amino acid prescribed for parenteral/enteral therapy. |
| D24 | square metre per steradian |
| D25 | square metre per steradian joule |
| D26 | square metre per volt second |
| D27 | steradian |
| D28 | syphon |
| D29 | terahertz |
| D30 | terajoule |
| D31 | terawatt |
| D32 | terawatt hour |
| D33 | tesla |
| D34 | tex
A unit of yarn density. One decitex equals a mass of 1 gram per 1 kilometre of length. |
| D35 | thermochemical calorie |
| D36 | megabit
A unit of information equal to 10^6 (1000000) bits (binary digits). |
| D37 | thermochemical calorie per gram kelvin |
| D38 | thermochemical calorie per second centimetre kelvin |
| D39 | thermochemical calorie per second square centimetre kelvin |
| D40 | thousand litre |
| D41 | tonne per cubic metre |
| D42 | tropical year |
| D43 | unified atomic mass unit |
| D44 | var
The name of the unit is an acronym for volt-ampere-reactive. |
| D45 | volt squared per kelvin squared |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| D46 | volt - ampere |
| D47 | volt per centimetre |
| D48 | volt per kelvin |
| D49 | millivolt per kelvin |
| D5 | kilogram per square centimetre |
| D50 | volt per metre |
| D51 | volt per millimetre |
| D52 | watt per kelvin |
| D53 | watt per metre kelvin |
| D54 | watt per square metre |
| D55 | watt per square metre kelvin |
| D56 | watt per square metre kelvin to the fourth power |
| D57 | watt per steradian |
| D58 | watt per steradian square metre |
| D59 | weber per metre |
| D6 | roentgen per second |
| D60 | weber per millimetre |
| D61 | minute [unit of angle] |
| D62 | second [unit of angle] |
| D63 | book
A unit of count defining the number of books (book: set of items bound together or written document of a material whole). |
| D64 | block |
| D65 | round
A unit of count defining the number of rounds (round: A circular or cylindrical object). |
| D66 | cassette |
| D67 | dollar per hour |
| D68 | number of words
A unit of count defining the number of words. |
| D69 | inch to the fourth power |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| D7 | sandwich |
| D70 | International Table (IT) calorie |
| D71 | International Table (IT) calorie per second centimetre kelvin |

| D73 | joule square metre |
| D74 | kilogram per mole |
| D75 | International Table (IT)calorie per gram |
| D76 | International Table (IT) calorie per gram kelvin |
| D77 | megacoulomb |
| D78 | megajoule per second
A unit of accumulated energy equal to one million joules per second. |
| D79 | beam |
| D8 | draize score |
| D80 | microwatt |
| D81 | microtesla |
| D82 | microvolt |
| D83 | millinewton metre |
| D85 | microwatt per square metre |
| D86 | millicoulomb |
| D87 | millimole per kilogram |
| D88 | millicoulomb per cubic metre |
| D89 | millicoulomb per square metre |
| D9 | dyne per square centimetre |
| D90 | cubic metre (net) |
| D91 | rem |
| D92 | band |
| D93 | second per cubic metre |
| D94 | second per radian cubic metre |
| D95 | joule per gram |
| D96 | pound gross |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| D97 | pallet/unit load |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| D98 | mass pound |
| D99 | sleeve |
| DAA | decare |
| DAD | ten day |
| | A unit of time defining the number of days in multiples of 10. |
| DAY | day |
| DB | dry pound |
| | A unit of mass defining the number of pounds of a product, disregarding the water content of the product. |
| DC | disk (disc) |
| DD | degree [unit of angle] |
| DE | deal |
| DEC | decade |
| | A unit of count defining the number of decades (decade: quantity equal to 10 or
time equal to 10 years). |
| DG | decigram |
| DI | dispenser |
| DJ | decagram |
| DLT | decilitre |
| DMA | cubic decametre |
| DMK | square decimetre |
| DMO | standard kilolitre |
| | A unit of volume defining the number of kilolitres of a product at a temperature
of 15 degrees Celsius, especially in relation to hydrocarbon oils. |
| DMQ | cubic decimetre |
| DMT | decimetre |
| DN | decinewton metre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| DPC | dozen piece |
| | A unit of count defining the number of pieces in multiples of 12 (piece: an individual part of a larger whole). |
| DPR | dozen pair |
| | A unit of count defining the number of pairs in multiples of 12 (pair: item described by two's). |
| DPT | displacement tonnage |
| | A unit of mass defining the volume of sea water a ship displaces, expressed as the number of tons. |
| DQ | data record |
| DR | drum |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| DRA | dram (US) |
| DRI | dram (UK) |
| DRL | dozen roll |
| | A unit of count defining the number of rolls, expressed in twelve roll units. |
| DRM | drachm (UK) |
| DS | display |
| DT | dry ton |
| | A unit of mass defining the number of tons of a product, disregarding the water content of the product. |
| DTN | decitonne |
| | synonym: centner, metric 100 kg; quintal, metric 100 kg |
| DU | dyne |
| DWT | pennyweight |
| DX | dyne per centimetre |
| DY | directory book |
| DZN | dozen |
| | A unit of count defining the number of units in multiples of 12. |
| DZP | dozen pack |
| | A unit of count defining the number of packs in multiples of 12 (pack: standard packaging unit). |

| | |
|---|---|
| CL21 | Measurement unit code (UNECE Recommendation 20) |
| Code specifying the unit of measurement. | |
| E01 | newton per square centimetre
A measure of pressure expressed in newtons per square centimetre. |
| E07 | megawatt hour per hour
A unit of accumulated energy of a million watts over a period of one hour. |
| E08 | megawatt per hertz
A unit of energy expressed as the load change in million watts that will cause a frequency shift of one hertz. |
| E09 | milliampercere hour
A unit of power load delivered at the rate of one thousandth of an ampere over a period of one hour. |
| E10 | degree day
A unit of measure used in meteorology and engineering to measure the demand for heating or cooling over a given period of days. |
| E11 | gigacalorie
A unit of heat energy equal to one thousand million calories. |
| E12 | mille
A unit of count defining the number of cigarettes in units of 1000. |
| E14 | kilocalorie (IT)
A unit of heat energy equal to one thousand calories. |
| E15 | kilocalorie (TH) per hour
A unit of energy equal to one thousand calories per hour. |
| E16 | million Btu(IT) per hour
A unit of power equal to one million British thermal units per hour. |
| E17 | cubic foot per second
A unit of volume equal to one cubic foot passing a given point in a period of one second. |
| E18 | tonne per hour
A unit of weight or mass equal to one tonne per hour. |
| E19 | ping
A unit of area equal to 3.3 square metres. |
| E2 | belt |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| E20 | megabit per second
A unit of information equal to 10 ⁶ (1000000) bits (binary digits) per second. |
| E21 | shares
A unit of count defining the number of shares (share: a total or portion of the parts into which a business entity's capital is divided). |
| E22 | TEU
A unit of count defining the number of twenty-foot equivalent units (TEUs) as a measure of containerized cargo capacity. |
| E23 | tyre
A unit of count defining the number of tyres (a solid or air-filled covering placed around a wheel rim to form a soft contact with the road, absorb shock and provide traction). |
| E25 | active unit
A unit of count defining the number of active units within a substance. |
| E27 | dose
A unit of count defining the number of doses (dose: a definite quantity of a medicine or drug). |
| E28 | air dry ton
A unit of mass defining the number of tons of a product, disregarding the water content of the product. |
| E3 | trailer |
| E30 | strand
A unit of count defining the number of strands (strand: long, thin, flexible, single thread, strip of fibre, constituent filament or multiples of the same, twisted together). |
| E31 | square metre per litre
A unit of count defining the number of square metres per litre. |
| E32 | litre per hour
A unit of count defining the number of litres per hour. |
| E33 | foot per thousand
A unit of count defining the number of feet per thousand units. |

| CL21 Measurement unit code (UNECE Recommendation 20) | |
|---|---|
| Code specifying the unit of measurement. | |
| E34 | gigabyte
A unit of information equal to 10^9 bytes. |
| E35 | terabyte
A unit of information equal to 10^{12} bytes. |
| E36 | petabyte
A unit of information equal to 10^{15} bytes. |
| E37 | pixel
A unit of count defining the number of pixels (pixel: picture element). |
| E38 | megapixel
A unit of count equal to 10^6 (1000000) pixels (picture elements). |
| E39 | dots per inch
A unit of information defining the number of dots per linear inch as a measure of
the resolution or sharpness of a graphic image. |
| E4 | gross kilogram
A unit of mass defining the total number of kilograms before deductions. |
| E40 | part per hundred thousand
A unit of proportion equal to 10^{-5} . |
| E41 | kilogram force per square millimetre
A unit of pressure defining the number of kilograms force per square
millimetre. |
| E42 | kilogram force per square centimetre
A unit of pressure defining the number of kilograms force per square
centimetre. |
| E43 | joule per square centimetre
A unit of energy defining the number of joules per square centimetre. |
| E44 | kilogram-force metre per square centimetre
A unit of energy defining the number of kilogram-force metres per square
centimetre. |
| E45 | milliohm |
| E46 | kilowatt hour per cubic metre
A unit of energy consumption expressed as kilowatt hour per cubic metre. |
| E47 | kilowatt hour per kelvin
A unit of energy consumption expressed as kilowatt hour per kelvin. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| E48 | service unit
A unit of count defining the number of service units (service unit: defined period / property / facility / utility of supply). |
| E49 | working day
A unit of count defining the number of working days (working day: a day on which work is ordinarily performed). |
| E5 | metric long ton
A metric unit of mass equal to 1016.047 kilograms (2240 pounds). |
| E50 | accounting unit
A unit of count defining the number of accounting units. |
| E51 | job
A unit of count defining the number of jobs. |
| E52 | run foot
A unit of count defining the number feet per run. |
| E53 | test
A unit of count defining the number of tests. |
| E54 | trip
A unit of count defining the number of trips. |
| E55 | use
A unit of count defining the number of times an object is used. |
| E56 | well
A unit of count defining the number of wells. |
| E57 | zone
A unit of count defining the number of zones. |
| E58 | exabit per second
A unit of information equal to 10^{12} bits (binary digits) per second. |
| E59 | exbibyte
A unit of information equal to 2^{60} bytes. |
| E60 | pebibyte
A unit of information equal to 2^{50} bytes. |
| E61 | tebibyte
A unit of information equal to 2^{40} bytes. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| E62 | gibibyte
A unit of information equal to 2^{37} bytes. |
| E63 | mebibyte
A unit of information equal to 2^{27} bytes. |
| E64 | kibibyte
A unit of information equal to 2^{17} bytes. |
| E65 | exbibit per metre
A unit of information equal to 2^{30} bits (binary digits) per metre. |
| E66 | exbibit per square metre
A unit of information equal to 2^{33} bits (binary digits) per square metre. |
| E67 | exbibit per cubic metre
A unit of information equal to 2^{36} bits (binary digits) per cubic metre. |
| E68 | gigabyte per second
A unit of information equal to 10^9 bytes per second. |
| E69 | gibibit per metre
A unit of information equal to 2^{37} bits (binary digits) per metre. |
| E70 | gibibit per square metre
A unit of information equal to 2^{37} bits (binary digits) per square metre. |
| E71 | gibibit per cubic metre
A unit of information equal to 2^{37} bits (binary digits) per cubic metre. |
| E72 | kibibit per metre
A unit of information equal to 2^{17} bits (binary digits) per metre. |
| E73 | kibibit per square metre
A unit of information equal to 2^{17} bits (binary digits) per square metre. |
| E74 | kibibit per cubic metre
A unit of information equal to 2^{17} bits (binary digits) per cubic metre. |
| E75 | mebibit per metre
A unit of information equal to 2^{27} bits (binary digits) per metre. |
| E76 | mebibit per square metre
A unit of information equal to 2^{27} bits (binary digits) per square metre. |
| E77 | mebibit per cubic metre
A unit of information equal to 2^{27} bits (binary digits) per cubic metre. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| E78 | petabit |
| | A unit of information equal to 10^{15} bits (binary digits). |
| E79 | petabit per second |

| G95 | litre per bar |
| G96 | cubic metre per bar |
| G97 | millilitre per bar |
| G98 | microhenry per kiloohm |
| G99 | microhenry per ohm |
| GB | gallon (US) per day |
| GBQ | gigabecquerel |
| GC | gram per 100 gram |
| GD | gross barrel |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| GDW | gram, dry weight |
| | A unit of mass defining the number of grams of a product, disregarding the water content of the product. |
| GE | pound per gallon (US) |
| GF | gram per metre (gram per 100 centimetres) |
| GFI | gram of fissile isotope |
| | A unit of mass defining the number of grams of a fissile isotope (fissile isotope:
an isotope whose nucleus is able to be split when irradiated with low energy neutrons). |
| GGR | great gross |
| | A unit of count defining the number of units in multiples of 1728 (12 x 12 x 12). |
| GH | half gallon (US) |
| GIA | gill (US) |
| GIC | gram, including container |
| | A unit of mass defining the number of grams of a product, including its container. |
| GII | gill (UK) |
| GIP | gram, including inner packaging |
| | A unit of mass defining the number of grams of a product, including its inner packaging materials. |
| GJ | gram per millilitre |
| GK | gram per kilogram |
| GL | gram per litre |
| GLD | dry gallon (US) |
| GLI | gallon (UK) |
| GLL | gallon (US) |
| GM | gram per square metre |
| GN | gross gallon |
| GO | milligrams per square metre |
| GP | milligram per cubic metre |
| GQ | microgram per cubic metre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| GRM | gram |
| GRN | grain |
| GRO | gross |
| | A unit of count defining the number of units in multiples of 144 (12 x 12). |
| GRT | gross register ton |
| | A unit of mass equal to the total cubic footage before deductions, where 1 register ton is equal to 100 cubic feet. Refer International Convention on tonnage measurement of ships. |
| GT | gross ton |
| | A unit of mass equal to 2440 pounds, see ton (UK). Refer International Convention on Tonnage measurement of Ships. |
| | Synonym: metric gross ton |
| GV | gigajoule |
| GW | gallon per thousand cubic feet |
| GWH | gigawatt hour |
| GY | gross yard |
| GZ | gage system |
| H03 | henry per kilohm |
| H04 | henry per ohm |
| H05 | millihenry per kilohm |
| H06 | millihenry per ohm |
| H07 | pascal second per bar |
| H08 | microbecquerel |
| H09 | reciprocal year |
| H1 | half page – electronic |
| H10 | reciprocal hour |
| H11 | reciprocal month |
| H12 | degree Celsius per hour |
| H13 | degree Celsius per minute |
| H14 | degree Celsius per second |
| H15 | square centimetre per gram |
| H2 | half litre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| HA | hank |
| | A unit of length, typically for yarn. |
| HAR | hectare |
| HBA | hectobar |
| HBX | hundred boxes |
| | A unit of count defining the number of boxes in multiples of one hundred box units. |
| HC | hundred count |
| | A unit of count defining the number of units counted in multiples of 100. |
| HD | half dozen |
| HDW | hundred kilogram, dry weight |
| | A unit of mass defining the number of hundred kilograms of a product, disregarding the water content of the product. |
| HE | hundredth of a carat |
| HF | hundred feet |
| HGM | hectogram |
| HH | hundred cubic feet |
| | A unit of volume equal to one hundred cubic feet. |
| HI | hundred sheet |
| HIU | hundred international unit |
| | A unit of count defining the number of international units in multiples of 100. |
| HJ | metric horse power |
| HK | hundred kilogram |
| HKM | hundred kilogram, net mass |
| | A unit of mass defining the number of hundred kilograms of a product, after deductions. |
| HL | hundred feet (linear) |
| HLT | hectolitre |
| HM | mile per hour |
| HMQ | million cubic metre |
| | A unit of volume equal to one million cubic metres. |
| HMT | hectometre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| HN | conventional millimetre of mercury |
| HO | hundred troy ounce |
| HP | conventional millimetre of water |
| HPA | hectolitre of pure alcohol
A unit of volume equal to one hundred litres of pure alcohol. |
| HS | hundred square feet |
| HT | half hour |
| HTZ | hertz |
| HUR | hour |
| HY | hundred yard |
| IA | inch pound (pound inch) |
| IC | count per inch |
| IE | person
A unit of count defining the number of persons. |
| IF | inches of water
A unit of pressure defining the number of inches in a water column. |
| II | column inch |
| IL | inch per minute |
| IM | impression |
| INH | inch |
| INK | square inch |
| INQ | cubic inch
Synonym: inch cubed |
| IP | insurance policy |
| ISD | international sugar degree
A unit of measure defining the sugar content of a solution, expressed in degrees. |
| IT | count per centimetre |
| IU | inch per second |
| IV | inch per second squared |
| J2 | joule per kilogram |
| JB | jumbo |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| JE | joule per kelvin |
| JG | jug |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| JK | megajoule per kilogram |
| JM | megajoule per cubic metre |
| JNT | pipeline joint |
| | A count of the number of pipeline joints. |
| JO | joint |
| JOU | joule |
| JPS | hundred metre |
| | A unit of count defining the number of 100 metre lengths. |
| JR | jar |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| JWL | number of jewels |
| | A unit of count defining the number of jewels (jewel: precious stone). |
| K1 | kilowatt demand |
| | A unit of measure defining the power load measured at predetermined intervals. |
| K2 | kilovolt ampere reactive demand |
| | A unit of measure defining the reactive power demand equal to one kilovolt ampere of reactive power. |
| K3 | kilovolt ampere reactive hour |
| | A unit of measure defining the accumulated reactive energy equal to one kilovolt ampere of reactive power per hour. |
| K5 | kilovolt ampere (reactive) |
| | Use kilovar (common code KVR) |
| K6 | kilolitre |
| KA | cake |
| | A unit of count defining the number of cakes (cake: object shaped into a flat, compact mass). |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| KAT | katal
A unit of catalytic activity defining the catalytic activity of enzymes and other catalysts. |
| KB | kilocharacter
A unit of information equal to 10^3 (1000) characters. |
| KBA | kilobar |
| KCC | kilogram of choline chloride
A unit of mass equal to one thousand grams of choline chloride. |
| KD | kilogram decimal |
| KDW | kilogram drained net weight
A unit of mass defining the net number of kilograms of a product, disregarding the liquid content of the product. |
| KEL | kelvin
Refer ISO 80000-5 (Quantities and units — Part 5: Thermodynamics) |
| KF | kilopacket |
| KG | keg
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| KGM | kilogram
A unit of mass equal to one thousand grams. |
| KGS | kilogram per second |
| KHY | kilogram of hydrogen peroxide
A unit of mass equal to one thousand grams of hydrogen peroxide. |
| KHZ | kilohertz |
| KI | kilogram per millimetre width |
| KIC | kilogram, including container
A unit of mass defining the number of kilograms of a product, including its container. |
| KIP | kilogram, including inner packaging
A unit of mass defining the number of kilograms of a product, including its inner packaging materials. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| KJ | kilosegment |
| | A unit of information equal to 10^3 (1000) segments. |
| KJO | kilojoule |
| KL | kilogram per metre |
| KLK | lactic dry material percentage |
| | A unit of proportion defining the percentage of dry lactic material in a product. |
| KMA | kilogram of methylamine |
| | A unit of mass equal to one thousand grams of methylamine. |
| KMH | kilometre per hour |
| KMK | square kilometre |
| KMQ | kilogram per cubic metre |
| | A unit of weight expressed in kilograms of a substance that fills a volume of one cubic metre. |
| KMT | kilometre |
| KNI | kilogram of nitrogen |
| | A unit of mass equal to one thousand grams of nitrogen. |
| KNS | kilogram named substance |
| | A unit of mass equal to one kilogram of a named substance. |
| KNT | knot |
| KO | milliequivalence caustic potash per gram of product |
| | A unit of count defining the number of milligrams of potassium hydroxide per gram of product as a measure of the concentration of potassium hydroxide in the product. |
| KPA | kilopascal |
| KPH | kilogram of potassium hydroxide (caustic potash) |
| | A unit of mass equal to one thousand grams of potassium hydroxide (caustic potash). |
| KPO | kilogram of potassium oxide |
| | A unit of mass equal to one thousand grams of potassium oxide. |
| KPP | kilogram of phosphorus pentoxide (phosphoric anhydride) |
| | A unit of mass equal to one thousand grams of phosphorus pentoxide phosphoric anhydride. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| KR | kiloroentgen |
| KS | thousand pound per square inch |
| KSD | kilogram of substance 90 % dry
A unit of mass equal to one thousand grams of a named substance that is 90% dry. |
| KSH | kilogram of sodium hydroxide (caustic soda)
A unit of mass equal to one thousand grams of sodium hydroxide (caustic soda). |
| KT | kit
A unit of count defining the number of kits (kit: tub, barrel or pail). |
| KTM | kilometre |
| KTN | kilotonne |
| KUR | kilogram of uranium
A unit of mass equal to one thousand grams of uranium. |
| KVA | kilovolt - ampere |
| KVR | kilovar |
| KVT | kilovolt |
| KW | kilograms per millimetre |
| KWH | kilowatt hour |
| KWO | kilogram of tungsten trioxide
A unit of mass equal to one thousand grams of tungsten trioxide. |
| KWT | kilowatt |
| KX | millilitre per kilogram |
| L2 | litre per minute |
| LA | pound per cubic inch |
| LAC | lactose excess percentage
A unit of proportion defining the percentage of lactose in a product that exceeds a defined percentage level. |
| LBR | pound |
| LBT | troy pound (US) |
| LC | linear centimetre |
| LD | litre per day |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| LE | lite |
| LEF | leaf
A unit of count defining the number of leaves. |
| LF | linear foot
A unit of count defining the number of feet (12-inch) in length of a uniform width object. |
| LH | labour hour
A unit of time defining the number of labour hours. |
| LI | linear inch |
| LJ | large spray |
| LK | link
A unit of distance equal to 0.01 chain. |
| LM | linear metre
A unit of count defining the number of metres in length of a uniform width object. |
| LN | length
A unit of distance defining the linear extent of an item measured from end to end. |
| LO | lot [unit of procurement]
A unit of count defining the number of lots (lot: a collection of associated items). |
| LP | liquid pound
A unit of mass defining the number of pounds of a liquid substance. |
| LPA | litre of pure alcohol
A unit of volume equal to one litre of pure alcohol. |
| LR | layer
A unit of count defining the number of layers. |
| LS | lump sum
A unit of count defining the number of whole or a complete monetary amounts. |
| LTN | ton (UK) or long ton (US) |
| LTR | litre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| LUB | metric ton, lubricating oil
A unit of mass defining the number of metric tons of lubricating oil. |
| LUM | lumen |
| LUX | lux |
| LX | linear yard per pound |
| LY | linear yard

A unit of count defining the number of 36-inch units in length of a uniform width

object. |
| M0 | magnetic tape |
| M1 | milligram per litre |
| M4 | monetary value

A unit of measure expressed as a monetary amount. |
| M5 | microcurie |
| M7 | micro-inch |
| M9 | million Btu per 1000 cubic feet |
| MA | machine per unit |
| MAH | megavolt ampere reactive hours

A unit of electrical reactive power defining the total amount of reactive power across a power system. |
| MAL | mega litre |
| MAM | megametre |
| MAR | megavolt ampere reactive

A unit of electrical reactive power represented by a current of one thousand amperes flowing due a potential difference of one thousand volts where the sine

of the phase angle between them is 1. |
| MAW | megawatt

A unit of power defining the rate of energy transferred or consumed when a current of 1000 amperes flows due to a potential of 1000 volts at unity power factor. |
| MBE | thousand standard brick equivalent

A unit of count defining the number of one thousand brick equivalent units. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| MBF | thousand board feet
A unit of volume equal to one thousand board feet. |
| MBR | millibar |
| MC | microgram |
| MCU | millicurie |
| MD | air dry metric ton
A unit of count defining the number of metric tons of a product, disregarding the water content of the product. |
| MF | milligram per square foot per side |
| MGM | milligram |
| MHZ | megahertz |
| MIK | square mile |
| MIL | thousand |
| MIN | minute [unit of time] |
| MIO | million |
| MIU | million international unit
A unit of count defining the number of international units in multiples of 10?. |
| MK | milligram per square inch |
| MLD | milliard
Synonym: billion (US) |
| MLT | millilitre |
| MMK | square millimetre |
| MMQ | cubic millimetre |
| MMT | millimetre |
| MND | kilogram, dry weight
A unit of mass defining the number of kilograms of a product, disregarding the water content of the product. |
| MON | month
Unit of time equal to 1/12 of a year of 365,25 days. |
| MPA | megapascal |
| MQ | thousand metre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| MQH | cubic metre per hour |
| MQS | cubic metre per second |
| MSK | metre per second squared |
| MT | mat |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| MTK | square metre |
| MTQ | cubic metre
Synonym: metre cubed |
| MTR | metre |
| MTS | metre per second |
| MV | number of mults |
| MVA | megavolt - ampere |
| MWH | megawatt hour (1000 kW.h)
A unit of power defining the total amount of bulk energy transferred or consumed. |
| N1 | pen calorie
A unit of count defining the number of calories prescribed daily for parenteral/enteral therapy. |
| N2 | number of lines |
| N3 | print point |
| NA | milligram per kilogram |
| NAR | number of articles
A unit of count defining the number of articles (article: item). |
| NB | barge |
| NBB | number of bobbins |
| NC | car |
| NCL | number of cells
A unit of count defining the number of cells (cell: an enclosed or circumscribed space, cavity, or volume). |
| ND | net barrel |
| NE | net litre |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| NEW | newton |
| NF | message
A unit of count defining the number of messages. |
| NG | net gallon (us) |
| NH | message hour |
| NI | net imperial gallon |
| NIU | number of international units
A unit of count defining the number of international units. |
| NJ | number of screens |
| NL | load
A unit of volume defining the number of loads (load: a quantity of items carried
or processed at one time). |
| NMI | nautical mile |
| NMP | number of packs
A unit of count defining the number of packs (pack: a collection of objects packaged together). |
| NN | train |
| NPL | number of parcels |
| NPR | number of pairs
A unit of count defining the number of pairs (pair: item described by two's). |
| NPT | number of parts
A unit of count defining the number of parts (part: component of a larger entity). |
| NQ | mho |
| NR | micromho |
| NRL | number of rolls
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| NT | net ton
A unit of mass equal to 2000 pounds, see ton (US). Refer International Convention on tonnage measurement of Ships. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| NTT | net register ton

A unit of mass equal to the total cubic footage after deductions, where 1 register ton is equal to 100 cubic feet. Refer International Convention on tonnage measurement of Ships. |
| NU | newton metre |
| NV | vehicle |
| NX | part per thousand

A unit of proportion equal to 10^{-3} . |
| NY | pound per air dry metric ton |
| OA | panel

A unit of count defining the number of panels (panel: a distinct, usually rectangular, section of a surface). |
| ODE | ozone depletion equivalent

A unit of mass defining the ozone depletion potential in kilograms of a product relative to the calculated depletion for the reference substance, Trichlorofluoromethane (CFC-11). |
| OHM | ohm |
| ON | ounce per square yard |
| ONZ | ounce |
| OP | two pack |
| OT | overtime hour

A unit of time defining the number of overtime hours. |
| OZ | ounce av

A unit of measure equal to 1/16 of a pound or about 28.3495 grams (av = avoirdupois). |
| OZA | fluid ounce (US) |
| OZI | fluid ounce (UK) |
| P0 | page - electronic |
| P1 | percent

A unit of proportion equal to 0.01. |
| P2 | pound per foot |
| P3 | three pack |

| CL21 Measurement unit code (UNECE Recommendation 20) | |
|---|---|
| Code specifying the unit of measurement. | |
| P4 | four pack |
| P5 | five pack
A unit of count defining the number of five-packs (five-pack: set of five items packaged together). |
| P6 | six pack |
| P7 | seven pack |
| P8 | eight pack |
| P9 | nine pack |
| PA | packet
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| PAL | pascal |
| PB | pair inch |
| PD | pad
A unit of count defining the number of pads (pad: block of paper sheets fastened together at one end). |
| PE | pound equivalent |
| PF | pallet (lift)
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| PFL | proof litre
A unit of volume equal to one litre of proof spirits, or the alcohol equivalent thereof. Used for measuring the strength of distilled alcoholic liquors, expressed as a percentage of the alcohol content of a standard mixture at a specific temperature. |
| PG | plate
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| PGL | proof gallon |
| | A unit of volume equal to one gallon of proof spirits, or the alcohol equivalent thereof. Used for measuring the strength of distilled alcoholic liquors, expressed as a percentage of the alcohol content of a standard mixture at a specific temperature. |
| PI | pitch |
| | A unit of count defining the number of characters that fit in a horizontal inch. |
| PK | pack |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet).
Synonym: package |
| PL | pail |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| PLA | degree Plato |
| | A unit of proportion defining the sugar content of a product, especially in relation to beer. |
| PM | pound percentage |
| PN | pound net |
| PO | pound per inch of length |
| PQ | page per inch |
| | A unit of quantity defining the degree of thickness of a bound publication, expressed as the number of pages per inch of thickness. |
| PR | pair |
| | A unit of count defining the number of pairs (pair: item described by two's). |
| PS | pound-force per square inch |
| PT | pint (US) |
| | Use liquid pint (common code PTL) |
| PTD | dry pint (US) |
| PTI | pint (UK) |
| PTL | liquid pint (US) |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| PU | tray / tray pack |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| PV | half pint (US) |
| PW | pound per inch of width |
| PY | peck dry (US) |
| PZ | peck dry (UK) |
| Q3 | meal |
| | A unit of count defining the number of meals (meal: an amount of food to be eaten on a single occasion). |
| QA | page - facsimile |
| | A unit of count defining the number of facsimile pages. |
| QAN | quarter (of a year) |
| | A unit of time defining the number of quarters (3 months). |
| QB | page - hardcopy |
| | A unit of count defining the number of hardcopy pages (hardcopy page: a page rendered as printed or written output on paper, film, or other permanent medium). |
| QD | quarter dozen |
| QH | quarter hour |
| QK | quarter kilogram |
| QR | quire |
| | A unit of count for paper, expressed as the number of quires (quire: a number of paper sheets, typically 25). |
| QT | quart (US) |
| | Use liquid quart (common code QTL) |
| QTD | dry quart (US) |
| QTI | quart (UK) |
| QTL | liquid quart (US) |
| QTR | quarter (UK) |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| R1 | pica |
| | A unit of count defining the number of picas. (pica: typographical length equal to 12 points or 4.22 mm (approx.)). |
| R4 | calorie |
| R9 | thousand cubic metre |
| | A unit of volume equal to one thousand cubic metres |
| RA | rack |
| RD | rod |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| RG | ring |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| RH | running or operating hour |
| | A unit of time defining the number of hours of operation. |
| RK | roll metric measure |
| RL | reel |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| RM | ream |
| | A unit of count for paper, expressed as the number of reams (ream: a large quantity of paper sheets, typically 500). |
| RN | ream metric measure |
| RO | roll |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| RP | pound per ream |
| | A unit of mass for paper, expressed as pounds per ream. (ream: a large quantity of paper, typically 500 sheets). |
| RPM | revolutions per minute |
| | Refer ISO/TC12 SI Guide |
| RPS | revolutions per second |
| | Refer ISO/TC12 SI Guide |

| CL21 Measurement unit code (UNECE Recommendation 20) | |
|---|--|
| Code specifying the unit of measurement. | |
| RS | reset |
| RT | revenue ton mile
A unit of information typically used for billing purposes, expressed as the number of revenue tons (revenue ton: either a metric ton or a cubic metres, whichever is the larger), moved over a distance of one mile. |
| RU | run |
| S3 | square foot per second
Synonym: foot squared per second |
| S4 | square metre per second
Synonym: metre squared per second (square metres/second US) |
| S5 | sixty fourths of an inch |
| S6 | session |
| S7 | storage unit |
| S8 | standard advertising unit |
| SA | sack
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| SAN | half year (6 months)
A unit of time defining the number of half years (6 months). |
| SCO | score
A unit of count defining the number of units in multiples of 20. |
| SCR | scruple |
| SD | solid pound |
| SE | section |
| SEC | second [unit of time] |
| SET | set
A unit of count defining the number of sets (set: a number of objects grouped together). |
| SG | segment
A unit of information equal to 64000 bytes. |
| SHT | shipping ton
A unit of mass defining the number of tons for shipping. |
| SIE | siemens |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| SK | split tank truck |
| SL | slipsheet
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| SMI | mile (statute mile) |
| SN | square rod |
| SO | spool
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| SP | shelf package |
| SQ | square
A unit of count defining the number of squares (square: rectangular shape). |
| SQR | square, roofing
A unit of count defining the number of squares of roofing materials, measured in multiples of 100 square feet. |
| SR | strip
A unit of count defining the number of strips (strip: long narrow piece of an object). |
| SS | sheet metric measure |
| SST | short standard (7200 matches) |
| ST | sheet
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| STI | stone (UK) |
| STK | stick, cigarette
A unit of count defining the number of cigarettes in the smallest unit for stock-taking and/or duty computation. |
| STL | standard litre
A unit of volume defining the number of litres of a product at a temperature of 15 degrees Celsius, especially in relation to hydrocarbon oils. |
| STN | ton (US) or short ton (UK/US)
Synonym: net ton (2000 lb) |

| CL21 Measurement unit code (UNECE Recommendation 20) | |
|---|--|
| Code specifying the unit of measurement. | |
| SV | skid
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| SW | skein
A unit of count defining the number of skeins (skein: a loosely-coiled bundle of
yarn or thread). |
| SX | shipment
A unit of count defining the number of shipments (shipment: an amount of
goods shipped or transported). |
| T0 | telecommunication line in service
A unit of count defining the number of lines in service. |
| T1 | thousand pound gross |
| T3 | thousand piece
A unit of count defining the number of pieces in multiples of 10 (piece: an
individual part of a larger whole). |
| T4 | thousand bag |
| T5 | thousand casing |
| T6 | thousand gallon (US) |
| T7 | thousand impression |
| T8 | thousand linear inch |
| TA | tenth cubic foot |
| TAH | kiloampere hour (thousand ampere hour) |
| TC | truckload |
| TD | therm |
| TE | tote |
| TF | ten square yard |
| TI | thousand square inch |
| TIC | metric ton, including container
A unit of mass defining the number of metric tons of a product, including its
container. |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| TIP | metric ton, including inner packaging
A unit of mass defining the number of metric tons of a product, including its inner packaging materials. |
| TJ | thousand square centimetre |
| TK | tank, rectangular
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| TL | thousand feet (linear) |
| TMS | kilogram of imported meat, less offal
A unit of mass equal to one thousand grams of imported meat, disregarding less valuable by-products such as the entrails. |
| TN | tin
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| TNE | tonne (metric ton)
Synonym: metric ton |
| TP | ten pack
A unit of count defining the number of items in multiples of 10. |
| TPR | ten pair
A unit of count defining the number of pairs in multiples of 100 (pair: item described by two's). |
| TQ | thousand feet |
| TQD | thousand cubic metre per day
A unit of volume equal to one thousand cubic metres per day. |
| TR | ten square feet |
| TRL | trillion (EUR) |
| TS | thousand square feet |
| TSD | tonne of substance 90 % dry |
| TSH | ton of steam per hour |
| TT | thousand linear metre |
| TU | tube
Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |

| CL21 | Measurement unit code (UNECE Recommendation 20) |
|---|--|
| Code specifying the unit of measurement. | |
| TV | thousand kilogram |
| TW | thousand sheet |
| TY | tank, cylindrical |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| U1 | treatment |
| | A unit of count defining the number of treatments (treatment: subjection to the action of a chemical, physical or biological agent). |
| U2 | tablet |
| | A unit of count defining the number of tablets (tablet: a small flat or compressed solid object). |
| UA | torr |
| UB | telecommunication line in service average |
| | A unit of count defining the average number of lines in service. |
| UC | telecommunication port |
| | A unit of count defining the number of network access ports. |
| UD | tenth minute |
| UE | tenth hour |
| UF | usage per telecommunication line average |
| UH | ten thousand yard |
| UM | million unit |
| VA | volt ampere per kilogram |
| VI | vial |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| VLT | volt |
| VP | percent volume |
| | A measure of concentration, typically expressed as the percentage volume of a solute in a solution. |
| VQ | bulk |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|---|
| VS | visit |
| W2 | wet kilo
A unit of mass defining the number of kilograms of a product, including the water content of the product. |
| W4 | two week |
| WA | watt per kilogram |
| WB | wet pound
A unit of mass defining the number of pounds of a material, including the water content of the material. |
| WCD | cord
A unit of volume used for measuring lumber. One board foot equals 1/12 of a cubic foot. |
| WE | wet ton
A unit of mass defining the number of tons of a material, including the water content of the material. |
| WEB | weber |
| WEE | week |
| WG | wine gallon
A unit of volume equal to 231 cubic inches. |
| WH | wheel |
| WHR | watt hour |
| WI | weight per square inch |
| WM | working month
A unit of time defining the number of working months. |
| WR | wrap |
| WSD | standard
A unit of volume of finished lumber equal to 165 cubic feet. |
| WTT | watt |
| WW | millilitre of water
A unit of volume equal to the number of millilitres of water. |
| X1 | chain |
| YDK | square yard |

CL21 Measurement unit code (UNECE Recommendation 20)**Code specifying the unit of measurement.**

| | |
|------------|--|
| YDQ | cubic yard |
| YL | hundred linear yard |
| YRD | yard |
| YT | ten yard |
| Z1 | lift van |
| Z2 | chest |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| Z3 | cask |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| Z4 | hogshead |
| | Use UN/ECE Recommendation 21 (refer to Note 2 in the spreadsheet introduction, 1st sheet). |
| Z5 | lug |
| Z6 | conference point |
| Z8 | newspage agate line |
| ZP | page |
| | A unit of count defining the number of pages. |
| ZZ | mutually defined |
| | A unit of measure as agreed in common between two or more parties. |

3.2.8.23 CL22 – Guarantee status

| CL22 Guarantee status (eTIR) | |
|--|-----------------------------|
| 001 | Issued |
| 002 | In use |
| 003 | Cancelled |
| 004 | Requested cancellation |
| 005 | Discharged in all countries |

3.2.8.24 CL23 – Holder status

| CL23 Holder status (eTIR) | |
|---------------------------------------|-----------------|
| 001 | Active |
| 002 | Withdrawn |
| 003 | End of activity |

3.2.8.25 CL24 – Control result code

| CL24 Control result code (eTIR) | |
|---|------------------|
| 001 | Satisfactory |
| 002 | Non satisfactory |

3.2.8.26 CL25 – Control type code

| CL25 Control type code (eTIR) | |
|---|-------------|
| 001 | Seals check |

3.2.8.27 CL26 – Message types (eTIR)

For message type codes and definitions see Table 3.1 (chapter 3.2.4.1) and Table 3.2 (chapter 3.2.4.2).

| 3.2.8.28 CL99 – Error code | |
|-----------------------------------|---|
| CL99 | Error code (eTIR) |
| 12 | Incorrect (code) value
Value of an element in a message is outside the predefined domain or not part of the applicable code list. |
| 13 | Missing
A mandatory/required element is missing in the received data, e.g. a required element like the MRN for the Arrival Advice (C_ARR_ADV) is not present. |
| 14 | Value not supported in this position (code value constraint)
Notification that a recipient does not support use of the specific value of an identified element in the position where it is used. This type of error refers to the use of an improper code value for a specific element. |
| 15 | Not supported in this position
An element is not allowed to have a value due to the following two reasons:
- The element is not allowed to be present according to the FMS message specification.
- The element is not allowed to be present according to some additional condition, e.g.
if type of packages has the value 'UNPACKED' then number of package can not have a value. |
| 19 | Invalid decimal notation
The decimal notation is not according to the decimal formatting standards UCI, UCM, UCD. |
| 26 | Duplicate detected
The same interchange is received again. Duplication is detected by reception of an interchange reference that has already been received. |
| 35 | Too many repetitions
Too many occurrences of a segment or entity. |
| 37 | Invalid type characters
Notification that one or more numeric characters were used in an alphabetic element or that one or more alphabetic characters were used in a numeric element. |
| 38 | Missing digit in front of decimal sign
Notification that a decimal sign is not preceded by one or more digits. |

CL99 Error code (eTIR)

- | | |
|-----------|--|
| 39 | Element too long (length constraint)
Notification that the length of the element received exceeded the maximum length specified. |
| 40 | Element too short (length constraint)
Notification that the length of an element received is shorter than the minimum length specified. |
| 92 | Message out of sequence
The message can not be processed, because the receiver is not in a proper state. |
-

4.2.3.2. *UN/EDIFACT*

Only E9 and E10 messages will be mapped in the UNEDIFACT format. Other messages will only be exchanged using the XML format

4.2.3.2.1 E9 - Advanced cargo information

a. Introduction

This message allows the holder to provide Customs authorities of departure with all information required to begin a TIR transport. It also allows the holder to amend the information and complement it in case of multiple loading places.

b. Entities

See Chapter 3.2.5.1.1.i.

c. Entities and attributes

See Chapter 3.2.5.2.1.i.

d. Rules and conditions

See Chapter 3.2.6.

e. Cross Reference (English only)

Annex I

Requirements list

The requirements list provides an artefact for storing discrete, measurable business requirements and constraints. As requirements and constraints are discovered in performing the modelling steps they are added to this running list by the secretariat. Note: requirements shall be referenced in all modelling artefacts, and if necessary, each requirement should reference modelling artefact(s) that are based on it.

| <i>Req. #</i> | <i>Statement</i> | <i>Source</i> | <i>Date</i> | <i>Status</i> |
|---------------|---|---------------|-----------------------|----------------|
| 1 | The international organization organizes and ensures the proper functioning of the guarantee chain for a TIR transport. A TIR transport can be associated to one and only one international organization. The international organization can represent the guarantee chain for an unlimited number of transports. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 2 | The international organization has member associations. The membership is associated to at least one country. An association has to be member of at least one international organization. An international organization can have any number of member associations. A membership can be associated to various countries (e.g. FEBETRA –IRU has a membership valid for Belgium but also for Luxembourg) and one country can be covered by various memberships. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 3 | An association has two roles represented by the subdivision of the association into its issuing role (issuing association), responsible for the issuance of TIR Carnets to the TIR Carnets holders, and its guaranteeing role (guaranteeing association), representing the guarantee chain in its national territory. The two roles cannot be disconnected | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 4 | The issuing association issues TIR Carnets for TIR transports. One and only one issuing association is issuing the TIR Carnet for a TIR transport. The issuing association can issue TIR Carnets for numerous TIR transports. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 5 | Deleted | | | |
| 6 | A road vehicle can serve in numerous TIR transports. A TIR transport is performed by means of one or many road vehicles. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 7 | A road vehicle is composed of zero or many load compartments. A load compartment is part of a single road vehicle. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |

| <i>Req. #</i> | <i>Statement</i> | <i>Source</i> | <i>Date</i> | <i>Status</i> |
|---------------|---|---------------|-----------------------|----------------|
| 8 | A sealed loading unit is a generalization of a container and a load compartment of a road vehicle. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 9 | A sealed loading unit can contain numerous loads, mentioned in the TIR Carnet as Goods Manifest Line Items. The goods described in the Goods Manifest Line Item are contained in one and only one sealed loading unit. In case of heavy and bulky goods (HBG), the goods described in the Goods Manifest Line Item may not be contained in a sealed loading unit. | | | Used in
1.6 |
| 10 | A TIR transport is composed of TIR operations. The number of TIR operations within a TIR transport is at the moment limited to ten with the current paper system and has a minimum of two (these limitations should be extensible; therefore, two to many is more advisable). A TIR operation is part of one and only one TIR transport. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 11 | A Goods Manifest Line Item is associated to one and only one TIR transport. A TIR transport can have from one to many Goods Manifest Line Items. | | | Used in
1.6 |
| 12 | A TIR transport is performed by one and only one TIR Carnet holder. A TIR Carnet holder can perform any number of TIR transports. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 13 | The TIR operation is started at one and only one Customs office and terminated at one and only one Customs office. A Customs office can start and terminate any number of TIR operations. | ExG
Warsaw | 28-29
June
2004 | Used in
1.6 |
| 14 | The goods described in one single Goods Manifest Line Item arrive at and have their termination certified by a one and only one Customs office of destination. A Customs office can “terminate” any number of goods described in Goods Manifest Line Items. | | | Used in
1.6 |
| 15 | A Goods Manifest Line Item has one and only one intended Customs office of destination. A Customs office can be the intended destination of numerous Goods Manifest Line Items. | | | Used in
1.6 |
| 16 | Deleted | | | |
| 17 | The goods described in a Goods Manifest Line Item are loaded at a single Customs office of departure. A Customs office can be the departure for any number of goods described in Goods Manifest Line Items. | | | Used in
1.6 |
| 18 | A Customs office is located in one and only one Contracting Party. A Contracting Party can have | ExG
Warsaw | 28-29
June | Used in
1.6 |

| <i>Req. #</i> | <i>Statement</i> | <i>Source</i> | <i>Date</i> | <i>Status</i> |
|---------------|--|---------------|--------------------|---------------|
| | any number of Customs offices. | | 2004 | |
| 19 | A transport operator is established in one and only one Contracting Party. A Contracting Party can be the residence of numerous transport operators. | ExG Warsaw | 28-29 June 2004 | Used in 1.6 |
| 20 | The printing and distribution of TIR Carnets can only be performed by an approved international organization. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 21 | Only an approved association can issue TIR Carnets. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 22 | TIR Carnets shall be issued only to authorized persons. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 23 | A TIR transport can only be performed by means of road vehicles, combinations of vehicles or containers previously approved under the conditions set forth in Chapter III of the Convention. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 24 | A TIR transport must be performed under cover of a TIR Carnet. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 25 | A TIR transport must be guaranteed by associations approved in accordance with the provisions of Article 6 of the Convention. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 26 | Customs authorities can use national and international risk analysis data to assess risk in relation to the TIR transport. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 27 | When the TIR transport has ended, the TIR Carnet is returned to the holder, then to the association and finally to the international organization. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 28 | The international organization and the associations uses the control system for TIR Carnets to check TIR Carnets. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 29 | The international organization can perform risk analysis with data stored in the repository. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 30 | Risk analysis can be performed with data from the control system for TIR Carnets. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 31 | The control system for TIR Carnets stores data regarding the distribution of TIR Carnets. | ExG Geneva | 26-27 October 2004 | Used in 1.2.1 |
| 32 | The control system for TIR Carnets stores data on the termination of TIR operation at Customs | ExG | 26-27 October | Used in |

Annex II

TIR glossary

The TIR glossary captures any terms and acronyms the reader might need to understand about the TIR procedure domain. The glossary is maintained in a running list by the secretariat throughout the requirements gathering/modelling process. This document is used to define terminology associated with TIR procedure business process modelling as well as terminology specific to it, explaining terms (or groups of terms from a sub-business domain) that may be unfamiliar to the reader of the use-case descriptions or other project documents. Often, this document can be used as an informal data dictionary, capturing data definitions so that use-case descriptions and other project documents can focus on what the system shall do with the information. Reference may be made to external documents that give such details.

| <i>Term</i> | <i>Definition</i> | <i>Source</i> | <i>Date</i> |
|---------------------------|---|-------------------------------|---------------------|
| Advance cargo information | Information provided to the competent Customs authorities within the prescribed deadlines and in the prescribed form and manner of the intention of the holder to place goods under the TIR procedure or pursue a TIR transport. | ECE/TRANS /WP.30/GE.1 /2010/2 | GE.1 8-9 March 2010 |
| Consignee | Person receiving goods | ExG Warsaw | ExG 28-29 June 2004 |
| Consignor | Person consigning goods on behalf of the TIR Carnet holder | ExG Warsaw | ExG 28-29 June 2004 |
| Container | An article of transport equipment (liftvan, movable tank or similar structure):

1. fully or partially enclosed to constitute a compartment intended for containing goods;

2. of a permanent character and accordingly strong enough to be suitable for repeated use;

3. specially designed to facilitate the transport of goods by one or more modes of transport without intermediate unloading;

4. designed for ready handling, particularly when being transferred from one mode of transport to another;

5. designed to be easy to fill and to empty, and

6. having an internal volume of one cubic metre or more | Art. 1 (j) | ExG 28-29 June 2004 |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> | <i>Date</i> |

28-29
June
2004 |
| Start of a TIR operation | The road vehicle, the combination of vehicles or the container have been presented for purposes of control to the Customs office of departure or entry (en route) together with the load and the TIR Carnet relating thereto and the TIR Carnet has been accepted by the Customs office | Art. 1 (c) | ExG
26-27
October
2004 |
| Termination of a TIR operation | The road vehicle, the combination of vehicles or the container have been presented for purposes of control to the Customs office of destination or of exit (en route) together with the load and the TIRE Carnet relating thereto. | Art. 1 (d) | ExG
26-27
October
2004 |
| TIR Carnet holder | The person to whom a TIR Carnet has been issued in accordance with the relevant provisions of the TIR Convention and on whose behalf a Customs declaration has been made in the form of a TIR Carnet indicating a wish to place goods under the TIR procedure at the Customs office of departure. He shall be responsible for the presentation of the road vehicle, combination of vehicles or the container together with the load and the TIR Carnet relating thereto at the Customs office of departure, the Customs office en route and the Customs office of destination and for due observance of the other relevant provisions of the TIR Convention. | Art. 1 (o) | ExG
28-29
June
2004 |
| TIR operation | The part of a TIR transport that is carried out in a Contracting Party from a Customs office of departure or entry (en route) to a Customs office of destination (en route) | Art. 1 (b) | ExG

Annex III

Current TIR Carnet data elements records

This annex contains the results of the survey on current TIR Carnet elements, which had been held by the secretariat among participants of the Expert Group in the course of 2002. In the survey, participants had been requested to supply information on each individual data element contained in the paper TIR Carnet.

This Annex presents the amended records, as discussed by and presented to the Expert Group at its second session in Prague. To understand the records correctly, certain premises should be taken into account:

- a) each actor, writing a specific piece of information, is assumed to read it as well;
- b) each actor, writing a specific piece of information, is assumed to validate it as well; in addition, the same information may also be validated by another actor;
- c) updating of information refers to the act of changing data as a result of a certain action or event occurring; after updating, the updated data will have to be validated¹ (ExG/COMP/2002/10, para. 14 and Annex 4).

¹ In the course of the session, the issue of distinction between correcting and updating of data was raised, because in the current situation, where the TIR Carnet is filled-in by hand, it may not seem relevant to distinguish between the two actions. In an electronic environment, however, it is important to introduce such distinction because these two actions may take place at different times, which may require or lead to different procedures. Within the context of the data records of Annex 3, updating does NOT include corrections.

Elaboration of a class diagram – TIR Operation example

On the basis of the requirements contained in Annex 1 of the Reference Model, we will construct the part of the class diagram depicting the TIR operation.

First, we draw the class:

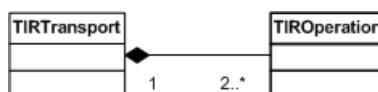

In the list of Requirements, only two requirements deal with the TIR operation:

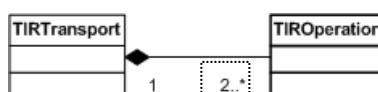

Req.10 A TIR transport is composed of TIR operations. The number of TIR operations within a TIR transport is at the moment limited to 10 with the current paper system and has a minimum of 2 (these limitations should be extensible; therefore a two to many is more advisable). A TIR operation is part of one and only one TIR transport.

Req. 13 The TIR operation is started at one and only one Customs office and terminated at one and only one Customs office. A Customs office can start and terminate any number of TIR operations.

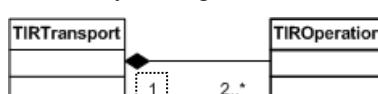

Requirement 10 first stipulates that *a TIR transport is composed of TIR operations*. UML uses a line terminated by a black diamond to indicate the composition (◆—):

It also states that the number of TIR operations within a TIR transport is at the moment limited to 10 with the current paper system and has a minimum of 2 (these limitations should be extensible; therefore a two to many is more advisable). This is translated in UML by indicating on the TIR operation side of the line “2..*” (multiplicity). The multiplicity indicates the number of objects participating in the relationship:

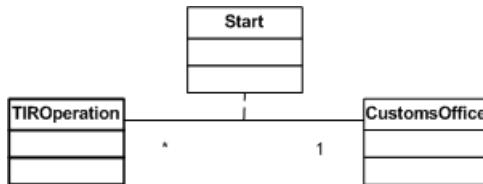

Finally, requirement 10 says that *a TIR operation is part of one and only one TIR transport*. This is translated by writing “1” on the TIR transport side of the relationship:

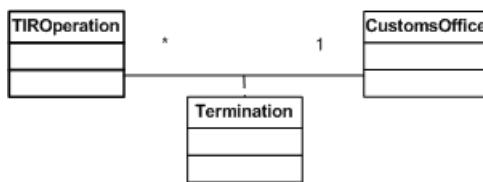

Requirement 13 contains information about two relationships between the classes *TIR Operation* and *Customs Office*. First, we will identify the two relationships, which are called “associations”. Requirement 13 stipulates that *the TIR operation is started at ... Customs office.... Start* is therefore the first association between the classes *TIR Operation* and *Customs Office*:

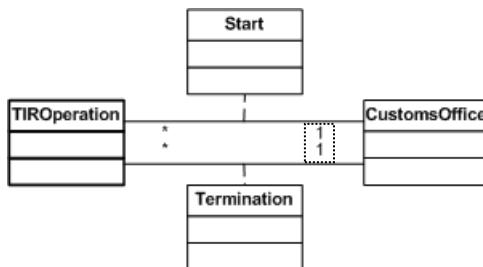

In case the association itself contains information, UML uses a different symbol called “association class”. This is the case for the *Start* association which contains information, such as the starting date of the TIR operation:

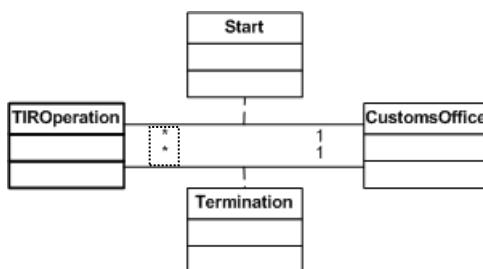

The second association, *Termination*, can be identified in Requirement 13: *the TIR operation is... and terminated at ... Customs office*. Following the logic of the previous association, the association is depicted as an association class:

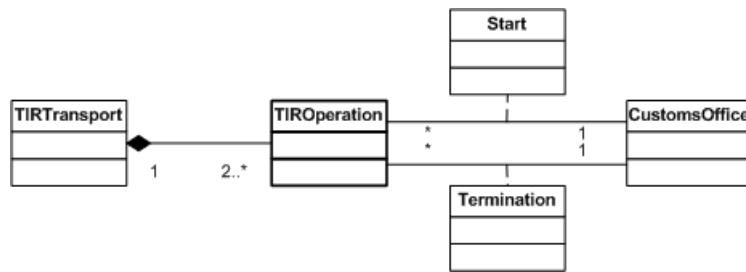

The multiplicities of these two associations are identical. The words *one and only one* indicate that a TIR operation has to start at a Customs office and can not start at more than one. This is translated in UML by inserting “1” on the *Customs Office* side of the association:

In addition, *a Customs office can start and terminate any number of TIR operations*. This is translated in UML by inserting “*” (meaning from zero to any number) on the *TIR operation* side of the association:

Finally, in order to get the full picture of all relationships involving the *TIR operation* class, the sub part of the high level class diagram can be drawn:

When looking at the complete high level diagram, one should not forget the fact that, although all relationships are depicted in one, single diagram, this does not change the way in which each single relationship should be read.

Annex V

UMM/UML glossary

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|---------------------------|---|-------------------------------------|
| abstract class | A class that cannot be directly instantiated. | <i>Unified Modelling User Guide</i> |
| abstraction | The essential characteristics of an entity that distinguish it from all other kinds of entities. An abstraction defines a boundary relative to the perspective of the viewer. | <i>Unified Modelling User Guide</i> |
| activity diagram | Shows behaviour with control structure. Can show many objects over many uses, many objects in single use case, or implementation of method. Encourages parallel behaviour. | <i>UML Distilled</i> |
| actor | Someone or something, outside the system or business that interacts with the system or business. | <i>Rational Unified Process</i> |
| aggregation | A special form of association that specifies a whole-part relationship between the aggregate (the whole) and a component (the part). | <i>Unified Modelling User Guide</i> |
| analysis classes | An abstraction of a role played by a design element in the system, typically within the context of a <i>use-case realization</i> . Analysis classes may provide an abstraction for several roles, representing the common behaviour of those roles. Analysis classes typically evolve into one or more design elements (e.g. design classes and/or capsules, or design subsystems). | <i>Rational Unified Process</i> |
| analysis | The part of the software development process whose primary purpose is to formulate a model of the problem <i>domain</i> . Analysis focuses on what to do, design focuses on how to do it. See <i>design</i> . | <i>Rational Unified Process</i> |
| API | Application Protocol Interface. | |
| architecture | The organizational structure of a system. An architecture can be recursively decomposed into parts that interact through interfaces, relationships that connect parts, and constraints for assembling parts. Parts that interact through interfaces include <i>classes</i> , <i>components</i> and <i>subsystems</i> . | <i>Rational Unified Process</i> |
| artifact | (1) A piece of information that (1) is produced, modified, or used by a process, (2) defines an area of responsibility, and (3) is subject to version control. An artefact can be a <i>model</i> , a <i>model element</i> , or a <i>document</i> . A document can enclose other documents. | <i>Rational Unified Process</i> |
| association | A structural relationship that describes a set of links, in which a link is a connection among objects; the semantic relationship between two or more classifiers that involves the connections among their instances. | <i>Unified Modelling User Guide</i> |
| attributes | An attribute defined by a <i>class</i> represents a named property of the class or its objects. An attribute has a <i>type</i> that defines the type of its instances. | <i>Rational Unified Process</i> |
| binary association | An association between two classes. | <i>Unified Modelling User Guide</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|--|--|--|
| BPAWG | UN/CEFACT Business Process Analysis Working Group. Responsible for analysing and understanding the key elements of international transactions and working for the elimination of constraints. | <i>UN/CEFACT</i> |
| Boolean | An enumeration whose values are true and false. | <i>Unified
Modelling User
Guide</i> |
| business domain model | The first stage in UN/CEFACT unified process. | <i>UMM</i> |
| business entity class | Group of Items which are structured in the same way:
that serves the fundamental missions of the company,
that has legal and/or commercial basis,
which may participate in exchanges with partners,
which will be implemented into objects (object technology) through a modelling process.

For example: order is a business entity class. | <i>UMM</i> |
| business entity | Something that is accessed, inspected, manipulated, produced, and so on in the business. | <i>UMM</i> |
| business expert | A person who is knowledgeable about the business area being modelled. | <i>UMM</i> |
| Business Operational View (BOV) | A perspective of business transactions limited to those aspects regarding the making of business decisions and commitments among organizations, which are needed for the description of a business transaction. | <i>(Open-edi Reference Model - ISO/IEC 14662).</i> |
| business process | The means by which one or more activities are accomplished in operating business practices. | <i>UMM</i> |
| business rule | Rules, regulations and practices for business. | <i>UMM</i> |
| business | a series of processes, each having a clearly understood purpose, involving more than one organization, realized through the exchange of information and directed towards some mutually agreed upon goal, extending over a period of time. | <i>(Open-edi Reference Model - ISO/IEC 14662). (MoU)</i> |
| cardinality | The number of elements in a set. | <i>Unified
Modelling User
Guide</i> |
| class | A description of a set of objects that share the same <i>attributes</i> , <i>operations</i> , <i>methods</i> , <i>relationships</i> , and semantics. A class may use a set of interfaces to specify collections of operations it provides to its environment. See: <i>interface</i> . | <i>Rational Unified Process</i> |
| class diagram | shows static structure of concepts, types, and classes. Concepts show how users think about the world; types show interfaces of software components; classes show implementation of software components. (UML Distilled) A diagram that shows a collection of declarative (static) <i>model elements</i> , such as <i>classes</i> , <i>types</i> , and their contents and <i>relationships</i> . (Rational Unified Process). | <i>UML Distilled/
Rational Unified
Process</i> |
| collaboration | (1) A collaboration diagram describes a pattern of interaction among | <i>Rational Unified</i> |

| Term | Definition | Source |
|----------------------------|--|-------------------------------------|
| diagram | objects; it shows the objects participating in the interaction by their links to each other and the <i>messages</i> they send to each other. Unlike a sequence diagram, a collaboration diagram shows the relationships among the instances. Sequence diagrams and collaboration diagrams express similar information, but show it in different ways. See: <i>sequence diagram</i> . | <i>Process</i> |
| component | A physical, replaceable part of a system that packages implementation and conforms to and provides the realization of a set of interfaces. A component represents a physical piece of implementation of a system, including software code (source, binary or executable) or equivalents such as scripts or command files. | <i>Rational Unified Process</i> |
| component diagram | A diagram that shows the organizations and dependencies among <i>components</i> . | <i>Rational Unified Process</i> |
| component interface | A named set of operations that characterize the behaviour of a component. | <i>OMG</i> |
| composition | A form of aggregation with strong ownership and coincident lifetime of the parts by the whole; parts with nonfixed multiplicity may be created after composite itself, but once created they live and die with it; such parts can also be explicitly removed before the death of a composite. | <i>Unified Modelling User Guide</i> |
| constraint | A semantic condition or restriction. Certain constraints are predefined in the UML, others may be user defined. Constraints are one of three extensibility mechanisms in UML. See: <i>tagged value, stereotype</i> . | <i>Rational Unified Process</i> |
| construction | The third phase of the software development life cycle, in which the software is brought from an executable architectural baseline to the point at which it is ready to be transitioned to the user community. | <i>Unified Modelling User Guide</i> |
| control classes | A class used to model behaviour specific to one, or a several use cases. | <i>Rational Unified Process</i> |
| datatype | A descriptor of a set of values that lack identity and whose operations do not have side effects. Data types include primitive pre-defined types and user-definable types. Pre-defined types include numbers, string and time. User-definable types include enumerations. | <i>Rational Unified Process</i> |
| delegation | The ability of an object to issue a message to another object in response to a message. | <i>Unified Modelling User Guide</i> |
| deliverables | An output from a process that has a value, material or otherwise, to a customer or other stakeholder. | <i>Rational Unified Process</i> |
| dependency | A semantic relationship between two things in which a change to one thing (the independent thing) may affect the semantics of the other thing (the dependent thing). | <i>Unified Modelling User Guide</i> |
| deployment diagram | A diagram that shows the configuration of run-time processing nodes and the <i>components, processes, and objects</i> that live on them. Components represent run-time manifestations of code units. See: <i>component diagram</i> . | <i>Rational Unified Process</i> |
| design | The part of the software development process whose primary purpose is to decide how the system will be implemented. During design, strategic and tactical decisions are made to meet the required functional and quality requirements of a system. See <i>analysis</i> . | <i>Rational Unified Process</i> |
| design patterns | A specific solution to a particular problem in software design. Design patterns capture solutions that have developed and evolved over time, | <i>Rational Unified</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|---------------------------------|---|--|
| design view | expressed in a succinct and easily applied form. | <i>Process</i> |
| diagram | The view of a system's architecture that encompasses the classes, interfaces and collaborations that form the vocabulary of the problem and its solution; a design view addresses the functional requirements of a system. | <i>Unified Modelling User Guide</i> |
| document type definition | A graphical depiction of all or part of a <i>model</i> . | <i>Rational Unified Process</i> |
| domain | See DTD. | |
| DTD | An area of knowledge or activity characterized by a family of related systems. | <i>Rational Unified Process</i> |
| EDI message | An area of knowledge or activity characterized by a set of concepts and terminology understood by practitioners in that area. | |
| EDIFACT messages | Document Type Definition. | <i>(MoU)</i> |
| edifact working group | An approved, published, and maintained formal description of how to structure the data required to perform a specific business function, in such a way as to allow for the transfer and handling of this data by electronic means. | <i>UN/CEFACT</i> |
| elaboration phase | A electronic message formats based on UN/EDIFACT standard set developed and maintained by the UN/EDIFACT Working Group which are in UN/TDID directories. | |
| electronic business | To develop and maintain UN/EDIFACT, the support of harmonised implementations and the use of multi-lingual terminology. | <i>Rational Unified Process</i> |
| electronic commerce | The second <i>phase</i> of the process where the product <i>vision</i> and its <i>architecture</i> are defined. | <i>(MoU)</i> |
| entity classes | a generic term covering information definition and exchange requirements within and between enterprises, including customers. | <i>UN/CEFACT SIMAC</i> |
| enumerations | Electronic Commerce is doing business electronically. This includes the sharing of standardised unstructured or structured business information by any electronic means (such as electronic mail or messaging, World Wide Web technology, electronic bulletin boards, smart cards, electronic funds transfers, electronic data interchange, and automatic data capture technology) among suppliers, customers, governmental bodies and other partners in order to conduct and execute transactions in business, administrative and consumer activities. | <i>Open-edi Reference Model Standard - ISO/IEC 14662).</i> |
| entity classes | The automated exchange of any predefined and structured data for business among information systems of two or more organizations. | <i>(MoU)</i> |
| enumerations | A class used to model information that has been stored by the system, and the associated behaviour. A generic class, reused in many use cases, often with persistent characteristics. An entity class defines a set of entity objects, which participate in several use cases and typically survive those use cases. | <i>Rational Unified Process</i> |
| enumerations | A list of named values used as the range of a particular attribute type. For example, RGBColor = {red, green, blue}. Boolean is a predefined | <i>Rational Unified</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|--------------------------------------|---|-------------------------------------|
| EWG | enumeration with values from the set { false, true }. | <i>Process</i> |
| eXtensible Markup Language | UN/EDIFACT Working Group. To develop and maintain UN/EDIFACT, the support of harmonised implementations and the use of multi-lingual terminology. | |
| eXtensible Markup Language | See XML. | |
| Functional Service View (FSV) | A perspective of business transactions limited to those information technology interoperability aspects of IT Systems needed to support the execution of Open-edi transactions. | <i>(MoU)</i> |
| generalization | A taxonomic relationship between a more general element and a more specific element. The more specific element is fully consistent with the more general element and contains additional information. An instance of the more specific element may be used where the more general element is allowed. See: <i>inheritance</i> . | <i>Rational Unified Process</i> |
| implementation | A concrete realization of the contract declared by an interface; a definition of how something is constructed or computed. | |
| inception phase | The first <i>phase</i> of the Unified Process, in which the seed idea, request for proposal, for the previous generation is brought to the point of being (at least internally) funded to enter the <i>elaboration</i> phase. | <i>Rational Unified Process</i> |
| inheritance | The mechanism by which more specific elements incorporate structure and behaviour of more general elements related by behaviour. See <i>generalization</i> . | <i>Rational Unified Process</i> |
| instance | An individual entity satisfying the description of a <i>class</i> or <i>type</i> . | <i>Rational Unified Process</i> |
| interaction diagram | A diagram that shows an interaction, consisting of a set of objects and their relationships, including the messages that may be dispatched among them; interaction diagrams address the dynamic view of a system; a generic term that applies to several types of diagrams that emphasize object interactions, including collaboration diagrams, sequence diagrams and activity diagrams. | <i>Unified Modelling User Guide</i> |
| interface | A collection of <i>operations</i> that are used to specify a service of a <i>class</i> or a <i>component</i> . | <i>Rational Unified Process</i> |
| ISO | A named set of operations that characterize the behaviour of an element. | |
| Messages | The International Organization for Standardization. | <i>Rational Unified Process</i> |
| messaging protocols | A specification of the conveyance of information from one instance to another, with the expectation that activity will ensue. A message may specify the raising of a signal or the call of an operation. | |
| Metaclass | See Messages and Protocol. | |
| Metamodel | A class whose instances are classes. Metaclasses are typically used to construct <i>metamodels</i> . | <i>Rational Unified Process</i> |
| metaobjects | A model that defines the language for expressing a <i>model</i> . | <i>Rational Unified Process</i> |
| | A generic term for all metaentities in a metamodeling language. For example, metatypes, metaclasses, metaattributes, and metaassociations. | <i>Rational Unified Process</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|---------------------------------|---|-------------------------------------|
| method | (1) A regular and systematic way of accomplishing something; the detailed, logically ordered plans or procedures followed to accomplish a task or attain a goal. (2) UML 1.1: The implementation of an operation, the algorithm or procedure that effects the results of an operation. | <i>Rational Unified Process</i> |
| | The implementation of an operation. It specifies the algorithm or procedure associated with an operation. | |
| methodology | the science of method. A body of methods used in a particular branch of activity. | <i>COD</i> |
| model | A semantically closed abstraction of a system. In the Unified Process, a complete description of a system from a particular perspective ('complete' meaning you don't need any additional information to understand the system from that perspective); a set of model elements. Two models cannot overlap. | <i>Rational Unified Process</i> |
| | A semantically closed abstraction of a subject system. See: <i>system</i> . | |
| | Usage note: In the context of the MOF specification, which describes a <i>meta-metamodel</i> , for brevity the meta-metamodel is frequently referred to as simply the model. | |
| modelling tools | any device or implement used to carry out modeling whether manually or by a machine. | <i>COD</i> |
| naming | to give a string used to identify a <i>model element</i> . | <i>Rational Unified Process</i> |
| n-ary association | An association among three or more classes. | <i>Unified Modelling User Guide</i> |
| note | One of model elements which is a figure symbol to express an element in a diagram. | <i>UML Toolkit</i> |
| object diagram | A diagram that encompasses <i>objects</i> and their relationships at a point in time. An object diagram may be considered a special case of a class diagram or a collaboration diagram. See: <i>class diagram</i> , <i>collaboration diagram</i> . | <i>Rational Unified Process</i> |
| Object Oriented Approach | The development of classes of business objects may support and have an impact on the developments in the area of simplification of EDI and its standards. A business object is a true representation of a tangible concept stemming from real business usage. | |
| objects | An entity with a well-defined boundary and identity that encapsulates <i>state</i> and <i>behaviour</i> . State is represented by <i>attributes</i> and <i>relationships</i> , behavior is represented by <i>operations</i> , <i>methods</i> , and <i>state machines</i> . An object is an instance of a class. See: <i>class</i> , <i>instance</i> . | <i>Rational Unified Process</i> |
| OCL | Object Constraints Language; a formal language used to express side effect-free constraints. | <i>Unified Modelling User Guide</i> |
| OO-edi | Object Oriented edi. | |
| Open-edi | electronic data interchange among multiple autonomous organizations to accomplish an explicit shared business goal according to Open-edi standards (i.e. that complies with the Open-edi Reference Model Standard - | <i>(MoU)</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|----------------------------|--|-------------------------------------|
| | ISO/IEC 14662). | |
| operation signature | See Operation and Signature. | |
| operation | A service that can be requested from an object to effect behaviour. An operation has a <i>signature</i> , which may restrict the actual parameters that are possible. | <i>Rational Unified Process</i> |
| package | A general purpose mechanism for organizing elements into groups. Packages may be nested within other packages. | <i>Rational Unified Process</i> |
| package diagram | shows groups of classes and dependencies among them. | <i>UML Distilled</i> |
| parameter | The specification of a variable that can be changed, passed, or returned. | <i>Unified Modelling User Guide</i> |
| patterns | offers useful bits of analysis, design, and coding techniques. Good examples to learn from; starting point for designs. | <i>UML Distilled</i> |
| phases | The time between two major project milestones, during which a well-defined set of objectives is met, artefacts are completed, and decisions are made to move or not move into the next phase. | <i>Rational Unified Process</i> |
| process view | The view of a system's architecture that encompasses the threads and processes that form the system's concurrency and synchronization mechanisms; a process view addresses the performance, scalability and throughput of the system. | <i>Unified Modelling User Guide</i> |
| projects | a plan; a scheme. A planned undertaking. | <i>COD</i> |
| | A long-term task undertaken by a student to be submitted for assessment. | |
| protocol | A specification of a compatible set of messages used to communicate between <i>capsules</i> . The protocol defines a set of incoming and outgoing messages types (e.g. operations, signals), and optionally a set of sequence diagrams which define the required ordering of messages and a state machine which specifies the abstract behaviour that the participants in a protocol must provide. | <i>Rational Unified Process</i> |
| prototype | A release that is not necessarily subject to <i>change management</i> and <i>configuration control</i> . | <i>Rational Unified Process</i> |
| register | an official list in which items are recorded for reference (list of elementary data in which the meaning –i.e. semantics- of these data is defined). | |
| Registry | a place where registers are kept. | |
| Relationship | A semantic connection among model elements. Examples of relationships include <i>associations</i> and <i>generalizations</i> . | <i>Rational Unified Process</i> |
| repository | Electronic store of structured information (such as EDIFACT messages, X12 messages, XML messages). | |
| requirement | A desired feature, property or behaviour of a system. | <i>Unified Modelling User Guide</i> |
| re-use | Further use or repeated use of an <i>artefact</i> . | <i>Rational Unified Process</i> |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|---|--|---------------------------------|
| scenario | A formal specification of a class of business activities having the same business goal. | <i>(ISO 19735 part I)</i> |
| schema | In the context of the MOF (Metadata Object Facility), a schema is analogous to a <i>package</i> which is a container of <i>model elements</i> . Schema corresponds to an MOF package. Contrast: <i>metamodel</i> , package corresponds to an MOF package. | <i>Rational Unified Process</i> |
| scope | the extent to which it is possible to range; the opportunity for action etc. | <i>COD</i> |
| semantics | relating to meaning in language; relating to the connotations of words. | <i>COD</i> |
| sequence diagram | A diagram that shows object interactions arranged in time sequence. In particular, it shows the objects participating in the interaction and the sequence of messages exchanged. Unlike a collaboration diagram, a sequence diagram includes time sequences but does not include object relationships. A sequence diagram can exist in a generic form (describes all possible <i>scenarios</i>) and in an instance form (describes one actual scenario). Sequence diagrams and collaboration diagrams express similar information, but show it in different ways. See: <i>collaboration diagram</i> . | <i>Rational Unified Process</i> |
| signature | The name and parameters of a behavioural feature. A signature may include an optional returned parameter. | <i>Rational Unified Process</i> |
| Simpl-EDI | Subsets of UN/EDIFACT messages especially designed for SMEs. Simpl-EDI (Simple Electronic Business) defines simplest processes and their required core data allowing the exchange of the minimum data to effect a business transaction electronically. | <i>UN/CEFACT SIMAC</i> |
| software developer | A person responsible for developing a software in accordance with project-adopted standards and procedures. This can include performing activities in any of the <i>requirements, analysis & design, implementation, and test</i> workflows. | <i>Rational Unified Process</i> |
| software solution | the act or a means of solving a problem or difficulty using a software. | <i>COD</i> |
| specification | A declarative description of what something is or does. Contrast: <i>implementation</i> . | <i>Rational Unified Process</i> |
| stakeholder | An individual who is materially affected by the outcome of the system. | <i>Rational Unified Process</i> |
| state diagram | shows how single object behaves across many use cases. | <i>UML Distilled</i> |
| state machine | A state machine specifies the behaviour of a <i>model element</i> , defining its response to events and the life cycle of the object. | <i>Rational Unified Process</i> |
| | A behaviour that specifies the sequences of <i>states</i> that an object or an interaction goes through during its life in response to events, together with its responses and actions. | |
| statechart (state machine) diagram | A diagram that shows a state machine. See: <i>state machine</i> . | <i>Rational Unified Process</i> |
| states | A condition or situation during the life of an object during which it satisfies some condition, performs some activity, or waits for some event. Contrast: state [OMA]. | <i>Rational Unified Process</i> |

| Term | Definition | Source |
|-------------------------|---|---|
| stereotype | A new type of modelling element that extends the semantics of the metamodel. Stereotypes must be based on certain existing types or classes in the metamodel. Stereotypes may extend the semantics, but not the structure of pre-existing types and classes. Certain stereotypes are predefined in the UML, others may be user defined. Stereotypes are one of three extensibility mechanisms in UML. See: constraint, tagged value. | <i>OMG</i> |
| sub-domain | An lower area of knowledge or activity characterized by a family of related systems contained by a domain. | |
| swimlane | A partition on an interaction diagram for organizing responsibilities for actions. | <i>Unified Modelling User Guide</i> |
| syntax rules | rules governing the structure of an interchange and its functional groups, messages, segments and data elements. | (ISO 9735) |
| system | As an instance, an executable configuration of a software application or software application family; the execution is done on a hardware platform. As a class, a particular software application or software application family that can be configured and installed on a hardware platform. In a general sense, an arbitrary system instance.

1. A collection of connected units that are organized to accomplish a specific purpose. A system can be described by one or more models, possibly from different viewpoints. Synonym: physical system. 2. A top-level subsystem. | <i>Rational Unified Process</i> |
| templates | A pre-defined structure for an <i>artefact</i> . Synonym: <i>parameterized element</i> . | <i>Rational Unified Process</i> |
| test | A <i>core process workflow</i> in the software-engineering process whose purpose is to integrate and test the system. | <i>Rational Unified Process</i> |
| TMWG | UN/CEFACT Techniques and Methodologies Group. To research and identify techniques and methodologies which could be utilised by CEFACt and its working groups to enhance the process by which its deliverables are produced and integrated. | |
| traceability | The ability to trace a project element to other related project elements, especially those related to <i>requirements</i> . | <i>Rational Unified Process</i> |
| transition phase | The fourth <i>phase</i> of the process in which the software is turned over to the user community; a relationship between two states indicating that an object in the first state will perform certain actions and enter the second state when a specified event occurs and conditions are satisfied. | <i>Unified Modelling User Guide</i> |
| type | Description of a set of entities which share common characteristics, relations, attributes, and semantics.

A stereotype of class that is used to specify a domain of instances (objects) together with the operations applicable to the objects. A type may not contain any methods. See: <i>class, instance</i> . Contrast: <i>interface</i> . | <i>Rational Unified Process</i> |
| UML | See Unified Modelling Language. | |
| UN/EDIFACT | (United Nations Electronic Data Interchange for Administration, Commerce and transport): "User application protocol, for use within user application systems for data to be interchanged, compatible with the OSI model." | (UN/EDIFACT syntax implementation guidelines, |

| <i>Term</i> | <i>Definition</i> | <i>Source</i> |
|---|--|---------------------------------|
| Unified Modeling Language (UML) | a set of diagrams that communicate requirements regarding a business process. | <i>UNTDID 1990). (MoU)</i> |
| use case | The specification of a sequence of actions, including variants, that a system (or other entity) can perform, interacting with <i>actors</i> of the system. See: <i>use-case instances</i> . A use-case class contains all main, alternate flows of events related to producing the 'observable result of value'. Technically, a use-case is a class whose instances are <i>scenarios</i> . | <i>Rational Unified Process</i> |
| use-case analysis | The part of the software development process using use case methodology whose primary purpose is to formulate a model of the problem <i>domain</i> . Analysis focuses on what to do, design focuses on how to do it. | |
| use-case diagram | A diagram that shows the relationships among <i>actors</i> and <i>use cases</i> within a system. | <i>Rational Unified Process</i> |
| use-case instance | A sequence of actions performed by a system that yields an observable result of value to a particular actor. | <i>Rational Unified Process</i> |
| use-case model | A model that describes a system's functional <i>requirements</i> in terms of <i>use cases</i> . | |
| use-case realization | A use-case realization describes how a particular use case is realized within the <i>design model</i> , in terms of collaborating objects. | <i>Rational Unified Process</i> |
| use-case view | An <i>architectural view</i> that describes how critical use cases are performed in the system, focusing mostly on architecturally significant components (objects, tasks, nodes). In the Unified Process, it is a view of the <i>use-case model</i> . | <i>Rational Unified Process</i> |
| view elements | A view element is a textual and/or graphical projection of a collection of <i>model elements</i> . | <i>Rational Unified Process</i> |
| view | A simplified description (an abstraction) of a model, which is seen from a given perspective or vantage point and omits entities that are not relevant to this perspective. See also <i>architectural view</i> . | <i>Rational Unified Process</i> |
| workflow | A sequence of activities in the Rational Unified Modelling Methodology. | |
| XML (eXtensible Markup Language) | XML is designed to enable the exchange of information (data) between different applications and data sources on the World Wide Web. XML is a simplified subset of the Standard Generalized Markup Language (SGML). XML allows construction of structured data (trees) which rely on composition relationships. XML schemas are used to define data models. | <i>UN/CEFACT SIMAC</i> |

Annex VI

eTIR declaration mechanism

Chapter 2.1.2.4.2, stipulates “that the holder submits the declaration by electronic means to the Customs office of departure, making reference to a guarantee issued by a guarantee chain, using authentication mechanisms. The declaration shall be submitted prior to the presentation of the goods at the Customs office of departure. Alternatively, the holder can make use of declaration mechanisms provided by the eTIR international system, the Customs system of his country of residence (if available) or third party solutions provided by the private sector (including by the guarantee chains). National Customs system will use the declaration web service of the eTIR international system to forward the declaration to the country of departure. Authorized international private sector declaration systems can use the declaration web service of the eTIR international system to forward the declaration to the country of departure. Customs authorities shall, if satisfied, validate and accept the declaration and transmit it to the eTIR international system. The eTIR international system forwards this information to the following Customs authorities involved in the transport.”^{1/}

The declaration mechanism envisages that the holder sends his advance cargo information^{2/} only to the Customs office of departure of the TIR transport. The Customs office of departure uses this information when the holder lodges his Customs declaration. The holder actually lodges the Customs declaration by presenting Customs with the reference to the guarantee which he has obtained from the guarantee chain and which he has included in the advance cargo information. The Customs office of departure after having accepted the Customs declaration, registers the information contained in the declaration together with other TIR transport information (e.g. the information on seals) as advance cargo information in the eTIR international system. The eTIR international system forwards the advance cargo information to all Customs authorities declared by the holder as part of his itinerary. This mechanism is devised to facilitate the submission procedure by the holder, without further complicating the procedure for Customs authorities that would in any case have to exchange information concerning TIR transports. This mechanism is similar to the current paper based procedure, where the TIR Carnet becomes a Customs document from the moment the first Customs office of departure stamps each and every page of the TIR carnets. The difference lies in the transportation of the information, which is performed by the truck driver today and will be performed by the eTIR international system tomorrow.

The fact that the holder is obliged to provide Customs with advance cargo information does not relieve him from his responsibility to lodge his declaration by presenting himself, together with the goods vehicle and the reference to the guarantee, in accordance with Article 21 of the TIR Convention. It is then the responsibility of Customs to accept the declaration.

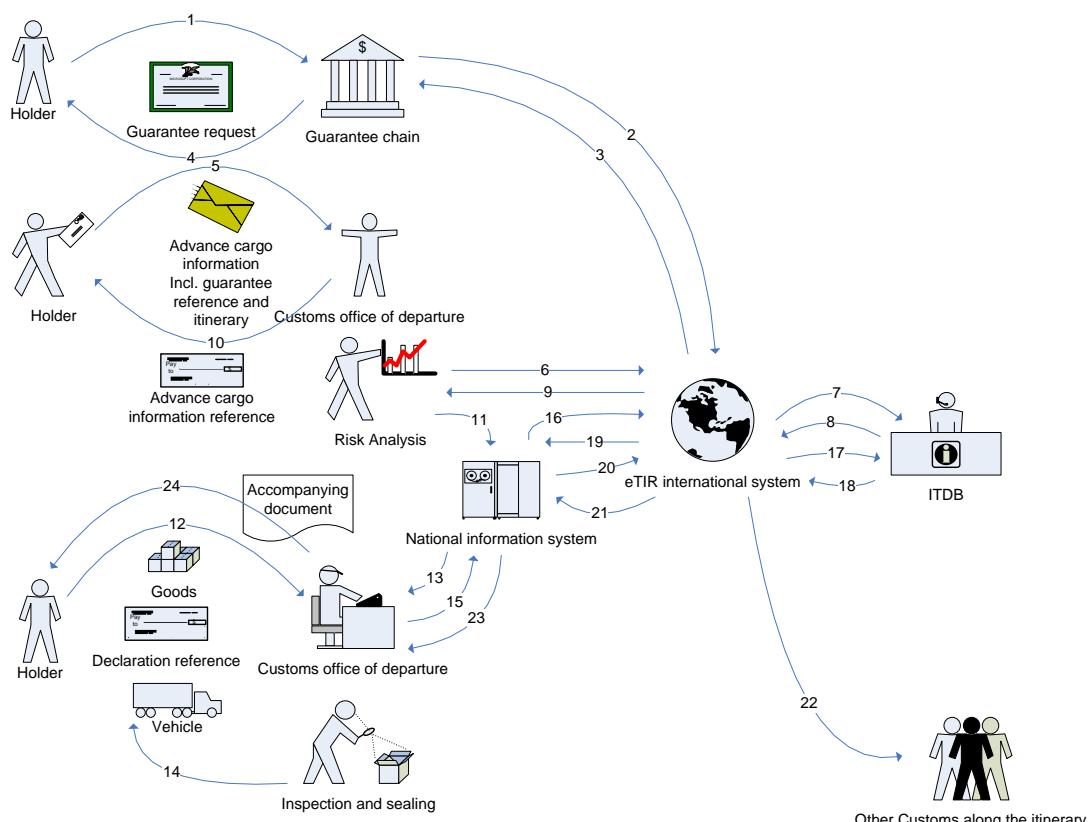

^{1/} The eTIR system maintains the principle that a TIR transport consists of a set of TIR operations. See Annex 1 of the eTIR Reference Model, Requirement 10.

^{2/} The holder, at any time, can verify the integrity of the advance cargo information by means of a ‘key’ which has been generated on the basis of these data.

VI.1. The eTIR declaration at the first Customs office of departure

Figure 1 describes all steps related to the declaration submission process at the first Customs office of departure. Steps are numbered and described in the text following the figure.

Figure VI.1
Declaration at the first Customs office of departure

1. The holder requests a guarantee from the guarantee chain;
2. The guarantee chain accepts the request and registers the guarantee with the eTIR international system;
3. The eTIR international system acknowledges registration of the guarantee;
4. The guarantee chain provides the holder with a unique reference to the guarantee;
5. After having generated the “key” to ensure the integrity of the advance cargo information, the holder sends the advance cargo information to the central Customs system in the country of departure, using a national declaration mechanism of the country of departure (if he has the required credentials), the declaration mechanism of his country of residence (if available for declarations made in other countries), the web service made available in the eTIR international system or a declaration mechanism provided by the private sector;
6. As part of their risk analysis, Customs authorities check the validity of the guarantee in the eTIR international system;
7. The eTIR international system queries the ITDB to check that the holder is authorized;

8. The ITDB provides information on the holder to the eTIR international system;
9. The eTIR international system provides the information on holder and guarantee to Customs;
10. Customs confirm the reception and the validity of the advance cargo information to the holder and provide him with a unique reference;
11. Customs store the advance cargo information in their internal system, possibly together with the results of their risk assessment;
12. The holder presents the vehicle, the goods and the reference to the guarantee (or the reference provided by Customs) to the Customs office of departure to lodge the declaration;
13. The Customs office of departure retrieves from the national Customs system the data contained in the advance cargo information message to become the Customs declaration, allowing the holder to verify the integrity of the data by comparing the “key” of the declaration with the one originally generated. Then, Customs check the vehicle and goods against the Customs declaration in accordance with the appropriate risk assessment information;
14. The Customs office of departure inspects and seals the vehicle;
15. The results of the checks and the seals numbers are stored in the Customs system;
16. The Customs office of departure (national system) informs the eTIR international system that it accepts the guarantee;
17. The eTIR international system queries the ITDB on the status ^{1/} of the holder to whom the guarantee has been issued;
18. The ITDB returns the status of the holder to the eTIR international system;
19. The eTIR international system confirms the acceptance of the guarantee to the national Customs system;
20. After having accepted the declaration, the national system forwards the relevant TIR transport data (Customs declaration and the seals numbers) to the eTIR international system by means of the “Record Consignment” message; ^{2/}
21. The eTIR international system confirms the reception of the information;
22. The eTIR international system provides all Customs administrations involved in the TIR transport with the TIR transport information. This information, exchanged in a Customs secure environment, will serve as the advance cargo information for the subsequent Customs authorities;
23. The Customs officer sees the results on his/her screen and prints the accompanying document;
24. The Customs officer hands out the paper accompanying document to the holder.

^{1/} The status of the holder refers to his status as contained in the ITDB, i.e. authorized, withdrawn, excluded (art. 38), end of activity.

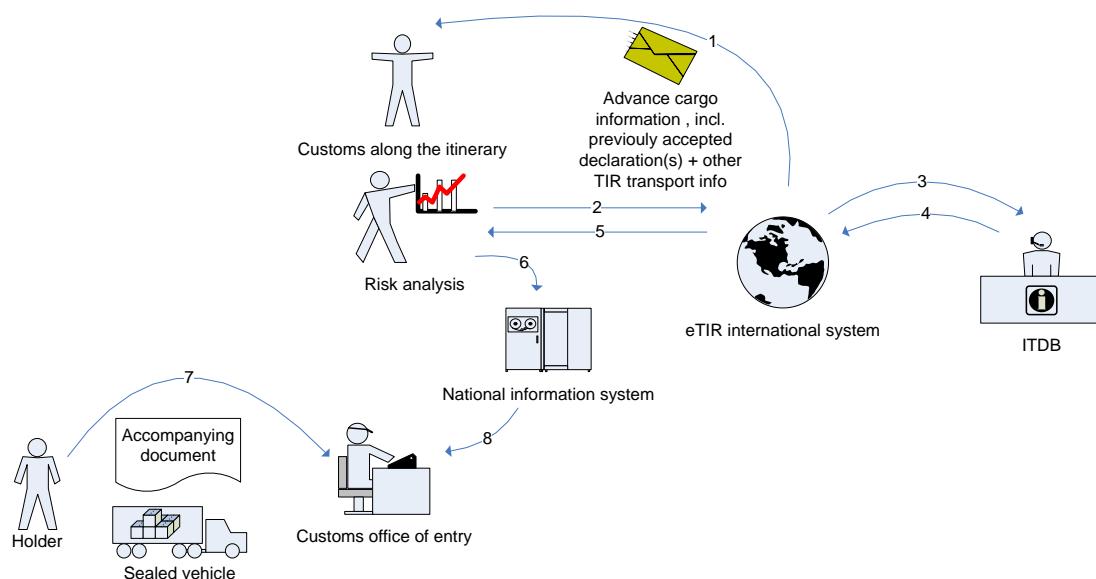

^{2/} Customs perform other activities in line with national or international requirements, such as sending a “Start TIR operation” message (which triggers a checking of the guarantee before the TIR operation can be started). However, as this is not part of the declaration submission mechanism but rather follows the acceptance of the declaration by Customs, it is not further described in this document.

VI.2. The eTIR declaration at the Customs office of entry

Figure 2 describes all steps related to the declaration submission process at the Customs office of entry. Steps are numbered and described in the text following the figure.

Figure VI.2

Declaration at the Customs office of entry

1. Customs authorities along the itinerary receive the advance cargo information from the eTIR international system, indicating that a holder is performing a TIR transport which will enter their territory (see step 22 of the Customs office of departure; such information might be just a message, inviting Customs to query the eTIR international system or the TIR transport information);
2. As part of their risk analysis, Customs authorities check the validity of the guarantee with the eTIR international system;
3. The eTIR international system queries the ITDB to check that the holder is authorized;
4. The ITDB provides information on the holder to the eTIR international system;
5. The eTIR international system provides the information on holder and guarantee to Customs;
6. Customs store the advance cargo information in their national system, possibly together with the results of their risk assessment;
7. The holder presents the sealed vehicle (containing the goods) together with the accompanying document and the guarantee reference at the Customs office of entry en route;
8. The Customs office of entry en route retrieves from the national Customs system the data contained in the advance cargo information message to become the Customs

declaration, allowing the holder to verify the integrity of the data by comparing the “key” of the declaration with the one originally generated.^{1/}

In case the geographical distance between the Customs office of departure and the Customs office of entry en route is too close to meet deadlines^{2/} for the submission of advance cargo information, Customs authorities at the Customs office of entry en route should accept the advance cargo information forwarded through the eTIR international system. In a computerized environment, even short time lags are sufficient to perform automatic risk assessment and should allow for adequate channelling of the holder upon his arrival at the border.

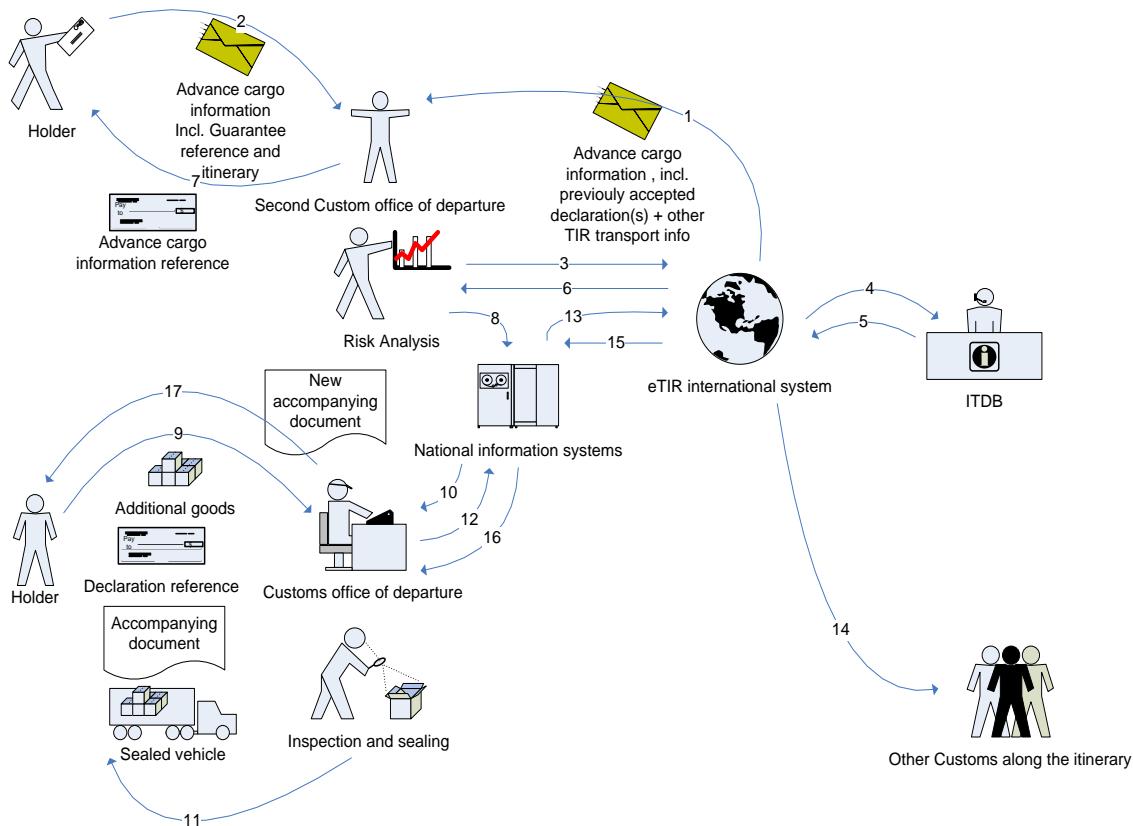

VI.3. The eTIR declaration at the following Customs offices of departure

Figure 3 describes all steps related to the declaration submission process at a Customs office of departure, other than the first Customs office of departure, in case of multiple loading places. Steps are numbered and described in the text following the figure.

^{1/} After accepting the declaration, Customs perform other activities in line with national or international requirements, such as sending a “Start TIR operation” message (which triggers a checking of the guarantee before the TIR operation can be started). However, as this is not part of the declaration submission mechanism but rather follows the acceptance of the declaration by Customs, it is not further described in this document.

^{2/} Specific deadlines regarding the arrival of advance information will be defined in the legal provisions allowing for the implementation of the eTIR system.

Figure VI.3
Declaration at the following Customs offices of departure

1. The eTIR international system sends the advance cargo information to the Customs authorities along the itinerary (see step 22 at the first Customs office of departure);
2. After having generated the “key” to ensure the integrity of the advance cargo information, the holder sends the advance cargo information, regarding the totality of the goods, to the central Customs system in the country of departure, using a national declaration mechanism of the country of departure (if he has the required credentials), the declaration mechanism of his country of residence (if available for declarations made in other countries), the web service made available in the eTIR international system or a declaration mechanism provided by the private sector;
3. As part of their risk analysis, Customs authorities check the validity of the guarantee with the eTIR international system;
4. The eTIR international system queries the ITDB to check that the holder is authorized;
5. The ITDB provides information on the holder to the eTIR international system;
6. The eTIR international system provides the information on holder and guarantee to Customs;

7. Customs confirm the reception and the validity^{1/} of the advance cargo information regarding the additional goods to be loaded to the holder and provide him with a unique reference;
8. Customs store the advance cargo information in their internal system, possibly together with the results of their risk assessment;
9. The holder presents the sealed vehicle (containing goods loaded at previous loading points), together with the accompanying document. Moreover, he presents the additional goods to be loaded, together with the reference to the guarantee (or the reference provided by Customs) to the Customs office of departure to lodge the declaration;
10. The Customs office of departure retrieves from the national Customs system the data contained in the advance cargo information message to become the Customs declaration, allowing the holder to verify the integrity of the data by comparing the “key” of the declaration with the one originally generated. Then, Customs check the vehicle and goods against the Customs declaration in accordance with the appropriate risk assessment information;
11. Customs retrieves the advance cargo information from the Customs system, possibly together with the results of their risk assessment;
12. Customs remove the seals, inspect the goods and the vehicle according to the results of the risk analysis and, after the additional good are loaded, seal the vehicle;
13. The results of the checks and the seals numbers are stored in the Customs system;
14. After having accepted the declaration, the national system forwards the relevant TIR transport data (Customs declaration and the seals numbers) to the eTIR international system by means of the “Update Consignment” message;^{2/}
15. The eTIR international system confirms the reception of the information;
16. The eTIR international system provides all Customs administrations involved in the TIR transport with the TIR transport information. This information, exchanged in a Customs secure environment, will serve as the advance cargo information for the subsequent Customs authorities;
17. The Customs officer sees the results on his/her screen and prints the accompanying document;
18. The Customs officer hands out the paper accompanying document to the holder.

In case the geographical distance between the first and the second Customs office of departure is too close to meet deadlines^{3/} for the submission of advance cargo information, Customs authorities at the second Customs office of departure should accept the advance cargo information forwarded through the eTIR international system. In a computerized

^{1/} As part of the verification procedure, Customs also verify that the information provided at the first loading point (received through the eTIR international system) is contained in the new advance cargo information message.

^{2/} Customs perform other activities in line with national or international requirements, such as sending a “Start TIR operation” message (which triggers a checking of the guarantee before the TIR operation can be started). However, as this is not part of the declaration submission mechanism but rather follows the acceptance of the declaration by Customs, it is not further described in this document.

^{3/} Specific deadlines regarding the arrival of advance information will be defined in the legal provisions allowing for the implementation of the eTIR system.

environment, even short time lags are sufficient to perform automatic risk assessment and should allow for adequate channelling of the holder upon his arrival at the border.

VI.4. Remarks

VI.4.1. Submission of the declaration in foreign countries

A major issue with regard to the declaration submission procedure as contained in the eTIR Project seems to be the requirement for the holder to send advance cargo information to Customs administrations in other countries than the holder's country of residence. The responsibility to provide an adequate submission procedure lies at the national level and is a matter between the holder and the Customs authorities, falling outside the scope of the eTIR Project. Nevertheless, further to defining a standard set of elements to be contained in the advance cargo information message, the eTIR international system will also provide a declaration web service that will be made available to authorized holders, third party service providers and Customs.

There is general agreement that the requirement of a national electronic declaration system does not pose a problem in the relationship between holder and Customs authorities of the country in which he is established or resident. However, there seemsto be a potential problem with regard as to how the holder can establish secure electronic communications with Customs authorities in other countries where the beginning of the TIR transport could take place, without having to call upon the paid services of a Customs broker or any other third party. In order to achieve this, Customs administrations will have to ensure not only that their national declaration submission system is accessible by all holders (in particular when considering authentication requirements), but that it is also available in, at least, one of the three official languages of the TIR Convention (English, French or Russian). A generalized use of standard codes will also further simplify this issue. In order to provide holders with additional options to submit their declaration to Customs, a declaration web service is also available in the eTIR international system and made available to authorized holders, Customs systems and authorized third party declaration mechanisms. This web service allows to forward advance cargo information to the Customs system of the country of departure. Furthermore, Customs administrations may wish to extend the scope of their national declaration mechanism to allow their national holders to send advance cargo information to other Customs systems when the TIR transport starts abroad (making use of the eTIR international system declaration web service). Finally, third party solutions (like TIR-EPD or Customs brokers services) may also be used to transmit the advance cargo information directly to Customs or via the eTIR international system declaration web service.

VI.4.2. Comparison with the current paper environment

The declaration mechanism contained in the eTIR Project only differs slightly from the current paper-based procedure. The declaration continues to be formally lodged by the holder at the time he presents himself at the Customs office of departure or entry en route, together with the vehicle and the goods. However, the eTIR system introduces, as new requirement, that Customs should receive advance cargo information prior to the physical presentation of the vehicle and goods at the Customs office of departure or entry en route. In line with the objectives of the eTIR Project, the purpose of this is to allow Customs to perform certain checks (including the validity of the guarantee) and to determine the risk profile of the TIR transport prior to its arrival at the Customs office concerned. In continuation, the eTIR system is designed in such a way that the holder only needs to submit his advance cargo information once, thus avoiding the multiple, unsolicited and, possibly even erroneous, submission to various national Customs systems. The Customs

office of departure, by registering all relevant TIR transport information in the eTIR international system, ensures that the data required for lodging the declaration, as well as other TIR transport information (e.g. seals), are provided to all consecutive countries involved in the TIR transport prior to the arrival of the vehicle so that Customs can perform advance risk assessment. As it is the case today, the holder remains responsible for the presentation of the vehicle, load and guarantee reference in accordance with the principles set out in Article 21 of the TIR Convention at each Customs office. The change in the procedure regards only the information required to lodge the declaration, which is currently provided by means of the TIR Carnet and which will be provided electronically in the future by means of the mechanisms described above.

VI.4.3. Legal implications of the eTIR declaration submission mechanism

In the course of the discussions of the WP.30 at its 119th session, issues have been raised of a legal nature, which go beyond the scope of the mandate of the GE.1, but which deserve the Working Party's full attention. In the following paragraphs, the secretariat provides its preliminary assessment of the issues at stake for consideration by WP.30.

a. Legal basis for Customs to receive/send/use advance declaration data through the eTIR international system

It goes without saying that the introduction of the eTIR system will require a revision of the legal provisions of the TIR Convention. In the framework of this revision, it will be necessary to include provisions ensuring that the eTIR international system is adequately defined as the cornerstone of the information exchange between Customs authorities and providing a legal basis for a secure electronic exchange of TIR data, which would replace the current exchange of information based on the paper TIR Carnet.

b. Liability of the holder if an error occurs in the course of the transmission of data from Customs to Customs through the eTIR international system

First of all, it should be stressed that the holder is and will remain responsible, and thus liable, for the accuracy and the completeness of the information he provides. The eTIR system nevertheless provides the holder with means to ensure the authenticity of the information. The eTIR system foresees that the holder generates a "key" using his advance cargo information.^{1/} The Customs authorities will also calculate the "key", from the information they received directly from the holder or through the eTIR international system, and therefore provide the holder with a quick mean to ensuring that the correct information has been considered. With that in mind, it is the responsibility of the holder to ensure there is no divergence between data he submitted, data transmitted via the eTIR international system and data received by Customs authorities in the course of a TIR transport, and request a correction, if need be.

^{1/} In more technical terms this key is also known as hash code. A "hash" function takes information as an input and provides the hash code as an output. Whenever the information, e.g. the advance cargo information, is changed the resulting hash code will also change. Therefore, the hash code can ensure that the information provided by the holder is not changed in the course of the TIR transport.

Annex VII

Cost Benefit Analysis of the eTIR system: summary, limitations and recommendations

VII.1. Background

At its forty-eighth session, further to requests from the Inland Transport Committee (ITC), the Working Party on Customs Questions affecting Transport (WP.30) and the Informal Ad hoc Expert Group on Conceptual and Technical aspects of Computerization of the TIR Procedure (GE.1 or “Expert Group”), the TIR Executive Board (TIRExB) mandated the secretariat to conduct a Cost Benefit Analysis (CBA) of the eTIR Project (TIRExB/REP/2011/48final para. 10). Consequently, taking into account the funds available in the TIRExB consultancy budget line and the task to be undertaken, the TIR secretariat requested the relevant services of the United Nations Office at Geneva (UNOG) to issue a tender. In line with the applicable United Nations procurement principles, rules and procedures, UNOG sent out a request for quotes to five companies. Two companies submitted bids, which were evaluated. The contract was awarded to the qualified bidder, whose bid substantially conformed to the requirements set forth in the solicitation documents and who had been evaluated as being most cost-efficient for the United Nations.

At its twentieth session, the Expert Group welcomed the draft CBA, presented in Informal documents GE.1 Nos. 6a, 6b, 6c, 6d and 6e (2012). The Expert Group expressed its general consent with the methodology used by the consultants, while, at the same time, raising preliminary comments on various assumptions used by the consultants in the course of the CBA. Inter alia, the Expert Group was of the opinion that the two scenarios described in the CBA (gradual introduction of eTIR Carnets versus the one time replacement of the paper TIR system by an electronic system, the so-called “big-bang” scenario) were too optimistic and requested the unrealistic “big-bang” scenario, to be replaced by a more pessimistic (i.e.: more realistic) one. In reply to suggestions that the scenarios used should be based on complex forecasts on the long-term development of transport flows between TIR Contracting Parties, the secretariat recalled that the CBA had been adjudged to the consultants on the basis of a clear mandate and with a limited budget and that, therefore, it was unrealistic to expect them to undertake such a complex simulation exercise, in addition to their work so far. To wrap up its initial discussions on the issue, the Expert Group requested additional time in order to provide the secretariat in writing with its comments on the draft CBA and proposed that eTIR focal points would also be given the opportunity to submit their contributions. Further to this request, the secretariat sent an e-mail to eTIR focal points, soliciting their considerations on the draft CBA.

On the basis of all comments received, the consultants prepared an updated version of the CBA, which was presented as Informal document No. 12 at the Expert Group’s twenty-first session. The Expert Group took note that, apart from apparent mistakes in the calculations and lack of textual consistency, the CBA was final. The Expert Group agreed on the methodology used by the consultants, but felt that some costs, e.g. training, and indirect benefits were missing from the calculations. The Expert Group agreed with the proposal by the secretariat to prepare a revision of Informal document No. 12, correcting all remaining mistakes, for circulation among the network of eTIR focal points. Furthermore, it requested the secretariat to prepare a document, for consideration at its twenty-second session, containing a summary of the consultants’ CBA, in combination with an assessment of the limitations of the analysis, i.e. the missing costs and benefits, as well as recommendations.

At its twenty-second session, the Expert Group welcomed Informal document GE.1 No. 2 (2013), discussed it and slightly revised the wording of the recommendations. The IRU expressed reservations with regard to the final CBA, the corresponding assessment made by the TIR secretariat and the recommendations by the Expert Group (see ECE/TRANS/WP.30/2013/10, para. 16). After responding to the IRUs reservations (see ECE/TRANS/WP.30/2013/10, para. 17), the Expert Group requested the secretariat to include a revised version of Informal document GE.1 No. 2 (2013) as an annex to the eTIR Reference Model and submit it to WP.30 for consideration.

VII.2. Summary of the Cost Benefit Analysis

VII.2.1. Disclaimer

The CBA, as contained in Informal document GE.1 No. 12 Rev.1 (2012), reflects the views of the consultants and not those of the UNECE secretariat. The UNECE secretariat's contribution has been limited to ensuring that the CBA methodology has been properly applied and preparing the underlying summary.

VII.2.2. Objective and methodology

The main objective of the eTIR CBA is to compare the costs and the benefits of the implementation of an eTIR system under various assumptions, exploring different technological options and assuming different scenarios over a period of twelve years, i.e. two years for the development and deployment of a centralized exchange platform (the "so-called" eTIR international system), followed by ten years of progressively increased usage. In line with standard CBA methodology, costs and benefits are discounted to allow their comparison at present value. For the purpose of the eTIR CBA, a discount rate of 5 per cent is used. Returns on investment (ROI) and Net Present Values (NPV) are used to compare the various technological options.

7. The assumptions are based on various sources, e.g. the eTIR Reference Model, as well as the consultants' expertise in the field of information and communication technology (ICT) projects, in particular software development projects.

VII.2.3. Technological options

The CBA identifies six technological options to implement a centralized eTIR international system.

- At premises: a new data centre will be established to host the eTIR international system. This implies the purchase and maintenance of a completely new data centre (space, network, hardware and software).
- UNOG: the eTIR international system will run on machines hosted and maintained at the United Nations at Geneva (UNOG) data centre.
- UNICC: the eTIR international system will run on machines hosted and maintained at the United Nations International Computing Center (UNICC) data centre.

- IaaS (Infrastructure as a Service): the eTIR international system will run on a shared infrastructure in cloud.¹
- PaaS (Platform as a Service): the eTIR international system will run on a shared platform in cloud.
- SaaS (Software as a Service): the eTIR international system will be provided as a service by a cloud provider.

The technical assessment, presented in Annex of the CBA, identifies PaaS as the best option, followed by UNOG and UNICC.

VII.2.4. Scenarios

The CBA considers two different scenarios over a period of 12 years. It is assumed that, at the end of this period, all 57 Contracting Parties (CP) to the TIR Convention would have upgraded their Customs IT systems to ensure the connectivity with the eTIR international system, according to the following schedule:

**Table VII.1
Annual number of Contracting Parties upgrading their IT system**

| Year | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|----------------------------|---|---|---|---|----|----|---|---|---|----|----|----|
| No. of Contracting Parties | 3 | 3 | 3 | 5 | 10 | 10 | 5 | 5 | 5 | 5 | 4 | 4 |

The two scenarios differ from each other by the number of TIR transports that would be handled solely electronically every year, i.e. making full use of the eTIR international system. In the first scenario, the number of computerized TIR transports would gradually reach the current annual number of TIR Carnets used (approx. 3 million). In the second scenario, only half of those would be computerized after the twelfth year. The following table shows the annual number of computerized TIR transports for both scenarios.

**Table VII.2
Number of fully computerized TIR transports (thousands)**

| Year | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|------------|-----|-----|-----|-------|-------|-------|-------|-------|-------|-------|----|----|
| Scenario 1 | 100 | 700 | 800 | 1 200 | 1 300 | 2 000 | 2 500 | 2 600 | 2 800 | 3 000 | | |
| Scenario 2 | 50 | 300 | 400 | 500 | 600 | 1 000 | 1 200 | 1 300 | 1 400 | 1 500 | | |

VII.2.5. Costs

The following costs categories are considered:

- Development costs
- Initial costs
- Operational and hosting costs
- Helpdesk costs
- Costs to adapt national applications

¹ The term “cloud” refers to cloud computing, i.e. the usage of (shared) computing resources (hardware and software) made available by specialized companies as services over the Internet.

For each cost category, minimal and maximum costs are estimated.

VII.2.5.1. Development costs

The development costs of the three components of the eTIR international system have been estimated separately:

- (a) the kernel (ensuring the electronic exchange of eTIR messages);
- (b) the web base user interface, which would serve as backup to the kernel, and
- (c) the administration console.

The system dimension of each component has been estimated by means of a function point analysis (FPA) and adjusted on the basis of an estimated processing complexity. On that basis (and by using the Constructive Cost Model (COCOMO) II methodology), the development costs and schedule have been estimated. The development costs of the entire eTIR international system range between 924,800 and 1,127,000 US\$.

VII.2.5.2. Initial Costs

Setting up the eTIR international system will require different costs, depending on the technological options selected. Table 3 presents the minimum and maximum estimated initial costs for each option. They include, but are not limited to, purchasing facilities, hardware and software, as well as training and recruitment activities.

**Table VII.3
Initial costs
(United States dollars)**

| | <i>Min</i> | <i>Max</i> |
|-------------|------------|------------|
| At premises | 1 255 000 | 1 450 000 |
| UNOG | 681 500 | 792 500 |
| UNICC | 632 000 | 743 000 |
| IaaS | 632 000 | 743 000 |
| PaaS | 142 000 | 183 000 |
| SaaS | 10 000 | 15 000 |

VII.2.5.3. Operational and hosting costs

Operating and maintaining the eTIR international system will imply annual costs. Most of those costs depend on the number of TIR transports that will be handled by the system. The costs will also vary greatly, depending on the technological options selected. Table 4 presents the minimum and maximum estimated annual variable costs for each option, in case 3 million TIR transport would be handled by the system. Variable costs include, depending on the option, costs for testing, backup, staff, training, audit, insurance and management as well as fees paid to cloud operators.

**Table VII.4
Annual operational and cloud costs
(United States dollars)**

| | <i>Min</i> | <i>Max</i> |
|-------------|------------|------------|
| At premises | 340 419 | 526 059 |
| UNOG | 194 739 | 243 259 |

| | <i>Min</i> | <i>Max</i> |
|-------|------------|------------|
| UNICC | 167 719 | 257 059 |
| IaaS | 113 402 | 153 126 |
| PaaS | 159 116 | 180 816 |
| SaaS | 1 500 000 | 3 000 000 |

By dividing the above-mentioned costs by 3 million, a unit cost operational and cloud cost per TIR transport has been calculated. On that basis, the annual variable costs for each scenario have been estimated.

VII.2.5.4. Helpdesk costs

The eTIR Reference Model requires only a minimal helpdesk, the main function of which it is to assist countries in connecting their IT systems to the eTIR international system. Such a helpdesk would be composed of 2 IT specialists, working 40 hours a week. The initial costs to establish such a helpdesk would range from 24,500 to 44,000 US\$. The operating and personnel costs have been estimated between 126,180 and 216,600 US\$ per annum.

VII.2.5.5. Costs to adapt national applications

It is assumed that countries already have, or will, develop IT systems that process TIR operations nationally or regionally. Therefore, the only costs that have been assessed are aimed at;

- (a) ensuring that all information required by the eTIR international system can be entered and stored in the national IT system;
- (b) integrating eTIR web services in the national applications handling TIR operations and
- (c) developing the interfaces (web services) required by the eTIR international system.

On the basis of an estimated project plan, adapting national Customs IT system would cost between 120,000 and 150,000 US\$ per country.

VII.2.5.6. Other costs

The consultants have considered that there would be no other costs, including from the trader/transport community.

VII.2.6. Benefits

A fully computerized TIR system will generate direct annual benefits for Customs, the guarantee chain and holders. The various benefits have been estimated independently, before calculating the average benefits of computerization per TIR transport.

VII.2.6.1. For Customs

The direct benefits for Customs have been derived from the comparison between the time required to process a paper based TIR Carnet and the estimated time it would take to process the equivalent electronic information, once the system would be fully computerized. Taking also into account that some Customs administrations already receive information in an electronic form and that not all time reductions lead to actual saving in

personnel costs, the savings for Customs administrations are estimated at 4,311,428 US\$ per annum, if 3 million TIR transports are computerized.

VII.2.6.2. For the guarantee chain

The guarantee chain's costs related to printing, distribution and archiving of TIR Carnets are estimated at 2 US\$ per TIR Carnet, resulting in potential savings of 6 million US\$ per year, in case the entire TIR system becomes paperless.

VII.2.6.3. For the holders

The benefits for the holders, resulting from the reduction in time to begin a TIR transport (i.e. difference between the time to fill in a paper TIR Carnet and the time to input data electronically) as well as the reduction in time spent at borders could reach 16,437,504 US\$ per annum.

VII.2.7. Results of the CBA

In order to include a factor of incertitude (inherent to such a large scale project) into the analysis, a 20 per cent risk ratio to both costs and benefits has been introduced, i.e. costs have been increased by 20 per cent and benefits decreased by 20 per cent. On the basis of the risk-adjusted and discounted costs and benefits, the annual cash flows, ROI and NPV have been calculated for each technological option and for both scenarios over a 12-years period. Tables 5 and 6 present the final results of the CBA of the eTIR system.

**Table VII.5
Costs, Benefits, ROI and NPV for scenario 1**

(United States dollars)

| ROI for Customs | -57% | -48% | -48% | -45% | -49% | -59% |
| Overall ROI | 165% | 221% | 222% | 244% | 217% | 156% |
| Net present value | 24 738 266 | 27 355 184 | 27 379 660 | 28 174 305 | 27 193 395 | 24 224 492 |

Finally, the profitability of the project for single Customs administration has been assessed, indicating that, from when approximately 30,000 TIR operations per year are fully computerized, the investment in both the eTIR international system and the costs to adapt a national IT system become profitable.

VII.2.8. Conclusions and recommendations

Combining their technical assessment with the results of the CBA, the consultants have made the following conclusions and recommendations:

- The eTIR system should be implemented as soon as possible to maximize its benefits;
- The best technical option to implement the eTIR international system is to use a Platform as a Service (cloud solution), closely followed by Iaas, UNICC and UNOG options;
- In scenario 2, even if the project does not have a positive ROI for Customs alone, it remains a very profitable project overall.
- Processing annually 30,000 TIR operations electronically is sufficient to justify the investment in eTIR for any single Customs administration.

VII.3. Assessment of the Cost Benefit Analysis by the secretariat

VII.3.1. Scope

VII.3.1.1. General

As highlighted by the Expert Group, when analysing earlier versions, the CBA does, unfortunately, not take into account any indirect benefits from the computerization of the

TIR system. Indirect benefits can range from increased transport facilitation (due to the availability of advance information) to, ultimately, increased security of the TIR system, which is beneficial to both Customs and the guarantee chain.

Furthermore, contrary to the consultants' assumption, both transport operators and the guarantee chain may incur costs from the introduction of the eTIR system.

VII.3.1.2. Technological options

The technological options in the CBA allow for a good comparison of the various hosting possibilities of the eTIR international system. Nevertheless, all analysed technological options are based on the development of the eTIR international system from scratch. The use (and configuration) of "off the shelf" solutions has not been considered, neither in the technical evaluation nor in the CBA.

VII.3.1.3. Scenarios

The two scenarios analysed by the consultants are relatively straightforward as they do not take into account any future political or economic developments. Over a decade, many factors may have a significant influence on the annual number of TIR transports. The following, non-exhaustive list, contains an overview of potential events, which may significantly influence the use of the TIR system and, thus, the eTIR international system:

- The ratification and use of the TIR Convention by new countries (e.g. China, Pakistan);
- The extension or creation of other transit agreements as alternatives to the TIR system (e.g. Turkey joining the Common Transit Convention);
- The creation or extension of Customs Unions (e.g. the Russian Federation-Belarus-Kazakhstan Customs Union);
- Variations in trade flows, which could significantly affect international road transport patterns;
- The fluctuation in energy prices, which has direct repercussions on the modal split of international transport.

It should be stressed that, although possibly important, the probabilities as well as the effects of such events occurring (as well as others) remain very difficult to estimate and require dedicated studies. The combined effects are even more difficult to analyse and, thus, it seems understandable that the consultants have not taken them into account in the CBA. However, the two scenarios proposed by the consultants allow comparing two significantly different patterns in the usage of the eTIR international systems and their influence on the profitability of the project.

VII.3.2. Assumptions

The consultants' assumptions are sound and generally based on concrete reference material.¹ However, considering that some of the favoured options envisage that the eTIR

¹ The functionalities of the eTIR system, taken into account by the consultants in the CBA, are those described in version 3.0 of the eTIR Reference Model (ECE/TRANS/WP.30/2011/4). In case Contracting Parties, when preparing for the introduction of a legal framework to enable the eTIR system, decide to introduce requirements which are new to or different from those described in the eTIR Reference Model, the results of the CBA might change or even lose relevance.

international system be hosted in an international data centre in Geneva, the labour costs, calculated as a weighted average of European wages, seem too low.

VII.3.3. Methodological aspects

VII.3.3.1. Function point analysis

The FPA, used for the estimation of the development costs of the three components of the eTIR international system, allows for a realistic assessment of the complexity of each function to be performed by each component and allows, therefore, a realistic estimation of the development efforts for the whole system.

VII.3.3.2. Costs

The consultants have undertaken a very detailed analysis of the costs attributable to the various technological options. They thoroughly listed and priced development, equipment, helpdesk and maintenance costs for a system that can handle 3 million TIR transport per year. On the basis of optimistic and pessimistic assumptions, they have calculated minimum and maximum costs. Yet, to be on the safe side, they considered only maximum costs and have increased them by a 20 per cent risk factor.

However, the assumption that total variable costs can be divided by the number of TIR transports in order to calculate unitary costs is questionable. Indeed, this may be a valid assumption for cloud solutions, but it does not take into account that, for some options, the variable costs are not fully scalable (e.g. personnel or infrastructure costs). Furthermore, some costs may be missing or underestimated, in particular those that relate to personnel costs (see III.2), as well as training costs.

VII.3.3.3. Benefits

The consultants' estimation of the benefits is purely based on the difference in time required to provide and process electronic information compared to paper, together with the consequences of reducing the processing time for Customs officers and the time spent at Customs offices for transport operators. To be on the safe side, any benefits have been decreased by a 20 per cent risk factor. Therefore, the consultants did indirectly take into account that the benefits of a computerized system may not automatically lead to savings in personnel costs and that some benefits are already present today, e.g. the obligation to provide advance information on incoming TIR transports in the EU.

Considering that providing advance information to Customs and increasing security are major objectives of the eTIR project, it is unfortunate that the consultants have not even made an attempt to estimate those benefits. Those missing benefits would, most likely, largely offset the costs which remain missing or are underestimated.

VII.3.3.4. CBA

The consultants have used a standard cost benefit methodology, calculating the present value of future costs and benefits with a 5 per cent discount rate. The use of both ROI and NPV gives an approximate idea of the profitability and the actual value of the project, taking into account the various technological options. Most importantly, the ROI and NPV allow for an adequate comparison of the technological options for both scenarios.

VII.3.4. Conclusions

The CBA provides, for the various technological options, a good estimation of the profitability of the eTIR project as well as an approximation of the amounts that would be required to develop and maintain it. It shows that the profitability of the project for Customs alone depends significantly on the future usage of the system, but that the overall ROI remains highly positive, even if the system would only be used for a limited number of TIR transports.

Despite the fact that some assumptions of the CBA can be criticized for underestimating some costs and benefits, the methodology used remains solid and, therefore, the CBA demonstrates that the eTIR project could be greatly beneficial for all the actors involved in the TIR procedure, in particular transport operators.

VII.4. Recommendations

On the basis of the results of the CBA and its own expertise, the Expert Group is of the view that:

- (a) Considering that the eTIR project seems to be highly profitable for all parties involved in the TIR procedure, it is recommended that the eTIR system should be implemented, including at national level, as soon as the legal provision would be prepared and ratified, the technical specification completed and a project road map agreed on;
- (b) Considering the large benefits for TIR Carnet holders, a potential avenue to explore for the financing of the eTIR international system seems to be through a contributory system per TIR transport, similar to the one used for TIRExB;
- (c) Considering the commercial sensibility of the data that will be handled by the eTIR international system and in view of the relatively small costs differences with the cloud solution recommended in the CBA, it is recommended that the eTIR international system be hosted at UNICC or UNOG data centres;
- (d) Considering the availability of message broker software on the market, it is recommended to consider the use of “off the shelf” solutions, including open source, for the development of the eTIR international system.
